(d) Graduate training in environmental or occupational health must provide training to prepare individuals for leadership and policy development roles in the definition, solution, and management of environmental systems in which humans live and work. Graduate training in environmental or occupational health may not include the technical training of industrial hygienists, environmental health technicians, or other allied health personnel.

(e) Graduate training in dietetics and nutrition must provide training in human nutritional requirements as preparation for leadership roles in community nutrition, and must include training in the application of specialized knowledge to the analysis and solution of community or population group nutritional problems. Graduate training in dietetics may not provide basic professional training required for entry level employment as a registered dietitian nor technical training in clinical dietetics primarily emphasizing the analysis and solution of individual patient nutritional problems.

(f) Graduate training programs may not include more than 4 months of field training unless expressly approved by the Secretary.

(g) The grantee must require each trainee to complete a statement of appointment by the beginning of the training period. The original copy must be submitted to the Secretary by the grantee as soon as it is completed. A copy of the statement must be retained by the grantee to be available for program and financial audits.

(h) Full-time trainees must be required to sign a statement that, as a condition of their traineeship, they will not undertake employment during their traineeships which would interfere with their ability to satisfactorily complete in a timely fashion the training program in which they are enrolled. All trainees must agree to respond to communications from the Secretary regarding the trainees' professional activities following completion of the training program for which the traineeship is awarded.

(i) Trainees may not be required, as a condition of their traineeships, to perform any work which is not an integral part of their training program and required of all students in the program. Trainees may not be required to perform services which detract from or prolong the training for which their traineeships are awarded.

(j) Where trainees are enrolled in a course of study requiring more than 12 months to complete, the grantee must advise these trainees that continued support from funds awarded under this subpart is contingent upon continued availability of grant funds, and the ability of the trainee to continue in attendance in accordance with the standards and practices of the institution at which the trainee is enrolled.

§ 58.206 Who is eligible for financial assistance as a trainee?

Trainees must meet the following criteria to be eligible for grant support:

(a) A trainee must be a national of the United States or a lawful permanent resident of the United States, Puerto Rico, the Virgin Islands, Guam, or a permanent resident of the Trust Territory of the Pacific Islands or the Northern Mariana Islands.

(b) A trainee must be enrolled in a school of public health or other public or nonprofit private educational entity which has been awarded a grant under section 748 of the act and enrolled in a graduate program or specialized training that meets the requirements of § 58.205 (b) or (c).

(c) A trainee may not be receiving concurrent support from any other Federal source except education benefits under the Veterans Readjustment Benefits Act.

§ 58.207 Duration and termination of traineeships.

(a) Traineeships must be for a full academic year, except an appointment for less than a full academic year may be made when the student will complete the program of study at the termination of the appointment. Training for which the student receives a traineeship must begin during the period for which funds are made available. A traineeship may extend beyond the end of this period, but may not exceed 12 months in duration. Appointments may be made on a year-to-year basis.

(b) The grantee must terminate a traineeship at any time (1) upon request of the trainee, (2) if the trainee withdraws from the grantee institution, or (3) upon a determination by the grantee that (i) the trainee is no longer an enrolled student or (ii) is not eligible or able to continue in attendance in accordance with the standards and practices of the institution at which the student is enrolled. In the event that a traineeship is terminated for any reason, the grantee must notify the Secretary as soon as possible.

§ 58.208 How will grant awards be made?

(a) *Grants to schools of public health.* (1) A percentage of the traineeship funds to be awarded under this subpart, to be determined by the Secretary annually, will be awarded on a formula basis among the schools of public health whose applications have been approved by the Secretary. The Secretary will publish a notice in the FEDERAL REGISTER, as soon as possible after the determination is made, setting forth the amount of funds to be available under this paragraph.

(2) The amount of funds awarded to each school of public health with an approved application will be computed by multiplying the amount of traineeship funds determined to be available for schools of public health in that fiscal year, by a ratio determined by dividing the number of students enrolled in graduate programs and specialized training in each school of public health with an approved application, by the total number of students enrolled in graduate programs and specialized training in all schools of public health with approved applications. The number of students enrolled in each school of public health is the number of full-time students plus the total number of credit hours in which part-time students are enrolled divided by 9. This product will be rounded, if necessary, to the next highest number. Students will be counted as of October 15 of the fiscal year in which application is made. In no case will the amount of a grant exceed the amount requested by the applicant.

(b) *Grants to public and nonprofit private educational entities.* (1) After allocation of the funds available for schools of public health in accordance with paragraph (a), the remaining funds will be available to meet the continuation commitments and for award on a competitive basis to eligible public or nonprofit private educational entities (other than schools of public health).

(2) Within the limits of funds available for competitive grant awards, the Secretary may award grants to those applicants whose traineeship programs will in his/her judgment best promote the purposes of section 748 of the act, taking into consideration among other pertinent factors:

(i) The degree of the need for professionals trained in the program(s) provided by the applicant for which funds for traineeships are requested;

(ii) The quality of the training program(s) provided by the applicant for which funds for traineeships are requested;

V 4 3 / 1 7 8

(iii) The capability of the applicant to carry out the program(s) for which traineeship funds are requested.

(3) The amount of any award under this paragraph will be determined by the Secretary on the basis of his/her estimate of the sum necessary during the budget period to cover the costs of tuition, fees, stipends, and allowances (including travel costs approved by the Secretary) for full-time students and the costs of tuition and fees for part-time students which the applicant proposes to provide to individuals receiving traineeships.

(c) *General.* (1) All grants awards will be in writing and will specify the amount of funds granted and the period for which such funds will be available for obligation by the grantee.

(2) Neither the approval of any application nor the award of any grant commits or obligates the United States in any way to make any additional, supplemental, continuation, or other award with respect to any approved application or portion thereof. In the case of competitive grants, grantees must make separate applications for continuation support in accordance with § 58.204.

(3) If a public or nonprofit private educational entity which received a competitive award has filed an application for continuation support, within the limits of funds available for this purpose the Secretary may make a grant award for an additional budget period for any previously approved traineeship grant if, on the basis of progress, accounting, and other records as may be required, the Secretary finds that the grantee's activities during the current budget period justify continued support of the traineeship grant for an additional budget period. If the Secretary decides to continue support, the amount of the grant award will be determined in accordance with paragraph (b) of this section. If the Secretary decides not to continue supporting a traineeship grant for an additional budget period, he/she will notify the grantee in writing before the end of the current budget period.

§ 58.209 How will grant payments be made?

The Secretary will from time to time make payments to a grantee of all or a portion of any grant award, either in advance or by way of reimbursement.

§ 58.210 For what purposes may grant funds be spent?

(a) Any funds granted under this subpart must be expended solely for providing traineeships to eligible individuals in accordance with section 748 of the act, the regulations of this subpart, the approved applications, and the terms and conditions of the award.

(b) Expenditures are limited to (1) payment of stipends within the limitations set forth in paragraphs (c) and (d) of this section and in footnote 1, (2) tuition and fees, in accordance with the established rates of the institution except as limited by the Secretary, and (3) transportation allowances on an individual basis when prior approval has been obtained from the Secretary in the following circumstances:

(i) The grantee may pay a trainee an allowance from grant funds for travel from his or her residence to the training site only in cases of extreme need.

(ii) The grantee may pay a trainee an allowance from grant funds for travel to and from field training which is at a site beyond a reasonable commuting distance and which requires the trainee to establish a temporary new residence. No allowance will be paid for daily commuting from the new place of residence to the field training headquarters.

(iii) The grantee may pay the trainee an allowance from grant funds for domestic travel to conduct research to meet dissertation requirements. Use of traineeship funds for dependency allowances or to meet indirect costs (overhead) of the training institution is not authorized.

(c) The grantee may pay each trainee whatever stipend and allowance the grantee determines is required to enable the trainee to pursue the training program in which the trainee is enrolled, except that the stipent amount may not exceed the amount established by the Secretary for predoctoral or postdoctoral trainees, as appropriate.

(d) A grantee may not give a stipend or allowance to a part-time trainee, but may give a traineeship award to pay a part-time trainee's tuition and fees.

(e) A school of public health which receives a grant in accordance with § 58.208(a) may obligate these traineeship funds at any time within the period specified in the grant award document. At the end of this period, any unobligated grant funds must be refunded to the Federal Government.

(f) In the case of competitive grants, any unobligated grant funds remaining in the grant account at the close of a budget period may be carried forward and be available for obligation during subsequent budget periods of the project period. The amount of a subsequent award will take into consideration the amount remaining in the grant account. At the end of the last budget period of the project period any unobligated grant funds remaining in the grant account must be refunded to the Federal Government.

§ 58.211 What prohibitions against discrimination are applicable to these traineeship grants?

(a) Recipients of grants under this subpart are advised that in addition to the terms and conditions of these regulations, the following laws and regulations are applicable:

(1) Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) and its implementing regulation, 45 CFR Part 80 (prohibiting discrimination in federally assisted programs on the grounds of race, color, or national origin);

(2) Title IX of the Education Amendments of 1972 (20 U.S.C. 1681 et seq.) and its implementing regulation, 45 CFR Part 86 (prohibiting discrimination on the basis of sex in federally assisted education programs);

(3) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and its implementing regulation, 45 CFR Part 84 (prohibiting discrimination in federally assisted programs on the basis of handicap);

(4) Section 704 of the Act (42 U.S.C. 292d) and its implementing regulaiton, 45 CFR Part 83 (prohibiting discrimination on the basis of sex in the admission of individuals to its training programs or in the award of traineeships).

(b) The grantee may not discriminate on the basis of religion in the admission of individuals to its training programs or in the award of traineeships.

§ 58.221 How must a grantee account for the grant funds it receives?

(a) *Accounting for grant award payments.* The grantee must record all payments made by the Secretary in accounting records separate from the records of all other funds, including funds derived from other grant awards. The grantee must account for the sum total of all amounts paid by presenting or otherwise making available evidence satisfactory to the Secretary of expenditures meeting the requirements of this subpart.

(b) *Grant closeout*—(1) *Date of final accounting.* The grantee must submit, with respect to each grant under this subpart, a full account, as provided in this subpart, as of the date of the termination of grant support. The Secretary may require other special and periodic accounting.

(2) *Final settlement.* The grantee must pay to the Federal Government as final settlement with respect to each grant under this subpart the total sum of (i) any amount not accounted for under paragraph (a) of this section and (ii) any other amounts due under subparts F and M of 45 CFR Part 74 and the terms and conditions of the grant award. This total sum constitutes a debt owed by the grantee to the Federal Government and may be recovered from the grantee or its successors or assignees by setoff or other lawful action.

§ 58.213 What recordkeeping, audit, and inspection requirements apply to these grants?

(a) *Records.* In addition to the applicable requirements of 45 CFR Part 74, the grantee must establish and maintain records which the Secretary may by regulation or order require, including records which completely disclose the amount and disposition of the total amount of funds received by the grantee for the project, the total cost of the project for which a grant was received, the total amount of that portion of the total cost of the project received by or allocated to the grantee from other sources, and other records which will facilitate an audit conducted in accordance with generally accepted auditing standards.

(b) *Audit.* The grantee is responsible for providing and paying for an annual financial audit of its books, accounts, financial records, files, and other papers and property in accordance with the requirements of section 705(b) of the Act. The audit must be conducted by, and certified to be accurate by, an independent certified public accountant utilizing generally accepted auditing standards. A report of the audit must be filed with the Secretary at the time and in the manner which the Secretary may require.

(c) *Inspection.* The grantee must make available to the Secretary or the Comptroller General of the United States or any of their duly authorized representatives all books, documents, papers, and records for examination, copying, or mechanical reproduction, on or off the premises of the grantee upon reasonable request.

§ 58.214 What provisions of 45 CFR 74 apply to these grants?

The relevant provisions of the following subparts of 45 CFR Part 74, establishing uniform administrative requirements and cost principles, apply to all grants awarded under this subpart.

A. General.
B. Cash depositories.
C. Bonding and insurance.
D. Retention and custodial requirements for records.
F. Grant-related income.
K. Grant payment requirements.
L. Budget revision procedures.
M. Grant closeout, suspension, and termination.

§ 58.215 What additional conditions may apply to these grants?

The Secretary may with respect to any grant award impose additional conditions prior to or at the time of any award when in his/her judgment these conditions are necessary to assure or protect advancement of the approved program, the interests of the public health, or the conservation of grant funds.

Title 50—Wildlife and Fisheries

CHAPTER 1—FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Certain National Wildlife Refuges in California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain national wildlife refuges in California is compatible with the objectives for which these areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting seasons for migratory birds and upland game.

EFFECTIVE DATES: October 14, 1978 through January 21, 1979

FOR FURTHER INFORMATION CONTACT:

The refuge manager at the address or telephone number listed below in the body of special regulations.

GENERAL CONDITIONS

Hunting on portions of the following refuges shall be in accordance with applicable State and Federal regulations, subject to additional Special Regulations and conditions as indicated. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters. No vehicle travel is permitted except on designated roads and trails.

§ 32.12 Special regulations: Migratory game birds; for individual wildlife refuge areas.

Migratory game birds, except pigeons and doves, may be hunted on the following refuges:

Salton Sea National Wildlife Refuge, P.O. Box 247, Calipatria, Calif. 92233, telephone 714-348-2323.

Kern National Wildlife Refuge, P.O. Box 219, Delano, Calif. 93215, telephone 805-725-2767.

Special conditions: 1. All persons assigned to the space blind unit must remain within 50 feet of the numbered steel post (blind site), except when pursuing cripples, placing decoys or traveling to and from the parking lot.

2. Hunters assigned to the space blind unit must travel to and from parking areas and blind sites with firearms unloaded.

Merced National Wildlife Refuge, (Headquarters: San Luis National Wildlife Refuge, P.O. Box 2176, Los Banos, Calif. 93215, telephone 805-725-2767).

Sacramento National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Special conditions: 1. All persons assigned to the spaced blind unit must remain in their blind except when pursuing cripples or retrieving birds, placing decoys or traveling to and from the parking lot. All shooting must be from assigned blinds only, except when pursuing crippled birds.

2. No snipe may be taken in the spaced blind unit.

3. Hunters assigned to the spaced blind unit must travel to and from parking areas and blinds with firearms unloaded.

Colusa National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988 telephone 916-934-2801.

Delevan National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Sutter National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Kesterson National Wildlife Refuge, P.O. Box 2176, Los Banos, Calif. 93635, telephone 209-826-3508.

San Luis National Wildlife Refuge, P.O. Box 2176, Los Banos, Calif. 93635, telephone 209-826-3508.

Clear Lake National Wildlife Refuge, (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tulelake, Calif. 96134, telephone 916-667-2231).

Special conditions: 1. Air-thrust and inboard water-thrust boats are prohibited.

Lower Klamath National Wildlife Refuge, (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tulelake, Calif. 96134, telephone 916-667-2231).

Special conditions: 1. During the first two days of waterfowl season, all hunters, 16 years of age and older, must have in their possession an entry permit for the controlled hunting unit in which they are hunting.

2. Posted retrieving zones are established on certain hunting units. Possession of firearms in these retrieving zones is prohibited, except, unloaded

V 4 3 / 1 7 8

firearms may be taken through these zones when necessary to reach or leave hunting areas. Decoys may not be set in retrieving zones.

3. Air-thrust and inboard water-thrust boats are prohibited.

4. Bow hunters must follow the same regulations as firearm hunters, the use of long bow is permitted.

5. Legal waterfowl shooting hours end at 1 p.m., daily on all California portions of the refuge.

6. No person may possess any weapon or ammunition that may not be legally used for the taking of waterfowl or pheasants.

Tule Lake National Wildlife Refuge, (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 75, Tulelake, Calif. 96134, telephone 916-667-2231).

Special conditions: 1. During the first 2 days of waterfowl season, all hunters, 16 years of age and older, must have in their possession an entry permit for the controlled hunting unit in which they are hunting.

2. Posted retrieving zones are established on certain hunting units. Possession of firearms in these retrieving zones is prohibited, except, unloaded firearms may be taken through these zones when necessary to reach or leave hunting areas. Decoys may not be set in retrieving zones.

3. Air-thrust and inboard water-thrust boats are prohibited.

4. In designated spaced blind areas, hunters may not possess any loaded firearm further than 100 feet from the established blind stakes. Hunters will select blind sites by lottery at the beginning of each day's hunt. Hunters may shoot only from within their assigned blind sites.

5. No person may possess any weapon or ammunition that may not be legally used for taking waterfowl or pheasants. Certain assigned blinds will be limited to possession and use of designated steel or lead shot loads in conjunction with a scientific study.

6. The use of long bow is permitted. Bow hunters must follow the same regulations as firearm hunters.

7. Legal waterfowl shooting hours end at 1 p.m., daily.

Modoc National Wildlife Refuge, P.O. Box 1610, Alturas, Calif. 96101, Telephone 916-233-3572.

Special conditions: 1. First weekend only, entry permits are required to enter the hunting area for every individual with the exception of persons under 16 years of age.

2. After first weekend, hunting permitted on Tuesdays, Thursdays, and Saturdays during authorized seasons.

3. Hunters are required to enter hunting area via designated parking sites.

4. Hunting area is open for access from 90 minutes prior to legal shooting hours until 90 minutes after sunset on days hunting is permitted.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Ring-necked pheasant only may be hunted on the following refuge areas:

Colusa National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Delevan National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Kern National Wildlife Refuge, P.O. Box 219, Delano, Calif. 93215, telephone 805-725-2767.

Special condition: No pheasant hunting is permitted in the spaced blind unit.

Merced National Wildlife Refuge, P.O. Box 2176, Los Banos, Calif. 93635, telephone 209-826-3508.

Sacramento National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Special condition: No pheasant hunting is permitted in the spaced blind unit.

Sutter National Wildlife Refuge, Route 1, Box 311, Willows, Calif. 95988, telephone 916-934-2801.

Lower Klamath National Wildlife Refuge, (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tulelake, Calif. 96134, telephone 916-677-2231).

Special conditions: 1. Steel shot is required for 12 guage shotguns on the California portion of Lower Klamath National Wildlife Refuge bounded by State Highway 161 and Dorris Brownell Road. Field possession of lead 12 guage loads are prohibited within this steel shot zone.

2. Pheasant may not be hunted in the controlled waterfowl hunting area or in the retrieving zones.

3. In the controlled pheasant hunting area, entry permits are required throughout the pheasant season for all hunters 16 years of age or older. Advance reservations are required for the first two days of the hunt. Advance reservations are also available for the following seven days.

4. No person may possess any weapon or ammunition that may not be legally used for the taking of pheasant.

Tule Lake National Wildlife Refuge, (Headquarters, Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tulelake, Calif. 96134, telephone 916-667-2231).

Special conditions: 1. Steel shot is required for 12 guage shotguns only on all areas of Tule Lake National Wildlife Refuge. Field possession of lead 12 guage loads is prohibited within this steel shot zone.

2. Pheasant may not be hunted in the controlled waterfowl hunting area or in the retrieving zones.

3. In the controlled pheasant hunting area, entry permits are required throughout the pheasant season for all hunters 16 years of age or older. Advance reservations are required for the first two days of the hunt. Advance reservations are also available for the following seven days.

4. No person may possess any weapon that may not be legally used for the taking of pheasant.

The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

The primary author of this document is Patrick L. O'Halloran, Sacramento Area Office; telephone FTS 468-4771, com'l 916-484-4771.

Dated: September 6, 1978.

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 662—NORTHERN ANCHOVY FISHERY

Harvesting by Domestic Fishermen

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Final rulemaking.

SUMMARY: This document promulgates regulations under which domestic fishermen may harvest the central subpopulation of the northern anchovy resource. These regulations were published as proposed regulations based on the fishery management plan (FMP) for the northern anchovy. That FMP was developed by the Pacific Fishery Management Council and was approved by the Secretary on July 13, 1978. The regulations establish quotas for both reduction and nonreduction fisheries. The quotas are intended to allow a food and bait fishery, and a reduction fishery, while maintaining a sufficient anchovy population for forage.

EFFECTIVE DATE: 0001 P.d.t., September 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald V. Howard, Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, Calif. 90731, telephone 213-548-2575.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 305 of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended, authorizes the Secretary of Commerce to publish regulations to implement fishery management plans. This part 662 implements the Pacific Council's management plan for the (central subpopulation) of the northern anchovy fishery resource.

These regulations were published as proposed rulemaking on July 21, 1978 (43 FR 31652). The northern anchovy resource is divided into northern, central, and southern subpopulations. The central subpopulation which ranges from 30° N. latitude in Baja California, Mexico, to 38° N. latitude at Point Reyes, Calif., and extends offshore approximately 200 miles, is harvested by reduction, bait and food fisheries in the United States and Mexico. The Council recognizes the need for an agreement with Mexico and has requested the Departments of State and Commerce to develop such an agreement.

The FMP addresses the management problems presented by a stock which is transnational in character, which is subject to wide population fluctuations, and which is utilized by different fisheries for different purposes. The further complication is that this species also serves as a major forage stock for desired game and food fish.

The regulations establish quotas for both reduction and nonreduction fisheries. These quotas will be announced by FEDERAL REGISTER notice on or about August 1 of each year. The 1978-79 announcement appeared on July 20, 1978 (43 FR 31191). These quotas are intended to allow a food and bait fishery, and a reduction fishery, while maintaining a sufficient anchovy population for forage. All anchovies harvested after August 1 of each year will be counted toward the harvest quotas. Anchovies harvested between August 1, 1978, and the effective date of these regulations will be counted toward the 1978-79 harvest quotas. The total anchovy quota for the 1978-79 season is 70,933 tons.

The reduction and human consumption fisheries may not land anchovies less than 5 inches in length, except that 15 percent of a load or lot may be comprised of shorter fish. This is intended to reduce fishing impact on immature anchovies.

Certain areas of the fishery conservation zone are closed to reduction fishing in order to improve the bait fishery for anchovies in those areas. Reduction fishing is also limited to certain seasons. There are no season or area limits on the nonreduction fisheries.

BROWN PELICAN ISSUE

Fish and Wildlife Service (FWS), Department of the Interior, submitted a biological opinion, after consultations with representatives of the National Marine Fisheries Service, on the effect of the management plan on the California brown pelican, which is listed as an endangered species. This was in accordance with the regulations implementing section 7 of the Endangered Species Act of 1973 (50 CFR 402). That opinion held that the implementation of the northern anchovy fishery management plan is not likely to jeopardize the continued existence or recovery of the brown pelican. However, the opinion contained certain recommendations regarding protection of the brown pelican over the long term. These recommendations, which include closure of some California State waters to anchovy fishing, an overall ceiling on the anchovy harvest, and continued study of the brown pelican/anchovy interactions, are being reviewed, and necessary actions will be taken.

PUBLIC COMMENTS

Many comments were received by the Council and the Secretary during development of this FMP. The significant comments received, and the responses, appear in the final environmental impact statement (FEIS). The notice of availability of the FEIS was published on April 28, 1978, in the FEDERAL REGISTER (43 FR 18249). Issues and concerns raised by commenters with responses during the review period included:

(A) The need for an agreement with Mexico on anchovy management.

Answer. The need for an agreement with Mexico is recognized.

(B) The absence of an upper limit for the optimum yield formula used to calculate the annual harvest quota.

Answer. One reason there is no upper limit on the total harvest of anchovy (reduction and nonreduction) fisheries is because of insufficient data. However, the formula adopted conforms with the requirements of the act.

(C) Problems created if large investments in the commercial fishery were made so that it would be difficult to curtail the fishery if anchovy abundance declined in the future.

Answer. The Council also considered that expansion of the fishery might occur, but concluded that the industry recognizes the risks of expansion under a variable quota system. The Council's FMP clearly indicates that it is the level of anchovy abundance, not the level of investment by the commercial fishing industry, which will determine the harvest quota in any single year.

(D) The suitability of scientific information and methods used to determine the population dynamics of the anchovy stock.

Answer. The FMP is based on the best available scientific evidence. However, the Council does recognize the lack of ecological evidence; every effort is being made to improve on and update the scientific basis of the FMP.

(E) The need for annual egg and larval surveys.

Answer. Estimates of the stock biomass will be made annually under the FMP. These estimates may rely on techniques other than egg and larval surveys as current researchers are investigating the most cost-effective method of stock biomass estimates.

(F) Several commenters voiced concern over the future of the anchovy population, and noted that the anchovy is in danger of being depleted. Concern was also expressed that the harvest quotas adopted are inadequate to protect the anchovy in light of its importance as a forage species for the sport fisheries.

Answer. The anchovy FMP adopts a conservative approach to management of this fishery. The harvest quotas adopted are intended to allow for a 1-million-ton spawning and forage reserve.

(G) Several commenters expressed concern that the anchovy FMP does not provide adequate protection to the bait fishery, and that additional area closures are needed to provide such protection.

Answer. The closures and harvest quota provided in the FMP and these regulations are considered to adequately protect the bait fishermen.

Comments received on the regulations themselves were generally not of a substantive nature. One commenter requested that the regulations be amended to conform with California's requirement that anchovy reduction vessels display their registration number in 14-inch numerals on the sides and top of the wheelhouse. Since this poses no new burden upon the reduction vessels, it has been implemented as a new section.

One comment on the regulations indicated that the management area should include that portion of the FCZ north of 38° N. latitude. This is the northern limit of the range of the central subpopulation. No controls are proposed for the northern subpopulation as it is currently not fished and is not addressed in the FMP. Therefore, the boundaries of the management

SE 13 78

area will remain as originally proposed.

To clarify the relationship of these regulations to those of the State of California, the following sentence has been added to the end of § 662.1:

These regulations recognize that any State law which pertains to vessels registered under the laws of that State, while such vessels are in the fishery conservation zone, and which is consistent with Federal regulations, shall continue to have force and effect upon fishing activities addressed herein.

For clarification purposes the second sentence of § 662.6(c) dealing with the closure of the nonreduction quota was removed.

NOTE.—The Department of Commerce has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Orders 11821 and 11949, and OMB Circular A-107.

Signed this 7th day of September 1978, at Washington, D.C.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

AUTHORITY: 16 U.S.C. 1801-1882.

§ 662.1 Purpose and scope.

This part 662 governs fishing for northern anchovy by vessels of the United States in the fishery conservation zone seaward of California south of 38° N. latitude over which the United States exercise exclusive fishery management authority (Pacific Anchovy Fishery Area (PAFA)). These regulations recognize that any State law which pertains to vessels registered under the laws of that State, while such vessels are in the fishery conservation zone, and which is consistent with the Federal Regulations shall continue to have force and effect upon fishing activities addressed herein.

§ 662.2 Definitions.

For the purpose of this part, the following terms mean:

(a) *Act.* The Fishery Conservation and Management Act of 1976, Pub. L. 94-265 (16 U.S.C. 1801 et seq.) as amended.

(b) *Authorized officer.* (1) Any commissioned, warrant, or petty officer of the U.S. Coast Guard;

(2) Any certified enforcement agent or special agent of the National Marine Fisheries Service;

(3) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Secretary of Transporation to enforce the provisions of the act; and

(4) Any Coast Guard personnel accompanying and acting under the direction of any person described in subparagraph (1) of this paragraph.

(c) *Fishing.* (1) The catching, taking, or harvesting of fish;

(2) The attempted catching, taking, or harvesting of fish;

(3) Any other activity which can reasonably be expected to result in the catching, taking, or harvesting of fish.

(d) *Fishing vessel.* Any boat, ship, or other water craft which is used for, equipped to be used for, or of a type which is normally used for fishing, except for seine skiffs which are an integral part of a fishing operation conducted under this part.

(e) *Fishing year.* A 12-month period beginning August 1 and extending through July 31 of the following year.

(f) *Northern anchovy.* Fish of the species *Engraulis mordax*, or parts or products thereof.

(g) *Reduction fishing.* The fishing for northern anchovies for conversion of fish into fish flour, fish meal, fish scrap, fertilizer, fish oil, or other fishery products or byproducts for other than human consumption.

(h) *Nonreduction fishery.* Fishing for northern anchovies for the purposes of providing live or frozen bait or providing fish for human consumption.

(i) *Load.* The total amount of fish by weight from a single vessel per fishing trip.

(j) *Lot.* An amount of fish by weight which is the subject of a separate sale or delivery.

(k) *Reduction harvest quota.* The amount of anchovies, by weight, which may be harvested annually for reduction purposes.

(l) *Regional Director.* The National Marine Fisheries Service Regional Director, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731, or a designee.

(m) *Secretary.* The Secretary of Commerce or a designee.

(n) *Subarea B harvest quota.* The amount of anchovies, by weight, which may be harvested annually for reduction purposes in subarea B.

(o) *Total harvest quota.* The total amount of anchovies, by weight, which may be harvested annually by the reduction and nonreduction fisheries.

§ 662.3 Quota.

The total harvest quota, reduction harvest quota and subarea B harvest quota shall be determined by the following formulas and announced by notice in the FEDERAL REGISTER on or about August 1 of each year.

(a) When spawning biomass is less than 100,000 short tons, there shall be no fishing for anchovies for any purpose.

(b) When spawning biomass is equal to or greater than 100,000 short tons but less than 1 million short tons, the total harvest quota for the PAFA shall not exceed 12,600 short tons which will be reserved for nonreduction purposes.

(c) When spawning biomass is equal to or greater than 1 million short tons, the total harvest quota in the PAFA shall not exceed 70 percent of one-third of the spawning biomass in excess of 1 million short tons, or 12,600 short tons, whichever is greater; of this amount, the first 12,600 short tons will be reserved for nonreduction fishing and the remainder will constitute the reduction harvest quota.

(d) Ten percent of the reduction harvest quota or 10,000 tons, whichever is less, shall be reserved for reduction fishing in subarea A. The remainder will constitute the subarea B harvest quota.

(e) Anchovies harvested after August 1, 1978, will be counted toward the 1978-79 harvest quotas.

§ 662.4 Fishery management areas.

(a) The PAFA is divided into two subareas which have the following northern and southern limits;

(1) Subarea A: Between a northern limit at 38° N. latitude (Point Reyes) and a southern limit at 35°14′ N. latitude (Point Buchon).

(2) Subarea B: Between a northern limit at 35°14′ N. latitude (Point Buchon) and a southern limit which is the United States-Mexico International Boundary described at 42 FR 12938.

(b) The inner boundary of both subareas is a line coterminous with the seaward boundary of the State of California, and the outer boundary of each subarea is a line drawn in such a manner that each point on it is 200 nautical miles from the baseline from which the territorial sea is measured.

§ 662.5 Reduction fishing.

(a) *Open seasons.* All open seasons will begin at 0001 hours and terminate at 2400 hours local time. The PAFA is closed to reduction fishing except as follows:

(1) In subarea A: The open season is from August 1 to January 31; and from April 1 to June 30.

(2) In subarea B: The open season is from September 15 to January 31; and from April 1 to June 30.

(b) *Closed areas.* The following areas are closed to reduction fishing:

(1) *Farallon Islands closure.* The portion of subarea A bounded by:

(i) A straight line joining Pigeon Point Light (37°10.9′ N., 122°23.6′ W.) and the U.S. navigation light on Southeast Farallon Island (37°42.0′ N., 123°00.1′ W.); and

(ii) A straight line joining the U.S. navigation light on Southeast Farallon Island (37°42.0′ N., 123°00.1′ W.) and the U.S. navigation light on Point Reyes (37°59.7′ N., 123°01.3′ W.).

(2) *Subarea B areas.* That portion of subarea B described as:

(i) *Oxnard closure.* The area that extends offshore 4 miles from the mainland shore between lines running 250° true from the steam plant stack at Manadalay Beach (34°12.4′ N., 119°15.0′ W.) and 220° true from the steam plant stack at Ormond Beach (34°07.8′ N., 119°10.0′ W.).

(ii) *Santa Monica Bay closure.* Santa Monica Bay shoreward of that line from Malibu Point (34°01.8′ N., 188°40.8′ W.) to Rocky Point (Palos Verdes Point) (33°46.5′ N., 118°25.7′ W.).

(iii) *Los Angeles Harbor closure.* The area outside Los Angeles Harbor described by a line extending 6 miles 180° true from Point Fermin (33°42.3′ N., 118°17.6′ W.) and then to a point located 3 miles offshore on a line 225° true from Huntington Beach Pier (33°39.2′ N., 118°00.3′ W.).

(iv) *Oceanside to San Diego closure.* The area 6 miles from the mainland shore south of a line running 225° true from the tip of the outer breakwater (33°12.4′ N., 117°24.1′ W.) of Oceanside Harbor to the United States-Mexico International Boundary.

(3) The inner boundary line of each closed area shall be the line described in 662.4b.

(c) *Length restrictions.* No person shall land anchovies less than five (5) inches in length, measured from tip of snout to tip of tail, for reduction purposes, except that 15 percent by weight of all anchovies in any such load or lot may be less than minimum length.

(d) If a vessel has filed with the State of California a declaration of intent to take anchovies for reduction purposes, it shall be conclusively presumed that any fishing for anchovies by that vessel is for reduction purposes unless an exemption to the declaration has been filed with the State of California.

(e) *Closure of the reduction fishery.* (1) When the reduction harvest quota, the subarea B harvest quota, or the total harvest quota is about to be reached, the Secretary will announce in the FEDERAL REGISTER, and through the offices of the Southwest Region, National Marine Fisheries Service, the Council, and the California Department of Fish and Game, a closure of the reduction fishery in one or both subareas.

(2) If a closure is announced during any open season as specified in § 662.5(a), reduction fishing subject to the closure shall cease by seven (7) days from the date of the FEDERAL REGISTER notice, and shall not resume until new harvest quotas are announced under § 662.3.

(3) All anchovies harvested for reduction purposes in the PAFA and adjacent territorial sea shall be counted toward the applicable harvest quotas.

(f) Registration. All vesseis fishing anchovies for reduction shall be required to display their State anchovy reduction registration number in 14 inch numerals on the side and top of the wheel house.

§ 662.6 Nonreduction fisheries.

(a) There are no closed areas or closed seasons for nonreduction fishing in the PAFA.

(b) No person shall land anchovies less than five (5) inches in length, measured from tip of snout to tip of tail, for any nonreduction purpose other than bait, except that 15 percent, by weight, of all anchovies in any such load or lot may be less than minimum length.

(c) Nonreduction fishing in the PAFA shall cease seven (7) days from the date that a total harvest quota closure is announced as specified in § 662.5(e). Nonreduction fishing shall not resume until a new total harvest quota is announced under § 662.3.

(d) All anchovies harvested for nonreduction purposes in the PAFA and adjacent territorial sea shall be counted toward the total harvest quota.

§ 662.7 Catch report.

Data regarding fishing vessels, fishing activities, landings, and processing activities required by the fishery management plan for the reduction and nonreduction fisheries are collected by the State of California under existing State data collection provisions. No additional reports will be required of fishermen or processors as long as the data collection and reporting systems operated by the State of California continue to provide the Secretary with statistical information adequate for management. Reporting requirements may be promulgated by emergency regulations if this reporting system becomes inadequate for management purposes.

§ 662.8 General restrictions.

The following restrictions apply to all anchovy fishing in subareas A and B:

(a) No person shall fish for anchovies: (1) During any applicable closed season or in any applicable closed area specified in this part; or

(2) During any applicable closure specified in this part; or

(3) Aboard a vessel which has not filed an applicable declaration of intent with the State of California as specified in this part.

(b) No person shall land any anchovy of less than minimum length, except as specified in this part.

(c) No person shall possess, have custody or control of, ship, transport, offer for sale, sell, purchase, import, export, or land, any anchovy which was taken in violation of the act, this part, or any other regulation issued under the act.

(d) No person shall: (1) Refuse to permit an authorized officer to board a fishing vessel subject to such person's control for purposes of enforcement of this act, this part, or any other regulation issued under the act.

(2) Forcibly assault, resist, oppose, impede, intimidate, or interfere with any authorized officer in enforcing provisions of this part;

(3) Resist a lawful arrest for any act prohibited by this part; or

(4) Interfere with, delay, or prevent, by any means, the apprehension or arrest of another person knowing that such person has committed any act prohibited by this part.

(d) The operator of each fishing vessel shall immediately comply with instructions issued by authorized officers to facilitate safe boarding and inspection of the vessel for purposes of enforcing the act and this part.

§ 662.9 Penalties.

Any person found to be in violation of the part, the act, or any other regulation issued under the act will be subject to the civil and criminal penalty provisions and forefeiture provisions of the act.

§ 662.10 Emergency regulations.

The Secretary may issue emergency regulations under section 305(e) of the act, if an emergency involving the anchovy resource is found, by publication of a notice in the FEDERAL REGISTER.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-21]

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[7 CFR Part 17]

OCEAN TRANSPORTATION OF AGRICULTURAL COMMODITIES

Proposed Regulations Governing the Financing of Commercial Sales of Agricultural Commodities;

AGENCY: Office of the General Sales Manager, USDA.

ACTION: Proposed rule.

SUMMARY: These proposed regulations would revise the portion of existing regulations which pertains to the ocean transportation of agricultural commodities, the purchase of which is financed under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (herein referred to as the act). This proposal is part of an overall review of Part 17 designed to update esisting regulations pertaining to the financing of the sale and exportation of Title I commodities, ensure expeditious operations under the program, enable suppliers to effectively participate and keep the costs of the program as low as possible consistent with the purposes of the act.

DATES: Written comments should be submitted in duplicate on or before November 13, 1978.

ADDRESSES: Written comments:

General Sales Manager, Office of the General Sales Manager, U.S. Department of Agriculture, Room 4073, South Building, 14th and Independence Avenue SW., Washington, D.C. 20250.

Comments available for public inspection during business hours (8:15 a.m. to 4:45 p.m., Monday through Friday): Room 4554, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

John H. Maxwell, Room 4554, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone: 202-447-3664.

SUPPLEMENTARY INFORMATION: These regulations propose to revise the rules governing the financing by the Commodity Credit Corporation (CCC) of ocean freight costs and the current procedures governing the approval of the pertinent terms of proposed charter parties and booking notes for vessels carrying agricultural commodities, the purchase of which by foreign governments or private trade entities is financed under the act. Financing of ocean freight costs covers the extension of credit with respect to freight costs or the payment of ocean freight differential, whichever is provided for in the purchase authorization governing the particular transaction.

Currently, CCC does not extend any credit with respect to ocean freight costs. CCC does make an ocean freight differential payment with respect to ocean freight costs on that portion (at least 50 percent) of the commodities required by the Cargo Preference Act to be shipped on U.S. flag vessels. The ocean freight differential is based on the difference between freight rates of U.S. flag vessels and foreign flag vessels, determined in accordance with a specified method.

The proposed rules specify certain costs which may or may not be included in ocean freight costs used as a basis for determining the amount to be financed by CCC.

These rules are promulgated in proposed form to provide interested persons an opportunity to comment and assist the Department in developing final rules. Written comments should be submitted in duplicate to the specified office and, in order to be considered, must not be accompanied by a request that all or any part of the material be treated as confidential. All comments received prior to the closing date will be available for public inspection and copying. Following are explanations of major provisions of the proposed rules together with statements indicating the reason for the proposed rules and their intended effect.

Freight Invitations for Bids (§ 17.9(b))

It is proposed that the contracting for ocean transportation will generally take place based on freight invitations for bids (IFB's), which must be reviewed by the appropriate USDA official prior to issuance by importers. Since it is desirable that all interested carriers have the same opportunity to participate, it is proposed to require that IFB's be made available through two media, including an acceptable news medium such as the Transportation News Ticker. IFB's for non-U.S. flag vessels will not be required when the importer or participant solely employs its national flag vessels or vessels under its control. Vessels under the control of the participant or importer include vessels under consecutive voyage charters, time charters, bareboat charters, or other contractual arrangements for the carriage of commodities where the participant or importer has been guaranteed access to vessels.

Although IFB's are required, the negotiation of contract terms which may result in a less expensive combination of vessels or other arrangements favorable to the importer would not be precluded provided required contract provisions are not avoided. For example, in no event may the participant consider a vessel that offers with a cancelling date later than the last contract layday specified in the IFB. USDA will not approve any vessel with such a discrepancy. This provision is deemed necessary to ensure that the purchased commodity will be lifted within the commodity contract delivery period, thereby meeting the participant's required delivery schedule and reducing storage expenses. Similarly, IFB's will require offers to provide for guaranteed rates for vessel load and free out discharge with demurrage and despatch at both ends in some circumstances.

Ocean Freight Differential Rate (§ 17.9(e))

The applicable Purchase Authorization and Form CCC-106, "Advice of Vessel Approval," will state the extent to which financing of ocean freight is authorized. The proposed regulations establish the method by which the rate of ocean fright differential will be computed. When IFB's are required for both U.S. and non-U.S. flag vessels, the approprate USDA official will average, on a weighted basis, the non-U.S. flag rates for vessels offered that could carry the total tonnage purchased but for the requirement that approximately 50 percent must be carried on U.S. flag vessels. The difference between this average rate and the lowest U.S. flag rate for vessels offered that could carry the preference cargo will comprise the rate of ocean freight differential, irrespective of the freight rate agreed upon for U.S. flag vessels fixed. When IFB's are not required or when insufficient non-U.S. flag tonnage is offered, the appropriate USDA official will construct a non-U.S. flag rate, which in that person's opinion fairly approximates the market rate and which will be used in computing the ocean freight differential rate.

Failure of Vessel To Perform

Under present regulations, a charterer may incur necessary expenses to enable the vessel to perform after tender at the loading port, such as lifting liens asserted against the vessel. Any such expeness incurred may be deducted from the freight earned. It is proposed (§ 17.9(h)(2)) that this provision will be applicable to both charter party and booking notes in an effort to ensure that all commodities will be shipped as anticipated.

Freight Commissions

Recent Title I ocean transportation transactions have been criticized because of provisions in the freight contracts precluding ships brokers from sharing in the freight commissions. The Department believes that ships brokers perform a service in arranging for ocean transportation and that practices which may preclude their participation limit the range of potential suppliers and, therefore, should be avoided. Consequently it is proposed (§ 17.9(1)(10)) that CCC would not finance a brokerage commission to any one person in excess of 50 percent of total commissions when ships brokers are used. This reflects normal commercial practice where ships brokers are involved and freight commissions are shared with shipping agents. This rule would not affect the limitation on CCC's financing total freight commissions of more than 2½ percent of the freight financed.

Demurrage and Despatch

It is proposed (§ 17.9(b)(2) (iii) and (iv)) to require that freight IFB's provide that offers submitted thereunder contain demurrage and despatch provisions, except for bulk liquid cargoes and certain specified liner shipments. It is anticipated that this requirement will reduce the ocean freight differential costs to be paid by CCC since a pro rata portion of net despatch may be witheld from the final payment of differential. Laydays are reversible (§ 17.9(h)(2)(iii)) which precludes demurrage and despatch at only loading or discharge ports. This should be an incentive to accelerate discharging operations. The mechanics of the calculation are set forth in § 17.9(m).

Since many carriers have experienced delays in receiving from importers payment of the final 10 percent of freight, a provision has therefore been added requiring the participant to forward signed laytime statements and statements of fact within 30 days after discharge of vessel (§ 17.9(h)(2)(iv)).

Initial Freight Payment and Cargo Loss

Presently, the regulations state that 90 percent of the ocean freight is earned and payable when the vessel and cargo arrive at the first port of discharge. In view of the increased costs of ocean carriage, it is proposed that this initial freight payment be increased to 95 percent.

The proposed regulations substantially follow existing regulations regarding payment of ocean freight in the case of cargo loss for shipments on charter party terms. The required notice of arrival is prima facie evidence of arrival of the cargo. Consequently, if sufficient evidence exists of cargo loss prior to arrival, the freight on the cargo lost is ineligible for financing until the General Sales Manager determines whether a force majeure, as described in § 17.9(k)(3), is the cause of the non-arrival of the vessel or cargo. If such is determined to be the cause, not more than 95 percent of the freight is then eligible for financing. The final 5 percent is payable only on the cargo which arrives subject to appropriate despatch reductions. If the cargo loss or non-arrival of the vessel is from a cause other than force majeure, no freight is payable on the cargo lost.

Force Majeure

The force majeure provision has been revised to clearly provide for the exclusion, as a force majeure, of incidents caused by master or crew such as faulty navigation. In this respect this provision differs from that provided by the Carriage of Goods by Sea Act.

Cargo Loss or Damage Claims

The provision regarding earned freight is not intended to restrict a charterer's rights to pursue cargo loss and damage claims arising from incidents after the vessel has arrived at the first port of discharge. In these situations charterers would continue to recover damages when the loss is due to causes for which the carrier is liable under general rules of maritime law, notwithstanding the provision for earned freight. The charterer may not withhold amounts other than disputed despatch from the final 5 percent of freight.

It is proposed to add a new section (§ 17.9(j)) specifying that any claims against the ocean carrier for cargo loss or damage pursued by the importer must be reported to OGSM and the ocean freight differential portion of any final recovery must be refunded to CCC. Such claims have not been generally accounted for in the past because these claims have been small. However, it is now felt that amounts realized by this Department would justify the administrative burden involved in collecting such amounts.

Freight Forwarding Fees

It is proposed to make freight forwarding fees assessed at loading ports ineligible for financing by CCC (§ 17.9(1)(13)). This would not preclude the use of such services if the importer feels such services are necessary.

Minibridge Shipments

This Department has been urged to amend the regulations to provide for the financing of the sale and exportation under Title I, Pub. L. 480, of commodities utilizing minibridge services. Minibridge refers to the shipment of containerized cargo by rail to ports for loading upon ocean vessels. The cargo is delivered to containers at railheads operated by minibridge carriers and the ocean carrier's tariff includes the cost of the rail leg of the shipment. It is felt that total transit time could be reduced and risk of commodity loss lessened.

Rather than include detailed minibridge provisions in these draft regulations, public comments are invited from all interested parties concerning the approach to this matter as set forth in this preamble. After considering these comments, proposed regulations with respect to the use of minibridge will be published with a request for further comments. Final publication of ocean transportation regulations specifically proposed herein will not be delayed while consideration is being given to amending the regulations to provide for financing when minibridge services are used.

Minibridge service is not compatible with present operations under the program. This is because under the regulations CCC financing of commodities is available only upon presentation of an on-board ocean bill of lading. In order to permit minibridge services to be utilized, CCC financing of the commodities would be made available upon the presentation of copies of a through bill of lading to final destination which shows the date containers were loaded on rail cars at the railhead. Since the importer would take custody of the commodity at the railhead, the importer would be responsible for pursuing any claims for loss or damage on the rail leg of the shipment.

An endorsement on the through bill of lading indicating that the containers were loaded to the vessel would be necessary for the financing of ocean freight. This would not preclude an importer who is receiving financing for ocean freight under the reimburse-

SE 13 78

V 43 / 178

ment method from making initial payment earlier.

Ocean freight differential would be computed in the same manner as if conventional service were used, from the port at which the railhead is located. Any foreign flag minibridge operator's rate would be averaged into foreign flag all-water rates.

Importers desiring to do so would specify the minibridge option when issuing IFB's for commodity and freight. Such invitations would be issued simultaneously so commodity suppliers could consider any additional cost factors. Commodity suppliers would be permitted to offer separate prices for delivery f.o.b. vessel, f.a.s. vessel, or f.o.b. container at railhead. For purposes of determining the lowest f.o.b. or f.a.s. commodity price, no distinction will be made between offers "f.o.b. container at railhead" and offers "f.o.b. vessel" or "f.a.s. vessel." This will assist in keeping the costs of the Title I, Pub. L. 480 program to the U.S. Government as low as possible by insuring that all responsive commodity offers be considered in arriving at the lowest commodity price.

Accordingly, it is proposed that 7 CFR, part 17, subpart A be amended as follows:

§ 17.1 [Amended]

1. In § 17.1, paragraph (b)(2) is amended by changing the reference "§ 17.9(b)" to "§ 17.9(c)" and paragraph (c)(1) is amended by adding the words "ocean freight or" before the words "ocean freight differential" wherever they appear in the second and third sentences.

2. Section 17.2 is amended by revising paragraph (b)(5), adding a new paragraph (b)(8), and revising paragraph (c)(8), as follows:

§ 17.2 Definition of terms.

* * * * *

(b) *Terms relating to ocean transportation.* * * *

(5)(i) "Ocean bill of lading" means:

(A) *In the case of cargo carried in vessels other than LASH or Seabee.* An "on-board" bill of lading, or a bill of lading with an "on-board" endorsement, which is dated and signed or initialed on behalf of the carrier, or

(B) *In the case of cargo carried in LASH or Seabee barges. (1)* For the purpose of financing commodity price, an "on-board" bill of lading showing the date commodity was loaded on board barges, which is dated and signed or initialed on behalf of the carrier, or a bill of lading or a LASH or Seabee barge bill of lading with an "on-board barges" endorsement which is dated and signed or initialed on behalf of the carrier.

(2) For the purpose of financing ocean freight or ocean freight differential, or any portion thereof, an "on-board" bill of lading which is dated and signed or initialed on behalf of the carrier indicating the barges containing the cargo were placed aboard the vessel named in the form CCC-106 not later than eight (8) running days after the last LASH or Seabee barge loading date (contract layday) specified in the form CCC-106, or a bill of lading or a LASH or Seabee barge bill of lading with an "on-board ocean vessel" endorsement which is dated and signed or initialed on behalf of the carrier indicating the barges containing the cargo were placed aboard the vessel named in the form CCC-106 not later than eight (8) running days after the last LASH or Seabee barge loading date (contract layday) specified in the form CCC-106.

(ii) Documentary requirements for a copy of an "ocean bill of lading" refer to a non-negotiable copy thereof.

* * * * *

(8) "Financing" means the extension of credit with respect to freight costs or the payment of ocean freight differential, whichever is provided for in the purchase authorization governing the particular transaction.

3. Section 17.3 is amended by revising paragraph (b) as follows:

§ 17.3 Purchase authorization.

* * * * *

(b) *Issuance of purchase authorization.* On approval of the application by the General Sales Manager, a purchase authorization will be issued to the participant. For commodities, the form shall be form OGSM-480 (Commodity), "Authorization to Purchase Agricultural Commodities." Financing of ocean freight or ocean freight differential may be authorized in the form OGSM-480 (Commodity) or on a separate form EMS-480 (Ocean Transportation). Financing will be in accordance with the purchase authorization.

* * * * *

§ 17.8 [Amended]

4. In § 17.8, paragraph (c)(5) is amended by changing the reference "17.9(i)(8)" to "17.9 (1) (8), (9), and (10)."

5. Section 17.9 is revised to read as follows:

§ 17.9 Ocean Transportation.

(a) *General.* This section provides requirements applicable to ocean transportation supplied for the shipment of commodities financed under title I of the Act, and specific requirements applicable to the financing of ocean freight or ocean freight differential. The purchase authorization may provide requirements in addition to or in lieu of those stated in this section.

(1) Ocean freight or ocean freight differential will be financed by CCC only to the extent specifically provided for in the purchase authorization.

(2) The offices specified in paragraph (c)(2) of this section shall determine the quantity of the commodity which shall be shipped on privately owned U.S. flag commercial vessels.

(3) The supplier of ocean transportation shall release copies of the ocean bill of lading to the supplier of the commodity promptly upon completion of loading the commodity to the ocean-going vessel; or, in the case of LASH or Seabee type barges, upon completion of loading the commodity to the LASH or Seabee type barge.

(b) *Freight Invitations for Bids.* (1) Freight "Invitations for Bids" (IFB's) must be issued in the United States for U.S. and non-U.S. flag vessels unless otherwise authorized by the Director, Ocean Transportation Division (OTD), Office of the General Sales Manager (OGSM), or in the case of cotton shipments, by the Director, Kansas City ASCS Commodity Office; except that IFB's for non-U.S. flag vessels are not required if the participant or the importer uses only its own flag vessels or non-U.S. flag vessels under its control. Vessels considered to be under the control of the participant or the importer include vessels under time charters, bare boat charters, consecutive voyage charters, or other contractual arrangements guaranteeing access to vessels to the participant or the importer. Prior to release to the trade, IFB's must be submitted for review to the Director, OTD, OGSM (or for cotton, to the Director, Kansas City ASCS Commodity Office). The IFB shall state that offers with a canceling date beyond the laydays specified in the IFB will not be considered by the participant. Freight IFB's must be issued by means of an acceptable news medium (such as the Transportation News Ticker) plus at least one other means of communication, such as teletype or letter, to assure adequate notice to all interested parties. Copies of the freight IFB issued and all offers received must be promptly furnished to the Director, OTD, OGSM (or, for cotton, to the Director, Kansas City ASCS Commodity Office, if the Director so requires). If requested, a record of all negotiations must also be furnished.

(2) For commodities other than cotton, freight IFB's shall provide

that offers submitted thereunder shall contain the following:

(i) The name(s) of the specific vessel(s) to perform.

(ii) The vessel's layday canceling date (last contract layday), which must be no later than the last contract layday specified in the IFB.

(iii) Guaranteed rates for vessel load/free out discharge with provisions for demurrage/dispatch both ends on U.S. flag vessels on charter terms (unless otherwise authorized by the Director, OTD, OGSM, prior to conclusion of fixture).

(iv) That shipments of "mark and count" on U.S.-flag liner vessels will be on basis of gross terms when within the scope of applicable tariffs; "mark and count" shipments on U.S.-flag liner vessels on "open" rates and bulk grain shipments will be on basis of guaranteed rates for vessel load/free out discharge with provisions for demurrage/dispatch at both ends unless otherwise authorized by the Director, OTD, OGSM, prior to conclusion of booking). Shipment of bulk liquid commodities on U.S.-flag vessels may be contracted in accordance with trade customs.

(v) That whenever the quantity of cargo to be loaded is qualified (for example, 5 percent more or less), the option is to be at vessel's discretion, unless approved otherwise by the Director, OTD, OGSM.

(c) *Request for vessel approval.* Whether any portion of the ocean freight is financed by CCC or not, the pertinent terms of all proposed ocean freight contracts, and any amendments thereto (whether liner bookings, single voyage charters, consecutive voyage charters, or time charters), must be submitted to the USDA official specified in paragraph (c)(2) of this section for review and approval before fixture of the vessel. Request for vessel approval must state the name of the specific vessel(s) to perform. Tentative advance vessel approval may be obtained by telephone or telegram provided Form CCC-105, "Request for Vessel Approval, Ocean Shipment Data—PL 480," is sent promptly confirming the information supplied by telephone or telegram.

(1) Requests for vessel approval will be reviewed to insure compliance with the following:

(i) Pub. L. 664 (Cargo Preference Act), the applicable purchase authorization, and the provisions of these regulations.

(ii) Pub. L. 87-266 (definition of privately owned U.S.-flag commercial vessels; 46 U.S.C. 1241(b)).

(iii) That laydays of vessel conform to laydays of IFB, or in absence of a freight IFB, that the canceling date is sufficient to permit loading by the terminal delivery date of the commodity supply contract. Requests for vessel approval submitted to OGSM covering vessels that, when offered in response to the IFB, did not comply with this provision will not be approved by the Director, OTD, OGSM.

(2) To obtain approval, Form CCC-105 shall be sent in duplicate to the applicable office indicated below:

(i) *For cotton.* Form CCC-105 (Cotton), "Request for Vessel Approval, Ocean Shipment Data—PL 480," shall be sent to the Director, Kansas City ASCS Commodity Office, USDA, P.O. Box 8377, Shawnee Mission, Kans. 66208.

(ii) *For all other commodities.* Form CCC-105, "Request for Vessel Approval, Ocean Shipment Data—PL 480", shall be sent to the Director, OTD, OGSM, USDA, Washington, D.C. 20250.

(d) *Advice of vessel approval.* Approval will be given on Form CCC-106. It will state whether the vessel is approved as a dry cargo liner, dry bulk carrier, or tanker; whether or not financing by CCC of any part of the ocean freight is authorized; and, when CCC financing is authorized, a statement as to whether demurrage/dispatch is or is not applicable.

(1) *For cotton.* Form CCC-106-3 (white), signed for the Director, Kansas City ASCS Commodity Office, on sales made on a c.i.f. or c. & f. basis will be issued only to the supplier of the cotton. If CCC finances any part of the ocean freight when cotton is shipped on an f.a.s. basis, two signed originals will be issued, one to the supplier of the cotton and the other to the ocean carrier.

(2) *For all other commodities.* Form CCC-106, signed for the Director, OTD, OGSM, will be issued as follows:

(i) For shipments to be made on an f.o.b. or f.a.s. basis, original Form CCC-106-1 (yellow) will be issued to the supplier of the commodity. When CCC finances any part of the cost of ocean freight, original Form CCC-106-2 (blue) will be issued to the ocean carrier.

(ii) For shipments to be made on a c.i.f. or c. & f. basis, original Form CCC-106-1 (yellow) will be issued to the supplier of the commodity.

(e) *Ocean freight differential.* (1) All required U.S.-flag vessels will be approved prior to approval of any non-U.S.-flag vessles unless otherwise authorized by the Director, OTD, OGSM (or, for cotton, by the Director, Kansas City ASCS Commodity Office).

(2) When IFB's are required for both U.S.- and non-U.S.-flag vessels the ocean freight differential rate will be computed by the Director, OTD, OGSM, except that for cotton, the ocean freight differential rate will be computed by the Director, Kansas City ASCS Commodity Office. The rate of ocean freight differential will be computed on the basis of the difference between (i) the weighted average freight rate(s) of non-U.S.-flag vessels offered that, in the appropriate official's opinion, could carry the total quantity of the commodity purchased (mean or min/max as applicable) and (ii) the lowest U.S.-flag rate offered which in that person's opinion could carry the required U.S.-flag tonnage irrespective of U.S.-flag vessels fixed. When IFB's are not required, either for U.S.- or non-U.S.-flag vessels, or when insufficient non-U.S.-flag tonnage is offered, the non-U.S. flag rate to be used for computation of the ocean freight differential rate will be as determined by the Director, OTD, OGSM, or, for cotton, by the Director, Kansas City ASCS Commodity Office.

(3) The ocean freight differential shall be computed by multiplying the rate of differential stated on Form CCC-106 bearing the number of the applicable purchase authorization, by the tonnage transported as authorized on the Form CCC-106. The ocean freight differential rate will be adjusted to deduct any ineligible commissions or costs as authorized in paragraph (e)(1) of this section.

(f) *U.S.-flag vessels.* When a commodity is required to be shipped on privately owned U.S.-flag commercial vessels, Form CCC-106 will show in addition to other pertinent data:

(1) The rate of the ocean freight differential, if any; as determined by the Director, OTD, OGSM (or Director, Kansas City ASCS Commodity Office, for cotton);

(2) The approximate tonnage for which CCC will finance ocean freight or ocean freight differential; and

(3) A statement that demurrage/dispatch is or is not applicable.

(g) *Foreign flag vessels.* CCC will not finance any part of the ocean freight on foreign flag vessels.

(h) *Information and provisions required on charter party or booking note when any part of ocean freight is financed by CCC.* (1) When CCC finances any part of the ocean freight, the charter party or booking note shall contain the following information:

(i) The name of each party sharing in the ocean freight commission, if any, and the percentage payable to each party.

(ii) The name of the vessel and name of alternate vessel, if any.

(2) The charter party or booking note shall contain or, for the purpose of financing under the regulations in this part, shall be deemed to contain, the following provisions:

V 4 3 / 1 7 8

(i) Any failure by the supplier of ocean transportation to perform under the charter party or the booking note after the vessel has tendered at the loading port shall entitle the participant to incur all expenses which in the judgment of the GSM are required to enable the vessel to undertake and carry out her obligations under the freight contract. This includes, but is not limited to, expenses for lifting any liens against the vessel.

(ii) Notwithstanding any prior assignments of freight made by the owner or operator, the expenses authorized in paragraph (h)(2)(i) of this section may be deducted from the freight earned under the charter party or booking note.

(iii) Laydays are reversible when the contract provides for demurrage and dispatch at both ends. Laytime at first loading and discharging port to commence at 0800 hours the next regular working day after vessel tenders, during regular business hours, whether in berth or not. Prior time, if use, not to count. Laytime at second or subsequent ports of loading or discharging to commence on arrival.

(iv) Signed loading and discharging laytime statement(s) and statement(s) of fact shall be submitted to the supplier of ocean transportation no later than 30 days after discharge of vessel, or payment shall be made to supplier directly, or the bank holding the letter of credit shall be directed to pay, the outstanding balance of freight, less disputed dispatch.

(v) Settlement directly between the supplier of ocean transportation and the participant or through arbitration proceedings of disputes affecting freight financed by CCC shall not be binding on CCC.

(i) *Special charter party provisions required when any part of ocean freight is financed by CCC.* The charter party shall contain or, for the purpose of financing under the regulations in this Part, shall be deemed to contain, the following provisions:

(1) Subject to subparagraphs (2) and (3) of this paragraph, 95 percent of the ocean freight is earned and payable by the charterers when the vessel and cargo arrive at the first port of discharge. The final 5 percent, less adjustments for dispatch only, is payable upon submission of required documentation.

(2) If a force majeure as described in paragraph (k)(3) of this section results in the loss of part of the vessel's cargo, 95 percent of the ocean freight is payable on the part so lost and the quantity on board when the vessel arrives at the first port of discharge. This does not relieve the carrier of the obligation to carry the cargo to other points of discharge if so required by the charter party. The final 5 percent balance of freight on the cargo which arrives shall be settled promptly, subject to adjustments for dispatch only, if any, after submission of signed loading and discharging laytime statement(s) and statement(s) of fact. The 5 percent balance of freight on the cargo lost shall not be due or payable.

(3) If any of the force majeures as described in paragraph (k)(3) of this section prevents the vessel's arrival at the first port of discharge, an amount not to exceed 95 percent of the freight shall be payable by the charterer if the GSM determines that such force majeure was the cause of nonarrival. A pro rata portion of dispatch earned at loading port will be deducted from amounts financed by CCC as provided in § 17.9(m). The remaining 5 percent balance of freight shall not be due or payable.

(j) *Cargo loss and damage claims.* The importer is responsible for pursuing all cargo loss and damage claims and notifying the Director, OTD, OGSM (or, for cotton, the Director, Kansas City ASCS Commodity Office) of all claims made. The importer shall refund to CCC the ocean freight differential portion of amounts recovered which were financed by CCC. This shall not in any way limit CCC's rights to pursue such claim directly against the carrier.

(k) *Notice of arrival.*—(1) *Requirements.* Each Form CCC-106-2 will state whether a notice of arrival is required. If required, it must be furnished promptly to the carrier by the importer or its designated agent or other source acceptable to CCC (excluding the carrier or his agent). The notice must include the name of the vessel, purchase authorization number, first port of discharge, and the date of arrival. The notice of arrival also constitutes prima facie evidence of arrival of the cargo.

(2) *Waiver of notice of arrival (letter of credit).* On receipt of an acceptable letter of credit furnished to CCC as financial coverage by the supplier of ocean freight, the GSM or Controller will issue a waiver of the requirement for the notice of arrival for initial CCC financing of up to 95 percent of the ocean freight or ocean freight differential prior to arrival. The amount of the letter of credit may be computed as follows:

(i) If a copy of the ocean bill of lading is not sent to CCC, 100 percent of the ocean freight or ocean freight differential on the basis of the tonnage stated in the ocean freight contract (without tolerance) times the ocean freight rate or ocean freight differential rate shown on Form CCC-106; or,

(ii) If a copy of the ocean bill of lading is sent to CCC, 95 percent of the ocean freight or ocean freight differential on the basis of the tonnage shown on the ocean bill of lading times the approved ocean freight rate or ocean freight differential rate shown on the Form CCC-106.

(3) *Waiver of notice of arrival (force majeure).* The GSM will waive the requirement for the notice of arrival by a written notice to the supplier of ocean transportation on receipt of evidence satisfactory to him that the vessel is lost or unable to proceed to destination after completion of loading due to one or more of the following causes: Damage caused without the fault of the carrier (including the master or crew) by perils of the sea or other waters, collisions, wrecks, stranding, fire, arrest or restraint of princes, rulers or peoples, jettison, Act of God, public enemies or pirates; wars; public disorders; captures; or detention by public authority in the interest of public safety.

(4) *Force majeure (CCC financing of ocean freight).* When the GSM determines that a force majeure has occurred, as specified in paragraph (k)(3) of this section, the following shall apply: For shipments under purchase authorizations which provide for CCC financing of ocean freight or ocean freight differential, an amount not to exceed 95 percent of the ocean freight or ocean freight differential shall be eligible for financing by CCC. (If the GSM determines that less than 95 percent of the ocean freight is payable to the carrier, CCC will finance the corresponding percentage of the ocean freight or ocean freight differential.) A pro rata portion of dispatch will be deducted in determining the amount to be financed by CCC. The remaining 5 percent of the ocean freight or ocean freight differential is not eligible for CCC financing.

(l) *Items not eligible for CCC financing.* The following costs are not eligible for CCC financing:

(1) Loading, trimming, and other related vessel expenses unless included in the ocean freight rate;

(2) Discharge costs except when in accordance with trade custom (i.e., normal berth term liner shipments);

(3) Cost of "dead freight";

(4) Cargo dues and taxes assessed by the country of import;

(5) Surcharges assessed by steamship conferences or carriers, unless authorized by the Director, OTD, OGSM;

(6) General Average contributions;

(7) Stevedoring overtime and vessel crew overtime;

(8) Address commissions;

(9) Brokerage commissions in excess of 2½ percent of the freight financed;

(10) Brokerage commission to any one person in excess of 50 percent of total commissions when ships brokers are used;

(11) Demurrage;

(12) Elevator or terminal overtime in excess of dispatch earnings for the same voyage;

(13) Freight forwarding fees assessed at loading ports.

(m) *Calculation of demurrage/dispatch.* (1) For the purpose of determining net demurrage or net dispatch, laytime shall be calculated in the following manner:

(i) Determine the laytime saved or lost at loading ports;

(ii) Determine the laytime saved or lost at discharge ports;

(iii) Total the above figures in subdivisions (i) and (ii) of this subparagraph and determine the laytime lost (demurrage) or laytime saved (dispatch) for the entire voyage.

(2) The resulting figure shall be multiplied by the appropriate dollar rate to obtain the amount of demurrage or dispatch.

(3) Dispatch earnings may be credited against elevator or terminal overtime (excluding stevedoring and vessel crew overtime) at loading port.

(4) Any net dispatch earnings shall be divided in proportion to the freight financed by the participant and CCC. CCC's portion of such dispatch earnings shall be deducted from the amount of the request for reimbursement of the balance of the ocean freight or ocean freight differential.

(5) The CCC pro rata share of net dispatch to be deducted from the ocean freight differential otherwise payable will be determined by dividing the ocean freight differential rate by the ocean freight rate. The resulting percentage will be computed to the nearest ⅒ percent (drop less than 0.5 percent; .05 percent and over, round up to next ⅒ percent).

(n) *General financing provisions.* When any part of the ocean freight is to be financed by CCC, the following shall apply:

(1) A copy of the charter party or booking note, and any amendments thereto, shall be sent immediately after signature to the Director, OTD, OGSM (or, for cotton, to the Director, Kansas City ASCS Commodity Office) for review and approval before Form CCC-106 is issued. If any conflict arises between the regulations in this part and the charter party or booking note or the ocean bills of lading issued pursuant thereto, the regulations in this part shall prevail.

(2) Charter parties or booking notes shall show the ocean freight rate from one loading port to one discharge port. A charter party or booking note may provide for an increase in rate for an additional port of loading or discharge, any alternate route or other option. CCC will initially finance the lowest such rate or ocean freight differential. Increased amounts (if any) due because of the exercise of an option will be financed only after receipt of evidence that an option was exercised.

(3) When transshipment from a U.S.-flag vessel to a foreign flag vessel occurs, CCC will finance the ocean freight or ocean freight differential only to the point of transshipment, at a rate determined by the Director, OTD, OGSM. No part of the ocean freight beyond the point of transshipment will be financed by CCC unless specifically approved by the Director, OTD, OGSM. If the commodity was transported from a U.S. port and was transshipped at another U.S. port, CCC will not finance, without prior approval of the Director, OTD, OGSM, any part of the ocean freight incurred before transshipment.

(4) The ocean freight rate eligible for CCC financing and the rate used to compute ocean freight differential for the U.S.-flag vessel may not exceed the following rates for the kind of vessel concerned:

(i) The published contract rate (conference or independent).

(ii) For other commodities (bulk commodities and other commodities for which there is no published contract rate, whether carried on liners, dry bulk carriers, or tankers) the market rate current at the time of request for approval as determined by the Director, OTD, OGSM (or for cotton, by the Director, Kansas City ASCS Commodity Office) but, in any event, not in excess of rates charged other shippers (irrespective of booking dates) for like commodities on the voyage concerned.

(5) CCC will finance ocean freight or ocean freight differential from loading points to discharge points at rates determined by the Director, OTD, OGSM (or for cotton, by the Director, Kansas City ASCS Commodity Office) on Form CCC-106 in conformity with paragraph (n)(4) of this section.

(6) Freight is not eligible for CCC financing unless the vessel complies with the provisions of Pub. L. 87-266. A bank is not responsible for determining compliance with the provisions of the statute.

(7) For purchase authorizations which provide for c. & f., c.i.f. and f.a.s. delivery of cotton, when the financing of ocean freight differential is authorized on Form CCC-106-3, the supplier of the commodity (c. & f. and c.i.f. delivery) or ocean transportation (f.a.s. delivery) may obtain payment for ocean freight differential not included in payment under a letter of credit by application to the Financial Management Division, ASCS, USDA, P.O. Box 2415, Washington, D.C. 20013.

(o) *Initial and final financing of ocean freight or ocean freight differential separately financed under the reimbursement method.* As soon as possible after completion of ocean freight contracting, but not later than 48 hours prior to vessel presentation for loading, letters of credit for 100 percent of ocean freight shall be opened by the participant, providing for sight payment or acceptance of a draft in U.S. dollars, in favor of the supplier of ocean transportation on basis of tonnage and rates specified in the applicable charter party or booking note.

(1) *Initial reimbursement.* (i) When the Form CCC-106 states that a notice of arrival is not required and that no demurrage/dispatch is applicable, reimbursement will be made for 100 percent of the ocean freight or ocean freight differential, as appropriate, on presentation of required documents.

(ii) When the Form CCC-106 states that a notice of arrival is required and that no demurrage/dispatch is applicable, reimbursement for advances up to 95 percent of the ocean freight or ocean freight differential, as appropriate, may be obtained before arrival at the first port of discharge if the supplier furnishes CCC financial coverage in the form of an acceptable letter of credit from a U.S. bank. (See § 17.9(k)(2).)

(iii) When the Form CCC-106 states that a notice of arrival is not required and that demurrage/dispatch is applicable, reimbursement for 95 percent of the ocean freight or ocean freight differential, as appropriate, will be made on presentation of required documents.

(iv) When the Form CCC-106 states that a notice of arrival is required and that demurrage/dispatch is applicable, reimbursement for advances made to the supplier of ocean transportation up to 95 percent of ocean freight or ocean freight differential, as appropriate, may be obtained prior to arrival at the first port of discharge if the supplier furnishes CCC financial coverage in the form of an acceptable letter of credit from a U.S. bank. (See § 17.9(k)(2).)

(2) *Reimbursement of final 5 percent.* (i) After initial reimbursement in accordance with paragraph (1) of this section, or initial payment under the letter of commitment method in accordance with paragraph (p)(2) of this section, the supplier of ocean freight is entitled to prompt payment by the participant of that portion of the balance claimed which is not in dispute when it has been established that a part or all of the balance of ocean freight or ocean freight differential claimed is eligible for financing.

(ii) After the participant has paid to the ocean freight supplier the balance as indicated in paragraph (o)(2)(i) of

SEP 13 78

this section, CCC will reimburse the participant or assignee for such balance less a pro rata share of net dispatch, if any. Such reimbursement shall be made to the extent provided in Form CCC-106 when the participant submits to CCC the documents required by § 17.13(d)(6) and, if applicable, (7).

(3) *Requests for reimbursement.* Requests for reimbursement, accompanied by the required documents, shall be sent to: Financial Management Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.

(p) *Initial and final financing of ocean freight or ocean freight differential separately financed under the letter of commitment method.* As soon as possible after completion of ocean freight contracting, but not later than 48 hours prior to vessel presentation for loading, letters of credit for 100 percent of ocean freight shall be opened by the participant, through the U.S. bank holding the letter of commitment, providing for sight payment or acceptance of a draft in U.S. dollars, in favor of the supplier of ocean transportation, on basis of tonnage and rates specified in the applicable charter party or booking note. When a purchase authorization authorizes CCC financing of ocean freight or ocean freight differential separately from the commodity cost by the letter of commitment method, all costs other than ocean freight or ocean freight differential, as appropriate, will be charged against the account of the participant, including all banking institution charges such as commissions, expenses, et cetera, unless approved in advance by OTD, OGSM. In the event that CCC is unable to recover amounts representing ineligible freight payments, either from the carrier or the banking institution, the participant shall reimburse CCC for such amounts.

(1) *Letter of commitment (no demurrage/dispatch applicable.)* (i) If Form CCC-106 does not require notice of arrival and also states "no demurrage/dispatch applicable", 100 percent of the ocean freight may be paid to the carrier upon loading of the vessel and upon submission to the banking institution of the documents required by § 17.13(d) (1) through (5) of these Regulations, except that the carrier's invoice need not be marked "Paid". In this case CCC will finance 100 percent of the ocean freight or ocean freight differential under the letter of commitment.

(ii) If Form CCC-106 requires notice of arrival and also states "No demurrage/despatch applicable," 100% of the ocean freight at the one discharge port rate may be paid to the carrier upon arrival of vessel at first port of discharge and upon submission to the banking institution of documents required by § 17.13(d) (1) through (5) of these regulations, except that the carrier's invoice need not be marked "Paid." In this case CCC will finance 95% of the ocean freight or ocean freight differential under the letter of commitment and reimburse the balance in accordance with paragraph (o)(2) of this section.

(ii) If the Form CCC-106 does not require notice of arrival and also states "Demurrage/despatch is applicable," 95% of the ocean freight may be paid initially to the carrier upon loading of the vessel and upon submission to the banking institution of the documents required by § 17.13(d) (1) through (5) of the regulations, except that the carrier's invoice need not be marked "Paid." In this case CCC will finance 95% of the ocean freight or ocean freight differential under the letter of commitment and reimburse the balance in accordance with paragraph (o)(2) of this section.

(q) *Eligibility of ocean freight contracts for financing.* Ocean freight contracts will not be approved if the supplier of ocean transportation is also the supplier of the commodity or is an affiliate of the supplier of the commodity, unless the supplier of ocean transportation is (1) the owner of the vessel named in Form CCC-106 or (2) the operator of the vessel under time charter or bare-boat charter and the ocean freight rate used to determine the amount of ocean freight or ocean freight differential for which reimbursement is claimed is not in excess of the contract rate under the time charter or bare-boat charter.

(r) *Ocean freight included in commodity contract price (c.&f. or c.i.f.).* For c.&f. or c.i.f. contracts, the ocean freight or ocean freight differential will be financed only to the extent provided for in the purchase authorization.

(1) For c.&f. or c.i.f. contracts, the supplier's detailed invoice covering the commodity shall show a computation of the dollar amount of ocean freight and ocean freight differential. (See § 17.13(c)(2).)

(2) For c.&f. or c.i.f. contracts when Form CCC-106 states that CCC will not finance ocean freight (or ocean freight differential), the supplier's detailed invoice covering the commodity shall show a deduction for the total amount of ocean freight.

(s) *Shipment of commodities on deck of vessel.* No agricultural commodities or products thereof which are financed under the regulations may be shipped on the deck of any vessel unless the Director, OTD, OGSM (or, for cotton, the Director, Kansas City ASCS Commodity Office) has approved in writing in advance such method of shipment, or unless the commodities or products have been placed in ocean containers which are loaded on a specially designed containership outfitted to safely stow ocean containers on deck.

6. Section 17.13 is amended by revising paragraph (b)(1)(i), adding a new paragraph (b)(1)(iii), and revising paragraphs (d)(3), (d)(6), and (d)(7).

§ 17.13 Documentation.

* * * * *

(b) *Identification.* (1) * * *

(i) Documents submitted by a supplier to a bank with request for payment of commodity price (including ocean freight or ocean freight differential, as appropriate, and insurance when covered by the commodity price) or for payment of ocean freight or ocean freight differential when authorization for such financing is included in the commodity purchase authorization, and such documents when submitted to CCC for reimbursement.

(ii) * * *

(iii) Documents submitted to CCC to obtain reimbursement under a commodity purchase authorization which provides for reimbursement of ocean freight or ocean freight differential, which shall be identified with the commodity purchase authorization number.

* * * * *

(d) *Documents required for ocean freight or ocean freight differential financed separately from commodity price.* To obtain financing for ocean freight, or for ocean freight differential or any portion thereof which is financed separately from the commodity price, the following documentation shall be submitted:

* * * * *

(3) One copy of the carrier's invoice (marked "paid" when financing is under the reimbursement method) which shows the total freight costs paid, the amount not eligible for financing by CCC, and the amount for which financing is requested from CCC. * * *

* * * * *

(6) A request for financing of any balance claimed on a shipment after initial financing of 95 percent of ocean frieght or ocean freight differential shall be supported by the following documents:

(i) One copy of the carrier's invoice as described in subparagraph (3) of this paragraph except for the certification required therein. When the Form CCC-106 states that no demurrage/despatch applicable the documents in subdivision (iii) and (iv) of this subparagraph are not required.

(ii) A notice of arrival, if required by the Form CCC-106 and not previously presented to support the 95 percent payment.

* * * * *

(7) A request for payment of any amounts claimed because of the exercise of a higher rated option following payment of a lower rated option pursuant to § 17.9(n)(2) shall be supported by the following documents:

* * * * *

(Sec. 101-115, Pub. L. 83-480, as amended (7 U.S.C. 1701 et seq.); E.O. 10900, 26 FR 143, as amended)

Signed at Washington, D.C., on September 8, 1978.

FRED C. WELZ,
Acting General Sales Manager, Office of the General Sales Manager, Department of Agriculture.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 108]

FILING OF ASYLUM REQUESTS AFTER COMMENCEMENT OR COMPLETION OF DEPORTATION PROCEEDINGS

Proposed Rule

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed Rule.

SUMMARY: The Immigration and Naturalization Service proposes new procedures to be followed by aliens when filing claims for asylum after commencement or completion of deportation proceedings. These new procedures are designed to eliminate duplications of proceedings and to allow for a more efficient and expedious determination of alien's rights.

DATE: Representations must be received on or before November 13, 1978.

ADDRESS: Please submit written representations in duplicate to the Commissioner of Immigration and Naturalization, Room 7100, 425 I Street NW., Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 I Street NW., Washington, D.C. 20536, telephone 202-376-8373.

SUPPLEMENTARY INFORMATION: This is a proposal to amend the regulations of the Immigration and Naturalization Service to provide that a request for asylum made by an alien after the commencement of deportation proceedings shall be considered by the immigration judge as a request for the withholding of deportation under section 243(h) of the Immigration and Nationality Act and the benefits of articles 32 and 33 of the Convention Relating to the Status of Refugees. The proposal will also provide that a request for asylum made following the completion of a hearing shall be considered as a motion to reopen the deportation proceedings in order to submit a request for the withholding of deportation under section 243(h) of the act and for the benefits of articles 32 and 33 of the Convention Relating to the Status of Refugees. These will be the exclusive procedures for an alien who is within the United States unlawfully to raise his claim for asylum. Aliens maintaining lawful status in the United States or whose presence in the United States has been authorized by the Service may continue to submit their asylum applications to the District Director for adjudications.

Under current Service regulations, an alien within the United States and not under deportation proceedings may apply to a district director for asylum. If this request is denied, he may renew his application in a deportation proceeding before an immigration judge in the form of an application for withholding of deportation under section 243(h) of the act.

Under the present Service instructions, deportation proceedings must be stopped if a request for asylum is made, so the claim may be considered by the district director. Should the district director deny that request, the claims may be raised again in deportation proceedings.

The foregoing procedures are a duplication of effort and result in the application being adjudicated twice on the same facts. It delays the proceedings and the resolution of the asylum claim. This works to the detriment of the alien because his status remains in doubt and to the detriment of the Service which is unable to resolve the proceedings within a reasonable length of time. Similarly, after the hearing has been completed, an alien may raise an asylum claim which must then be considered by the district director. This also results in duplication of proceedings. In order to eliminate duplication of proceedings, and allow for a more efficient and expeditious determination of the alien's rights, the Service proposes the amendments to chapter I of title 8 of the Code of Federal Regulations set forth below.

1. It is proposed to amend 8 CFR 108.1 to read as follows:

§ 108.1 Application.

An applicant who is seeking admission to the United States at a land border port or preclearance station who wishes to apply for asylum shall be referred to the nearest American consul. In all other cases, application for asylum shall be submitted on form I-589, "Request for Asylum in the United States." Except as otherwise provided in this paragraph, an application for asylum by an alien who is applying for admission to the United States at an airport or seaport of entry shall be submitted to the docket clerk for the immigration judge who shall consider that application in connection with an exclusion hearing as provided in § 236.3 of this chapter. A crewman or stowaway or alien temporarily excluded pursuant to section 235(c) of the act who is at a seaport or airport shall submit his application for asylum to the district director. An application for asylum by an alien who is within the United States and who is maintaining a lawful status or whose presence in the United States has been authorized by the Service may be submitted to the district director having jurisdiction over his place of residence in the United States. For other aliens within the United States, the sole method for applying for asylum shall be through an application for withholding of deportation under section 243(h) of the act submitted in accordance with § 108.3 and § 242.17(c) of this chapter. The applicant's spouse and unmarried children under the age of 18 years may be included in the application.

2. It is proposed to amend 8 CFR 108 by adding a new § 108.3 to read as follows:

§ 108.3 Asylum requests after commencement or completion of deportation proceedings.

(a) *Asylum requests after proceedings have been commenced.* A request for asylum introduced by an alien or his representative after commencement of deportation proceedings shall be considered as a request for withholding of deportation under section 243(h) of the act and for the benefits of articles 32 and 33 of the Convention Relating to the Status of Refugees. See § 242.17(c) of this chapter for processing instructions for section 243(h) applications.

(b) *Asylum requests after completion of deportation hearing.* A request for asylum by an alien or his representative following completion of a deportation hearing shall be considered as a motion to reopen the hearing pursuant to § 103.5 or § 242.22 of this chapter to submit a request for withholding of deportation under section 243(h) of the act and for the benefits of articles 32 and 33 of the Convention Relating to the Status of Refugees and considered in accordance with § 242.17(c) of this chapter.

(Sec. 103; 8 U.S.C. 1103)

PUBLIC COMMENTS INVITED

In accordance with 5 U.S.C. 553 the Service invites representations of interested parties on this proposed rule. All relevant data, views, or arguments submitted on or before November 13, 1978, will be considered. Representations should be submitted in writing, in duplicate, to the Commissioner of Immigration and Naturalization at the address shown at the beginning of this notice.

Dated: September 8, 1978.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

CIVIL AERONAUTICS BOARD

[14 CFR Part 380]

[SPDR-66; Docket No. 32477; Dated: September 7, 1978]

PUBLIC CHARTERS

Modification of Bond Requirements for Charter Operators

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: In response to a petition by the City National Bank of Detroit, the Board proposes to amend its rules to allow charter operators to furnish, instead of surety bonds, security agreements issued by banks that provide equivalent or greater protection of charter participants' funds.

DATES: Comments by: November 20, 1978. Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 32427, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Richard B. Dyson, Office of General Counsel, Rules Division, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5444.

SUPPLEMENTARY INFORMATION: City National Bank of Detroit filed a petition for rulemaking to amend 14 CFR Part 389 to eliminate filing fees charged for requesting a waiver of our rules when a charter operator seeks to furnish a "surety trust agreement" in lieu of the surety bond required by 14 CFR Part 371. Part 371 of the Board's Special Regulations sets forth the terms and conditions governing the operation of "Advance Booking Charters" (ABC's). Section 371.31 requires that an ABC charter operator obtain a surety bond to insure his financial responsibility and compliance with the terms of the contract between himself and the charter participants relating to air transportation and the accommodations, services, and facilities, if any, that are included in the charter tour package.

The petition argues that "surety trust agreements" protect charter participants as well as if not better than bonds issued by surety companies. The petitioner also contends that the filing fee for a waiver request is particularly burdensome for small charter operators, who have difficulty in finding a surety willing to write the required bonds, file waiver requests for only one or two flights at a time, and must pass along the cost of the filing fee and associated legal fees to the consumer. There were no answers filed to the petition.

It appears that "surety trust agreements" furnished by banks provide a degree of protection for consumer funds substantially equivalent to that provided by surety bonds. The Board has been routinely granting waiver requests to use such agreements when their terms conform to the ones specified for surety bonds, e.g., appendix B of 14 CFR Part 371.

Instead of eliminating the filing fee as requested, the Board has tentatively decided to amend subpart C of part 380[1] to allow use of security agreements provided by banks, to the extent that they provide protection for consumer funds equivalent to or greater than is provided by surety bonds. The need for broadening part 380 to include security agreements other than surety bonds stems from the difficulty many charter operators are having in finding a bonding company willing to issue a surety bond, as well as the high cost of obtaining them. As the petitioner noted, these problems are disproportionately burdensome for small charter operators who file only a few flights at a time and consequently must request a waiver with each new filing. The resultant cost of market entry may be prohibitive, tending to stifle competition in the industry.

The Board proposes to use the term "security agreement" to include both the present surety bonds and any equivalent bank-issued instruments. The name given to these instruments appears not to be important. The proposed amendments allow use of any security agreement whose terms conform to the substantive requirements for surety bonds.

Under the proposed amendments, security agreements for charter operators may be offered by national or State banks. 12 CFR 7.7010(a) establishes the legal authority for national banks to issue surety bonds or guarantees if they meet the conditions specified there. The Board invites comment on how best to ascertain whether a State bank is authorized under State law to issue security agreements. Specifically, the Board proposes and requests comment on a procedure under which a prospectus for a charter to be covered by a State-bank-issued security agreement would have to include an opinion from the State attorney general, or another official responsible for supervising that State's banks, stating his conclusion that the bank is authorized under State law to issue such instruments. Once such an opinion was received from a given State, banks of the same class in that State could issue similar instruments without having to submit proof of their authority to do so.

An issue to be considered in this connection is whether any procedure to confirm the authority of a State bank is necessary. It is proposed in the alternative, therefore, that such a procedure be omitted, and comment is specifically requested on this point.

[1] Part 380, Public Charters replacing part 371, which is revoked effective Jan. 1, 1979. See SPR-149, Aug. 14 1978 (43 FR 36604, Aug. 18, 1978).

In SPDR-50B,[2] the Board recently proposed to simplify the prospectus filing system for public charters. Since 14 CFR 380.34(c), by incorporating appendix A, now prescribes the exact form of surety bonds, there appears to be no need for the Board's staff to examine the actual bonds. That proposal would therefore end the requirement that charter operators file exact copies of their bonds. Instead, they would file a short statement, signed by both the operator and the surety company, that they had entered into a bond that complied with § 380.34. The statement is set forth in SPDR-50B as proposed appendix C to part 380, "Statement of Charter Operator and Surety Company." The Board expects to take final action on SPDR-50B before final action on today's proposal.

We therefore propose two alternative ways of treating security agreements issued by banks. The first would be merely to allow the operator to file a statement, signed by it and the bank, like the statement to be used for bonds. This would be achieved by generalizing the statement in Appendix C, substituting "securer" for "surety company" and "security agreement" for "surety bond". The proposed new § 380.34(c) set out below, however, would permit as an alternative to the prescribed bond "a security instrument issued by a bank that provides equivalent or greater protection of charter participants' funds." Since the text of the security instrument would not be prescribed, the simple prospectus statement would leave a greater risk of noncompliance with § 380.34(c). This suggests a second possibility: To permit operators to use the short statement when they have surety bonds, while requiring them to file actual copies if they choose bank-issued security agreements. This way the staff would retain the opportunity to examine the arrangements for protecting charter participants' money, and reject those that were inadequate. The Board specifically invites comment on these two alternative proposals.

Comments are also invited on problems that may arise with bank-issued security agreements. For example, a bank may resist paying claims even when a valid trust agreement has been signed, if the corpus—the funds that form the basis of the trust—has not yet been delivered by the charter operator. In one case the corpus was delivered, but turned out to be not immediately available, since the operator had also used it as collateral for a loan. We specifically invite comment on whether these problems would be avoided by a requirement that charter prospectuses include a certification from the bank that the corpus has been delivered and the funds are in fact available for the payment of valid claims. Finally, the Board seeks comment on possible problems with a surety trust that may be caused by operator insolvency, particularly whether the corpus, where furnished (as it typically is) by the operator, may be claimed to be part of the operator's bankruptcy estate and therefore not directly available for payment of participant claims.

[2] August 30, 1978 (43 FR ——, September —, 1978).

PROPOSED RULE

Accordingly, it is proposed that 14 CFR Part 380 be amended as follows:

1. The Table of Contents for Part 380 would be amended so that the title for § 380.34 would read as follows:

PART 380—PUBLIC CHARTERS

Sec.

* * * * * *

380.34 Security and depository agreements.

* * * * * *

§ 380.2 [Amended]

2. Section 380.2 would be amended by adding the following definition in proper alphabetical order:

* * * * * *

"Security agreement" means either a surety bond in the form set forth in Appendix A or an agreement with a bank that provides equivalent or greater protection of charter participants' funds.

* * * * * *

§ 380.28 [Amended]

3. In the first sentence of § 380.28, the words "surety bond (an original bond and a copy thereof)" would be revised to read "security agreement (an original and a copy thereof)".

§ 380.32 [Amended]

4. In § 380.32, paragraph (i) would be amended to read as follows:

* * * * * *

(i) The name and address of the surety company or bank issuing the security agreement.

* * * * * *

5. In § 380.32, paragraph (k) would be amended by replacing the word "surety" with the word "securer" wherever it appears, and by replacing the word "bond" with "security agreement".

6. In § 380.32, paragraph (l) would be amended by replacing the words "surety bond-depository" with the words "security-depository".

7. The title of § 380.34 would be amended to read:

§ 380.34 Security and Depository agreements.

8. In § 380.34, paragraph (a) would be revised by replacing the words "surety bond" with "security agreement" and by replacing the words "a bond" with the word "security", wherever they appear.

9. In the proviso at the end of § 380.34(a), the word "surety" would be replaced by the word "securer".

10. In § 380.34, paragraph (b), in the introductory text the words "surety bond" would be replaced with the words "security agreement".

11. In § 380.34(b)(1), the words "surety bond" would be replaced with the words "security agreement", the words "a bond" would be replaced with the word "security" wherever they appear, and the word "surety" would be replaced with the word "securer".

12. In § 380.34(b)(2)(viii); the words "surety bond" would be replaced with the words "the security agreement", and the word "bond" would be replaced with the word "security".

13. In § 380.34, paragraph (c) would be amended to read as follows:

* * * * * *

(c) The security agreement required under paragraphs (a) and (b) of this section shall insure the financial responsibility of the charter operator or foreign charter operator and the supplying of the transportation and all other accommodations, services, and facilities in accordance with the contract between the charter operator or foreign charter operator and the charter participants.

(1) The security agreement may be either a surety bond in the form set forth as appendix A to this part, or a security instrument furnished by a bank that provides equivalent or greater protection of charter participants' funds. Any such instrument furnished by a bank that purports to furnish a lesser degree of protection than the bond form set forth as appendix A shall be invalid to that extent, and instead the bank, the charter operator or foreign charter operator, and the charter participants shall have the same rights and liabilities as those established by a bond in the form of appendix A.

(2) When security is provided by a surety bond, such bond shall be issued by a bonding or surety company (i) whose surety bonds are accepted by the Interstate Commerce Commission under 49 CFR 1084.6; or (ii) which is listed in Best's Insurance Reports (Fire and Casualty) with a general po-

licyholders' rating of "A" or better. The bonding or surety company shall

[6750-01]

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and understands that once the order has been issued, it will be required to

by respondent pursuant to paragraph I above, shall be divested directly or indirectly to anyone who is, at the time of divesti-

section 7 of the Clayton Act, as amended (14 U.S.C. 8) and/or section 5 of the Federal Trade Commission Act (15 U.S.C. 4).

Particleboard and medium-density fiber-

ble for inspection and copying at its principal office in accordance with

licyholders' rating of "A" or better. The bonding or surety company shall be one legally authorized to issue bonds of that type in the State in which the charter originates. For purposes of this section, the term "State" includes any territory or possession of the United States, or the District of Columbia.

(3) When security is provided by other security instruments, such instruments shall be issued by a national bank complying with the provisions of 12 CFR § 7.7010(a), or by a State bank complying with applicable State laws that give authority equivalent to that granted national banks.

(4) The security agreement shall be specifically identified by the issuing securer with a numbering system so that the Board may identify the security agreement with the specific charter or charters to which it relates. *Provided, however,* That these data may be set forth in an addendum attached to the security agreement, which addendum must be signed by the charter operator or foreign charter operator and the securer. It shall be effective on or before the date the charter Prospectus is filed with the Board. If the security agreement does not comply with the requirements of this section, or for any reason fails to provide satisfactory or adequate protection for the public, the Board will notify the direct air carrier and the charter operator or foreign charter operator, stating the deficiencies of the security agreement. Unless such deficiencies are corrected within the time set forth in such notification, the subject charter shall in no event be operated.

* * * * *

14. In § 380.34, paragraph (d) would be amended by replacing the word "bond" with "security agreement", and the word "surety" with the word "securer", wherever they appear.

(Sec. 101(3), 204(a), 401, 402, 407, 416, and 1102, Federal Aviation Act of 1958, as amended; 72 Stat. 737, 743, 754, 757, 766, 771, and 797; (49 U.S.C. 1301, 1324(a), 1371, 1372, 1377, 1386, and 1502)).

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 781 0022]

LOUISIANA-PACIFIC CORP.

Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Portland, Oreg., firm engaged in harvesting and converting timber into various wood products, including medium density fiberboard (MDF) and particleboard, to divest, within 2 years to a Commission-approved buyer, the Rocklin MDF plant, which firm was acquired through its merger with the Fiberboard Corp.; and offer the new buyer the opportunity to purchase from the firm, for 5 years, a limited amount of the raw materials necessary to manufacture MDF. Additionally, the order would prohibit the firm, for 10 years, from acquiring without prior agency approval, any entity engaged in the manufacture of particleboard of MDF.

DATE: Comments must be received on or before November 10, 1978.

ADDRESS: Comments should be directed to Office of the Secretary, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Alfred F. Dougherty, Director, Bureau of Competition, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3601.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No. 781 0022]

LOUISIANA-PACIFIC CORP.

AGREEMENT CONTAINING CONSENT ORDER

The Federal Trade Commission having initiated an investigation of certain acquisitions as well as a proposed acquisition by Louisiana-Pacific Corp., a corporation, and its subsidiaries, and it now appearing that Louisiana-Pacific Corp., a corporation, on behalf of itself and its subsidiaries is willing to enter into an agreement containing an order in settlement of that investigation.

It is hereby agreed by and between Louisiana-Pacific Corp., by its duly authorized officer, and counsel for the Federal Trade Commission that:

1. Proposed respondent, Louisiana-Pacific Corp. is a corporation organized, existing, and doing business under any by virtue of the laws of the State of Delaware with its offices and principal place of business located at 1300 Southwest Fifth Avenue, Portland, Oreg. 97201.

2. Proposed respondent admits all of the jurisdictional facts set forth in the draft of the complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto, publicly released; and such acceptance may be withdrawn by the Commission if, within sixty (60) days after the acceptance, comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.36(b) of the Commission's rules, the Commission may, without further notice to proposed respondent: (1) Issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order in disposition of the proceeding; and (2) make information public in respect thereto. When so entered, the order shall have the same force and effect and shall become final and may be altered, modified, or set aside in the same manner and within the same time provided by satute for other orders. The complaint may be used in construing the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully compiled with the order, and may be liable for a civil penalty of up to $10,000 per day for violation of the order after it becomes final.

ORDER

For the purpose of this order, the following definitions shall apply:

(a) "Particleboard" is a flat panel product consisting of particles of wood bonded together with a synthetic resin or other suitable bonding system by a process in which the interparticle bond is created by the bonding systems, as further described in Commercial Standard CS236-66, published by the U.S. Department of Commerce, National Bureau of Standards, and as reported under the Standard Industrial Classification Manual No. 24921.

(b) "Medium density fiberboard" is a dry-formed panel product manufactured from lignocellulosic fibers, combined with a synthetic resin or other suitable binder, by the application of heat and pressure in which the interfiber bond is substantially created by the added binder, as further described in the standard published by the National Particleboard Association, N.P.A. 4-73, and as reported under the Standard Industrial Classification Manual No. 24997.

(c) The "Rocklin MDF Plant" consists of land, plant, property, equipment, and machinery presently owned and operated by Fibreboard Corp. for the manufacture of medium density fiberboard at Rocklin, Calif., to be acquired by respondent as a result of its merger with Fibreboard Corp., including all additions, replacements, and improvements thereto hereafter made by respondent.

I. *It is ordered,* That respondent, it officers, directors, agents, representatives, and employees shall, absolutely and in good faith divest, within two (2) years from the date this order becomes final, subject to the prior approval of the Federal Trade Commission, all rights, title, and interest in and to the Rocklin MDF plant acquired by respondent as a result of its merger with Fibreboard Corp.

II. *It is further ordered,* That in connection with any divestiture of the said Rocklin MDF plant, respondent will offer to any prospective acquirer the right to enter into a contract to buy from respondent (or its subsidiary Fibreboard Corp.) for use in said plant at Rocklin, Calif., wood residue raw materials of the type currently being supplied by Fibreboard Corp.'s internal operations to said plant, which contract will include provisions substantially as follows:

(a) The contract will continue for a minimum of five (5) years;

(b) Prices will be market prices existing in the area during the contract term for similar wood residue raw materials; and

(c) Quantities to be sold in each year will equal at least the total quantity of said wood residue raw materials heretofore supplied to said plant from Fibreboard Corp.'s own internal operations in the year 1977, or which will be supplied in the year 1978, or double the total quantity of said materials so supplied in the first 6 months of 1978, whichever is greatest.

III. *It is further ordered,* That none of the assets and properties required to be divested by respondent pursuant to paragraph I above, shall be divested directly or indirectly to anyone who is, at the time of divestiture, an officer, director, employee, or agent of, or under the control, direction, or influence of respondent, or who owns or controls more than 1 percent of the capital stock of respondent.

IV. *It is further ordered,* That respondent shall cease and desist for a period of ten (10) years from the date this order becomes final from acquiring, directly or indirectly, through subsidiaries or otherwise, without the prior approval of the Commission: (1) the whole or any part of the stock or share capital or any concern, corporate or noncorporate, engaged at the time of acquisition in any State of the United States in the manufacture of: (a) particleboard, or (b) medium density fiberboard, or (2) a manufacturing plant or facility engaged at the time of acquisition in any State of the United States in the manufacture of: (a) particleboard, or (b) medium density fiberboard. Any exercise hereafter by respondent of its option to purchase the Ukiah, Calif., particleboard plant presently operated by respondent pursuant to a lease shall not be prohibited by this paragraph.

V. *It is further ordered,* That respondent shall within one (1) year from the date this order becomes final, and every sixty (60) days after one (1) year until respondent has fully complied with the provisions of paragraphs I and II of this order, submit in writing to the Federal Trade Commission a verified report setting forth in detail the manner and form in which respondent intends to comply or has complied with this order. All compliance reports shall include a summary of contacts or negotiations with anyone for the specified assets, the identity of all such persons, and copies of all written communications to and from such persons.

VI. *It is further ordered,* That respondent notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in the corporate respondent which may affect compliance obligations arising out of the order, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation or the creation or dissolution of subsidiaries.

ANALYSIS TO FACILITATE PUBLIC COMMENT ON PROPOSED CONSENT ORDER

The Federal Trade Commission has accepted an agreement containing a proposed consent order from Louisiana-Pacific Corp. ("L-P"). The agreement culminates an investigation conducted pursuant to file No. 781 0022.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during the period will become a part of this record. At the conclusion of the public record period, the Commission will review the agreement and all comments and determine whether to withdraw the agreement or make the order final.

Following a public announcement that L-P and Fiberboard Corp. ("F-B") had agreed to merge with F-B becoming a wholly owned subsidiary of L-P upon consummation, the Federal Trade Commission authorized an investigation to determine whether the effect of this acquisition or previous acquisitions in the particleboard industry may be substantially to lessen competition or to tend to create a monopoly in violation of section 7 of the Clayton Act, as amended (14 U.S.C. 8) and/or section 5 of the Federal Trade Commission Act (15 U.S.C. 4).

Particleboard and medium-density fiberboard ("MDF") are reconstituted wood products and are used as corestock in furniture, audio equipment, doors, and shelves, as underlayment, and as mobile home decking. The draft of complaint which is attached to the agreement charges that the effects of L-P's acquisition of Fibreboard and its previous acquisitions of particleboard plants located at Missoula, Mont., and Ukiah, Calif., did in fact violate section 7 of the Clayton Act and section 5 of the Federal Trade Commission Act in the particleboard/MDF market by eliminating actual competition between L-P and the acquired companies and by increasing concentration in that market. In order to cure these effects, the consent order requires L-P to:

A. Divest within 2 years from the date the consent order becomes final to a buyer approved by the Federal Trade Commission, the Rocklin, Calif., MDF plant acquired by L-P as a result of its merger with F-B.

This provision will eventually restore the state of competition in the particleboard/MDF market to what it was prior to the F-B acquisition and allows the Commission to reject any potential buyer of the Rocklin plant if it determines the sale would not be in the best interests of competition.

B. Offer the new buyer of the Rocklin plant for a period of at least 5 years, the right to buy California wood residue raw materials from L-P in quantities at least equal to the total quantity heretofore supplied to the Rocklin plant from F-B's own internal operations in 1977, or will be supplied in 1978, or double the total quantity supplied in the first 6 months of 1978, whichever is greater.

This provision enables the new buyer of the Rocklin, Calif., plant to be assured of at least a limited amount of the raw material necessary to manufacture MDF. This material called "furnish" is composed of wood shavings, chips, or dust from western pine, redwood, and fir trees. Sufficiency of furnish is a constant problem in the manufacture of particleboard/MDF and guaranteeing the buyer of the Rocklin plant at least some of his furnish needs may make the plant more desirable to a purchaser and make it a more viable operation.

C. Cease and desist for a period of 10 years from the date the order becomes final from acquiring without the prior approval of the Federal Trade Commission any entity engaged in the manufacture of particleboard or MDF.

This provision was necessary because of the two previous acquisitions by L-P in the particleboard/MDF market. It insures that if L-P is to grow in this market it must do so through internal means and not via acquisition.

To insure that the order is obeyed, L-P must, within 1 year from the date this order becomes final and every 60 days thereafter until L-P has fully complied with its terms, file with the Commission a written report showing in detail the manner and form of its compliance. Moreover, L-P must notify the Commission thirty (30) days prior to any proposed change in its organization which might affect its obligations under the order.

This analysis is intended to encourage public comment; it does not constitute an official interpretation of the agreement and

proposed order or a modification of their terms.

JAMES A. TOBIN,
Acting Secretary.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[21 CFR Part 1308]

SCHEDULES OF CONTROLLED SUBSTANCES

Proposed Placement of Pentazocine Into Schedule IV

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: This is a notice of proposed rulemaking issued by the Administrator of the Drug Enforcement Administration (DEA) to place the drug pentazocine into schedule IV of the Controlled Substances Act (CSA). This action was initiated upon DEA's receipt of a letter from the Assistant Secretary for Health, Department of Health, Education, and Welfare (HEW), recommending that pentazocine be placed into schedule IV. The effect of this proposal would be to require that the manufacture, distribution, dispensing, importation and exportation of pentazocine be subject to controls for schedule IV substances.

DATE: Comments should be received on or before October 13, 1978.

ADDRESS: Send comments in quintuplicate to: Administrator, Drug Enforcement Administration, Department of Justice, 1405 I Street NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT:

Howard McClain, Jr., Chief, Regulatory Control Division, Drug Enforcement Administration, telephone 202-633-1366.

SUPPLEMENTARY INFORMATION: On February 2, 1978, the Administrator sent information concerning the abuse of the drug pentazocine and a recommendation to control the drug in schedule IV of the CSA to the Assistant Secretary for Health, HEW. The Administrator requested of the Assistant Secretary a scientific and medical evaluation of the information concerning pentazocine, and a recommendation as to whether and in which schedule under the CSA the drug should be controlled. On August 30, 1978, the Assistant Secretary replied:

Mr. PETER B. BENSINGER,
Administrator, Drug Enforcement Administration, Washington, D.C.

DEAR MR. BENSINGER: The Drug Enforcement Administration requested on February 2, 1978, that the Department of Health, Education and Welfare evaluate a proposal to control pentazocine in Schedule IV of the Controlled Substances Act.

The Bureau of Drugs within the Food and Drug Administration has reviewed the relevant data on pentazocine pursuant to Section 201 of the CSA and recommends that pentazocine (including all drug products containing pentazocine and its salts) be controlled in schedule IV of the CSA. I concur with this scientific and medical evaluation. A summary of the basis for this recommendation is enclosed.

Please accept my thanks to you and your staff for your cooperation in gathering the necessary data for the inherently difficult task of evaluating the issue of pentazocine control.

Sincerely yours,

JULIUS B. RICHMOND, M.D.,
Assistant Secretary for Health and Surgeon General.

Enclosure

The Drug Enforcement Administration has conducted a review of pentazocine which has included the following:

1. Published scientific and medical literature from the United States and other nations regarding this drug;

2. Material submitted to the Drug Enforcement Administration by the Department of Health, Education, and Welfare in support of the Assistant Secretary's letter recommending control for pentazocine;

3. Materials on file with the Food and Drug Administration, and the Drug Enforcement Administration; and

4. The legislative history of the Controlled Substances Act.

Based upon the investigations and review of the Drug Enforcement Administration and upon the scientific and medical evaluation and recommendation of the Secretary of Health, Education, and Welfare, received pursuant to sections 201(a) and 201(b) of the Act (21 U.S.C. 811(a) and 811(b)), the Administrator of the Drug Enforcement Administration finds that:

1. Based on information now available, pentazocine has a low potential for abuse relative to the drugs or other substances currently listed in schedule III.

2. Pentazocine has a currently accepted medical use in treatment in the United States.

3. Abuse of pentazocine may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule III.

Therefore, under the authority vested in him by the Act and regulations of the Department of Justice, the Administrator of the Drug Enforcement Administration hereby proposes that § 1308.14(f) of title 21 of the Code of Federal Regulations (CFR) be amended to read:

§ 1308.14 Schedule IV

* * * * *

(f) Other substances. Unless specifically excepted or unless listed in another schedule, any material, compound, mixture or preparation which contains any quantity of the following substances, including its salts:

* * * * *

(2) Pentazocine	9,709

* * * * *

All interested persons are invited to submit their comments or objections in writing regarding this proposal. These comments and objections should state with particularity the issues concerning which the person desires to be heard. All such submissions must be received on or before October 13, 1978.

In the event that an interested party submits objections to this proposal which present reasonable grounds for this rule not to be finalized and requests a hearing in accordance with 21 CFR 1308.45, the party will be notified by registered mail of the time and place that the hearing will be held. If any objections which are submitted do not present reasonable grounds, the party will be so advised by registered mail.

If no objections presenting grounds for a hearing on this proposal are received within the time limitations, or all interested parties waive or are deemed to waive their opportunity for a hearing or to participate in a hearing, the Administrator, after giving consideration to written comments and objections, will issue his final order pursuant to 21 CFR 1308.48 without a hearing.

Dated: September 7, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

[FR Doc. 78-25507 filed 9-11-78; 8:45 am]

DEPARTMENT OF DEFENSE

Office of the Secretary

[32 CFR Part 47]

DETERMINATIONS OF ACTIVE DUTY AND DISCHARGE

Civilian or Contractual Personnel

AGENCY: Office of the Secretary of Defense.

ACTION: Proposed rule.

SUMMARY: This proposed rule establishes Department of Defense (DOD) policies and procedures for the operation of a civilian/military service review board to implement the provisions of section 401 of Pub. L. 95-202, The GI Bill Improvement Act of 1977. This act directs the Secretary of Defense to determine if civilian employment or contractual service rendered by groups to the Armed Forces of the United States shall be considered active duty and, if finding that it shall, to issue each member of such group a discharge under honorable conditions if the service of each member so warrants.

DATE: Comments should be received by October 13, 1978.

ADDRESSES: Office of the Secretary of the Air Force (Personnel Council) (SAF/MIPC), The Pentagon, Washington, D.C. 20330.

FOR FURTHER INFORMATION CONTACT:

Capt. Mary C. Pruitt, USAF, telephone 694-5204 or 694-5074.

SUPPLEMENTARY INFORMATION: All reviews to determine the active duty status of groups and all reviews of individual applications will be conducted in closed executive sessions and will be limited to written submissions. All available documentation to support group and individual applications should be submitted at the time of application for review. Documentation must be an official document and not a personal statement or affidavit. Documentation for group applications should normally consist of supporting material which may include, but is not limited to, discharge certificates, mission orders, directives from the Armed Forces, commendations, casualty information, and any other documents which may tend to establish qualifications under the criteria. Documentation for individual applications should normally consist of such documents as listed above and other supporting material which may include, but is not limited to, identification cards, contracts or personnel action forms, employment records, education certificates, diplomas, pay vouchers, certificates of awards, and any other supporting evidence of membership and character of service.

In the event the Board decides information provided in behalf of a group is incomplete, the application will be returned without prejudicing later Board consideration.

In the case of an individual application, where the service decides information provided by the applicant is incomplete, the application will be returned without prejudicing later consideration.

The Secretary shall notify in writing the persons or persons who made the request for active duty determination once the determination is made. If the individual application is that of a person who is deceased or incompetent, legal proof of death or incompetency must accompany the application.

The appropriate service will not provide counsel representation nor will it defray cost of such under any circumstances.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

SEPTEMBER 8, 1978.

Accordingly, it is proposed to amend 32 CFR Chapter I by adding a new Part 47, reading as follows:

Sec.
47.1 Purpose.
47.2 Applicability.
47.3 Definitions.
47.4 Policy and criteria.
47.5 Authorities.
47.6 Responsibilities.
47.7 Department of Defense Civilian/Military Service Review Board.
47.8 Procedures.

AUTHORITY: Pub. L. 95-202, Sec. 401.

§ 47.1 Purpose.

This Directive:

(a) Implements the provisions of Pub. L. 95-202, which directs the Secretary of Defense to determine if civilian employment or contractual service rendered by groups to the Armed Forces of the United States shall be considered active duty and, if finding that it shall, to issue each member of such group a discharge under honorable conditions if the service of such member so warrants;

(b) Establishes the Department of Defense Civilian/Military Service Review Board;

(c) Delegates authority vested in the Secretary of Defense by Pub. L. 95-202;

(d) Sets forth policy and assigns responsibilities.

§ 47.2 Applicability.

The provisions of this Directive apply to the Office of the Secretary of Defense, the Military Departments, and the U.S. Coast Guard.

§ 47.3 Definitions.

(a) *Active Duty.* The same as in section 101, Title 39, United States Code.

(b) *Group.* An organization similarly situated to the Women's Air Forces Service Pilots (sic), which was an organization of Federal civilian employees attached to the United States Army Air Forces during World War II. Its members rendered services, then considered civilian employment or contractual, to the Armed Forces of the United States (Pub. L. 95-202).

§ 47.4 Policy and criteria.

Determinations of the active duty status of a group shall be made considering judicial and other appropriate precedent and application of statutory criteria including "the extent to which (a) such group received military training and acquired a military capability or the service performed by such group was critical to the success of a military mission, (b) the members of such group were subject to military justice, discipline, and control, (c) the members of such group were permitted to resign, (d) the members of such group were susceptible to assignment for duty in a combat zone, and (e) the members of such group had reasonable expectations that their service would be considered to be active military service" (Pub. L. 95-202).

§ 47.5 Authorities.

The Secretary of Defense hereby delegates:

(a) To the Secretary of the Air Force the authority to make active duty determinations for groups;

(b) To the Military Department Secretaries concerned and to the Secretary of Transportation to issue discharges to individuals who were members of such groups.

§ 47.6 Responsibilities.

(a) The Secretary of the Air Force shall:

(1) Establish the Department of Defense Civilian/Military Service Review Board.

(2) Appoint a chairperson and a member and alternate from members/employees of the Air Force in grade GS-15 or O-6 or higher.

(3) If groups claim Coast Guard active service, in other than time of declared war, ask the Secretary of Transportation to nominate one member and one alternate member in the grade of GS-15 or O-6 or higher from the Coast Guard to be an additional voting member of the Board when the Board is considering the claims of such groups.

(4) Provide a recorder, maintain the records of the Board, and provide the Board with nonvoting legal advisors as requested by the chairperson.

(b) The Secretaries of the Army and Navy, and the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) shall appoint a member and alternate from members/employees of their organization in grade GS-15 or O-6 or higher.

§ 47.7 Department of Defense Civilian/Military Service Review Board.

(a) *Composition.* The Board shall

plication for discharge to the appropriate Military Department.

(f) The Secretary concerned shall

DATES: Comments must be received on or before January 15, 1979, and Reply Comments must be received on

it to consult with its functional divisions as well as its outside auditors; that considerable time will be needed to develop the definitions for the var-

rate levels proposed in tariff filings (see paragraph 7 of the "notice". We are therefore interested in the earliest possible implementation of a system

nonreserved channel for another in Saint James, Minn. The proposed reserved assignments would enable non-commercial educational service to be

§ 47.7 Department of Defense Civilian/Military Service Review Board.

(a) *Composition.* The Board shall consist of a chairperson and one representative each from the Office of the Secretary of Defense and the Departments of the Army, Navy, and Air Force. Each sitting member will have one vote with three members present constituting a quorum.

(b) *Advisory Panel.* The chairperson may request historical data or the assistance of historians. For that purpose, the Secretaries of the Military Departments, and, if required, the Secretary of Transportation, shall designate a historian or an alternate as a member of the Advisory Panel.

(c) *Coast Guard Service.* The Board shall consider service in the Coast Guard in time of declared war or as directed by the President as service in the Department of the Navy.

§ 47.8 Procedures.

(a) The Board will meet in executive session and will limit its reviews:

(1) To written submissions submitted by an applicant on behalf of a group;

(2) A written report prepared by the appropriate member or members of the Advisory Panel;

(3) Any other relevant information available and the criteria established by law.

(b) The Board shall make a written recommendation to the Secretary of the Air Force, together with the reasons for the recommendation:

(1) That the service of the group be considered active duty in one of the Armed Forces of the United States; or

(2) That the service of the group not be considered active duty in one of the Armed Forces of the United States.

(c) In the event the Board decides information provided by the applicant or by the Advisory Panel is incomplete, the application will be returned without prejudicing later Board consideration.

(d) The Secretary of the Air Force shall consider the recommendations of the Board to determine whether the service rendered by a group shall be considered active duty for the purpose of all laws administered by the Veterans Administration. The Secretary shall notify in writing:

(1) The person or persons who made the request for the active duty determination;

(2) The Administrator of the Veterans Administration;

(3) The Secretaries of the Army and Navy;

(4) The Assistant Secretary of Defense (M.R.A. & L.).

(e) Following a determination by the Secretary of the Air Force that a group's service is active duty, individuals who were members of that group or their survivors may submit an application for discharge to the appropriate Military Department.

(f) The Secretary concerned shall determine whether the applicant was a member of the group after considering the individual's evidence of membership. If the applicant is determined to have been a member of the group, the Secretary concerned will issue a certificate of service consistent with the provisions of DOD Instruction 1336.1.[1] The certificate will show inclusive dates of service as far as can be determined from existing records. If the applicant has submitted sufficient supporting evidence of the character of the active duty service performed, the Secretary of that military department will issue, as appropriate, an honorable discharge or a discharge under honorable conditions. In the event that the applicant challenges the characterization of a discharge issued by a military department, the applicant may appeal the characterization through the channels established by the military department's regulation, and by law.

(g) Applications:

(1) Submit application for group determinations to the Secretary of the Air Force (SAF/MIPC), the Pentagon, Washington, D.C. 20330.

(2) Individual members of groups whose employment was determined to have been active duty may submit applications for discharge to the appropriate military department. The application may be prepared using DD Form (now being developed) or in narrative form.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 31, 33, 42, and 43]

[CC Docket No. 78-196]

REVISION OF ACCOUNTS AND FINANCIAL REPORTING FOR TELEPHONE COMPANIES

Extension of Time

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: The Commission is granting a 4-month extension of time in which to file comments in the captioned proceeding. The action is taken pursuant to requests made by persons affected by the proposed rules. The additional time being allowed will permit further analysis to occur in connection with the preparation of comments.

DATES: Comments must be received on or before January 15, 1979, and Reply Comments must be received on or before March 15, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Douglas Slotten, Policy and Rules Division, Common Carrier Bureau, Room 546, 202-632-9342.

Adopted: September 1, 1978.

Released: September 6, 1978.

Order. In the matter of revision of the uniform system of accounts and financial reporting requirements for telephone companies (parts 31, 33, 42, and 43 of the FCC's rules), CC docket No. 78-196.

1. On July 31, 1978, a "notice of proposed rulemaking" in CC docket No. 78-196, FCC 78-453, 43 FR 33560, on the "revisions of the accounting and financial reporting requirement for telephone companies (notice)" was printed in the FEDERAL REGISTER. Our "notice" proposed comprehensive revisions of the uniform system of accounts (USOA) and financial reporting requirements contained in parts 31, 33, 42, and 43 of the Commission's rules to facilitate, among other things, the determination of the relevant cost of providing service by telephone companies and the prescription of rates by the Commission where necessary. The "notice" specified that comments were to be received on or before September 15, 1978, and that reply comments were due on or before November 1, 1978.

2. GTE Service Corp. and its related domestic telephone companies (GTE), the United States Independent Telephone Association (USITA), and the National Association of Regulatory Utility Commissioners (NARUC) have filed motions for extensions of time in the above-captioned proceeding pursuant to section 1.46 of the Commission's rules. Each of the parties has requested on extension of 6 months from September 15, 1978, within which to file initial comments in the proceeding.

3. In support of the requested extensions of time, the parties generally note the comprehensive nature of the revision proposed in the notice; the large number of issues on which specific comment is sought, such as the Mathtech Report, the impact of a new system of accounts on jurisdictional separations, and the impact on telephone companies of various sizes; and the changes that will be required to be made in the data and records of the telephone companies, as well as the impact on the industry generally. Specifically, GTE notes that in order to thoughtfully and completely comment on the "notice" it will be necessary for it to consult with its functional divisions as well as its outside auditors; that considerable time will be needed to develop the definitions for the various accounts and the data base on which to base its comments; and that substantial study will be required to permit it to comment on the proposed accounts for revenues, plant, and expense, as well as on the costing and nonfinancial reporting requirements.[1]

4. USITA states that as a trade association of many smaller independent telephone companies, it is necessary to initially arrange to send copies of the "notice" to its members as the majority of them do not subscribe to the FEDERAL REGISTER. Time will then be required for its members to analyze the proposed USOA, after which it will require additional time to collect the comments of its various members and assemble them into an informed, thoughtful commentary to present to the Commission. USITA notes, that the 757 independent companies listed in USITA's 1978 "phone facts," pages 19-24, more than 660 independent companies are class A companies under the current rules and 384 of the independent companies had revenues in excess of $1 million.

5. NARUC in its motion states that it intends to submit an extensive analysis of the issues involved through its Subcommittee on Accounts. However it believes that the time before September 15, 1978, is not sufficient time to prepare an adequate response and since 38 states have adopted the USOA of the Commission (see note 1 to the "notice"), it believes that the state commissions are integral parties to the proceeding and must be afforded adequate time and fair opportunity to comment.

6. Initially, we believe the parties have presented a persuasive case that requiring comments to be filed by September 15, 1978, provides insufficient time for adequate analysis of the issues presented in the "notice" and would be likely to lead to the filing of cursory comments that would be of little assistance to the Commission in shaping the USOA to be adopted. The question of the amount of additional time to permit for filing of comments is one affected by competing considerations. While additional time to prepare pleadings should result in comments that are more beneficial to the Commission in further developing the USOA to be adopted, we are aware of the serious limitations on our ability to develop adequate information from the current USOA on the cost of service and the reasonableness of various rate levels proposed in tariff filings (see paragraph 7 of the "notice". We are therefore interested in the earliest possible implementation of a system that will provide the needed information. Moreover, as is reflected in paragraph 46 of the "notice," Congress is extremely interested in having a system of accounts that will provide this additional information in order to permit better analytical tools to be applied to the regulatory process. A factor further complicating the process is that section 220(g) of the Communications Act of 1934, as amended, 47 U.S.C. 220(g), requires that the Commission provide 6 months advance notice of any changes in the USOA. Accordingly, for the proposed USOA to become effective on January 1 of a given year, the Commission must take its final action and have this same published prior to July 1 of the preceeding year. The grant of a 6 month extension of time for the filing of initial comments in this proceeding would severely limit the procedural options available to the Commission in seeking to have a system that can be implemented as soon as practicable. Therefore, we conclude that an extension of 4 months until January 15, 1979, for initial comments and March 15, 1979, for reply comments would be in the public interest.

7. *Accordingly, it is ordered,* Pursuant to authority delegated by § 0.303 of the Commission's rules, that the motions for extension of time in "notice of proposed rulemaking in" CC docket No. 78-196 are granted to the extent that interested parties have until January 15, 1979, to file initial comments, and until March 15, 1979, to file reply comments.

JOSEPH A. MARINO,
Acting Chief,
Common Carrier Bureau.

FR Doc. 78-25729 Filed 9-12-78; 8:45 am]

[1] GTE has also requested an open meeting with the Bureau's staff to seek clarification of certain items contained in the "notice." A public notice concerning such an open meeting will be released in the near future.

[BC Docket No. 78-270; RM-3022]

FM BROADCAST STATIONS IN CENTERVILLE, HIGH POINT, LANSING, MOUNT AYR, AND SPIRIT LAKE, IOWA, AND SAINT JAMES, MINN.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of noncommercial educational television channels to Centerville, High Point, Lansing, Mount Ayr, and Spirit Lake (all in Iowa), and the substitution of one nonreserved channel for another in Saint James, Minn. The proposed reserved assignments would enable noncommercial educational service to be extended to residents of the Iowa communities listed above.

DATES: Comments must be received on or before October 17, 1978. Reply comments must be received on or before November 6, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: August 18, 1978.

Released: August 25, 1978.

In the matter of amendment of § 73.606(b), *Table of Assignments,* television broadcast stations (Centerville, High Point, Lansing, Mount Ayr, and Spirit Lake, Iowa, and Saint James, Minn.), BC Docket No. 78-270, RM-3022.

1. The Commission has before it for consideration a petition for rulemaking,[1] filed by the State Educational Radio and Television Facility Board of the State of Iowa ("Board"), which seeks the amendment of the television table of assignments (§ 73.606(b) of the Commission's rules). The petition seeks five "drop-in" television assignments and a change in the channel of one existing assignment to better serve the residents in and around the proposed communities of assignment. No responses were received to the proposal.

2. More specifically, the petition requests assignment of channel *31 at Centerville, Iowa; channel *14 at High Point, Iowa; channel *41 at Lansing, Iowa; channel *25 at Mount Ayr, Iowa; and channel *38 at Spirit Lake, Iowa. Further, the Board requests that channel 32 be substituted for channel 38 (unoccupied and unapplied for) at Saint James, Minn., in order that the proposed assignment at Spirit Lake, Iowa, can be accomplished. If the assignments are made, the Board proposes to operate translators at or near Centerville, High Point, Lansing, Mount Ayr, and Spirit Lake, Iowa.[2] The Board is presently the licensee of eight noncommercial educational television stations in Iowa,[3] all of which form the Iowa Educational Broadcasting Network. It says its request for the

[1] Public notice of the petition was given on Jan. 3, 1978, report No. 1095.

[2] The translators would operate with transmitter power of 1,000 watts.

[3] KDIN-TV, Des Moines; KIIN-TV, Iowa City; KRIN, Waterloo; KHIN, Red Oak; KBIN, Council Bluffs; KSIN, Sioux City; KTIN, Fort Dodge; and KYIN, Mason City.

proposed assignments is necessary to improve reception in those areas of the State which do not now receive satisfactory off-the-air service.

station promptly. Failure to file may lead to denial of the request.

3. *Cutoff procedures.* The following procedures will govern the consideration of fil-

[47 CFR Part 83]

changing communications. The 1974 World Maritime Administrative Radio Conference subsequently established the frequency 156.8 MHz (Channel 16)

proposed assignments is necessary to improve reception in those areas of the State which do not now receive satisfactory off-the-air service.

3. The proposed assignments meet the Commission's distance separation requirements. The channel substitution at Saint James, Minn., represents the only change in any existing assignment in the table of assignments required by the Board's proposal. Because the proposed assignments could be used to bring noncommercial educational television to areas now unserved, we believe it is in the public interest to consider this proposal in a rulemaking proceeding.

4. Accordingly, it is proposed that the television table of assignments (§ 73.606(b) of the Commission's rules) be amended with regard to the following communities:

City	Channel No.	
	Present	Proposed
Centerville, Iowa		*31-
High Point, Iowa		*14-
Lansing, Iowa		*41+
Mount Ayr, Iowa		*25-
Spirit Lake, Iowa		*36
Saint James, Minn	38	32+

5. The Commission's authority to institute rulemaking proceedings, showings required, cutoff procedures, and filing requirements are contained in the attached appendix and are incorporated by reference herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the appendix before a channel will be assigned.

6. Interested parties may file comments on or before October 17, 1978, and reply comments on or before November 6, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
NEAL K. MCNAUGHTEN,
Acting Chief, Broadcast Bureau.

APPENDIX

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM table of assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking to which this appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking to which this appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cutoff procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rule making to which this appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

MULTIPLE OWNERSHIP OF TELEVISION BROADCAST STATIONS

Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order extending time.

SUMMARY: At the request of several parties, a 30-day extension of time has been granted for the filing of reply comments to the notice of inquiry concerning the Commission's top-50 policy.

DATE: Reply comments must be filed on or before October 5, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Carol P. Foelak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: September 1, 1978.

Released: September 6, 1978.

In the matter of amendment of § 73.636(a) of the Commission's rules relating to multiple ownership of television broadcast stations, BC Docket No. 78-101.[1]

1. The Commission's notice of inquiry in this proceeding invited interested parties to submit comments by August 7, 1978, and reply comments by September 5, 1978.

2. Citizens Communications Center, Metromedia, Inc. and American Broadcasting Companies, Inc., have requested a 30-day extension in which to file reply comments. These parties state that the comments filed are voluminous and additional time is necessary to analyze and reply to them. We agree that additional time is justified.

3. *It is ordered,* That the date for filing reply comments in this proceeding is extended through October 5, 1978.

4. This action is taken pursuant to sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[BC docket No. 78-168; RM-2922; RM-3194]

FM Broadcast Station in Cape May Court House, N.J.

Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order extending time.

SUMMARY: Action taken herein extends the time for filing reply comments in a proceeding involving the assignment of an FM channel to Cape May Court House, N.J. A counterproposal was recently accepted and an extension of time is needed for responses to that pleading.

DATE: Reply comments must be received on or before September 26, 1978.

[1] See 43 FR 29151, July 6, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: September 1, 1978.

Released: September 6, 1978.

In the matter of amendment of § 73.202(b), table of assignments, FM Broadcast Stations. (Cape May Court House, N.J.), BC docket No. 78-168,[1] RM-2922, RM-3194.

1. On June 8, 1978, the Commission adopted a memorandum opinion and order and notice of proposed rulemaking, 43 FR 25698, concerning the above-entitled proceeding. A timely filed counterproposal has since been received (RM-3194) from Triplett Broadcasting Co., Inc. The present date for filing reply comments is September 5, 1978.

2. On August 28, 1978, counsel for Avalon Broadcasting Co., filed a request to extend the reply comment date to September 26, 1978. Counsel states that due to prior irrevocable commitments and the press of other business before the Commission, the extension is deemed necessary.[2]

3. We believe an extension of time for reply comments is warranted. The counterproposal referred to above was given public notice of its acceptance on August 29, 1978. In order to provide sufficient time to comment on that pleading, an extension is justified.

4. *Accordingly, it is ordered,* That the request for extension of time for filing reply comments by Avalon Broadcasting Co., Inc., is granted to and including September 26, 1978.

5. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc. 78-25745 Filed 9-12-78; 8:45 am]

---

[1] See 43 FR 35969, Aug. 14, 1978.

[2] GCC Communications of Philadelphia, Inc., by its counsel, has also informed the Commission that it supports the extension request.

[Gen. Docket No. 78-277; FCC 78-623]

MARITIME MOBILE SERVICES

Providing for the Use of Scanning Type Receivers To Meet Multiple Watch Keeping Requirements on Certain Vessels Fitted With VHF Installations

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking.

SUMMARY: Notice of Proposed Rule Making is given in the matter of receivers which may be used to comply with multiple watch requirements in the Maritime Mobile Service VHF band. The proposed rules would permit the use of scanning receivers to reduce the impact of multiple watch requirements on the safe navigation of vessels.

DATES: Comments must be received by November 10, 1978, and reply comments by December 11, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Robert C. McIntyre, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: August 29, 1978.

Released: September 1, 1978.

Amendment of Part 83 to provide for the use of scanning type receivers to meet multiple watch keeping requirements on certain vessels fitted with VHF installations in the Maritime Mobile Services, Gen. Docket No. 78-277.

1. Notice is hereby given of rulemaking to provide for the use of and technical specifications governing receivers to satisfy mandatory watch requirements for certain ship stations operating on VHF in the Maritime Service.

BACKGROUND

2. The VHF maritime mobile radiotelephone service was initiated by Commission action to alleviate congestion in the medium frequency (MF) band. Commission action in 1968 established the frequency 156.8 MHz as a national distress frequency [1] and required ship stations licensed to operate in the band 156-162 MHz to maintain an efficient radio watch whenever such station is not being used for exchanging communications. The 1974 World Maritime Administrative Radio Conference subsequently established the frequency 156.8 MHz (Channel 16) as the international distress, safety and calling (DSC) frequency (international Radio Regulations, Art. 35, Subsection 19(4) (1976)).

3. Congress, on August 4, 1971, enacted the "Vessel Bridge-to-Bridge Radiotelephone Act" (Pub. L. 92-63; 33 U.S.C. 1201) to provide a positive means whereby the operators of approaching vessels can communicate their intentions to one another through voice radio, located conveniently to the operator's navigation station. The responsibility for implementing the provisions of this Act rests with the U.S. Coast Guard and the Federal Communications Commission. In our proceeding [2] implementing this Act the Commission dedicated the frequency 156.650 MHz for the purpose of exchanging navigational information between the bridges of certain vessels. Vessels subject to the Bridge-to-Bridge Radiotelephone Act are required to keep a continuous and efficient watch on the designated navigational frequency except when VHF equipment is transmitting authorized traffic.

4. In response to a request by the Commandant, U.S. Coast Guard, the Commission in 1975 initiated a proceeding to make three frequencies in the 156-162 MHz band of the Maritime Mobile Service available in certain designated port areas for a Vessel Traffic System (VTS). This action was requested to implement Title I of the "Ports and Waterways Safety Act of 1972" (Pub. L. 92-340; 33 U.S.C. 1221). The Commission promulgated rules [3] designating the frequencies 156.55, 156.6 and 156.7 MHz for use in VTS designated areas. The Coast Guard requires that an efficient watch be maintained on one of these three frequencies by vessels operating in port areas where VTS systems are implemented.

5. The Commission in Subpart J, Part 81, provides for the operation of limited coast stations. The licensees of these stations are regularly engaged in the operation, direction, servicing or maintencnce of vessels, ports and waterways. Many vessels engaged in commercial operations are required, because of the nature of the ships' business, to monitor frequencies operated by these limited coast stations. This monitoring is not required by legislative fiat but, nevertheless, is often necessary if the ship's business is to be economically and safely conducted.

SUPPLEMENTARY INFORMATION:

Decided September 5, 1978.

Since good cause may exist for re-

THE PROBLEM

6. A review of the VHF watch requirements indicates that certain vessels operating in congested areas especially where VTS systems have been established may find it necessary to guard as many as four or five frequencies in the VHF band. A large number of these vessels may also be licensed to operate in other frequency bands and, consequently are required to monitor additional frequencies, such as 2182 kHz, the International Distress Safety and Calling frequency in the MF band. The Commission is aware that there is a limit to the number of radio watches which can be maintained without adversely affecting the ability of personnel on the bridge to efficiently perform navigational duties. Our staff has held discussions on this matter with the U.S. Coast Guard and members of industry. As a result of these meetings, use of scanning receivers[1] was identified as one of the means by which the impact of multiple watch requirements on safe navigation of ships can be minimized.

THE COMMISSION PROPOSAL

7. The proposed rules appended hereto set out the technical standards describing a monitoring facility (including scanning receiver) which may be used on a voluntary basis to satisfy mandatory watch requirements for ship stations operating in the VHF band. The proposed monitoring facility provides for a continuous watch on the bridge-to-bridge frequency and use of scanning on the VTS, DSC and up to four other frequencies of the operator's choice. The scanning receiver portion of the monitoring facility includes provisions for a priority channel which requires the receiver to switch to that channel any time a signal is present on that frequency. The priority channel should be designated for VTS purposes when the vessel is operating within a designated VTS area. Outside designated VTS areas the priority channel should be programmed for DSC purposes (Channel 16).

8. The Commission is desirous of allowing the maximum possible flexibility with regard to the physical configuration of equipment to be used for multiple watch keeping facilities provided that the equipment is suitably labelled. Accordingly, the bridge-to-bridge and the scanning receiver may be contained in separate enclosures (equipment cases), in the same enclosure or as a part of a transceiver.

9. Attention is directed to the fact that this matter of VHF multiple watches is under active consideration by the Intergovernmental Maritime Consultative Organization's (IMCO) Subcommittee on Radiocommunications. The Commission is represented on the U.S. Delegation attending these meetings, and the comments received in this proceeding will also be used to aid members of the U.S. delegation to prepare for future sessions of the Subcommittee on Radiocommunications.

10. The proposed rules set out in the Appendix delineate the technical standards for receiving equipment to be used to satisfy multiple watch requirements. Comments are solicited concerning the adequacy of the proposal to provide maximum benefit to personnel responsible for safe navigation of vessels. Respondents should consider the technical specifications of the equipment and the operational aspects of this proposal.

11. Authority for this proposed rule making is contained in Sections 1, 4(i), 303(g) and (r), 355(d) and 384(4) of the Communications Act of 1934, as amended, Sections 1207(a) of the Vessel Bridge Radiotelephone Act, and Section 1221(2) of the Ports and Waterways Safety Act of 1972.

12. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before Novermber 10, 1978, and reply comments on or before December 11, 1978. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission will decide this matter solely on the basis of comments and other material that are made a part of the record in this proceeding.

13. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs or comments filed shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

14. Regarding questions on matters covered by this document contact Robert C. McIntyre, 202-632-7197.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. The title of Subpart H is amended to read as follows:

Subpart H—Watches, auto alarms and monitoring equipment for safety purposes

2. A new § 83.210 is added to read as follows:

§ 83.210 Receivers for multiple watch in the frequency band 156–162 MHz

(a) To fulfill the watch requirements for Bridge-to-Bridge; Vessel Traffic Services; and Distress, Safety and Calling; and to provide a voluntary watch on other frequencies necessary to conduct a ship's business; vessels may use:

(1) Separate receivers, or

(2) A scanning receiver in conjunction with an independent receiver capable of being tuned to the bridge-to-bridge frequency. Scanning receivers may not be used to monitor the bridge-to-bridge frequency. Scanning receivers shall comply with the technical standards set out in paragraph (b) of this section.

(b) The receivers used to comply with multiple-watch requirements may occupy the same or separate equipment enclosures (case) or be part of a transceiver, however, the scanning receiver may meet the following technical standards to be used for purposes of multiple watch:

(1) The scanning receiver shall provide a capability of scanning two or more frequencies but not more than six frequencies including the priority channel.

(2) The priority channel shall be checked at intervals of 1 second or less to determine if a signal is present on the priority channel.

(3) The priority channel may be capable of being set to any International Radio Regulation Appendix 18 frequency, but at a minimum shall be capable of being set to channel 16 and the VTS sector frequencies in § 83.361. The operator shall be able to select the frequency of the priority channel from the receiver front panel.

(4) Lockout[1] provisions may be provided on all scanned channels.

(5) A numeric indicator shall be provided showing the frequency or channel designation to which the priority channel is set. It is desirable, but not required, that other scanned channels have a similar numeric indication.

(6) A visible indication shall be provided showing the channel on which the receiver is sampling or scanning to determine the presence of a signal and to show on which channel a signal is being received.

(7) When operating in the normal scanning sequence, the receiver shall cease scanning and remain tuned to the priority channel during the time signals are present on that channel.

(8) To minimize susceptibility to spurious responses, the receiver shall not be designed to cover more than the frequency band specified in Appendix 18 of the international Radio Regulations (156–174 MHz).

(9) The dwell time of the scanning on any channel shall not be greater than 150 ms in the absence of a signal on that channel.

(10) Provisions may be included to permit the receiver to remain on any channel for a period not exceeding 2 seconds after reception of a signal on that channel, to permit reception of an interrupted transmission. However, during the normal scanning sequence such provisions shall not prevent the receiver from returning to the priority channel when a signal is present on the priority channel.

(11) The receiver may be provided with a facility for the operator to fix or hold reception on any channel.

(12) The receiver during the normal scanning sequence shall not remain on any channel, except the priority channel, for longer than 5 seconds unless the scanning is manually disabled.

(13) Provisions shall be included to switch the scanning facility on and off. When the scanning facility is switched off, the scanning receiver, if part of a transceiver, shall tune automatically to the same channel as the transmitter.

(14) The equipment shall be appropriately labeled to indicate that the scanning receiver complies with the provision of this section and has been certified in accordance with Part 2 of this chapter.

[FR Doc. 78-25746 Filed 9-12-78; 8:45 am]

[1] A scanning receiver is an electronically programmed device designed to tune to preselected channels in a sequential manner. The receiver automatically tunes to each channel selected and determines if a signal is present on that channel. When a signal is detected, the scanning is inhibited and the audio signal is connected to a speaker. If no signal is present the receiver automatically tunes to the next programmed channel. The scanning sequence is designed to be constantly repeated and one cycle is typically completed in a few seconds.

[1] Lockout is defined as the capability to eliminate a channel from the scanning sequence.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1033]

[S.O. No. 1335]

REPAIR AND RETIREMENT OF FREIGHT CARS

Service Order; Order To Show Cause

AGENCY: Interstate Commerce Commission.

ACTION: Service order No. 1335. Order to show cause why a proposed car service order should not be issued. Repair and retirement of freight cars.

SUMMARY: Each railroad is ordered to show cause why the Commission should not enter the attached service order requiring railroads having more than five percent (5%) of its ownership of 40-foot plain boxcars in unserviceable condition immediately to institute a repair program for each such car less than 35 years of age for which the estimated cost of repairs is $5,000 or less.

DATES: Respondents or any other persons wishing to provide information and argument relating to the necessity and appropriateness of entering the proposed order may file comments with the Commission on or before September 25, 1978.

ADDRESS: Fifteen copies of such documents shall be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone, 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided September 5, 1978.

Since good cause may exist for requiring any railroad having more than five percent (5%) of its ownership of 40-foot plain boxcars in unserviceable condition immediately to institute a repair program for each such car less than 35 years of age for which the estimated cost of repairs is $5,000 or less.

Accordingly, each railroad is ordered to show cause to the Commission by submitting fifteen (15) copies of a document setting forth all facts within its knowledge and legal arguments which might tend to show that entry of the attached Service Order is unnecessary or would be inappropriate. The Commission is interested in obtaining specific information with regard to the following areas of inquiry.

1. The number of its 40-foot plain boxcars held on its lines awaiting repairs as of 12:01 a.m., September 1, 1978, classified as follows:

40-ft narrow-door plain Boxcars

[Age of cars]

Estimated cost of repairs	35 years and under			Over 35 years			Total cars		
	Owned	Awaiting repairs	Percent to owned	Owned	Awaiting repairs	Percent to owned	Owned	Awaiting repairs	Percent to owned
$5,000 or less									
Over $5,000									

40-ft wide-door plain boxcars

[Age of cars]

Estimated cost of repairs	35 years and under			Over 35 years			Total cars		
	Owned	Awaiting repairs	Percent to owned	Owned	Awaiting repairs	Percent to owned	Owned	Awaiting repairs	Percent to owned
$5,000 or less									
Over $5,000									

NOTE.—Forty-foot narrow-door plain boxcars are defined as cars having mechanical designations "XM," "SMI" or "XMIH" and assigned car-type codes B100, B101, B105, B106, B110, B111, B115, B116, B120, B121, B125, and B126; 40-foot wide-door plain boxcars are defined as cars having mechanical designations "XM," "XMI" or "XMIH" and assigned car-type codes B102, B103, B104, B107, B108, B109, B112, B113, B114, B117, B118, B119, B122, B123, B124, B127, B128, and B129, all described on page 1170 of the Official Railway Equipment Register, ICC-RER No. 408, issued by W. J. Trezise, or successive issues thereof. Cars identified as having mechanical designation "BX," Passenger Box, are not to be included.

2. Its present program for the repair of such cars, separately by types, including separately its policy as to completion or deferral of light repairs (less than 20 man-hours) of empty boxcars in these categories and its policy as to more extensive repairs. If such policies include any monetary limits or any limitations based on the age of the cars such limits must be described.

3. The number of plain boxcars in each of the above categories which the carrier does not intend to repair and which are being held out of service awaiting retirement. Cars previously retired and held awaiting dismantlement or sale, which cars are excluded from the carrier's reported ownership, shall be excluded.

4. The estimated weekly capacity of the carrier's shops and repair facilities working one shift per day, 5 days per

be helpful, notice of the time and place for such argument will be published in the FEDERAL REGISTER.

(ii) This order shall apply to all 40-foot plain boxcars less than 35 years of age which are described in the Offi-

after the day the cars are set aside for repairs. (See note.)

(iii) Unserviceable system freight

Car type; number cars owned; number cars unserviceable; average daily surplus and shortage for each of the 10 immediately

ADDRESS: Comments may be addressed to the Director, U.S. Fish and Wildlife Service, Department of the

4. The estimated weekly capacity of the carrier's shops and repair facilities working one shift per day, 5 days per week, to restore plain boxcars to serviceable condition.

5. The estimated number of such cars which are removed from service each week for repairs.

6. The estimated net gain or loss of serviceable cars in these categories based on: (a) The carrier's present practices, and (b) the implementation of a repair program as required by the proposed Service Order.

7. The effects of the implementation of the repair program required by the proposed Service Order on the repairs of other types of cars presently scheduled for repairs. Show separately by car types.

8. The availability, source and amount of funds required to institute the proposed repair program.

9. The estimated degree that rehabilitation cost can be recovered under A.A.R. Circular OT-37-B, and whether or not the formula contained in these rules should be modified.

10. Any other information which respondents believe would be helpful to the Commission in determining the necessity and appropriateness of entering the proposed orders.

Oral argument is not presently contemplated by the Commission. However, if the Commission subsequently determines that an oral argument would be helpful, notice of the time and place for such argument will be published in the FEDERAL REGISTER.

(49 U.S.C. 1(10-17).)

A copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission. (Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham, and Clapp. Commissioner Murphy not participating.)

H. G. HOMME, Jr.,
Acting Secretary.

There is an acute shortage of 40-foot plain boxcars throughout the country. Many carriers have excessive numbers of cars held out of service for repairs, some of which can be restored to service without excessive expenditures of money. On July 1, 1978, the railroads reported that bad order ratios of 40-foot plain boxcars were:

Car type	Owned	Unserviceable Heavy	Light	Total	Percent	Repaired previous month (heavy)
40-ft narrow-door	70,297	6,726	2,402	9,128	13.0	407
40-ft wide-door	21,769	2,201	906	3,107	14.3	265
Total 40-ft plain	92,066	8,927	3,308	12,235	13.3	672

NOTE.—"Heavy" repairs are defined as those which require 20 or more man-hours of labor to accom

Certain of the carriers have ratios of unserviceable cars of these car types as high as 50 percent of their ownerships, but have no significant repair programs established for such cars.

Restoration to service of a reasonable portion of these defective cars will be of material assistance to the carriers in reducing the shortages of 40-foot plain boxcars available for loading.

It is in the opinion of the Commission that present regulations and practices with respect to the use, supply, and repair of freight cars are ineffective to overcome these shortages of cars and that an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than 30 days notice.

It is ordered,

§ 1033. Repair and retirement of freight cars.

(a) Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) *Application.* (i) The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(ii) This order shall apply to all 40-foot plain boxcars less than 35 years of age which are described in the Official Railway Equipment Register, ICC-RER-No. 408, issued by W. J. Trezise, or successive issues thereof, as having one of the following mechanical designations and car type codes:

40-foot narrow-door plain boxcars—Mechanical designations "XM," "XMI," and "XMIH"; Car-type codes B100, B101, B105, B106, B110, B111, B115, B116, B120, B121, B125, and B126.

40-ft. wide-door plain boxcars—Mechanical designations "XM," "XMI," and "XMIH"; Car-type codes B102, B103, B104, B107, B108, B109, B112, B113, B114, B117, B118, B119, B122, B123, B124, B127, B128, and B129.

(iii) Report to the Commission not later than the 15th day of each month, classified according to the mechanical designations described in paragraph (a)(1)(ii) of this section, the number of each such car type owned as of the first day of the month; the number set aside for repairs estimated to cost more than $5,000 per car; the number set aside for repairs estimated to cost $5,000 or less per car; the ratio of unserviceable cars to the number of cars of the same type owned or leased from others; the number set aside for dismantling, retirement, rebuilding, or reclassification to another car type; the number repaired the previous month at a cost of more than $5,000 per car; the number repaired the previous month at a cost of $5,000 or less per car; the number restored to service the previous month by rebuilding or reclassification from another car type; the number acquired, whether by purchase or by lease, the previous month; and the number retired the previous month.

(2) *Repairs required.* (i) Unserviceable freight cars of any of the car types described in paragraph (a)(1)(ii) of this section which require only light repairs shall be repaired and restored to serviceable condition within twenty-four (24) hours of the time they are found to be unfit for service or within twenty-four (24) hours of arrival at the nearest point at which repairs can be made. In computing time for application of this paragraph, Saturdays, Sundays, and holidays shall be excluded. "Light repairs" are defined as repairs requiring less than twenty (20) man-hours of labor.

(ii) Unserviceable system freight cars of any of the car types described in paragraph (a)(1)(ii) of this section for which the ratio of unserviceable cars to cars owned exceeds five percent (5%) and which require repairs estimated to cost $5,000 or less, but which will require the expenditure of twenty (20) or more man-hours of labor for completion, shall be repaired and restored to service not later than the 15th day of the second month after the day the cars are set aside for repairs. (See note.)

(iii) Unserviceable system freight cars of any of the car types described in paragraph (a)(1)(ii) of this section for which the ratio of unserviceable cars to cars owned exceeds five percent (5%) and which require repairs estimated to cost more than $5,000 shall be repaired and restored to service not later than the last day of the fourth month after the day the cars are set aside for repairs. (See note.)

(iv) Unserviceable foreign cars which will be repaired by the railroad holding the car shall be repaired within the time limits provided in paragraph (a)(2) (ii) or (iii) of this section without regard to the unserviceable car ratio of either the owner or the line repairing the car.

(v) Unserviceable foreign cars which will be returned to the owner for repairs will be forwarded to the owner for repairs within thirty (30 days of the day they become unserviceable, either on their own wheels or loaded on another car. After receipt by the car owners, such cars are subject to the time limits provided in paragraph (a)(2) (ii) or (iii) of this section for repair of cars.

(vi) NOTE.—In the application of paragraph (a)(2) (ii) or (iii) of this section, cars set aside for repairs prior to the effective date of this order shall be considered as having been set aside for repairs on that date.

(3) *Limitations on retirement.* (i) No serviceable 40-foot plain boxcar may be retired by any carrier unless it is thirty-five (35) or more years old.

(ii) No serviceable 40-foot plain boxcar less than 25 years of age which is in need of repairs may be retired unless the estimated cost of repairs exceeds eighty percent (80%) of its depreciated value, or fifty percent (50%) of the cost of a new car of comparable type, capacity and design, whichever is greater.

(iii) No freight car 25 years of age or older which is in need of repairs may be retired unless the estimated cost of repairs exceeds the following amounts:

25 years and less than 26 years—$5,000
26 years and less than 27 years—$4,000
27 years and less than 28 years—$3,000
28 years and less than 29 years—$2,000
29 years and less than 30 years—$1,000
30 years and less than 35 years—$500
35 years and older—No requirement.

(4) *Exceptions:* Exceptions to this order may be authorized to carriers by the Director or Assistant Director, Bureau of Operations, Interstate Commerce Commission, Washington, D.C. 20423. Request for exceptions must be submitted in writing and must contain the following data separately for each type of car for which an exception is requested:

Car type; number cars owned; number cars unserviceable; average daily surplus and shortage for each of the 10 immediately preceding weeks; proposed schedule of repairs; availability of repair facilities (1) operated by applicant, (2) operated by other than applicant; estimated remaining service life after repairs, if request is for permission for premature retirement.

(b) *Effective date.* This order shall become effective at 12:01 a.m.

(c) *Expiration date.* This order shall expire at 11:59 p.m., December 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

A copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 32]

HUNTING

Opening of Aransas National Wildlife Refuge, Texas, To Hunting of Migratory Birds and of Resident Game Species

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to add Aransas National Wildlife Refuge, Texas, to the refuge areas open for the hunting of migratory game birds and of resident game species. The Director has determined that this action would be in accordance with the provisions of all laws applicable to the area, would be compatible with the principles of sound wildlife management, would otherwise be in the public interest, and that such use is compatible with the management objectives established for refuge. Hunting, subject to annual special regulations, will provide additional public recreational opportunities.

RATES: Comments must be received on or before September 30, 1978.

ADDRESS: Comments may be addressed to the Director, U.S. Fish and Wildlife Service, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Donald G. Young, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20240, 202-343-4307.

SUPPLEMENTARY INFORMATION: Donald G. Young is also the primary author of this proposed rule. The Aransas National Wildlife Refuge is managed with the following entities in mind: Threatened and endangered species, migratory birds, environmental education, indigenous species, wildlife/wildlands-oriented recreation, research, historic sites, depredation control, and economic use.

This proposal would open approximately 10,000 acres of refuge lands on Matagorda Island to the hunting of migratory ducks, geese, and mourning doves; resident bobwhite quail and white-tailed deer. A total of approximately 8,992 acres of federally controlled land on Matagorda Island will remain closed to hunting. The closed areas will provide a sanctuary where game species may rest and feed without disturbance.

The area proposed for hunting does not include established critical habitat for the endangered whooping cranes. The Service has conducted an "Intra-Service Consultation Procedure" pursuant to section 7 of the Endangered Species Act of 1973, and the director has determined that this action will not affect any endangered species or their habitat.

Pursuant to the requirements of section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(c), and environmental assessment has been prepared on this proposal, which is available for public inspection and copying at room 2342, Department of the Interior, 18th and C Streets NW., Washington D.C. 20240, or by mail, addressing the Director at the address given above. A determination will be made prior to the time of final rulemaking as to whether this is a major Federal action significantly affecting the quality of the human environment.

Special circumstances are involved in the promulgation of this rulemaking which limit the amount of time the Service can allow for public comment. Opening dates for State hunting seasons are rapidly approaching and the public interest would not be served by delaying the opening of the refuge unnecessarily. Nevertheless, it is the policy of the Department of the Interior whenever practicable to afford the public an opportunity to partici-

pate in the rulemaking process. Therefore, interested persons may submit

notices

V 43 / 178 SE 13 78

pate in the rulemaking process. Therefore, interested persons may submit written comments, suggestions, or objections regarding the proposal to the Director by September 30, 1978. All relevant comments received will be considered by the Director prior to the issuance of a final rulemaking.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Accordingly, it is proposed to amend 50 CFR Part 32 by the addition of Aransas National Wildlife Refuge as follows:

§ 32.11 List of open areas; migratory game birds.

TEXAS

ARANSAS NATIONAL WILDLIFE REFUGE

§ 32.21 List of open areas; upland game.

TEXAS

ARANSAS NATIONAL WILDLIFE REFUGE

Dated: September 7, 1978.

ROBERT S. COOK,
Acting Director,
Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

COWTOWN HORSE AUCTION, TURLOCK, CALIF., ET AL.

Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agricultural Marketing Service, U.S. Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the act.

CA-173—Cowtown Horse Auction, Turlock, Calif.
IN-154—Cloverdale Sale Barn, Cloverdale, Ind.
IN-155—Producers Livestock Association, Vincennes, Ind.
MS-157—Corinth Livestock Commission Co., Corinth, Miss.
NC-149—Gus Z. Lancaster Stockyards, Inc., Dunn, N.C.
VA-152—Farmers Livestock Market, Rose Hill, Va.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the act as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, registrations, Bonds, and Reports Branch, Packers and Stockyards, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, by September 28, 1978.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 6th day of September 1978.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch, Livestock Marketing Division.

[FR Doc. 78-25719 Filed 9-12-78; 8:45 am]

[3410-02]

MALVERN LIVESTOCK AUCTION CO., MALVERN, ARK., ET AL.

Deposting of Stockyards

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), no longer come within the definitions of a stockyard under said act and are, therefore, no longer subject to the provisions of the act.

Facility No., name, location of stockyard, and date of posting

AR-127—Malvern Livestock Auction Co., Malvern, Ark., June 21, 1957.
FL-117—Paxton Livestock Cooperative Association, Paxton, Fla., February 29, 1960.
IN-148—Producers Livestock Association, Vincennes, Ind., April 28, 1969.
MI-140—Traverse City Livestock Commission Co., Inc., Traverse City, Mich., May 5, 1959.
TN-141—Tri-County Stockyards, McKenzie, Tenn., May 5, 1959.
TX-189—Hico Commision Company, Hico, Tex., September 11, 1961.
VA-120—Loudoun County Live Stock Market, Leesburg, Va., July 7, 1959.

Notice or other public procedure has not preceded promulgation of the foregoing rule. There is no legal justification for not promptly deposting a stockyard with is no longer within the definition of that term contained in the act.

The foregoing is in the nature of a rule relieving a restriction and may be made effective in less than 30 days after publication in the FEDERAL REGISTER. This notice shall become effective September 13, 1978.

(42 Stat. 159, as amended and supplemented; 7 U.S.C. 181 et seq.)

Done at Washington, D.C., this 6th day of September 1978.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch, Livestock Marketing Division.

NATIONAL FOREST MANAGEMENT ACT COMMITTEE OF SCIENTISTS

Meeting

The Committee of Scientists will meet on September 28-29, 9 a.m. to 5 p.m., at the Stouffers Denver Inn, 3203 Quebec Street, Denver, Colo.

The purpose of this work session will be to prepare the Committee's detailed technical analysis of the adequacy of the Section 6, National Forest Management Act regulations, published in the August 31, 1978 FEDERAL REGISTER. The following issues will be considered: (1) Lands suitable for timber production, (2) departures from nondeclining yield, (3) silvicultural standards, (4) diversity, (5) wilderness, and (6) coordination of public planning efforts.

The meeting will be open to the public. Persons who wish to attend and/or furnish written statements should notify Charles R. Hartgraves, Forest Service, Director, Land Management Planning, P.O. Box 2417, Washington, D.C. 20013, area code 202-447-5933.

Dated: September 7, 1978.

DOUGLAS R. LEISZ,
Deputy Chief, Forest Service.

ception of TXI, all the answers support consolidation. TXI believes that the Board has the discretion to treat the applications separately and that

through new licenses without the combination of carriers. While we believe that consolidation will lead to a more efficient use of everybody's time, we

V 43 / 178 SEP 13 78

that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. M. J. Spears, State conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for a 55-acre recreation development. The planned works of impovement include the installation of fences, an access road, parking areas, pavilion, picnic areas, play structure, restroom, scenic overlook, nature trails, and the preservation of historical points of interest. Drinking water and electrical services are also planned for the area.

The notice of intent not to prepare an environmental impact statement had been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. M. J. Spears, State Conservationist, Soil Conservation Service, Federal Office Building, 700 West Capitol Avenue, Little Rock, Ark. 72203, telephone 501-378-5445. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until October 13, 1978.

Dated: September 6, 1978.

[3410-16]

NORTH IDAHO COLLEGE PUBLIC WATER-BASED RECREATION, R.C. & D. MEASURE, IDAHO

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the North Idaho College Public Water-Based Recreation R.C. & D. Measure, Kootenai County, Idaho.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Amos I. Garrison, Jr., State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for constructing a day-use recreation area for North Idaho College and the city of Coeur d'Alene, Idaho. The planned works of improvement include facilities for picnicking, swimming, boating, landscaping, parking, and sanitation.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Amos I. Garrison, Jr., State Conservationist, Soil Conservation Service, Room 345, 304 North Eighth Street, Boise, Idaho 83702, telephone 208-384-1601. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until October 13, 1978.

Dated: September 6, 1978.

[3410-16]

TUNKHANNOCK RIVER STREET PARK PUBLIC WATER-BASED RECREATION AND CRITICAL AREA TREATMENT R.C. & D. MEASURE, PENNSYLVANIA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Tunkhannock River Street Park Public Water-Based Recreation and Critical Area Treatment R.C. & D. Measure, Wyoming County, Pa.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Graham T. Munkittrick, State conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for water-based recreation and critical area treatment. The planned works of improvement include developing portions of a 22-acre narrow strip along the Susquehanna River at Tunkhannock for picnicking, walking, riverbank fishing, and passive types of recreation. The planned action includes stabilizing approximately three acres of streambank by grading, shaping, and revegetation. Recreation facilities would include comfort stations, approximately 37 parking spaces, 24 picnic tables, 4,000 feet of trails, 15 benches, 2,200 feet of fence, shrub and tree planting, entrance landscaping, and park signs.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Federal Building, 228 Walnut Street, Harrisburg, Pa. 17108, telephone 717-782-2202. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until October 13, 1978.

Dated: September 6, 1978.

CIVIL AERONAUTICS BOARD

APPLICATION FOR AMENDMENT OF CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY UNDER THE BOARD'S PROCEDURAL REGULATIONS

SEPTEMBER 6, 1978.

Notice is hereby given that the Civil Aeronautics Board on September 6, 1978, received an application, docket 33359, from Texas International Airlines, Inc., for amendment of its certificate of public convenience and necessity for Route 82 so as to eliminate the stop requirement in condition (4) for services between Midland/Odessa, Lubbock, and Amarillo, Tex., on the one hand, and Los Angeles, Calif., on the other.

The applicant requests that its application be processed under the expedited procedures set forth in subpart M of part 302 (14 CFR Part 302).

PHILLIS T. KAYLOR,
Secretary.

[Docket Nos. 33283; 33112; Order 78-9-24]

PAN AMERICAN-NATIONAL ACQUISITION CASE AND TEXAS INTERNATIONAL-NATIONAL ACQUISITION CASE AND ENFORCEMENT INVESTIGATION

Order Consolidating Applications

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 7th day of September 1978.

On August 24, 1978, Pan American filed an application for approval of its acquisition of control of National Airlines and for approval of a merger between the two companies. Texas International Airlines also wants to acquire National, and a hearing on the TXI application and related issues has already been ordered by the Board. Order 78-8-150.[1] Pan American has filed a motion seeking consolidation of the two applications, arguing that the cases involve the same primary problems, cover many very similar issues, and that consolidation will be efficient and not result in delay.

Answers to Pan American's motion have been filed by National Airlines, Texas International Airlines, the United States Department of Transportation, and the Bureau of Pricing and Domestic Aviation.[2] With the exception of TXI, all the answers support consolidation. TXI believes that the Board has the discretion to treat the applications separately and that consolidation may complicate the case. TXI also argues that, if the applications are consolidated, the Board should maintain its original target dates for completion of the proceeding. It asks the Board to describe how the Pan American issues fit into its case, if consolidation is ordered.

We have decided to consolidate the two proceedings. Although initial information requests have been filed in the TXI case, and a prehearing conference has already been scheduled[3] we do not believe that catch-up period for the Pan American case need be lengthy. We do believe that the target date set for the Initial Decision should be modified to reflect the additional workload. Order 78-8-150 set January 2 as the target; we will extend this to February 1, 1979. We will target March 24 for our final decision.

We have decided to consolidate these proceedings for convenience, efficiency and the development of a complete record. There are a number of issues, particularly broad questions of competition policy, which the parties would duplicate if the proceedings were separate. TXI and Pan American would obviously intervene and participate in each other's hearing and many other parties would also be required to appear twice. We are enthusiastic about the prospect of two competing applicants arguing against one another; this should sharpen the issues and the debate. We hope that they will focus their arguments on the competitive matters that are of primary concern to us. And we believe that this can best be accomplished in a single hearing.

It is important, however, that the parties not misread the reasons for consolidation. We caution them not to look on these two proposed applications as presenting mutually exclusive comparative facts. The proceeding should not be focused principally on the comparative public benefits of either combination of route systems. The Board's route program is likely both to make futile any attempt to "freeze" the route system of any of these carriers long enough to examine it, and to make it possible to achieve any alleged public service benefits through new licenses without the combination of carriers. While we believe that consolidation will lead to a more efficient use of everybody's time, we would like all concerned to understand that Pan American's application, like the Texas takeover, raises very distinct questions about competition policy. We expect these to be considered separately for each proposed combination. Our general concerns about the impact of mergers on the potential for a successful transition to a market-regulated system were spelled out at some length in Order 78-8-150. These concerns naturally carry over into the Pan American application. Indeed, this is one of the overlapping issues that make consolidation attractive, and we want a clear statement from everyone on how they think approval of either one or both of these acquisitions would affect competition in general and the possibility of a successful transition period in particular.

In Order 78-8-150, we pointed to the actual and potential competition that existed between TXI and National as an area that needed close consideration.[4] We have similar concerns about a Pan American—National combination.

Pan American and National typify the rapid shift that can take place from potential to actual competition under our pro-competitive licensing and pricing policies. A month ago these two carriers engaged in only very limited actual competition. Pan American had only fill-up rights in two National markets, New York-Washington/Baltimore and Miami-Tampa, and these rights are limited by long-haul restrictions and by the need to use Dulles Airport rather than close-in National Airport in Washington, D.C. But this limited competition is a small fraction of the potential between these two carriers, especially since they both operate fleets that have long-haul, transcontinental and international capabilities. Both carriers have stations at many of the major east coast cities, both serve Los Angeles and San Francisco, as well as London, Paris, Frankfurt, and Amsterdam. Just in the last week we granted Pan American an exemption which will permit it to operate domestic fill-

[1] August 25, 1975. Also, see Order 78-8-151, consolidating the question of whether Texas and Pan American can continue to purchase National stock in advance of a Board decision on their control applications.

[2] All parties to the Texas International case were provided telegraphic notice of our intention to deal with this question expeditiously and these parties were requested to file responses by August 30, in advance of the date that would otherwise have been required by our rules. As noted, responsive answers have been filed and prompt action accords with the interest of all parties. See Rule 302.12.

[3] By notices issued on September 1, the prehearing conference in the Texas acquisition case was postponed, and a consolidated conference for both proceedings has been set.

[4] This issue, as specifically stated in the TXI order, refers to lessening competition *in any region of the United States.* There should be no question in anybody's mind that this includes foreign air transportation. The impact of an anticompetitive consolidation is felt by the consumer first at the point of sale. For example, a reduction in competition between Miama and Europe would have an impact on the sales of foreign air transportation in the Miami metropolitan area. The Miami area is clearly "a region of the country" for section 408 purposes.

up routes in connection with its Houston, Los Angeles, Miami and San Francisco-based international operations.[5]

interest. And, of course, the record should include the consideration of any new public service benefits that

reduce costs and increase productivity, even the most efficient of companies must adjust prices upward periodically

er parties argue that despite high actual profits in the transatlantic market, TWA persists in forecasting

The Board concludes that the proposed increases in normal economy fares may be unlawful and should be

basic point-to-point transportation, and in any event high enough to protect generally high-cost carriers. De-

up routes in connection with its Houston, Los Angeles, Miami and San Francisco-based international operations.[5] This could result in an immediate expansion in the actual domestic competition between these two carriers. The same type of expansion could take place internationally as a result of decisions in the *U.S.-Benelux Low-Fare Proceeding*, and related dockets,[6] where National seeks a direct extension into some of Pan American's European markets. Pan American, and of course National if it should agree to the Pan American proposal,[7] should confront the competitive problems raised by a consolidation of two carriers that are thus poised to become active, competitors over a widespread area of operations.

This statement of our concern about competitive impact is intended not to prejudge this application, but to direct the energies of the parties to what most concerns us. The applicants are free to argue that these concerns are misguided, that a more competitive system will result, that there are offsetting public interest reasons for approving the merger, and that there are no feasible less anticompetitive alternatives for achieving those benefits. On this last point, the consideration of less anticompetitive alternatives should include the possibility that Pan American's limited domestic authority can be cured by internal expansion and new licenses.

In Order 78-8-172, we indicated a willingness to give consideration to an overall plan for system realignment by Pan American, and we anticipate that it will offer a response to this as part of its presentation. We ask that the administrative law judge and the other parties, especially the Bureau of Pricing and Domestic Aviation, do their best to see that this alternative is fully developed.

While we have now described some of the problems that concern us the most, this is not an exclusive statement of the issues or a limitation on the right of any party to argue its case. The general merger issues have been outlined in Order 78-8-150, and they apply here. TXI has raised a question about a possible violation of section 408, and such issues are always considered as elements of the public interest. And, of course, the record should include the consideration of any new public service benefits that would arguably result from the proposed merger, although here again we are interested in whether these could also be feasibly achieved by expanding the licenses of the individual companies.

Accordingly, 1. We consolidate the application of Pan American World Airways for control of National Airlines, Docket 33283, with the proceedings in Docket 33112.

2. We direct the administrative law judge presiding over this consolidated proceeding to issue his decision by February 1, 1979.

3. We direct Pan American World Airways to file the environmental submissions required by Part 312.12 of the Board's Procedural Regulations within 30 days of service of this order.

4. Petitions for reconsideration of this order shall be filed within eight days of service of this order (by September 15, 1978) and answers five days thereafter (by September 20, 1978).

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[8]
Secretary.

[Docket No. 33276; Order 78-9-38]

TRANS WORLD AIRLINES, INC.

Order of Suspension and Investigation Regarding Transatlantic Fare Increases

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 23d day of August 1978.

On June 23, 1978, Trans World Airlines, Inc. (TWA), filed fare increases for effect November 1, 1978, through March 31, 1979, in its U.S.-Europe winter season fares. The increases average 7.5 percent. With some exceptions, first-class and normal economy-class fares are increased five percent and promotional fares 10 to 15 percent. The filing proposes no new low fares, although exisiting ones are retained with increases; no increases were filed to countries not directly served by TWA.

Urging early approval of its filing so that the traveling public and foreign governments will have ample advance notice of the changes, TWA contends that rapidly escalating costs, particularly in commissions and reservations expense, together with yield erosion from new low fares, have resulted in a severe decline in profitability and a pressing need for additional revenue; while it has taken steps to control and reduce costs and increase productivity, even the most efficient of companies must adjust prices upward periodically to servive in an inflationary economy; while higher load factors have helped it survive the squeeze between rising cost and declining yield, traffic growth clearly cannot continue at the rapid rate now experienced without dratically eroding the quality of scheduled services offered; and the increases will not result in excessive returns.[1]

TWA points out it has proposed only modest percentage increases in normal fares with greater percentage increases in promotional fares, in deference to the Board's historic concern with the relationship between them. Since most U.S.-Europe first-class fares took a five percent increase last April, it proposes to increase them only to Germany and Switzerland, which took no increase then, merely to align these points with the rests of Europe. TWA argues that while the Board has permitted domestic coach fare increases, which have resulted in higher coach yields domestically than internationally, it has permitted no increases in transatlantic normal economy fares since Novermber 1974; maintaining this "lid" is in direct opposition to the current Board's policy of placing reliance on competitive forces and managerial prerogative in developing an optimal fare structure; and increases in these fares are a market decision best left to carrier managment. TWA maintains the increases in promotional fares are necessary to restore a more reasonable relationship to operating costs as well as to eliminate traffic distribution problems stemming from the low budget and standby fares.

Acknowledging that its filing does little to reform the existing fare structure, TWA states it has unsuccessfully advocated structural reform in the past and is very dissatisfied with the current chaotic structure in which fares vary almost country by country. But any efforts at reform, it feels, stand little chance of success, and extension of the current structure into the winter season is the only approach likely to secure the necessary additional revenue with the approval of all parties.

Requesting suspension and investigation of the increases proposed by TWA, the Aviation Consumer Action Project (ACAP), together with three individuals who are consumers of commercial air services,[2] contend that TWA's justification is invalid and insufficient to support the excessive and massive increases sought. The consumer parties argue that despite high actual profits in the transatlantic market, TWA persists in forecasting an indadequate rate of return; that TWA's cost data for the increases is distorted by a number of questionable procedures such as inclusion of the capitalized value of leased equipment in its rate-making investment base and bizarre and illogical elasticity assumptions for traffic moving under different fares, which present an inaccurate picture of its present and projected return under the fares proposed; and that in failing to provde cost data by class of service, TWA has made it impossible to judge whether each fare is profitable at current levels and, if not, what percentage increase is warranted. The consumer parties also maintain that TWA has manipulated North Atlantic traffic growth statistics to support its contention that the new low fares have been barely profitable, and that other statements by TWA relating to the general, rising trend in travel costs and the difference in yields experienced in domestic and transatlantic service are either irrelevant or misleading. Finally, while endorsing the Board's current philosophy on competition as the most efficient regulator of fare levels, the consumer parties note that the transatlantic market is still closed and the responsibility for protecting consumers from excessive fares still rests with the Board; and TWA's increases will affect both full fare passengers, who are already paying exorbitant fares, and low fare passengers, who will find that travel this winter will cost almost as much as travel during the current peak season.[3]

In an answer to the complaint, TWA defends its comparison of transatlantic and domestic yields and asserts that its treatment of leased equipment is not contrary to the Board's policies; no methodology has been developed to break down expenses by fare category; and although TWA's corporate, system-wide profits have been good this year, its profitability in transatlantic scheduled service has declined from 1977 levels due to yield erpsion, notwithstanding record load factors. Finally, TWA states that excluding the effects of leased equipment capitalization and elasticity would still produce only a 10.2-percent return under proposed fares.[4]

[1] TWA forecasts returns on investment of 6.7 percent and 7.9 percent under existing and proposed fares, respectively, during the 12 months ending March 31, 1979.

[2] Lawrence J. Halloran, Joseph J. McGee and Joanne Yancy.

[3] In an amendment to their complaint, ACAP et al. point out that in 1978 TWA has had the most profitable second quarter in its history.

[4] The carriers have been ordered by the Board to show the capitalized value of leased equipment in their Form 41 reporting to conform with reporting requirements of the Securities and Exchange Commission, and for rate making purposes the Board permits a profit on the asset value of leased equipment when such value exceeds the industry average by a significant amount. As to elasticity, we recognize that passengers are not insenstive to changes in price but determination of its impact on traffic involves a great deal of speculation and assumption. Taking all these matters into consideration, however, there is not indication that TWA will earn excessive profits under the proposed fares, especially in view of our denial of the normal economy fare increases. Our reasons for denial, as will appear below, are not based on a finding that ROI will be excessive; for this reason, we need not attempt here to resolve these questions about the accuracy of TWA's calculations.

The Board concludes that the proposed increases in normal economy fares may be unlawful and should be suspended pending investigation. The Board has decided to take no action on the other fare proposals:

Over the years the North Atlantic has developed into one of the most competitive international markets. There are at present more than 34 U.S. and foreign carriers providing scheduled service to a wide variety of North Atlantic destinations along some of the densest, most heavily traveled international routes in the world. In the past, competition has largely been confined to improvements in schedule convenience or service amenities, since price competition was all but precluded in intercarrier price fixing. There is evidence that restricting competition results in relatively low load factors and relatively high cost, high fare service.

The Board believes there should be greater reliance on market forces to determine the price as well as the quantity and quality of air services and that governments should limit their interventions to preventing unjust discrimination, predation and the abuse of monopoly power. This policy, spurred by the entry of Laker and the continued competition of the supplemental carriers, has resulted in significant new price competition in the Atlantic market over the past year, concentrated at the low end of the fare spectrum. The more price-elastic segment of the market has been the principal beneficiary, but despite the entry of some carriers new to specific city-pair markets and our encouragement of carrier pricing initiatives, there has been little price competition in normal economy service. The overall industry demand for this service is viewed as relatively price inelastic, so that in an oligopolistic market, such as the North Atlantic, if each carrier assumes that a price cut will be matched by its rivals, there is no incentive for a fare reduction which is not expected to produce an overall increase in profits.

These fares are at present at a level set, in a long series of carrier agreements, high enough to cover the cost of providing services not required for basic point-to-point transportation, and in any event high enough to protect generally high-cost carriers. Designed to permit IATA member carriers not certificated over a particular route to compete for that traffic over an indirect routing, the fares include built-in allowances for stopovers and for 20 percent mileage circuity at no extra charge. These are services which many passengers do not need or use yet must pay for.

Against this background, no increase in normal economy fares seems warranted. This does not mean the carriers must be denied the opportunity to recover their costs and a reasonable return. A more competitive industry would set economy fares at the cost of direct point-to-point service, and have separate, unboundled charges for stopovers and circuitous routings. A passenger could then select from among these offerings on the basis of the value to him of the various, separately priced parts of the package, and would be free to choose only point-to-point transportation without paying for hidden extras. In fact, partially unbundled economy fares are already in effect in a few markets. Alitalia has a direct service, one stopover, economy fare in effect in the U.S.-Italy market and British Caledonian has a similar direct service, one stopover, "executive" fare in effect between Houston and London.

Similar reforms in other transatlantic markets are within reach, using fares that already exist. Several confirmed reservations fares for individual travel are currently available to U.S.-Europe air passengers: The normal economy fare with unlimited free stopovers, the 14/21-day excursion fare with two free stopovers in each direction, and the 22/45-day excursion fare, which allows no stopovers. All three have a 20-percent free-circuity allowance. Aside from the one-way availability of the normal fare (the other two are round-trip fares), the only relevant difference among the fares in terms of the cost to the carriers of performing the service is related to the stopover privileges. Obviously, the length of stay requirement is a contrived one; and if a carrier such as Air France is willing to sell a no-stopover fare at a discount of 25-27 percent from the normal fare (New York-Paris), we see no reason why that fare should be encumbered with a meaningless minimum-maximum stay requirement. Such period-of-stay rules are prime examples of fare conditions which do not involve or reflect cost savings. Stated another way, we would be prepared to accept TWA's proposed increases in normal fares if the passenger desiring no stopovers could purchase a reasonable, on demand fare at levels similar to the 22/45-day excur-

sion fare, but without the round-trip or minimum-maximum stay requirements. Similarly, other fares, priced at well as a holdover from the old system of setting fares by inter-carrier agreement, and the incumbent carriers' ap- much less than the latter.[7] Yet it is significant that when compared on the basis of price per mile to the passen-

on-demand service passengers, and to charging them a premium price for services they do not want. For years the IATA carriers have been trying to

7. Copies of this order be filed in the aforesaid tariff and be served upon Trans World Airlines, Inc., and counsel for the Aviation Consumer Action

(3) Discussion on the preceding films.

sion fare, but without the round-trip or minimum-maximum stay requirements. Similarly, other fares, priced at higher levels and offering varying numbers of stopovers, could be derived from the current 14/21-day excursion and normal economy fares, which now allow two free stopovers and unlimited stopovers, respectively. We certainly take no position on the proper number of stopovers to be offered at such levels; that is up to the carriers to determine. Perhaps the simplest approach, however, would be for them to adopt a low single factor point-to-point fare and charge a specific additional amount for each stopover—an idea the Board has espoused for a number of years. Undoubtedly other combinations would occur to imaginative managements.

Unfortunately, no such proposals are now before us, and we are concerned about what may happen if we simply allow TWA's increases to take effect. We are not convinced that we can rely on market forces to secure competition in economy fares during this period of transition. The number of competitors for such passengers in city-pair markets is severely restricted at this time. Between the U.S. and U.K., the provisions of Bermuda II limit the number in most city-pairs to two—one U.S. and one U.K. carrier—although for two U.S.-U.K. city-pairs two carriers may be designated by each party. Similarly, at the present time, competition between direct service carriers in other U.S.-Europe city-pair markets is limited to two or three combination service carriers. As of yet no new reserved-seat, scheduled service competitors have been certificated for transatlantic service, and while several existing carriers have been recently awarded new transatlantic points, their entry has not altered the limit of two now-stop carriers per city-pair that generally prevails.[5] Further, there are no outside competitors for on-demand passengers similar to the supplemental carriers. Lastly, while it can be argued that the presence of fifth-freedom carriers in a few city-pair markets increases the total number of competitors in those markets, in reality their competitive impact is limited because governments have restricted their operations in order to protect the traffic of their national airlines. The competitive process is not yet in gear as far as normal economy service is concerned. This is partially a result of our inability to bring new carriers devoted to price competition into the on-demand market as quickly as we would like, as well as a holdover from the old system of setting fares by inter-carrier agreement, and the incumbent carriers' apparent assumption that price competition in the normal economy market is not in their self-interest because of the inelasticity of demand. The circle of scheduled route carriers offering normal economy service over the Atlantic is still closed, and it would be naive for us to approve TWA's proposal with the hope that competition will operate to prevent or significantly temper these increases. It is quite likely that if approved, the increases will be adopted by most other carriers and the normal economy passenger will remain excluded from the benefits of the improving competitive regime.

Thus we have reluctantly concluded that we must suspend TWA's proposed increase in normal economy fares. We have a healthy distrust of our ability to divine what individual offerings the market wants. But in this transition period, we believe it is the Board's responsibility to interfere temporarily in the fare-setting process when market forces are as yet too weak to do the job. We view this as a temporary measure, to be abandoned as rapidly as possible once the natural forces of competition are unbound.[6]

TWA's arguments do not persuade us to the contrary. It contends that although the Consumer Price Index has risen 23 percent since late 1974, the Board has permitted no increases in North Atlantic economy fares yet has allowed domestic coach fares to rise over 13 percent on transcontinental routes, and 30 percent on shorter domestic segments, with the result that TWA's average domestic coach yield is now higher than its average transatlantic economy fare yield. This, together with the higher and increasing cost of international operations, is proof, says TWA, that the moderate increases are reasonable and necessary. But these comparisions do not prove its point. One would expect transcontinental coach fares to yield more than transatlantic economy fares, since the former distances are much less than the latter.[7] Yet it is significant that when compared on the basis of price per mile to the passenger, transatlantic economy fares are actually higher than transcontinental coach: the latter average 8.36 cents per mile in nine major markets, while the average current basic season per mile fare in 14 transatlantic markets served by TWA is 9.18 cents—almost 10 percent higher. With the increases proposed, the average would rise to 9.65 cents, or more than 15 percent above the domestic average.[8] This disparity in passenger per mile price reflects the fact that transatlantic fares include large allowances for dilution from stopovers and circuity. TWA's argument ignores the fact that, unlike the situation internationally, the Board's domestic policies have produced mileage related coach fares at levels more closely related to the costs of direct service, with an inconsequential allowance for circuity and none for stopovers. Naturally, as costs have gone up, we have allowed coach fares to rise. Furthermore, the DPFI formula fares in longhaul markets were acknowledged to be well above cost in the decision. Finally, we are now in the process of removing the *DPFI* fare constraints in step with our policy of freeing up entry of new carriers in domestic markets.

Nor are we convinced by TWA's argument that if carrier management sets the economy fares at too high a level the consumer will make his views known by selecting some other. This fare is the principal one used by the non-discretionary traveler, and his opportunity to choose an "alternate" fare is for all practical purposes nil because of the restrictions attached to the others and because most of them are available for round-trip travel only.

The Board will take no action on the increases sought in first-class and discount fares. With the exception of the first-class, the increases are in a lower end of the structure, where the forces of price competition appear to be working.

We are rather disappointed by TWA's judgment that the kind of needed changes in the North Atlantic fares structure we have briefly described stand little chance of success. It knows our historic attitude toward economy fares and their structure—our opposition to a rigid, high fare for on-demand service passengers, and to charging them a premium price for services they do not want. For years the IATA carriers have been trying to raise these fares and for years we have tried to get them down; thus far we have been limited to disapproving increases, so the old IATA levels have continued in effect. It appears that this situation is beginning to change, and carriers will begin to compete for normal-fare traffic by unbundling the various services now included in the price.[9] If there is a serious potential for more competition, present fare levels provide a point of departure every bit as convenient as the proposed ones, and until we have some assurance that there is real price competition in this part of the market, we are not prepared to approve increases in normal economy fares as they exist today.

Accordingly, pursuant to sections 102, 204(a), 403, 801, and 1002(j) of the Federal Aviation Act of 1958, as amended:

It is ordered, That:

1. An investigation be instituted to determine whether the fares and provisions set forth in the Appendix hereof, and rules and regulations or practices affecting such fares and provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial or otherwise unlawful, and if found to be unlawful, to take appropriate action to prevent the use of such provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board, the tariff provisions specified in the attached Appendix are suspended and their use deferred from November 1, 1978, to and including October 31, 1979, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the board;

3. This order shall be submitted to the President [10] and shall become effective on November 1, 1978;

4. The investigation ordered herein be assigned for hearing before an Administrative Law Judge of the Board at a time and place hereafter to be designated;

5. The motion of the Aviation Consumer Action Project, Joanne Yancey, Lawrence J. Halloran, and Joseph J. McGee, to amend their complaint in Docket 33053 is granted;

6. Except to the extent granted herein, the complaint in Docket 33053 is dismissed; and

7. Copies of this order be filed in the aforesaid tariff and be served upon Trans World Airlines, Inc., and counsel for the Aviation Consumer Action Project.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[11]
Secretary.

[5] It is the relative absence of a realistic threat of new entry into the market for on-demand services that is more troublesome than the absolute number of competitors at any one time.

[6] The best way to promote price competition in normal economy fares may be to certificate additional carriers for transatlantic routes, especially those which as part of their applications for new awards offer to establish lower, unboundled, economy fares. The Board has new service under consideration in the *United States-Benelux Low-Fare Proceeding,* and the focus in that proceeding will be on innovative low fares. We will, of course, expect applicant carriers to focus on the level of *all* fare categories in their proposals. But any expansion of competition through this proceeding will directly affect only the Benelux countries, which are a relatively small portion of the total transatlantic market. The greater part of the market will be only affected indirectly; so this proceeding cannot be viewed as a cure-all.

[7] In addition, domestic transcontinental services typically include more "free" amenities than do North Atlantic economy services.

[8] This comparison is between domestic *all year* coach fares and transatlantic *off-peak* economy fares. Peak fares are, of course, higher; and the average transatlantic per mile fare of 10.28 cents for both periods is almost 23 percent above the average for domestic coach.

[9] TWA now participates in lower economy fares that are now in effect between the United States and Italy. We question if even those are truly cost related, considering the availability of lower priced excursion fares which entail essentially identical costs.

[10] This order was submitted to the President on August 28, 1978.

[11] All members concurred.

ADVISORY COMMITTEE ON EAST-WEST TRADE

Partially Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. app. (1976), notice is hereby given that a meeting of the Advisory Committee on East-West Trade will be held on Wednesday, September 27, 1978, at 9:30 a.m., in Room 6802, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

The Committee was estalbished on February 11, 1974 to advise the Department, through the Deputy Assistant Secretary for East-West Trade, on ways to further its mission to promote and encourage the orderly expansion of commercial and economic relations between the United States and the communits countries.

The Committee meeting agenda has two parts:

GENERAL SESSION, ROOM 6802

MORNING 9:30 A.M. TO 12:30 P.M.

(1) Summary of recent events in East-West trade by the Deputy Assistant Secretary for East-West Trade.

(2) Film Presentation: "The Price of Freedom and Security" and "There Is No Defense."

(3) Discussion of the preceding films.

(4) Review and comment on upcoming meetings of joint U.S.-East European and Soviet Commercial commissions.

EXECUTIVE SESSION, ROOM 6802

AFTERNOON 2 P.M. TO 4 P.M.

(5) Prospects for U.S.-Soviet trade; the Crawford affair, Dresser Industries case, etc.

The General Session of the meeting will be open to public observation. Approximately 50 seats will be available (including 5 seats reserved for media representatives) on a first-come first-served basis.

A period will be set aside for oral comments or questions by the public which do not exceed 10 minutes each. More extensive questions or comments shold be submitted in writing before September 22, 1978. Other public statements regarding committee affairs may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c).

Copies of minutes of the open portion of the meeting will be available 30 days after the meeting upon written request addressed to the Industry and Trade Administration, Freedom of Information Officer, Freedom of Information Control Desk, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Gary R. Teske, Committee Control Officer, Office of East-West Policy and Planning, Bureau of East-West Trade, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C 20230, telephone 202-377-2403.

The complete Notice of Determination to close the aforementioned portion of the September 27 meeting of

the Advisory Committee on East-West Trade is hereby published.

KEMPTON B. JENKINS,
Director, Office of Export Administration.

Industry and Trade Administration

Export Administration Regulations; Amendment

Pursuant to section 10(a)(1) and 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. app. (1976), notice is hereby given that a meeting of the Advisory Committee on Export Administration will be held on Wednesday, September 27, 1978, at 9:30 a.m., in Room 6802, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

The Committee was established on January 3, 1973 to advise the Department on matters pertaining to the regulation of exports.

The Committee meeting agenda has two parts:

GENERAL SESSION, ROOM 6802

MORNING 9:30 A.M. TO 12:30 P.M.

(1) Discussion of the Export Administration Act.

(2) Discussion of the Export Administration Regulations.

(3) Discussion of the Commodity Control List.

(4) Discussion of the Export Control Program.

EXECUTIVE SESSION, ROOM 6802

AFTERNOON 2 P.M. TO 4 P.M.

(5) Discussion of the Export Administration Act.

(6) Discussion of the Export Administration Regulations.

(7) Discussion of the Commodity Control List.

(8) Discussion of the Export Control Program.

The General Session of the meeting will be open to public observation. Approximately 50 seats will be available (including 5 seats reserved for media representatives) on a first-come first-served basis.

A period will be set aside for oral comments or questions by the public which do not exceed 10 minutes each. More extensive questions or comments shold be submitted in writing before September 22, 1978. Other public statements regarding committee affairs may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c).

Copies of minutes of the open portion of the meeting will be available 30 days after the meeting upon written request addressed to the Industry and Trade Administration, Freedom of Information Officer, Freedom of Information Control Desk, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Gary R. Teske, Committee Control Officer, Office of East-West Policy and Planning, Bureau of East-West Trade, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C 20230, telephone 202-377-2403.

The complete Notice of Determination to close the aforementioned portion of the September 27 meeting of

the Advisory Committee on East-West Trade is hereby published.

KEMPTON B. JENKINS,
Deputy Assistant Secretary for East-West Trade.

ADVISORY COMMITTEE ON EAST-WEST TRADE

NOTICE OF DETERMINATION

The Secretary of Commerce, having determined that it is in the public interest in connection with the duties imposed on the Department by law, initially established the Advisory Committee on East-West Trade ("the Committee") on February 11, 1974, pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. (1976 ed.). The Committee, which currently has 21 members, will terminate no later than December 10, 1978, unless renewed by proper authority by appropriate action.

The Committee provides advice on ways to promote, facilitate and coordinate the expansion of two way trade with the Soviet Union, Poland, Hungary, Czechoslovakia, Romania, Bulgaria, the Peoles's Republic of China, and certain other areas of the world with similar economic/political structures, so as to contribute materially to a more positive balance of trade and payments situation.

The Committee may identify and make recommendations concerning current and proposed government policies and programs relating to the promotion and expansion of such trade; advise on the development of future government plans and actions directed at promoting and increasing such trade and improving trading relations; advise on ways U.S. firms could enter this trade or expand existing trade programs and activities; advise on problems encountered by U.S. business in pursuing such trade and recommend solutions; and provide a forum for business, the academic community and government to discuss problems and issues in the field of East-West trade.

The Committee's activities are conducted pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976 ed.), and Office of Management and Budget Circular A-63 (Revised), Advisory Committee Management, effective May 1, 1974. Section 10 of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, provides, among other things, that the meetings of advisory committees are to be open to the public, and to public participation, unless the President, or the head of the agency to which the advisory committee reports, determines that such meetings or portions thereof may be closed to the public in accordance with 5 U.S.C. 552b(c).

On September 7, 1977, the Assistant Secretary for Administration determinded that a one-hour portion of the September 28, 1977 meeting of the Advisory Committee on East-West Trade could be closed to the public, because Committee discussions concerned matters listed in 5 U.S.C. 552b(c)(9)(B). Such discussions addressed the progress by the U.S.S.R. and other East European countries toward implementation of the economic and commercial (Basket II) provisions of the Helsinki Final Act. Advice and information received from the Committee at this meeting was used to formulate and implement an effective U.S. Government negotiation at the October, 1977 Belgrade Conference on Security and Cooperation in Europe.

5 U.S.C. 552b(c)(9)(B) provides that agency meetings or portions thereof may be closed to the public where they are likely to disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action. In order to provide advice to the Department under terms of its charter, on September 27, 1978 from 2 p.m to 4 p.m. the Committee will discuss future U.S. Government actions regarding U.S.-Soviet trade in light of the recent arrest of a U.S. businessman in Moscow and recent imposition of validated licensing controls on exports to the U.S.S.R. of commodities utilized in the exploration or production of petroleum or natural gas. Advice and information received from the Committee at this meeting will subsequently be used by the Government in the formulation and implementation of policy on these issues. Public disclosure of information and advice furnished by the Committee could thwart the formulation and implementation of effective U.S. Government actions on these matters. In addition, knowledge that attributed information provided by the Committee would be disclosed would inhibit frank discussions of such issues by committee members at the September 27 meeting. All remaining portions of the meeting will be open to the public.

Accordingly, I hereby determine, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the portion of the Committee meeting scheduled from 2 p.m. to 4 p.m. on September 27, 1978, which will address matters discussed in the preceding paragraph, shall be exempt from the provisions of section 10 (a)(1) and (a)(3) relating to open meetings and public participation therein, because the aforementioned Committee discussions will be concerned with matters listed in 5 U.S.C. 552b(c)(9)(B). Remaining portion of the meeting will be open to the public.

Dated: September 8, 1978.

ELSA A. PORTER,
Assistant Secretary for Administration.

Dated: September 7, 1978.

DANIEL GARBERN,
Acting Assistant General Counsel for Administration.

[FR Doc. 78-25899 Filed 9-12-78; 8:45 am]

[3620-01]

DEPARTMENT OF DEFENSE

Defense Logistics Agency

PRIVACY ACT OF 1974

Amendments to o System of Records

AGENCY: Defense Logistics Agency; DLA.

ACTION: Notice of amendments to a system of records.

SUMMARY: The Defense Logistics Agency proposes to amend a record system subject to the Privacy Act of 1974. The specific changes to the system being amended are set forth below followed by the system published in its entirety as amended.

DATES: This system shall be amended as proposed without further notice on October 13, 1978, unless comments are received on or before October 13, 1978, which would result in a contrary determination and require republication for further comments.

ADDRESS: Any public comments, including written data, views, or arguments concerning the amendment should be addressed to the System Manager identified in the record system.

FOR FURTHER INFORMATION CONTACT:

Mr. Kenneth C. Scheflen, Defense Manpower Data Center, 300 North Washington Street, Alexandria, Va. 22314, 202-325-0490.

SUPPLEMENTARY INFORMATION: The Defense Logistics Agency systems of records notices inventory subject to the Privacy Act of 1974 (5 U.S.C. 552a) Pub. L. 93-579 have been published to date in the FEDERAL REGISTER as follows:

FR Doc. 77-28255 (42 FR 51388) September 28, 1977.
FR Doc. 78-1466 (43 FR 2753) January 19, 1978.

The proposed amendment is not within the purview of the provisions of 5 U.S.C. 552a(o) of the Act which requires the submission of a new or altered system report.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.
September 7, 1978.

AMENDMENTS

S322.10DLA-LZ

System name:

MARDAC Data Base (43 FR 2753) January 19, 1978.

Changes:

System name: Delete: "MARDAC" and substitute: "Defense Manpower Data Center".

System location: Delete: "DOD Manpower Research and Data Analysis Center" and substitute: "Defense Manpower Data Center".

Categories of individuals covered by the system: Delete: "reservist" and substitute: "military". Add at the end: "individuals responding to recruiting Advertisements since January 1978".

Categories of records in the system: Add at the end: ", military hospitalization records."

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Delete: "Manpower Research and Data Analysis Center" and substitute: "Defense Manpower and Data Center". In paragraph 4 (four) add at the end: ", and to validate eligibility for VA benefits." At the end of the Routine uses add the following: "Information on the name, rank; social security accounting number, duty station, birth date, retirement date, and retirement annuity may be disclosed to the Department of Health, Education, and Welfare (DHEW) for the following purposes: "To the Office of Education, DHEW, for the purpose of identifying individuals who appear to be in default on their guaranteed student loans so as to permit the DHEW to take action, where appropriate, to accelerate recoveries of defaulted loans." "To the Bureau of Supplemental Security Income, Social Security Administration, DHEW, in order to verify and adjust as necessary payments made to active and retired military members under the Supplemental Security Income Program." "To the Office of the Inspector General, DHEW, for the purpose of identifying and investigating DOD employees (military and civilian) who may be improperly receiving funds under the Aid to Families with dependent children (AFDC) program."

System manager(s) and address: Delete: "Director, Department of Defense Manpower Research and Data Analysis Center (MARDAC)" and substitute: "Deputy Chief, Defense Manpower Data Center (DMDC)".

Notification procedures: Delete: "Director, Department of Defense Manpower Research and Data Analysis Center" and substitute: "Deputy Chief, Defense Manpower Data Center".

Record access procedures: Delete: "Director, MARDAC" and substitute: "Deputy Chief, DMDC".

Record source categories: Add at end: ", the Civil Service Commission."

S322.10DLA-LZ

System name:

Defense Manpower Data Center Data Base.

System location:

Primary location: W. R. Church Computer Center, Navy Postgraduate School, Monterey, Calif. 93940.

Back-up locations for processing: Air Force Data Services Center, Room 1D167, The Pentagon, Washington, D.C. 20330.

U.S. Army Management Systems Support Agency, Room BD972, The Pentagon, Washington, D.C. 20310.

National Military Command Systems Support Center, Room BE685, The Pentagon, Washington, D.C. 20331.

Back-up files maintained at two offices of the Defense Manpower Data Center, Seventh Floor, 300 North Washington Street, Alexandria, Va. 22314 and Second Floor, 550 Camino El Estero, Monterey, Calif. 93940.

Selected historic files are maintained at Air Force Data Services Center, Room 1D167, The Pentagon, Washington, D.C., pursuant to court order in IBM antitrust case. These files will be withdrawn from current location when legally permissible.

Decentralized segments—military personnel centers of the services; selected civilian contractors with research contracts in manpower area; other Federal agencies.

Categories of individuals covered by the system:

All officers and enlisted personnel who served on active duty from July 1, 1968 and later; or who have been a member of a reserve component since July 1975; or are retired military; participants in project 100,000 and project transition and the evaluation control groups for these programs; all individuals examined to determine eligibility for military service at an Armed Forces Entrance and Examinating Station from July 1, 1970, and later; DOD civilian employees or civilian employees separated since January 1, 1971; all veterans who have utilized Vietnam-era GI bill education and training entitlements, who visited a state employment service office since July 1, 1971, or who participated in a department of Labor special training program since July 1, 1971; all individuals who ever participated in an educational program sponsored by the U.S. Armed Forces Institute, all individuals who participate in the Armed Forces vocational aptitude testing programs at the high school level since September 1969, individuals who responded to various paid advertising campaigns seeking enlistment information since July 1, 1973; participants in the DHEW, Office of Education and Longitudinal Survey, individuals responding to Recruiting Advertisements since January 1978.

Categories of records in the system:

Name, service number, selective service number, social security account number, demographic information such as hometown, age, sex, race, and educational level; civilian occupational information, military personnel information such as rank, length of service, military occupation; aptitude scores, postservice education, training, and employment information for veterans; participation in various inservice education and training programs, military hospitalization records.

Authority for maintenance of the system:

10 U.S.C. 136.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The purpose of the system of records is to provide a longitudinal statistical analysis capability for assessing military manpower trends and evaluation programs impacting of military personnel, potential enlistees, and veterans.

Defense Manpower Data Center—used to analyze accession patterns and trends, promotion and occupation patterns and trends, loss patterns and trends, qualification rates, effectiveness of recruiting programs, participation in education and training programs, force characteristics, postservice experiences of veterans, evaluation of military special pays and bonuses; evaluation of special programs affecting military personnel; to select sample population for surveys; to provide statistical data to OMB, GAO, the military services, DOD civilian contractors, educational institutions and other Federal agencies.

Personnel research and personnel management activities of the military services—uses are same as those specified above.

Veterans' Administration, Management Sciences Staff, Reports and Statistics Service, Office of the Comptroller—used to select sample for surveys asking veterans about the use of veterans benefits and satisfaction with VA services, and to validate eligibility for VA benefits.

Office of Research and Statistics, Social Security Administration—used for statistical analyses of impact of military service and use of GI bill benefits on long term earning.

DOD civilian contractors—used by contractors performing research on manpower problems for statistical analyses.

Aggregate data and/or individual records in the record system may be transferred to other Federal agencies having legitimate use for such information and applying appropriate safeguards to protect data so provided.

Records may be disclosed to the Civil Service Commission concerning pay, benefits, retirement deductions; and other information necessary for the Commission to carry out its governmentwide personnel management functions.

Any record contained in the system of records may be transferred to any other component of the Department of Defense having the need-to-know in the performance of official business.

Name and address information of former military personnel obtained from the Veterans' Administration or the military department may be re-

leased to a number of DOD components for use in attempting to recruit and reenlist prior service personnel and only properly cleared and authorized personnel have access.

The Air force Data Services Center,

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) will con-

Following review by Federal Energy Regulatory Commission (FERC) of the "Findings," we issued an environmental assessment of the proposed ex-

ficial will announce any additional procedures necessary at the opening of the conference.

We will prohibit any company-spe-

ity is provided under the Agreement as stated by AP&L. AP&L states that any energy not returned by AP&L to SWPA will be purchased by AP&L

V 43 / 178

leased to a number of DOD components for use in attempting to recruit and reenlist prior service personnel through direct contact methods. These components are as follows: U.S. Army Recruiting Command; U.S. Army Forces Command; Navy Recruiting Command; Chief of Naval Personnel; Chief of Naval Reserve; U.S. Air Force Recruiting Service; U.S. Air Force Tactical Air Command; Headquarters Air Force Reserve; National Guard Bureau; Headquarters, U.S. Marine Corps; District Directors, U.S. Marine Corps; Commanding General 4th Marine Division; Commanding General, 4th Marine Air Wing; Commandant, U.S. Coast Guard.

Information on the name, rank, social security accounting number, duty station, birth date, retirement date, and retirement annuity may be disclosed to the Department of Health, Education, and Welfare (DHEW) for the following purposes:

To the Office of Education, DHEW, for the purpose of identifying individuals who appear to be in default on their guaranteed student loans so as to permit the DHEW to take action, where appropriate, to accelerate recoveries of defaulted loans.

To the Bureau of Supplemental Security Income, Social Security Administration, DHEW, in order to verify and adjust as necessary payments made to active and retired military members under the supplemental security income program.

To the Office of the Inspector General, DHEW, for the purpose of identifying and investigating DOD employees (military and civilian) who may be improperly receiving funds under the aid for families of dependent children program.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic computer tape.

Retrievability:

Retrievable by name, SSAN, age, occupation, or any other data element contained in system.

Safeguards:

Primary location—at W. R. Church Computer Center, tapes are stored in a locked cage in machine room, which is a controlled access area; tapes can be physically accessed only by computer center personnel and can be mounted for processing only if the appropriate seurity code is provided.

At back-up locations in Alexandria, Va. and Monterey, Calif. tapes are stored in rooms protected with cypher locks, buildings are locked after hours, and only properly cleared and authorized personnel have access.

The Air force Data Services Center, the U.S. Army Management Systems Support Agency, and the National Command Systems Support Center are all TOP SECRET facilities.

Retention and disposal:

Files constitute a historical data base and are permanent.

System manager(s) and address:

Deputy Chief, Defense Manpower Data Center (DMDC), 550 Camino El Estero, Monterey, Calif. 93940.

Notification procedure:

Information may be obtained from: Deputy Chief, Defense Manpower Data Center, 550 Camino El Estero, Monterey, Calif. 93940 telephone area code 408-646-2951.

Record access procedures:

Requests from individuals should be addressed to Deputy Chief, Defense Manpower Data Center (DMDC), 550 El Estero, Monterey, Calif. 93940.

Written requests for information should contain the full name, social security account number, date of birth, and current address and telephone number of the individual.

For personal visits, the individual should be able to provide some acceptable identification such as drivers license, or military or other ID card.

Contesting record procedures:

The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSTEM MANAGER.

Record source categories:

The Military Services, the Veterans' Administration, the Office of Education of the Department of HEW, from individuals via survey questionnaires, the Department of Labor, the Civil Service Cimmission.

Systems exempted from certain provisions of the act:

None.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

1980 GASOLINE DEMAND

Conference

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of conference.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) will conduct a conference on Friday, September 22, 1978, at 9 a.m., to explore the capability of the U.S. refining industry to meet forecast gasoline demand in 1980. This conference is a followup to the conference held on August 17, 1978, attended by 17 large refiners. Representatives of all motor gasoline refining companies which did not attend the August 17, 1978, conference are invited to attend. The other conferees will consist of representatives of the DOE and the Environmental Protection Agency (EPA). The public may attend to observe.

DATES: Conference Date: September 22, 1978, 9 a.m.

ADDRESSES: Invitees planning to participate should advise public hearing management in writing on or before September 19, 1978, Box VN, Economic Regulatory Administration, 2000 M Street NW., Room 2313, Washington, D.C. 20461.

CONFERENCE LOCATION: Forrestal Building Auditorium, Forrestal Building, Room GE—086, 1000 Independence Avenue SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Gerald P. Emmer (Regulations and Emergency Planning), 2000 M Street NW., Room 2304, Washington, D.C. 20461, 202-254-7200.

Alan T. Lockard (Fuels Regulation), 2000 M Street NW., Room 6222, Washington, D.C. 20461, 202-254-7422.

Robert C. Gillette (Hearing Procedures), 2000 M Street NW., Room 2214, Washington, D.C. 20461, 202-254-5201.

Michael Paige (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 5136A, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION:

I. Background
II. Subject of Conference
III. Conduct of Conference

I. Background

In September 1977, the Federal Energy Administration issued "Findings and Views Concerning the Exemption of Motor Gasoline from Mandatory Petroleum Allocation and Price Regulations" ("Findings"), following a comment period and public hearing on preliminary findings which had been issued earlier. The "Findings" contained forecasts for 1978 and 1979 which revealed that motor gasoline supply and demand would likely be in balance in that period.

Following review by Federal Energy Regulatory Commission (FERC) of the "Findings," we issued an environmental assessment of the proposed exemption (EA) on June 28, 1978, accompanied by a "Supplement to the September 1977 Report" ("Supplement") that had been prepared in May 1978. The "Supplement" provided more recent supply and demand historical data than the "Findings" and updated our best estimates of the supply/demand balance for 1979. It did not extend the forecast in the "Findings" to 1980, however, because we were not yet satisfied that our supply projections for 1980 were valid.

II. Subject of the Conference

As indicated in our May 1978 "Supplement," we expect that the combination of domestic gasoline production and gasoline imports should be adequate to meet anticipated demand through 1979. The Energy Information Administration (EIA) has prepared preliminary analyses for 1980 based upon alternate assumptions as to economic growth. These analyses assume that the EPA's lead phasedown and MMT phaseout schedules will remain unchanged. In this analysis potential gasoline manufacturing quantity and quality depend heavily upon refinery downstream processing capability; such capability is essential for improving clear-pool octane and producing adequate volumes of gasoline under the EPA requirements. There are, however, several other factors which also bear upon the refining industry's ability to meet forecast gasoline demand in 1980. In view of our uncertainties as to DOE analyses to date, a conference to which seventeen largest refiners were invited was held on August 17, 1978, concerning the 1980 supply-demand outlook and those refiners' plans to meet 1980 gasoline demand. This conference has been scheduled as a followup to the August 17, 1978, conference to provide information to all other refiners of motor gasoline about DOE's 1980 projections and how these projections were developed. refiner attendees will have an opportunity to comment on DOE 1980 projections, and on any factor which they believe will bear significantly on the 1980 supply-demand picture, including their plans to add gasoline production facilities.

III. Conduct of Conference

Generally, the conference will be conducted in accordance with 10 CFR 205, subpart M. The conference will be presided over by a senior official of DOE. Only invited government and industry representatives may actively participate, but anyone may attend to observe. A transcript of the conference will be prepared, and the presiding official will announce any additional procedures necessary at the opening of the conference.

We will prohibit any company-specific discussion of production, marketing or pricing, but specific disucssion of aggregate data and information will be permitted. Any participant who believes that the discussion poses an antitrust risk may leave and ask that the record note that fact. Representatives of the Department of Justice and/or DOE's Office of General Counsel will be in attendance.

Issued in Washington, D.C., September 7, 1978.

DAVID J. BARDIN,
Administrator, Economic Regulatory Administration.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RI76-28]

ARKANSAS LOUISIANA GAS CO. V. FRANK J. HALL, ET AL.

Extension of Time

SEPTEMBER 5, 1978.

On August 30, 1978, Commission Staff Counsel filed a motion for an extension of time within which to file reply briefs pursuant to the Commission's Order issued August 9, 1978, in the above-designated proceeding.

Upon consideration, notice is hereby given that the time within which to file reply briefs in the above-designated proceeding is extended to and including September 15, 1978.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25773 Filed 9-12-78; 8:45 am]

[6740-02]

[Docket No. ER78-585]

ARKANSAS POWER & LIGHT CO.

Filing of Letter Agreement

SEPTEMBER 6, 1978.

Take notice that on August 29, 1978, Arkansas Power & Light Co. (AP&L) tendered for filing a Letter Agreement dated June 27, 1978 between the Southwestern Power Administration (SWPA) and AP&L. AP&L states that the Agreement provides for the exchange of energy between AP&L and SWPA for the period between 12:01 p.m. June 27, 1978 and 11:59 p.m. September 15, 1979. AP&L states that energy will be exchanged between AP&L and SWPA on a kilowatt-hour for kilowatt-hour basis. No firm capacity is provided under the Agreement as stated by AP&L. AP&L states that any energy not returned by AP&L to SWPA will be purchased by AP&L from SWPA at rate equal to the average cost of fuel per kilowatt-hour of generation at AP&L owned generating units during the months hydroelectric energy was furnished by SWPA to AP&L. AP&L requests an effective date of 12:01 p.m., June 27, 1978. AP&L requests waiver of the Commission's notice requirement. AP&L states that due to difficulty of estimating hydroelectric generation due to water conditions, no billing data was filed.

A copy of the filing has been mailed to SWPA, according to AP&L.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedures (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER-586]

ARKANSAS POWER & LIGHT CO.

Proposed Sale of Additional Capacity and Energy

SEPTEMBER 6, 1978

Take notice that on August 29, 1978 Arkansas Power & Light Co. (AP&L) tendered for filing a Letter Agreement between AP&L and Arkansas Electric Coopertive Corp. (AECC) for the sale of additional capacity and energy as provided for in the parties' Agreement for Electric Service dated July 26, 1977 and filed with this Commission in Docket No. ER77-535.

AP&L indicates that because of the inadequacy of AECC's resources to meet AECC loads during the period beginning June 1, 1978 and ending June 30, 1978, AECC requested and AP&L supplied certain amounts provided under the July 26, 1977 Agreement. AP&L states that the rate charged will be that contained in Ap-

SEP 13 1978

pendix B of the July 26, 1977 Agreement.

The proposed effective date is the date on which service commenced, June 1, 1978, and waiver of the Commission's notice requirements is therefore requested.

AP&L states that a copy of the filing was served on Arkansas Electric Cooperative Corp.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25786 Filed 9-12-78; 8:45 am]

[6740-02]

[Docket Nos. RP78-51, RP72-122 (PGA78-3) and RM77-14]

COLORADO INTERSTATE GAS CO.

Revised Rate Increase Filings

SEPTEMBER 6, 1978.

Take notice that Colorado Interstate Gas Co. (CIG) on August 31, 1978, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1 and Third Revised Volume No. 2.

The purpose of the filing is to comply with the directive stated in Paragraph (C) of the Commission's Order of May 1, 1978, requiring CIG to eliminate from Docket No. RP78-51 all costs associated with facilities which have not been certificated and placed in service by October 1, 1978. As a result of this filing, the jurisdictional cost of service in Docket No. RP78-51 will be reduced approximately $1.9 million.

Replacement Twenty-First Revised Sheet Nos. 5 and 6 are proposed to be substituted for and to replace Twenty-First Revised Sheet Nos. 5 and 6 as filed with the Commission on March 31, 1978, in Docket No. RP78-51 and suspended by the Commission until October 1, 1978, in its Order issued May 1, 1978. Replacement Substitute Twenty-First Revised Sheet Nos. 5 and 6 reflect the increase in gas purchased costs which CIG filed for in Docket No. RP72-122 (PGA 78-3) as applied to the adjusted Docket No. RP78-51 base tariff rates proposed herein. CIG requested that the Replacement Substitute Twenty-First Revised Sheet Nos. 5 and 6 be made effective as of October 1, 1978, the date previously provided for in Docket No. RP78-51.

Replacement Second Revised Sheets Nos. 198 and 262 and First Revised Sheet No. 341 reflecting the adjusted transportation rates contained in Rate Schedules X-60, X-66, and X-72 were also tendered for filing with a requested effective date of October 1, 1978.

By its filing, CIG also proposed to withdraw tariff sheets previously filed by it to be effective October 1, 1978. Such tariff sheets (First Revised Sheet No. 67B and Original Sheet No. 67C) would have instituted a "Gas Research Institute (GRI) Charge Adjustment Provision" in CIG's FPC Gas Tariff. CIG avers that the withdrawal of these tariff sheets is necessary because certain customers have not yet received appropriate State authority to pass through GRI charges from CIG.

Copies of this filing have been served upon the Company's jurisdictional customers and upon interested bodies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before *September 15, 1978.* Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25787 Filed 9-12-78; 8:45 am]

[6740-02]

[Docket No. ER78-576]

CONNECTICUT LIGHT & POWER CO.

Filing

SEPTEMBER 5, 1978.

Take notice that on August 24, 1978, The Connecticut Light & Power Co. (CL&P) tendered for filing a proposed Amendment to Transmission Agreement (Amendment) dated July 14, 1978 between (1) CL&P, the Hartford Electric Light Co. (HELCO) and Western Massachusetts Electric Co. (WMECP), and (2) Taunton Municipal Light Plant (Taunton).

CL&P states that Taunton has executed contracts with Green Mountain Power Corp. ("GMP") of Burlington, Vt., for the purchase of power from GMP's entitlement in Vermont Yankee nuclear generating facility in the amount of 5,000 kW for the period November 1, 1976 to November 30, 1978, and 5,000 kW for the period April 1, 1979 to November 30, 1979.

CL&P further states that the Amendment provides for an extension of the termination date of the Transmission Agreement from October 31, 1978 to November 30, 1979.

CL&P requests that the Commission permit the Amendment filed to become effective November 1, 1978.

CL&P indicates that the monthly transmission charge is equal to one-twelfth of the estimated annual cost of transmission service on the Northeast Utilities system determined in accordance with § 13.9 (Determination of Amount of the Pool Transmission Facilities (PTF) Costs) of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee multiplied by the number of kilowatts of winter capability which Taunton is entitled to receive, reduced to give due recognition of the payments made by Taunton for transmission services on the systems of Public Service Co. of New Hampshire and Eastern Utilities Associates.

Copies of this rate schedule have been mailed or delivered to HELCO, WMECO, and Taunton, according to CL&P.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-592]

DAYTON POWER & LIGHT CO.

Filing

SEPTEMBER 6, 1978.

Take notice that on August 11, 1978, the Dayton Power & Light Co. (DP&L) tendered for filing Second Revised Sheet No. 10, superseding First Revised Sheet No. 10, to its FERC Electric Tariff, Original Volume No. 1, that incorporates language changes to the provision insuring proper synchronous operation with other power supply systems in the event of interconnection through the electric systems of DP&L's municipal electric customers.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 15, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25793 Filed 9-12-78; 8:45 am]

[6740-02]

[Project No. 2232]

DUKE POWER CO.

Application for Change in Land Rights

SEPTEMBER 1, 1978.

Public Notice is hereby given that application for approval of a change in land rights of project lands (Catawba-Wateree Project No. 2232) was filed on March 23, 1978, by Duke Power Co. (Duke) (correspondence to: John E. Lansche, Assistant General Counsel, Duke Power Co., Box 2178, Charlotte, N.C. 28242).

The lands that are the subject of this application are located in Chester and Lancaster Counties, S.C., and are on the Catawba River, a navigable water of the United States.

Applicant proposes to grant permission to Carolina Pipeline Co., Inc. (Carolina) of Columbia, S.C. to construct, operate, and maintain an underground 6⅝-inch gas pipeline.

The proposed pipeline would fall within the boundaries of Project No. 2232 and pass beneath the Catawba River within an existing right-of-way, which at present contains two 8⅝-inch gas pipelines owned by Carolina.[1]

The proposed pipeline would be placed parallel to and approximately 50 feet away from the existing pipelines, at a minimum of 48 inches below the river bed, and backfilled.

The U.S. Army Corps of Engineers and the South Carolina Budget and Control Board have issued permits to Carolina for the proposed construction.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before October 12, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Project No. 2845]

IDAHO POWER CO.

Application for Preliminary Permit

SEPTEMBER 6, 1978.

Take notice that on March 30, 1978, Idaho Power Co. (correspondence to: Idaho Power Co., P.O. Box 70, Boise, Idaho 83721, and Lee S. Sherline, Leighton & Sherline, Suite 406, 1701 K Street NW., Washington, D.C. 20006) filed an application for a 36 month preliminary permit with the Federal Energy Regulatory Commission for the proposed A. J. Wiley Hydroelectric Project, FERC No. 2845, to be located on the Snake River in the counties of Gooding and Twin Falls.

The proposed run-of-the-river project would have an installed capacity of 75,000 kW, and would consist of an impervious core earth dam across the Snake River. The project would be located near the town of Bliss, Idaho. The dam would be of sufficient height to provide an effective head of approximately 79 feet, backing water up the Snake River approximately 8 miles. The dam would impound a reservoir with an estimated surface area of 600 acres, at an approximate elevation of 2,735 feet. A powerhouse containing semi-outdoor-type generator units, with adjacent step-up transformers and switching structures would be located below the dam. A transmission line would connect the powerhouse to one of the Applicant's three transmission lines passing within 3 miles of the project site.

The Applicant proposes to integrate the project energy into its interconnected transmission system for sale to its Idaho, Oregon, Nevada, and Wyoming customers.

A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering and economic feasibility of the proposed project, market for the power, and all other necessary information for inclusion in an application for license.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determing the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before November 6, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 78-25788 Filed 9-12-78; 8:45 am]

[1] License was issued by the Federal Power Commission for Project No. 2232 on Sept 17, 1958. On Feb. 10, 1958, Duke Power Co. granted to Carolina Pipeline Co. as easement and right-of-way, 200 ft wide and approximately 540 ft long between the project boundaries on each side of the river. Neither the construction of the existing gas pipelines nor the granting of the original easement and right-of-way has been approved by the Commission or its predecessor, the Federal Power Commission.

[Project No. 2846]

IDAHO POWER CO.

Application for Preliminary Permit

SEPTEMBER 6, 1978.

Take notice that on March 30, 1978, Idaho Power Co. (correspondence to: Idaho Power Co., P.O. Box 70, Boise, Idaho 83721, and Lee S. Sherline, Leighton & Sherline, Suite 406, 1701 K Street NW., Washington, D.C. 20006), filed an application for a 36 month preliminary permit with the Federal Energy Regulatory Commission for the proposed Dike Hydroelectric Project, FERC Project No. 2846, to be located on the Snake River in the county of Elmore, Idaho.

The proposed run-of-the-river project would have an installed capacity of 50,000 kW, and would consist of an impervious core earth dam across the Snake River. The project would be located approximately 5 miles southeast of King Hill, Idaho. The dam would be of sufficient height to provide an effective head of approximately 55 feet, backing water up the Snake River approximately 7 miles to the Applicant's Bliss Hydroelectric Project No. 1975. The dam would impound a reservoir with an estimated surface area of 475 acres, at an approximate elevation of 2,585 feet. A powerhouse containing semi-outdoor type generator units with adjacent step-up transformers and switching structures, would be located below the dam. A transmission line would connect the powerhouse to one of the Applicant's three transmission lines passing within 3 miles of the project site.

The Applicant proposes to integrate the project energy into its interconnected transmission system for sale to its Idaho, Oregon, Nevada, and Wyoming customers.

A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering and economic feasibility of the proposed project, market for the power, and all other necessary information for inclusion in an application for license.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before November 6, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-589]

IDAHO POWER CO.

Proposed Tariff Change

SEPTEMBER 6, 1978.

Take notice that the Idaho Power Co., on August 29, 1978, tendered for filing proposed changes in its FERC Electric Service Tariff, Volume 1. Because the tariff covers sales for resale of nonfirm energy, and the amount of such nonfirm energy which can be made available for sale is unknown, it is impossible to determine whether the proposed changes would result in any increase in the Company's revenues, according to the Company.

The proposed change in rates is to provide the Company with reasonable compensation for current costs of hydro and thermal generation, according to the Company.

Copies of the filing were served upon those utilities known to the Company to be interested in purchasing nonfirm energy from the Idaho Power Co. and the Idaho Public Utilities Commission, Boise, Idaho; the Public Utility Commissioner of Oregon, Salem, Oreg.; and the Public Service Commission of Nevada, Carson City, Nev.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 15, 1978. Protests will be considered by the Commission in determing the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-583]

MISSISSIPPI POWER & LIGHT CO.

Transmission Service Agreement

SEPTEMBER 6, 1978.

Take notice that on August 28, 1978, Mississippi Power & Light Co. (MP&L) tendered for filing an unexecuted bulk power transmission service agreement (Service Schedule E) between it and the City of Clarksdale (City), Miss., dated August 25, 1978, as a supplement to the Interconnection Agreement between the City and Mississippi Power & Light Co. dated February 13, 1976.

MP&L requests waiver of § 35.11 of the Commission's Regulations requiring thirty (30) days notice in order that transmission service may be available immediately to the City of Clarksdale.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-584]

MISSISSIPPI POWER & LIGHT CO.

Transmission Service Agreement

SEPTEMBER 6, 1978.

Take notice that on August 28, 1978, Mississippi Power & Light Co. (MP&L) tendered for filing an unexecuted bulk power transmission service agreement (Service Schedule E) between it and the Greenwood Utilities Commission, Greenwood, Miss., dated August 25, 1978, as a supplement to the Interconnection Agreement between Greenwood and Mississippi Power & Light Co. dated September 19, 1975.

MP&L requests waiver of § 35.11 of the Commission's Regulations requiring thirty (30) days notice in order that transmission service may be available immediately to the Greenwood Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP 76-89]

NORTHERN NATURAL GAS CO.

Accepting Briefs on Exceptions Out of Time and Granting Further Extension of Time

SEPTEMBER 1, 1978.

On August 30, 1978, Staff Counsel filed a motion for leave to file its Brief On Exceptions out of time and a request to further extend the time for filing Briefs Opposing Exception to the Administrative Law Judge's Initial Decision issued June 22, 1978, in the above-indicated proceeding. The motion states the reason for filing its Brief On Exceptions late was because of active participation in several other proceedings and assisting in the analysis of the proposed Natural Gas Policy Act of 1978. The motion also states that Counsel for the South Dakota Public Utilities Commission does not oppose the requested extension of Briefs Opposing Exceptions.

Upon consideration, notice is hereby given that Staff Counsel's Brief On Exceptions is accepted out of time and the time for filing Briefs Opposing Exception to the Initial Decision is further extended to and including September 15, 1978.

KENNETH F. PLUMB,
Secretary.

Office of Intergovernmental and Institutional Relations

STATUS REPORT ON SOLAR ENERGY DOMESTIC POLICY REVIEW

Public Availability

AGENCY: Department of Energy.

ACTION: Notice of Public Availability of "Status Report on Solar Energy Domestic Policy Review"

SUMMARY: The Department of Energy announces the availabilty of the "Status Report on Solar Energy Domestic Policy Review" for public review and comment. A final report will be sent to the President by the (Domestic Policy Review) (DPR) Task Force and the Solar Energy Policy Committee. A summary of the comments received concerning the Status Report will also be included as an attachment to this final report.

DATE: Written comments are invited for consideration, if submitted not later than September 21, 1978.

ADDRESSES: Written comments should be submitted to: Dr. Allan Hoffman, Chairman, Domestic Policy Review Integration Group, Room GB-145, Forrestal Building, Washington, D.C. 20585, telephone 202-252-6025.

Any inquiries should be directed to Dr. Hoffman or to Mr. James Madewell, Domestic Policy Review Executive Coordinator; telephone 202-252-6086.

Members of the public may obtain a copy of the document at the DOE National Office, by request in writing or by telephone to:

Department of Energy, Office of Consumer Affairs, Room 8G-066, Forrestal Building, 1000 Independence Avenue SW, Washington, D.C. 20585, Attn: IR-331, telephone 202-252-5877.

Copies also may be reviewed by members of the public during normal business hours at the DOE Regional Offices listed below:

DOE-Region I, 150 Causeway Street, Boston, Mass. 02114, telephone 617-223-0504.
DOE-Region II, 26 Federal Plaza, New York, N.Y. 10007, telephone 212-264-0520.
DOE-Region III, 1421 Cherry Street, Philadelphia, Pa. 19102, telephone 215-597-3880.
DOE-Region IV, 1655 Peachtree Street NE. Atlanta, Ga. 30309, telephone 404-257-2837.
DOE-Region V, 175 West Jackson Boulevard, Chicago, Ill. 60604, telephone 312-353-0540.
DOE-Region VI, 2626 West Mockingbird Lane, Dallas, Tex. 75235, telephone 214-749-7621.
DOE-Region VII, 324 East 11th Street, Kansas City, Mo. 64106, telephone 816-374-2061.
DOE-Region VIII, 1075 South Yukon Street, Denver, Colo. 80226, telephone 303-234-2420.
DOE-Region IX, 111 Pine Street, San Francisco, Calif. 94111, telephone 415-556-7130.
DOE-Region X, 1992 Federal Building, 915 Second Avenue, Seattle, Wash. 98174, telephone 206-399-7285.

FOR FURTHER INFORMATION CONTACT:

Dr. Karl Conrad or Ms. Liz Overstreet, Department of Energy, Office of Consumer Affairs, Room 8G-066, Forrestal Building, Washington, D.C. 20585, telephone 202-252-5877.

Issued in Washington, D.C., on September 11, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

Western Area Power Administration

MARKETING POWER FROM THE NAVAJO PROJECT

Public Meetings

AGENCY: Western Area Power Administration (WAPA), Department of Energy.

ACTION: Announcement of public meetings concerning marketing power from the Navajo Project, Page, Ariz.

SUMMARY: The Bureau of Reclamation has acquired a 24.3 percent interest (about 560 MW) in the Navajo steam generating plant near Page, Ariz., to provide power from pumping water for the Central Arizona Project (CAP). Power and energy surplus to the needs of the project is marketed by WAPA. The plant began operation in 1975. Pumping requirements are currently scheduled to begin in about 1985. Power is currently marketed to the other particiipants in the power plant and to a private power company under interim agreements which can be terminated on 5 years' notice.

WAPA is in the process of investigating various plans for marketing this surplus Navajo power and energy, upon termination of the interim sales agreements, including possible integration with other Federal resources. It is proposed to hold public meetings to obtain public participation in the marketing considerations.

DATES: Meetings have been scheduled at the times and locations noted below to obtain public participation in a discussion of the marketing of Navajo Project power, including the possible integration of Navajo thermal power with Federal hydroelectric resources on the Colorado River.

September 19, 1978, 9 a.m.: Phoenix Civic Plaza, room: N10, 225 East Adams, Phoenix, Ariz.

September 20, 1978: Hotel Utah, Room: Bonneville Hall 2 and 3 Main at South Temple Streets, Salt Lake City, Utah, telephone 801-531-1000.

September 21, 1978, 9 a.m.: Stouffer's Denver Inn, Room: Centennial Square A, 3203 Quebec Street, Denver, Colo., telephone 303-321-3333.

Three cities have been selected to provide an opportunity to all interested persons to participate in a conveniently located meeting.

ADDRESSES: Five copies of any written comments should be submitted before October 16, 1978, to the Administrator, Western Area Power Administration, P.O. Box 3402, Golden, Colo. 80401. Five copies should also be submitted to the Assistant Secretary for Resource Applications, U.S. Department of Energy, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Oisen, Area Manager, Boulder City Area Office, Western Area Power Administration, Department of Energy, P.O. Box 200, Boulder City, Nev. 89005, 702-293-8475.

BACKGROUND INFORMATION: The United States, acting through the Department of the Interior, is a participant in the Navajo Project, a thermal generating powerplant near Page, Ariz., with appurtenant transmission facilities. The United States is participating in the Navajo Project to obtain electrical power and energy to supply the power requirements of the Central Arizona Project (CAP) and to augment the Lower Colorado River Basin Development Fund, as authorized by Section 303 of the Colorado River Basin Project Act dated September 30, 1968. Section 303 further provides that, when not required by CAP, the power and energy may be disposed of intermittently by the Secretary of the Interior for other purposes at such prices as he may determine, including its marketing in conjuction with the sale of power and energy from Federal powerplants in the Colorado River system so as to produce the greatest practicable amount of power and energy that can be sold at firm power and energy rates. The marketing responsibility for Navajo Project power and energy was transferred on October 1, 1977, from the Secretary of the Interior to the Secretary of Energy by the Department of Energy Organization Act dated August 4, 1977.

In 1969, the United States completed contractual arrangements with other Navajo Participants—Arizona Public Service Co., Los Angeles Department of Water and Power, Nevada Power Co., Salt River Project, and Tucson Gas & Electric Co.—that entitle the United States to 24.3 percent of the output of each of the three 750-megawatt units in the Navajo Generating Station and a right to the use of certain transmission capacity. Construction on the Navajo Project began in April 1970, and the Project was in full-scale operation by May 1976.

In 1969, when the United States committed itself contractually as a Navajo Participant, it also entered into contracts to sell its share of Navajo power and energy until needed for CAP pumping or other purposes of the Colorado River Basin Project Act. These interim sales contracts with Southern California Edison Co. and with each of the other Navajo Participants assured annual repayments on the Federal investment during the 20-year contract period. The contracts can be terminated by the United States upon 5 years' notice. It is presently expected that power will first be needed for CAP pumping requirements in 1985 but may be needed earlier. Notice of termination of the interim sales contracts could be expected to be given by the United States between now and January 1, 1980. It is unlikely that all the Navajo Project power and energy available to the United States will be required for CAP when pumping begins. A gradual development of CAP loads over a period of several years is expected. The power required in any year for CAP pumping will depend upon the Colorado River water available during that year for use within the State of Arizona. Some energy and capacity surplus to the needs of CAP will be available at times, which can be marketed.

The interest and ability of existing or potential preference customers to purchase the United States share of Navajo power and energy not required by CAP will be assessed as part of a Navajo Project power marketing study undertaken by the Western Area Power Administration, Department of Energy. In addition, the possibility of marketing the Navajo Project power in conjunction with power and energy from the Boulder Canyon, Parker-Davis, and Colorado River Storage Projects will be evaluated. The recent shortage of water in the Colorado River has given impetus to such a study. The water shortage required the Federal Government to purchase energy from other sources at high cost to meet long-term firm power contract commitments from Federal power projects on the Colorado River. Any plan to integrate Navajo power and energy with Federal hydroelectric resources must assure the financial repayments required for all Federal projects.

Topics that will be covered at each of these meetings include the limitations on Navajo power availability imposed by the operations of the Central Arizona Project (CAP), options for resource integration, and related transmission studies. Various marketing issues will be addressed, as well as related questions concerning withdrawal of power from the current contractors.

These meetings will also provide background information on the participation of the Bureau of Reclamation in the Navajo Project and an explanation of the terms and conditions under which the Western Area Power Administration now makes Navajo power and energy available to the existing contractors.

All persons interested in the marketing of Navajo Project power are encouraged to participate in one of the scheduled public meetings. In addition to listening to your views orally at the meetings, written comments will also be received subsequent to the meetings.

Issued in Washington, D.C., September 11, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

[6560-01]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 964-6]

ADMINISTRATOR'S TOXIC SUBSTANCES ADVISORY COMMITTEE

Meeting

AGENCY Environmental Protection Agency.

ACTION: Notice of open meeting.

SUMMARY: There will be a meeting of the Administrator's Toxic Substances Advisory Committee from 9 a.m. to 5 p.m. on Friday, September 29, 1978. The meeting will be held in Room 3906, Waterside Mall, EPA, 401 M Street SW., Washington, D.C., and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Dr. H. Wade Fowler, Jr., Executive Secretary, Administrator's Toxic Substances Advisory Committee, Office of Toxic Substances (TS-788), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, telephone 703-557-7560.

SUPPLEMENTAL INFORMATION: The purpose of this meeting is to advise EPA on implementation of the Toxic Substances Control Act (Pub. L. 94-469). The agenda includes review of:

1. Reports from work groups.
2. Organizational activities of the Committee.
3. In addition, the Agency may present status reports on other ongoing programs of the Office of Toxic Substances.

Any member of the public wishing to attend or submit a paper should contact Dr. H. Wade Fowler, Jr., at the address or phone listed above. Interested persons may upon advance notice to the Executive Secretary, present oral statements to the extent that time permits.

Dated: September 7, 1978.

STEVEN D. JELLINEK,
Assistant Administrator for Toxic Substances.

[FRL 964-7]

CLEAN AIR ACT AND FEDERAL WATER POLLUTION CONTROL ACT

List of Violating Facilities

Pursuant to section 306 of the Clean Air Act (42U.S.C. 1857(h)), section 508 of the Federal Water Pollution Control Act (33 U.S.C. 1368) and Executive Order 11738, EPA has been authorized to provide certain prohibitions and requirements concerning the administration of the Clean Air Act and Federal Water Pollution Control Act with respect to Federal contracts, grants, or loans. On April 16, 1975, regulations implementing the requirements of the statutes and the Executive order were promulgated in the FEDERAL REGISTER (see 40 CFR Part 15, 40 FR 17124, April 16, 1975). Section 15.20 of the regulations provides for the establishment of a list of violating facilities which will reflect those facilities ineligible for use in nonexempt Federal contracts, grants, or loans.

The representatives of any facility under consideration for listing are afforded the opportunity to appear at a listing proceeding conducted by the Director, Office of Federal Activities. Listing occurs when the director determines there is adequate evidence of noncompliance with clean air or water standards. Federal, State, and local criminal convictions, civil adjudications, and administrative findings of noncompliance may serve as a basis for consideration of listing. However, in the case of a State or local civil adjudication or administrative finding, EPA may consider listing only at the request of the Governor.

The list of violating facilities is contained in two sublists. Sublist 1 includes those facilities listed on the basis of a conviction under section 113 (c) (1) of the Clean Air Act or section 309(c) of the Federal Water Pollution Control Act. Sublist 2 includes those facilities listed on the basis of: Any injunction, order, judgment, decree, or other form of civil ruling by a Federal, State, or local court issued as a result of noncompliance; or on the basis of noncompliance with an order under section 113(a) of the Clean Air Act or section 309(a) of the Federal Water Pollution Control Act; or having given rise to the initiation of court action under section 113(b) of the Clean Air Act or section 309(b) of the Federal Water Pollution Control Act; or having been subjected to equivalent State or local proceedings to enforce clean air or water standards.

No agency in the executive branch of Government shall enter into, renew, or extend any nonexempt contract, subcontract, grant, subgrant, loan, or subloan where a facility listed would be utilized for the purposes of any such agreement.

The purpose of this Notice is to remove from sublist 1 the facility of Allied Chemical Corp., Semet-Solvay Division, Ashland, Ky.

Pursuant to this authority, the Director, Office of Federal Activities, U.S. Environmental Protection Agency, certifies that the following facilities are on the list of violating facilities as of September 1, 1978. The list of violating facilities will be revised periodically as any listings or delistings occur.

LIST OF VIOLATING FACILITIES

SUBLIST 1

No facilities listed.

SUBLIST 2

ITT Rayonier, Inc., Fernandina Beach, Fla.

Dated: September 1, 1978.

WILLIAM D. DICKERSON,
Acting Director, Office of Federal Activities (A-104).

[FIFRA Docket Nos. 401, 402, 403; FRL 964-8; OPP-68003B]

SHELL OIL CO., ET AL.

Amended Notice of Intent To Cancel Registrations of Pesticide Products Containing Dibromochloropropane (DBCP), and Statement of Reasons

I. INTRODUCTION

On October 27, 1977, the Agency issued a notice of intent to cancel the registrations or change the classifications of pesticide products containing dibromochloropropane (DBCP), and statement of reasons (42 FR 57545, Nov. 3, 1977) (the "original notice"). The original notice provided for continuation of the Agency's rebuttable presumption against registration ("RPAR") review of DBCP, and stated that the decisions reached as the result of that review could form the basis, if appropriate, of an amendment to the original notice (id. at 57547). The RPAR review of DBCP has been concluded and a final position document which analyzes the risks and benefits of all uses of DBCP has been prepared. I have reviewed the information, analyses, and recommendations contained in the final position document, and I have determined that it is appropriate to amend the original notice to reflect those recommendations.

Accordingly, under the authority delegated to me by the Administrator (id. at 57547-8), and in accordance with § 164.21(b) of the Agency's rules of practice (40 CFR Part 164), I hereby issue this amended notice.

II. REGULATORY BACKGROUND

A. LEGAL AUTHORITY

The Administrator may cancel the registration of a pesticide whenever he determines that it no longer satisfies the statutory standard for registration. The statutory registration standard requires (among other things) that the pesticide not cause "unreasonable adverse effects on the environment" (FIFRA § 3(c)(5)(C); 7 U.S.C. 136a(c)(5)(C)). "Unreasonable adverse effects on the environment" is defined to mean "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide" (FIFRA § 2(bb); 7 U.S.C. 136(bb)).

The Administrator may also cancel the registration of a pesticide if he determines that the labeling does not comply with the requirements of FIFRA; labeling requirements are found in the statutory definition of "misbranded" (FIFRA § 2(q); 7 U.S.C. 136(q)). Among other things, that section provides that a pesticide is misbranded if the labeling "does not contain directions for use which are necessary for effecting the purpose for which the product is intended and if complied with, together with any requirements imposed under section 3(d) of (FIFRA), are adequate to protect health and the environment." Finally, the Administrator may change the classification of any use of a pesticide if he determines that such a change "is necessary to prevent unreasonable adverse effects on the environment" (FIFRA § 3(d)(2); 7 U.S.C. 136a(d)(2)).

In effect, FIFRA establishes a statutory scheme which requires the Administrator to weigh the risks and benefits associated with each use of a pesticide.[1] If he determines for any

[1] The burden of proof of establishing the registrability of a pesticide product rests at all times on the proponent of registration. *Environmental Defense Fund* v. *Environmental Protection Agency*, 465 F. 2d 528, 540

Footnotes continued on next page

particular use that the risks exceed the benefits, he must then determine whether those risks can be sufficiently

original notice in accordance with the provisions of 40 CFR 164.21(b). The Administrator delegated to the Assistant Administrator for Toxic Sub-

terms or conditions of registration, as described below. I have further determined that these modifications in the terms or conditions of registration ac-

direct supervision and only for those uses covered by the certified commercial applicator's certification.

WARNING

particular use that the risks exceed the benefits, he must then determine whether those risks can be sufficiently reduced (to a point where they are outweighed by the benefits) by the modification of the terms and conditions of registration (i.e., by changes in labeling or by the classification of the use for restricted use). If he determines that adequate risk reduction cannot be achieved by such means, the registration of the pesticide for that use must be canceled.

In addition, FIFRA authorizes the Administrator to take action to mitigate the risks associated with the use of a pesticide pending the completion of any cancellation or change in classification proceedings which may be instituted. Section 6(c) of FIFRA (7 U.S.C. 136d(c)) authorizes the Administrator to suspend the registration of a pesticide if he determines that such action "is necessary to prevent an imminent hazard during the time required for cancellation or change in classification proceedings." "Imminent hazard" is defined by the statute as "a situation which exists when the continued use of a pesticide during the time required for cancellation proceeding would be likely to result in unreasonable adverse effects on the environment * * *" (FIFRA § 2(l); 7 U.S.C. 136(l)). In other words, if the risks from any particular use of a pesticide during the anticipated pendency of cancellation or change in classification proceedings outweigh the benefits of that particular use during the same period, the registration of any product registered for that use may be suspended.

B. DBCP SUSPENSION ACTIONS

On September 8, 1977, the Administrator issued a notice of intent to suspend and conditionally suspend registrations of pesticide products containing dibromochloropropane (42 FR 48915, Sept. 26, 1977), based upon the Administrator's determination that regulatory action was necessary to prevent an "imminent hazard" from the use of DBCP during the time required for cancellation or change in classification proceedings. That determination was the result of an intensive, expedited investigation into the human health effects of DBCP, triggered primarily by then-recently disclosed information showing that male chemical plantworkers exposed to DBCP had experienced low- and zero-sperm counts, and by the Agency's prior review of animal test data developed by the National Cancer Institute indicating the DBCP is a carcinogen in laboratory animals.

Footnotes continued from last page
(D.C. Cir. 1972); *EDF* v. *EPA*, 510 F. 2d 1292, 1297 (D.C. Cir. 1975); *EDF* v. *EPA*, 548 F. 2d 998, 1004 (D.C. Cir. 1976).

Pursuant to section 6(c) of FIFRA, each registrant of a DBCP product had an opportunity to request an expedited hearing before the Agency on the question of whether an imminent hazard existed. The Agency received only three timely requests for an expedited hearing, each of which was subsequently withdrawn. Consequently, on October 27, 1977, the Administrator issued a suspension order suspending the registration of all pesticide products containing DBCP (42 FR 57543, Nov. 3, 1977).

The suspension order implemented two separate suspension actions: An unconditional "specific food use" suspension of DBCP products registered for use on any of nineteen (19) food crops, based on determinations of the likelihood of DBCP residues occurring in the edible portions of those crops;[2] and a conditional suspension of all DBCP products, aimed at mitigating hazards to DBCP applicators. With respect to the conditional suspension, registrants were afforded an opportunity for relief from the suspension order by obtaining an interim registration amendment implementing certain classification and labeling changes—including the restriction of the product to use only by certified applicators utilizing prescribed protective equipment and respirators—as described in the suspension order (42 FR 57543, Nov. 3, 1977).

Section 6(c)(1) of FIFRA provides that a suspension order cannot be issued unless a notice of intent to cancel the registrations or change the classifications of the pesticide products concerned has already been issued, or is issued with the suspension order. In order to comply with this provision of the statute, the Administrator issued the original notice at the same time he issued the suspension order (id. at 57545). The original notice stated that any registrant or other person adversely affected by it could request a hearing within 30 days. Three timely requests for a hearing were received by the Agency, and were consolidated by order of Chief Administrative Law Judge Perlman dated December 15, 1977. Administrative Law Judge Harwood was designated to preside in these consolidated proceedings by order of designation dated December 15, 1977.

RPAR REVIEW OF DBCP

On September 15, 1977, the Agency's Office of Pesticide Programs issued a notice of rebuttable presumption against registration and continued registration of pesticide products containing dibromochloropropane (DBCP) (42 FR 48026, Sept. 22, 1977).

The Agency's rebuttable presumption against registration ("RPAR") process is set out in 40 CFR 162.11. In broad summary, these regulations provide that a rebuttable presumption against registration shall arise if the Agency determines that a pesticide meets any of the risk criteria set forth in 40 CFR 162.11(a)(3). If it is determined that such a rebuttable presumption has arisen, registrants, applicants, and interested persons are offered an opportunity to submit evidence in rebuttal of the presumption. Those persons may also submit evidence relating to the economic, social and environmental benefits of the use of the pesticide subject to the presumption. If the presumptions of risk are not rebutted, the benefits evidence submitted is considered by the Agency in determining whether the risks of the use of the pesticide exceed the benefits of the use, and, if so, what regulatory action should be taken.

In short, the RPAR process is designed to permit the Agency to gather information about a problem pesticide and to make a decision concerning it in an open manner allowing maximum participation by all interested groups.

Ordinarily, the RPAR process culminates in a determination as to whether or not to issue a notice of intent to cancel the registration or change the classification of the pesticide at issue. As noted above, however, in the instant case it was necessary to issue the original notice prior to the completion of the RPAR process, in order to enable the Administrator to take the regulatory steps necessary to prevent an imminent hazard. Moreover, due to the expedited nature of the suspension remedy, the information then available to the Agency on the issues relevant to an ultimate cancellation or classification decision was necessarily incomplete.

Accordingly, and in light of the fact that the RPAR process had already been initiated with respect to DBCP, the Administrator found it to be in the public interest to continue the RPAR process and the information gathering which it entails. The Administrator determined that this continuation would serve a valuable discovery function in conjunction with this cancellation proceeding, would allow the development of information of significant probative value which might not otherwise be obtainable, and would serve to narrow the issues which may ultimately have to be adjudicated.

The Administrator alos determined that the decisions reached as the result of the RPAR review could form the basis for an amendment to the

[2]The suspension order was subsequently amended by the Administrator to clarify that he did not intend to unconditionally suspend the use of DBCP on strawberry plants which are being grown as transplants or nursery stock and which are not allowed to fruit until after being transplanted (43 FR 23649, May 31, 1978).

original notice in accordance with the provisions of 40 CFR 164.21(b). The Administrator delegated to the Assistant Administrator for Toxic Substances the authority and responsibility: (1) for reviewing evidence submitted in the RPAR process, Agency staff evaluations of that evidence, and Agency staff recommendations concerning possible amendments to the original notice, and (2) for issuing, filing and serving, if appropriate, an amended notice of intent to cancel the registrations or change the classifications of pesticide products containing DBCP (42 FR 57547-8, Nov. 3, 1977).

III. AMENDMENTS TO THE ORIGINAL NOTICE

The RPAR process has been completed, and the Office of Pesticide Programs has prepared a final position document on DBCP which analyzes in considerable detail both the risks and benefits associated with all registered uses of DBCP. I have reviewed that final position document and the recommendations of the Agency staff which are contained in it. In accordance with the authority delegated to me by the Administrator, I find it appropriate to amend the Administrator's original notice. I hereby adopt the final position document as the statement of reasons and underlying support document for this amended notice.[3]

I have determined that use of DBCP on the following crops poses risks which are greater than the social, economic, and environmental benefits of the uses, and that these uses of DBCP will therefore generally cause unreasonable adverse effects on the environment when used in accordance with commonly recognized practice. Accordingly, unless a hearing is timely requested in accordance with part IV of this amended notice, the following uses of DBCP are canceled: Broccoli, brussels sprouts, cabbage, carrots, cauliflower, celery, cucumbers, eggplants, endive, lettuce, lima beans (except commercial uses), melons, okra (except commercial uses), parsnips, peanuts, peppers, radishes, snap beans (except commercial uses), southern peas (except commercial uses), squash, tomatoes, turnips, and strawberries (except nursery stock which is not allowed to fruit until after being transplanted).

I have further determined that all remaining uses of DBCP pose risks which are greater than the social, economic, and environmental benefits of those uses, unless risk reductions are accomplished by modifications in the terms or conditions of registration, as described below. I have further determined that these modifications in the terms or conditions of registration accomplish significant risk reductions, and that these risk reductions can be achieved without significant impacts on the benefits of the uses. Unless these changes in the terms or conditions of registration are accomplished, these uses of DBCP will generally cause unreasonable adverse effects on the environment when used in accordance with widespread and commonly recognized practice, and the labeling of DBCP products for these uses will not comply with the provisions of FIFRA.

Accordingly, unless a hearing is timely requested in accordance with part IV of this amended notice, all uses of DBCP not specified above are canceled unless registrants amend the terms of conditions of registration as follows:[4]

1. Classification of DBCP products for restricted use, for use only by or under the direct supervision of certified applicators, and, in the case of residential turf and ornamental uses, for use only by or under the direct supervision of certified commercial applicators.

2. Modification of the labeling of DBCP products to include the following:

RESTRICTED USE PESTICIDE

For retail sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification. For residential turf and ornamental uses, for retail sale to and use only by certified commercial applicators or persons under their direct supervision and only for those uses covered by the certified commercial applicator's certification.

WARNING

KEEP OUT OF REACH OF CHILDREN

HARMFUL LIQUID AND VAPOR. MAY BE FATAL OR INJURIOUS IF SWALLOWED, INHALED, OR ABSORBED THROUGH SKIN. CAUSES SKIN IRRITATION AND BLISTERS. VAPOR CAUSES IRRITATION OF EYES, NOSE AND THROAT. EXPOSURE WITHOUT WEARING PROTECTIVE EQUIPMENT MAY LEAD TO CANCER, REDUCED SPERM COUNT, OR OTHER CHRONIC EFFECTS.

Use precautions. Wear a full face air-purifying respirator or positive-pressure supplied-air respirator jointly approved by the Mine Safety and Health Administration and National Institute for Occupational Safety and Health for organic vapors or fumigants. Replace canisters or cartridges after each day of use. Also wear impermeable full-body protective clothing during mixing, loading, and transfer operations, and while calibrating or maintaining application equipment. This clothing includes gloves, boots or boot covers, and coat and pants, all made of DBCP-resistant (and preferably heavy-duty) material such as nitrile, or neoprene, or other material shown by the manufacturer to give equal protection. Also wear impermeable gloves and boots or boot covers during application by drench, in-furrow, irrigation, or granular formulations. If protective clothing or shoes become contaminated, remove promptly. Do not wear again until completely free of material or else dispose by burying in soil. Wash thoroughly with soap and water after handling and before eating or smoking. Combustible mixture—do not use, pour, spill, or store near heat or open flame.

In case of accident. Flush eyes with water for at least 15 minutes and get medical attention. If illness results from inhalation, move to fresh air and call a doctor. If swallowed, call a doctor and induce vomiting.

Special equipment. If a closed system for mixing or transfer is used, a respirator and impermeable boots or boot covers, gloves and an apron must be worn. A closed system is defined as appropriate connections, meters, pumps and plumbing designed and maintained to eliminate human contact with the pesticide. If a closed system for mixing, transfer or application is used which results in an airborne concentration of DBCP not exceeding 1 part DBCP per billion parts of air (1 ppb) as an 8-hour time weighted average, a respirator need not be worn during operation of the closed system, but must be available for use in case of a leak, spill or other emergency.

Reentry prohibition. Do not reenter treated area for 24 hours without wearing an approved full-face respirator or positive-pressure respirator. If area has been treated by irrigation or drench, impermeable boots and gloves also must be worn before reentering during the 24 hour waiting period. Post warning signs at usual points of entrance into treated area.

Wildlife precautions. This product is toxic to wildlife. Birds and other wildlife in treated areas may be killed. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas

[3]Copies of the final position document may be obtained from Mr. C. J. Kempter, Special Pesticide Reviews Division (TS-791), EPA, Room 447, East Tower, 401 M St. SW., Washington, D.C. 20460, 202-755-8053.

[4]FIFRA § 6(b)(1) provides that the Administrator may initiate proceedings to cancel a registration or change its use classification, where the Administrator finds that the pesticide does not satisfy the statutory standard for registration. However, the registered DBCP products subject to this RPAR have not yet been initially classified. Accordingly, any classification action with respect to these products is an initial classification, and not a change in classification. Initial classification generally does not give rise to a right to review the classification decision in an adjudicatory hearing. (See "Preamble to Optional Procedures for Classification of Pesticide Used by Regulation", 43 FR 5782, 5784 (Feb. 9, 1978)). However, in view of the fact that the Agency is proposing other changes to the terms or conditions of the registration (i.e., labeling changes) for registered DBCP products, which are reviewable in adjudicatory hearing, the Agency has determined that it is appropriate to exercise its discretion to fashion procedures in excess of minimum statutory requirements, and to permit the question of whether DBCP products registered for the uses listed below should be initially classified for restricted use and their use limited to certified applicators to be reviewed in any such adjudicatory hearing as well.

treated. Apply this product only as specified on this label.

Crop residue precautions. Any forage crop grown on soil treated with bromide-containing fumigants should not be used as feed for dairy animals or animals being finished for slaughter until 2 years after row treatments and 3 years after overall treatment.

Residential use prohibition. Do not apply by drench technique of application to residential turf or ornamentals.

IV. Procedural Matters

A. Requests for Hearing

Because this is an amendment to the original notice, issued under 40 CFR 164.21(b), the parties which have already requested a hearing with respect to the original notice have the right under § 164.22(c) to amend their objections on or before October 12, 1978, or receipt of this amended notice, whichever occurs later.

Ordinarily, no other registrant or interested person would be entitled to respond to this amended notice of intent to cancel; failure to request a hearing with respect to an original notice of intent to cancel usually precludes any further participation in the cancellation proceedings. However, I recognize that the procedural circumstances of this case are somewhat unique, and that some registrants may have believed that the continuation of the RPAR review preserved their rights to request a hearing until that review was completed.

Accordingly, I have determined that all persons adversely affected by this amended notice—whether or not they previously requested a hearing in response to the original notice—may request a hearing on specific registered uses on or before October 12, 1978. In the case of registrants, I have determined that a hearing may be requested within thirty (30) days of receipt of this amended notice, or on or before October 12, 1978, whichever occurs later.

Requests must be received by the Hearing Clerk within the applicable thirty (30) day time period (40 CFR 164.5(a)).

Requests for a hearing must be accompanied by specific objections in accordance with 40 CFR 164.20(b) and 164.22. Failure to comply with these requirements will automatically result in denial of the request.

Requests should be submitted to: Hearing Clerk (A-110), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

B. Status of the DBCP Suspension Actions

As explained above, suspension is an interim remedy used to protect against an imminent hazard to public health or the environment "during the time required for cancellation or change in classification proceedings" (FIFRA § 6(c)). The Agency interprets that provision to mean that the suspension order remains effective until the conclusion of cancellation proceedings. Accordingly, the suspension order remains effective until a final order of cancellation or change in classification is issued, or until such other time as the Administrator may determine.

Dated: September 6, 1978.

Steven D. Jellinek,
Assistant Administrator for Toxic Substances.

FOOD ADDITIVE PETITION

Filing

The Washington State University Cooperative Extension Service, Pullman, Wash. 99163, has submitted a petition (FAP 8H5193) to the Environmental Protection Agency (EPA) which proposes to amend 21 CFR 193 by establishing a regulation permitting the use of the insecticide aldicarb (2 - methyl - 2 - (methylthio) propionaldehyde *O* - (methylcarbamoyl) oxime and its cholinesterase - inhibiting metabolites 2 - methyl - 2 - (methylsulfinyl) - propionaldehyde *O* - (methylcarbamoyl) oxime and 2 - methyl - 2 - (methylsulfonyl) propionaldehyde *O* - (methylcarbamoyl) oxime in an experimental program involving the application of said insecticide to growing hops with a tolerance limitation of 50 parts per million (ppm) in dried hops. Notice of this submission is given pursuant to the provisions of section 409(b)(5) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street SW., Washington D.C. 20460.

Inquiries concerning this petition may be directed to Emergency Response Section (ERS), Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone at 202-755-2516. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated September 6, 1978.

Douglas D. Campt,
Acting Director, Registration Division.

ISSUANCE OF EXPERIMENTAL USE PERMITS

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and are subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 464-EUP-53. Dow Chemical, U.S.A., Midland, Mich. 48640. This experimental use permit allows the use of 6,000 pounds of the insecticide chlorpyrifos on cotton to evaluate control of bollworms and boll weevils. A total of 500 acres is involved; the program is authorized only in the State of Mississippi. The experimental use permit is effective from May 26, 1978 to May 26, 1979. A permanent tolerance for residues of the active ingredient in or on cottonseed has been established (40 CFR 180.342).

No. 3125-EUP-132. Mobay Chemical Corp., Kansas City, Mo. 64102. This experimental use permit allows the use of 40,000 pounds of the insecticide O-ethyl *O*-[4-(methylthio) phenyl] *S*-propyl phosphorodithioate on cotton to evaluate control of various cotton insects. A total of 20,000 acres is involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. The experimental use permit is effective from May 18, 1978 to June 3, 1979. Temporary tolerances for residues of the active ingredient in or on cottonseed and in milk, meat, fat, and meat by-products of cattle, goats, hogs, horses, poultry, and sheep have been established. A food additive regulation for residues of the active ingredient in cottonseed hulls and cottonseed oils has been established.

No. 891-EUP-29. Hercules, Inc., Wilmington, Del. 19899. This experimental use permit allows the use of 64 pounds of the insecticide O,O-diethyl S-(2-chloro-1-phthalimidoethyl) - phosphorodithioate on walnuts to evaluate control of coddling moth, walnut husk fly, aphids, mites, and scale insects. A total of 4 acres is involved; the program is authorized only in the State of California. The experimental use permit is effective from June 1, 1978 to June 1, 1979. This permit is being issued with the limitation that all

treated crops are destroyed or used for research purposes only.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office so that the appropriate permits may be made conveniently available for review purposes. These files will be made available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).)

MINNESOTA DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption to Use Mesurol To Control Blackbirds on Wild Rice

The Environmental Protection Agency (EPA) has granted a specific exemption to the Minnesota Department of Agriculture (hereafter referred to as the "Applicant") to use Mesurol (3,5-dimethyl-4-(methylthio) phenyl methyl carbamate) to control blackbirds which are causing grain losses on commercial wild rice in 13 counties in north central Minnesota. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460.

According to the Applicant, blackbirds attack cultivated wild rice paddies every year; if not controlled, blackbird damage may cause well over 50 percent of the wild rice grain to be lost to harvest, and as a result, economic losses of from $1.5 to $3.0 million may occur. The areas to be treated cover approximately 20,000 to 25,000 acres of commercial wild rice located in the following counties: Aitkin, Beltrami, Cass, Clearwater, Crow Wing, East Polk, Hubbard, Itasca, Koochiching, Lake of the Woods, Pennington, Red Lake, and Wadena. The Applicant will apply Mesurol aerially at a dosage rate of 1.5 to 3.0 pounds active ingredient per acre. At the lower rate, two applications may be made. The 75 percent WP formulation of Mesurol will be used; a 14-day preharvest interval will be observed.

Mesurol is currently registered as a seed treatment on corn for repelling blackbirds. Tolerances for Mesurol have been established on cherries (25 p.p.m.) and peaches (15 p.p.m.), in addition to corn (0.03 p.p.m.). A temporary tolerance for Mesurol residues on domestic rice has been established at 0.2 p.p.m. EPA has determined that residues greater than that level should not occur in the human food processed wild rice. Since neither the processed by-products (husks, debris) nor straw are used as animal feed items, there is no expectation of finite residues of Mesurol in meat, poultry, and eggs. Therefore, a 0.2 ppm residue level of this pesticide in or on processed wild rice grain will not constitute a human health hazard; in addition, wild rice constitutes a very small fraction of the human diet.

The Fish and Wildlife Service, U.S. Department of the Interior (USDI), has informed EPA that two endangered species, the Peregrine Falcon (*Falco peregrinus*) and the Wolf (*Canis lupus*), may be present in the Minnesota counties where the pesticide is to be applied; however, since neither species is known to frequent rice paddies, it is not believed that Mesurol will cause any adverse effects in this respect. Because of the large acreage involved, there is also a possibility that some mortality to nontarget songbirds will occur. However, most of these birds would ingest only enough to induce the repellency effect of this substance; this effect would discourage the birds from ingesting further amounts of treated grain which would induce death. Finally, both the USDI and EPA agree that Mesurol is acutely toxic to fish and aquatic invertebrates; accidental contamination of aquatic areas near these rice paddies will result in fish kills. Therefore, the utmost caution must be exercised by the applicators of this pesticide to avoid such contamination.

After reviewing the application and other available information, EPA has determined that (a) an emergency situation concerning blackbird damage to commercial wild rice crops has occurred; (b) there is no pesticide presently registered and available for this use to control blackbirds in Minnesota; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the blackbirds are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until September 15, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The Chemagro product, Mesurol 75 percent WP, is authorized;
2. The dosage rate shall be 1.5 to 3.0 pounds active ingredient per acre; two applications may be made at the 1.5 pound rate. Total amount applied per acre must not exceed 3.0 pounds active ingredient;
3. Up to 25,000 acres in the 13 counties listed in this notice may be treated;
4. Only State-certified and licensed commercial applicators may apply Mesurol;
5. Aerial applications are authorized;
6. Applications are limited to drained ricefields only;
7. Applicators must take careful measures to avoid contamination of adjacent aquatic areas or fish kills will occur;
8. A residue level of Mesurol in or on processed wild rice grain not exceeding 0.2 p.p.m. has been deemed adequate to protect the public health. The Food and Drug Administration of the U.S. Department of Health, Education, and Welfare has been advised of this action;
9. There will be a preharvest interval of 14 days;
10. The University of Minnesota should continue to monitor residue levels of Mesurol in soil and wild rice in cooperation with Chemagro. In addition, efficacy data should be collected so that a registration of this pesticide for use on wild rice may be obtained;
11. Any adverse effects of this pesticide in connection with this specific exemption must be reported to the EPA immediately. In particular, the Peregrine Falcon and the Wolf, endangered species that occur in north central Minnesota, must be protected by cautious application to avoid contamination of areas frequented by these species. Mesurol is also toxic to bees. Drift to nontarget areas must be avoided;
12. The Applicant and Chemagro should actively pursue registration for this use; and
13. A report summarizing the results of this program must be submitted to the EPA by January 15, 1979.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) *et seq.*).)

MINNESOTA DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption to Use Malathion To Control Wild Rice Worm on Commercial Wild Rice Crop

The Envrionmental Protection Agency (EPA) has granted a specific exemption to the Minnesota Department of Agriculture (hereafter referred to as the "Applicant") to use malathion to control populations of the Wild Rice Worm (*Apamea apamiformis*) which are threatening the commercial wild rice crop in thirteen counties in Minnesota. This exemption was granted in accordane with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Room E-315, Washington, D.C. 20460.

According to the Applicant, approximately 30,000 acres of commercial wild rice require treatment with malathion to control damage caused by the wild rice worm. The rice crop to be treated is located in the following counties: Aitkin, Beltrami, Cass, Clearwater, Crow Wing, East Polk, Hubbard, Itasca, Koochiching, Lake of the Woods, Pennington, Red Lake, and Wadena. The wild rice worm appears to be a continuing pest of this food crop in Minnesota.

There appear to be no registered alternative pesticides nor alternative methods of controls available to suppress this pest. The Applicant has previously submitted efficacy data which indicate that malathion is effective in controlling the wild rice worm. Application of malahtion E.C. on grain crops, including rice, is a registered use pattern. The Applicant proposes to use 1 pound of active ingredient malathion per acre. There will be a single aerial application, and a 10-day preharvest interval. Without this application, the Applicant estimated that wild rice growers could lose from $1,500,000 to $2,000,000.

EPA has determined that wild rice bearing residues not in excess of 8.0 parts per million (ppm) will not pose a hazard to human health. The Fish and Wildlife Service, U.S. Department of the Interior (USDI), has advised EPA that one endangered species, the Timber Wolf (*Canis lupus lycaon*), is found occasionally in the counties listed; in addition, two endangered migratory avian species, the Whooping Crane (*Grus americana*) and the Arctic Peregrine Falcon (*Falco peregrinus tundrius*), pass through the area. However, both species will be located north of Minnesota during the rice growing season.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of wild rice worm has occurred; (b) there is no pesticide presently registered and available for use to control the wild rice worm on the commercial wild rice crop in Minnesota; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the wild rice worm is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until August 31, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. A malathion E.C. product bearing labeling appropriate for aerial application will be used;
2. A maximum of 3,000 pounds active ingredient may be used;
3. The dosage rate shall not exceed 1 pound active ingredient per acre;
4. A single application may be made;
5. The counties to be treated are limited to the ones listed in this notice;
6. Applications of malathion are prohibited within 10 days of harvest;
7. Wild rice grains with malathion residues not exceeding 8.0 ppm will not pose a hazard to the public health and may be offered in interstate commerce. The Food and Drug Administration of the U.S. Department of Health, Education, and Welfare has been advised of this action;
8. Care will be taken to avoid spraying over fish-bearing waters. Treated water may not be used to irrigate crops or to water livestock; and
9. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption.

(Sec. 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) *et seq.*)

Dated: September 8, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administror for Pesticide Programs.

NORTH DAKOTA DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use 2,4-D To Control Broadleaf Weeds in Millet

The Environmental Protection Agency (EPA) has granted a specific exemption to the North Dakota Department of Agriculture (hereafter referred to as the "Applicant") to use 2,4-D (2,4-dichlorophenoxyacetic acid, alkylamine salt) on 75,000 acres of millet for the control of broadleaf weeds in North Dakota. This exemption was granted in accordance with, and is subject to, provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Room E-315, Washington, D.C. 20460.

Millets are minor crops grown for grain and forage. Of at least five different groups of millets grown in the United States, foxtails and proso are the primary ones grown in North Dakota. The Applicant has estimated that 100,000 acres of millet will be planted within the State this year. According to the Applicant, approximately 99 percent of the millet is harvested for grain and the major commercial use for the grain is in bird seed mixtures. Proso millet can also be foraged or cut and dried for hay. Foxtail millet hay and ground grain can be fed to livestock. Broadleaf weeds, such as redroot pigweed, Kochia, and wild mustard, are of primary concern to millet growers. There are currently no EPA-registered pesticides for control of broadleaf weeds in millets.

The Applicant has estimated that a 10 to 15 percent loss in yield will occur on 75,000 acres of millet if an efficacious herbicide is not applied to control broadleaf weeds. The economic loss is valued at $900,000 to $1,350,000.

The Applicant proposed to make a single application of 0.25 to 0.50 pound dimethylamine salt of 2,4-D per acre on a maximum of 75,000 acres of millet by State-certified private and commercial applicators using air and ground equipment.

2,4-D is a widely used broadleaf weed herbicide and tolerances have been established on foods that make up approximately 80 percent of the total average human diet. EPA has determined that millet grain and straw with residues of 2,4-D not in excess of 0.1 part per million (ppm) and 10 ppm, respectively, pose a negligible hazard to human health. EPA has also considered the potential for residues from nitrosamine contamination of the chemical and has calculated that such residues would be less than 1 part per billion (ppb) which level also should not pose undue hazard to the environment. This determination was based on the following reasons: (1) Millet is not normally a human food item; (2) the residues are extremely small; and (3) the residues are very likely not stable. The proposed use of 2,4-D is not expected to result in dietary exposure to residues of the chemical which would be in excess of those levels currently considered adequate to protect the public health for the following reasons: (1) Millet is not normally a human food item; (2) established tolerances for meat, milk, and poultry will not be exceeded; and (3) 2,4-D tolerances are established for the major feed commodities at levels significantly higher than the 10 ppm level expected to occur in millet straw.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of broadleaf weeds in millet is likely to occur; (b) there is no pesticide presently registered and available for use to control these weeds in North Dakota; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if these weeds are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until September 1, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. An EPA-registered dimethylamine salt of 2,4-D which is appropriately labeled for the intended means of application (ground or air) is authorized;
2. 2,4-D will be applied at a maximum rate of one-half pound active ingredient per acre. A maximum of one application may be made;
3. A maximum of 75,000 acres may be treated;
4. A maximum of 37,500 pounds active ingredient may be applied;
5. Applications may be made by air and ground equipment;
6. All applications will be made by State-certified commercial applicators or by growers;
7. No application will be made within 4 weeks of heading time;
8. The resulting residue levels of 0.1 ppm in or on millet grain and 10 ppm in or on straw from such use of this herbicide have been judged adequate to protect the public health. Permanent tolerances have been established for 2,4-D in meat and milk under provisions of the Federal Food, Drug, and Cosmetic Act. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;
9. All applicable directions, restrictions, and precautions on the product label must be followed;
10. Precautions must be taken to minimize or avoid spray drift to nontarget areas;
11. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption; and
12. The Applicant shall be responsible for assuring that all of the provisions of this specific exemption are met, and must submit a report summarizing the results of this program by December 31, 1978.

(Sec 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136 et seq.).)

PESTICIDE PROGRAMS

Receipt of Application to Register a Pesticide Product Entailing a Changed Use Pattern

Chempar Chemical Co., Inc., 260 Madison Avenue., New York, N.Y. 10016, has submitted to the Environmental Protection Agency (EPA) an application to register the pesticide product Rozol Formulation R11A Rodenticide Ground Spray Concentrate (EPA File Symbol 7173-RUN), which contains 5.34 percent of the active ingredient 2-[(p-chlorophenyl)phenylacetyl]-1,3-indandione. The application received from Chempar Chemical Co. proposes that the use pattern of this product be changed from use to control the Norway rat, roof rat, and house mouse in and around buildings to include control of the pine mouse in apple orchards. The application also proposes that this product be classified for restricted use.

Notice of receipt of this application does not indicate a decision by this Agency on the application. Interested persons are invited to submit written comments on this application to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, Room 401, East Tower, 401 M Street SW., Washington D.C. 20460. The comments must be received by October 13, 1978, and should bear a notation indicating the EPA File Symbol "7173-RUN". Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning this application should be directed to Product Manager (PM) 16, Registration Division (TS-767), Office of Pesticide Programs, at the above address or by telephone at 202-755-9315. The label furnished by Chempar Chemical Co., Inc., as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal

Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Notice of approval or denial of this

Rather, the purpose of this notice is to establish a date by which the parties to the forthcoming comparative hear-

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration

DETERMINATION OF POPULATION OF HEALTH SERVICE AREAS

Section 1516 of the Public Health Service Act, as added by the National Health Planning and Resources Development Act of 1974 (Pub. L. 93-641), authorized the Secretary of Health, Education, and Welfare to make grants (hereinafter referred to as "planning grants") to health systems agencies to assist them in meeting their costs. The amount of the planning grant to each health systems agency, as provided in the regulations governing this program (42 CFR Part 122, Subpart C), is determined in accordance with a formula set forth in the regulations, and is based in part upon a determination by the Secretary of the population of the health service area to be served by each agency. Section 122.205 of the governing regulations provides that the Secretary will determine the population of the areas based upon the latest available estimate from the Department of Commerce, and will publish annually in the FEDERAL REGISTER a list of all health service areas and their populations. The populations of the health service areas will be published prior to the final allocation of funds in each fiscal year. Pursuant to section 1536 of the Act, certain States (District of Columbia, Rhode Island, and Hawaii) as well as the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, the Northern Mariana Islands, and American Samoa do not have health service areas established within them or health systems agencies designated for them but are nonetheless eligible to receive planning grants, based in part upon their population. This notice also sets forth the population of these areas.

The latest available Department of Commerce comparable estimates of the populations of the health service areas are the July 1, 1975, estimates which appear in the current Population Reports series P-26. The issues from series P-26 publish the population of States by counties and by equivalent major incorporated jurisdictions, and were used to determine the population of the areas within all States except those States in the paragraphs which follow. The Department of the Treasury, Office of Revenue Sharing "Tribe List and Extract" was used to adjust the populations of health service areas in Arizona and the health service area that includes portions of Arizona, New Mexico, and Utah.

Series P-25 Population Reports lists the population of States and territories by counties, incorporated places, and selected minor jurisdictions. Issues from this series were used to determine, by aggregation of data for local jurisdictions, the population of areas in Alaska, Connecticut, Illinois, and Massachusetts, as well as the population of the District of Columbia.

Estimates of July 1, 1973, Populations Reports, series P-25 indicate the populaton of Puerto Rico, American Samoa, Guam, Virgin Islands, and the Trust Territory of the Pacific Islands and the Northern Mariana Islands. These are the latest available estimates from the Department of Commerce for these noncontinental territories.

The populations of the health service and other areas as described above are, with the following exceptions, the same as those published in the FEDERAL REGISTER, vol. 42, No. 171, Friday, September 2, 1977. The exceptions, nature of change, and reasons for the changes in the estimates are:

Florida: Health Service Area 3, population figure changed from 707,100 to 916,900; Health Service Area 5, population figure changed from 1,027,600 to 817,800. Reason for change: Redesignation; Volusia County moved from HSA 5 to HSA 3, July 18, 1978.

Iowa: Health Service Area 1, population figure changed from 2,523,100 to 2,508,600; Health Service Area 2, population figure changed from 709,800 to 724,300. Reason for change: Redesignation; Adams County and Taylor County moved from HSA 1 to HSA 2, July 14, 1977.

Northern Mariana Islands: Population of 14,000 is not identified separately until redesignation January 9, 1978; i.e., prior to that time was included in the Trust Territories of the Pacific Islands.

Trust Territory of the Pacific Islands; population figure changed from 107,500 to 93,500, due to redesignation January 9, 1978, setting up the Northern Mariana Islands separately per section 1536.

The following changes were in all cases made in order to correct errors in previously published figures:

Kansas: Health Service Area 2, population figure changed from 591,100 to 577,300; Health Service Area 3, population figure changed from 787,400 to 801,200.

Massachusetts: Health Service Area 1, population figure changed from 820,594 to 822,480. Health Service Area 3, population figure changed from 480,558 to 478,672.

North Carolina: Health Service Area 1, population figure changed from 934,922 to 939,700.

Accordingly, the Secretary has made the following determination of populations of the health service and other areas as described above.

Dated: September 1, 1978.

HENRY A. FOLEY,
Administrator,
Health Resources Administration.

DETERMINATION OF POPULATION OF THE STATES

Section 1525 of the Public Health Service Act, as added by the National Health Planning and Resources Development Act of 1974 (Pub. L. 93-641), authorizes the Secreatary of Health, Education, and Welfare to make grants (hereinafter referred to as "planning and development grants") to State health planning and development agencies (hereinafter referred to as "State Agencies") to assist them in meeting their costs of operation. The amount of the planning and development grant to each State health planning and development agency, as provided in the regulations governing this program (42 CFR Part 123, Subpart C) is determined in accordance with a formula set forth in the regulations, based in part upon a determination by the Secretary of the population of the States. Section 123.204 of the governing regulations provides that the Secretary will determine the population of each State based upon the latest available estimate from the Department of Commerce, and will publish annually in the FEDERAL REGISTER a list of all States and their populations. The purpose of this notice is to set forth the populations of the States as so determined.

The latest available Department of Commerce estimates of the populations of the States are the July 1977 estimates, issued by the Bureau of the Census, January 23, 1978, which are shown below.

The list does not include population figures for Hawaii, Rhode Island, District of Columbia, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, American Samoa, or the Northern Mariana Islands. The Secretary has determined that these States and territories meet the requirements of section 1536 of the act and the amount of grants to their State Agencies shall be computed in accordance with 42 CFR 122.204(b). The population of these States and territories is determined by the Secretary in accordance with 42 CFR 122.205. Accordingly, their population figures are included with the estimates of population for health service areas, which are published in a separate notice in this issue of the FEDERAL REGISTER. Also published in that notice is the population figure for Puerto Rico, currently under consideration by Congress for inclusion under the provisions of section 1536.

Accordingly, the Secretary has made the following determination of populations of the States,

Dated: September 1, 1978.

HENRY A. FOLEY,
Administrator, Health Resources Administration.

POPULATION OF THE STATES

[1977 Department of Commerce estimate]

Alabama	3,690,000
Alaska	407,000
Arizona	2,296,000
Arkansas	2,144,000
California	21,896,000
Colorado	2,819,000
Connecticut	3,108,000
Delaware	582,000
Florida	8,452,000
Georgia	5,048,000
Idaho	857,000
Illinois	11,245,000
Indiana	5,330,000
Iowa	2,879,000
Kansas	2,326,000
Kentucky	3,458,000
Louisiana	3,921,000
Maine	1,085,000
Maryland	4,139,000
Massachusetts	5,782,000

ARTIFICIAL KIDNEY-CHRONIC UREMIA ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Artificial Kidney-Chronic Uremia Advisory Committee, on October 18, 1978. The meeting will be held in Building 31, Room 9A51, at the National Institutes of Health, Bethesda, Md. The meeting will be open to the public from 9 to 10 a.m., to discuss administrative reports. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C. and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 10 a.m. to 5 p.m., for the review, discussion, and evaluation of individual contract proposals. The proposals and the discussions could reveal trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals.

Further information concerning the meeting may be obtained from Dr. Robert J. Wineman, associate chief, artificial kidney chronic uremia program, National Institute of Arthritis, Metabolism, and Digestive Diseases, NIH, Building 31, Room 9A-05, Bethesda, Md. 20014, 301-496-4881.

Messrs. James N. Fordham or Irving Shapiro, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Md. 20014, 301-496-3583, will provide summaries of the meeting and rosters of the committee members.

(Catalog of Federal Domestic Assistance Program No. 13.849, National Institutes of Health.)

Dated: September 1, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer, National Institutes of Health.

CELLULAR AND MOLECULAR BASIS OF DISEASE REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Cellular and Molecular Basis of Disease Review Committee, National Institute of General Medical Sciences, October 30-31, 1978, at the Landow Building, Conference Room A, 7910 Woodmont Avenue, Bethesda, Md.

This meeting will be open to the public on October 30, 1978, from 8:30 a.m. until noon for background information and discussion of issues relevant to the National Institute of General Medical Sciences and its national research service award training activities and research program. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Title 5, U.S.C. 552b(c)(4) and 552b(c)(6), the meeting will be closed to the public on October 30, 1978, from 1 until 5 p.m. and on October 31, 1978, from 8:30 a.m. until adjournment for the review, discussion, and evaluation of individual grant applications. These applications could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Paul Deming, Research Reports Officer, NIGMS, National Institutes of Health, Room 9A05, Westwood Building, Bethesda, Md. 20014, telephone 301-496-7301, will provide a summary of the meeting and a roster of committee members.

Dr. Lee Van Lenten, Executive Secretary, Cellular and Molecular Basis of Disease Review Committee, NIGMS, National Institutes of Health, Room 907, Westwood Building, Bethesda, Md. 20014, telephone 301-496-7621, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13-863, General Medical Sciences.)

Dated: September 1, 1978.

SUZANNE L. FREMEAU
Committee Management Officer, National Institutes of Health.

DIVISION OF RESEARCH GRANTS

Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the following study sections for September through November 1978 and individuals from who summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to study section business for approximately 1 hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code, and section 10(d) of Pub. L. 92-463, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Richard Turlington, Chief, Grants Inquiries Office of the Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Md. 20014, telephone area code 301-496-7441, will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each study section. Anyone planning to attend a meeting should contact the executive secretary to confirm the exact meeting time.

Study section	September to November 1978 meetings	Time	Location
Allergy and Immunology: Dr. Morton Reitman, room 320, telephone 301-496-7380.	Nov. 2-4	8:45	Holiday Inn, Chevy Chase, Md.

NATIONAL ADVISORY CHILD HEALTH AND HUMAN DEVELOPMENT COUNCIL

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, October 13-14, 1978, Building 31, Conference Room 6, National Institutes of Health, Bethesda, Md.

This meeting will be open to the public on October 13 from 9 a.m. to 5 p.m. with current status reports, review of the pregnancy and infancy program, and scientific presentations. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on October 14 from 9 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mrs. Marjorie Neff, Council Secretary, NICHD, Building 31, Room 2A-04, National Institutes of Health, Bethesda, Md., area code 301-496-1848, will provide a summary of the meeting and a roster of Council members as well as substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.864 and 13.865, National Institutes of Health.)

Dated: September 1, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

NEUROLOGICAL DISORDERS PROGRAM-PROJECT REVIEW A COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Neurological Disorders Program-Project Review A Committee, National Institutes of Health, October 19-21, 1978, in the Holiday Inn, 8120 Wisconsin Avenue, Bethesda, Md. 20014.

The meeting will be open to the public from 8:30 p.m. until 10:30 p.m. on October 19, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on October 20, from 8:30 a.m. to adjournment on October 21, for the review, discussion, and evaluation of individual grant applications. The applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Sylvia Shaffer, Chief, Office of Scientific and Health Reports, Building 31, Room 8A03, NIH, NINCDS, Bethesda, Md. 20014, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

Dr. Leon J. Greenbaum, Jr., Executive Secretary, Federal Building, Room 9C14B, Bethesda, Md. 20014, 301-496-9223, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.852, National Institutes of Health.)

Dated: September 1, 1978.

SUZANNE L. FREMEAU,
Committee management Officer,
National Institutes of Health.

NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE SCIENCE INFORMATION PROGRAM ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Neurological and Communicative Disorders and Stroke Science Information Program Advisory Committee, National Institutes of Health, November 9, 1978, in Building 31-C, Conference Room 6, NIH, Bethesda, Md. 20014.

This meeting will be open to the public on November 9, from 12 m. to 6 p.m. to discuss the status and plans for the Institutes' science information program. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, the meeting will be closed on November 9, from 9 a.m. until 12 m. for the review, discussion, and evaluation of an individual contract proposal. The portion of the meeting being closed involves the review, discussion, and evaluation of this contract proposal. The proposal and the discussion could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposal.

Sylvia Shaffer, Chief, Office of Scientific and Health Reports, Building 31, Room 8A03, NIH, NINCDS, Bethesda, Md. 20014, telephone 301-496-5751, will furnish summaries of the meeting and rosters of committee members.

Mr. Alfred Weissberg, Executive Secretary, NINCDS, NIH, Building 31, Room 8A-07, Bethesda, Md. 20014, telephone 301-496-9271, will furnish substantive program information.

REVIEW OF CONTRACT PROPOSALS AND GRANT APPLICATIONS

Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and section 10(d) of Pub. L. 92-463, for the review, discussion, and evaluation of individual contract proposals and grant applications, as indicated. These proposals and applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals and the applications.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the executive secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, unless otherwise stated.

Name of Committee: Virus Cancer Program Scientific Review Committee.
Dates: October 20, 1978; 9 a.m.
Place: Landow Building, Conference Room A, 7910 Woodmont Avenue, Bethesda, Md. 20014.

Public Health Service

SAFETY AND OCCUPATIONAL HEALTH STUDY SECTION

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Center for Disease Control announces the following National Institute for Occupational Safety and Health Committee meeting:

Name: Safety and Occupational Health Study Section.
Date: October 26, 27, 28, 1978.
Place: Conference Room C, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.
Time: 9 a.m.
Type of meeting: Open—9 to 11 a.m. on October 26, 1978. Closed—Remainder of meeting.
Contact person: Donald F. Flick, Ph. D., Executive Secretary, 5600 Fishers Lane, Parklawn Building, Room 8-63, Rockville, Md. 20857, telephone 301-443-4493.
Purpose: The Committee is charged with the initial review of research, training, demonstration, and fellowship grant applications for Federal assistance in program areas administered by the National Institute for Occupational Safety and Health, and with advising the Institute staff on training and research needs.
Agenda: Agenda items for the open portion of the meeting will include consideration of minutes of previous meeting, and administrative and staff reports. Beginning at 11 a.m., October 26, 1978, through adjournment on October 28, 1978, the Study Section will be performing the initial review of research grant and training grant applications for Federal assistance, and will not be open to the public, in accordance with the provisions set forth in Section 552b(c)(6), Title 5, United States Code, and the determination of the Director, Center for Disease Control, pursuant to Pub. L. 92-463.

Agenda items are subject to change as priorities dictate.

The portion of the meeting so indicated is open to the public for observation and participation. A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: September 5, 1978.

WILLIAM H. FOEGE,
Director, Center for Disease Control.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

OFFICE OF THE ASSISTANT SECRETARY FOR PLANNING AND EVALUATION

Statement of Organization, Functions and Delegations of Authority

This notice amends part A of the statement of organization, functions, and delegations of authority of the Department of Health, Education, and Welfare, Office of the Secretary, by modifying certain parts of chapter AE "Office of the Assistant Secretary for Planning and Evaluation" (41 FR 47275, dated 10-28-76).

Increased attention to the evaluation of the Department's programs, the need for greater coordination between evaluation management and available technical and statistical services, the importance of emphasizing the evaluative role of the special concerns function, and administrative streamlining justify these proposed changes. This notice:

(a) Establishes an Office of Evaluation and Technical Analysis (new AE.10.F).

(b) Abolishes the Office of Technical Support and Statistics and its component divisions (AE.10.G).

(c) Abolishes the Division structure within the Office of Program Systems (AE.10.A.1, 2 & 3).

(d) Transfers the Office of Special Concerns (old AE.10.F) to the Office of Evaluation and Technical Analysis. Special Concerns will have a suboffice status within the Office of Evaluation and Technical Analysis, and its existing Divisions are transferred intact (new AE.10.F.5).

(e) Creates within the Office of Evaluation and Technical Analysis:

(1) A Division of Evaluation Planning and Utilization (AE.10.F.1),

(2) A Division of Evaluation Standards and Management (AE.10.F.2),

(3) A Division of Computation and Modeling (AE.10.F.3), and

(4) A Division of Statistics (AE.10.F.4).

(f) Creates within the Office of Program Systems:

(1) A Division of Policy Analysis and Research (AE.10.A.1),

(2) A Division of Planning and Policy Coordination (AE.10.A.2), and

(3) A Division of Intergovernmental Policy (AE.10.A.3).

The following changes are made in the statement of organization, functions and delegations of authority.

Section AE.20.A is revised to read:

A. The Office of Program Systems is responsible for the general development, coordination, and operation of the Department's policy planning and development activities, as well as for direct policy and program analysis for crosscutting issues which involve more than one HEW agency or which involve HEW interaction with other Federal departments or agencies or other levels of government. This office also supervises the collection, storage, retrieval and dissemination of information required for planning, research, and policy anaylsis.

1. The Division of Policy Analysis and Research is responsible for the development of policies and procedures to insure the quality, relevance, and utility of the Department's research activities; for the conduct of policy analysis in subjects and areas not covered by, or cutting across, the programmatic offices of the Office of the Assistant Secretary for Planning and Evaluation; for providing the Department's analysis and representation on issues of primary concern to other Federal departments and agencies, for representing the Department externally on governmentwide task forces studying requirements and procedures for policy analysis, and for developing approaches to conduct effective policy analysis of social programs and providing technical support to other offices on techniques of policy, systems, and benefit cost analysis.

2. The Division of Planning and Policy Coordination is responsible for the oversight, development, and coordination of the Department's policy planning and development procedures, including the establishment of schedules and procedures to insure the availability of supporting information (policy analyses and research) for the purposes of policy planning, legislation, and budget preparation. This Division is further responsible for coordination of the internal development of the Department's legislative program, for performing analyses to identify program duplication and opportunities for consolidation, and for ongoing analysis of the effect of planning requirements in HEW laws and regulations, of experiences and opportunities in the areas of integration of services and the joint funding of projects.

3. The Division of Intergovernmental Policy is responsible for conducting and coordinating the necessary policy planning, program analysis, research, and evaluation on the implications of alternative departmental policies on State and local governments. Functions include: Conduct of policy planning and analysis when such policies have particular impact on State or local governments, review of proposed policies to insure that views of other governments are included in the consideration of proposed policies; oversight of research in areas having intergovernmental significance; analysis of the effect of Department policies on other government types (Indian tribes, Puerto Rico, Virgin Islands, trust territories); assistance to the Deputy Under Secretary for Intergovernmental Affairs on particular initiatives with real or potential impact on State or local governments, and oversight of State or local research and demonstrations under section 1115 of the Social Security Act.

Section AE.20F. is revised to read:

F. The Office of Evaluation and Technical Analysis is generally responsible for development of the Department's evaluation policies and procedures, oversight of the Department's evaluation and statistical policy activities, development and dissemination of new and effective evaluation techniques, performance of some direct evaluation, and insuring that evaluation reports are formatted and organized in such a way that they are available to policy, legislative, and budget decision discussions, and evaluating the Department's programs and analyzing potential departmental policies from the perspective of the program and policy impact on vulnerable groups, including Spanish-surnamed Americans, black Americans, Asian Americans, women, and others.

1. The Division of Evaluation Planning and Utilization is responsible for developing a departmental evaluation agenda, taking into account principal operating components' evaluation priorities, questions raised in policy, legislative, and budget discussions which can be answered by evaluation, and other anticipated information needs for future policy issues or budget or legislative decisions. This Division is also responsible for reviewing evaluation plans of the principal operating components and the Office of the Assistant Secretary for Planning and Evaluation, formatting evaluation products for maximum utility in policy, legislation, and budget decision discussions, working with the Assistant Secretary for Management and Budget to develop ways to shorten the timelag between question development and production of evaluation answers, direct operation of some evaluation projects, and monitoring the usefulness of evaluation products to the Department's decisionmakers.

2. The Division of Evaluation Standards and Management is responsible for monitoring evaluation projects of the Office of the Assistant Secretary

for Planning and Evaluation and the principal operating components through review of evaluation objectives, designs, and reports. Particular attention is given to the impact of programs on vulnerable groups, including Spanish-surnamed Americans, black Americans, Asian Americans, women, and other vulnerable groups. The Office initiates evaluations, research and policy analyses in response to requests from the Secretary, principal regional officials, heads of principal operating components and their staff, and to other agencies of

appropriate degree of their participation in the implementation and evaluation of Department programs. Divi-

Deputy Assistant Secretary for Evaluation and Technical Analysis.

d. The Women's Action program

[4110-12]

OFFICE FOR CIVIL RIGHTS

for Planning and Evaluation and the principal operating components through review of evaluation objectives and design (and in some cases direct participation in contractor selection) and continuing project monitoring throughout the course of the evaluation, establishing standards for use throughout the Department to insure utilization of adequate methodology and the relevance of evaluation activities to real policy or program management concerns, directly operating some evaluation projects, and providing technical assistance both to POC evaluation staff on particular problems of evaluation design or management and to the Office of the Inspector General on service delivery assessments.

3. The Division of Computation and Modeling is responsible for the provision of analytical staff services and professional scientific advice in modeling socioeconomic processes, the development and operation of large-scale computerized simulations for proposed departmental initiatives, provision of specialized scientific computation and analysis services for policy research and evaluation, and providing user-oriented computer assistance for evaluators and other analysts within the Office of the Assistant Secretary for Planning and Evaluation.

4. The Division of Statistics is responsible for the provision of statistical staff services and professional scientific advice in direct support of analytic work in planning and evaluation and in the technical coordination of selected crosscutting statistical activities within the Department, representing the Department in dealing with the Bureau of the Census and other Federal agencies on matters of statistical data collection, establishment of congruent definitions and classifications for statistics of departmental concern, and data access and use; direct performance of survey development and analysis for crosscutting evaluations and policy initiatives; performance of special studies and research to improve existing statistical techniques; development of new quantitative methods for planning and evaluation; and planning and coordination of major data collections to acquire data for policy analysis and evaluation.

5. The Office of Special Concerns is a suboffice within the Office of Evaluation and Technical Analysis and is responsible for conducting program and policy analyses, research and program evaluations to advise the Secretary, Assistant Secretary, and the Deputy Assistant Secretary for Evaluation and Technical Analysis on the impact of the Department's programs and the implications of alternative Departmental policies and strategies on the effective delivery of services to minorities, women, and other vulnerable groups. The Office initiates evaluations, research and policy analyses in these areas and assists or advises on evaluations, studies, or policy analyses conducted by other offices within the Office of the Assistant Secretary and elsewhere in the Department. In addition, the Office is the principal office within the Office of the Secretary which directly interfaces with the Department's Office for Civil Rights and other departmental agencies to coordinate the related issues of the planning, policy analysis, and the legislative formulation process and which conducts research, analysis, and evaluation activites in the civil rights area. These responsibilities, plus special evaluation, research, and analysis projects assigned by the Secretary or Assistant Secretary are accomplished through four divisions representing the interests of Spanish-surnamed Americans, black Americans, Asian Americans, and women as well as through cross divisional working teams.

a. The Division of Spanish-surnamed Americans serves as the principal advisor to the Secretary, the Assistant Secretary, and the Deputy Assistant Secretary for Evaluation and Technical Analysis on all policy matters relating to the Hispanic community. The Division brings this perspective to the development and implementation of a basic social science research, evaluation and policy strategy program for the Office of Special Concerns designed to increase the effective impact of departmental programs on minorities and women. Specific functions include: Design and conduct of research and evaluation studies on the needs of the Spanish-surnamed American populations and on the impact of Department policies and programs on these groups; advice and assistance in the design of research and evaluation studies conducted elsewhere within the Office of the Assistant Secretary and the Department: Identification of the policy issues relevant to impact on these groups; conduct of or assistance in analysis of these policy issues; preparation of reports, issue papers and decision memoranda for the Secretary; advice and assistance on policy analyses conducted elsewhere within the Department; periodic analysis of the standard performance indicators of the Department's programs, such as beneficiary data, to assess the equity of service delivery to Spanish-surnamed Americans and development of recommendations to the Deputy Assistant Secretary for Evaluation and Technical Analysis, the Assistant Secretary, and the Secretary indicating the need for improvement; provision of information and advice on programatic and policy issues impacting on this population to the Department's principal regional officials, heads of principal operating components and their staff, and to other agencies of Federal and State government; provision of advice to the Secretary on methods of building and sustaining effective communication with Spanish-surnamed American communities, including the appropriate degree of their participation in the implementation and evaluation of Department programs. Division staff also serve on cross-division teams to conduct planning, policy, legislative research and evaluation activities in the civil rights area, as well as other crosscutting activities assigned to the Office by the Secretary, the Assistant Secretary, or the Deputy Assistant Secretary for Evaluation and Technical Analysis.

b. The Division of Black American Affairs serves as the principal advisor to the Secretary, the Assistant Secretary, and the Deputy Assistant Secretary for Evaluation and Technical Analysis, on all policy matters relating to the black community. The Division brings this perspective to the development and implementation of a basic social science research, evaluation, and policy strategy program for the Office of Special Concerns designed to increase the effective impact of departmental programs on minorities and women. Specific functions include: Design and conduct of research and evaluation studies on the needs of the black American populations and on the impact of Department policies and programs on these groups; advice and assistance in the design of research and evaluation studies conducted elsewhere within the Office of the Assistant Secretary and the Department; identification of policy issues relevant to impact on these groups' conduct or of assistance in analysis of these policy issues; preparation of reports, issue papers, and decision memoranda for the Secretary; advice and assistance in policy analyses conducted elsewhere within the Department; periodic analysis of the standard performance indicators of the Department's programs, such as beneficiary data to assess the equity of service delivery to black Americans and development of recommendations to the Deputy Assistant Secretary for Evaluation and Technical Analysis, the Assistant Secretary, and the Secretary indicating the need for improvement; provision of information and advice on programatic and policy issues impacting on this population to the Department's principal regional officials, heads of principal operating components and their staffs, and to other agencies of Federal and State government; provision of advice to the Secretary on methods of building and sustaining effective communication with black American communities including the appropriate degree of their participation in the implementation and evaluation of Department programs. Division staff also serve on cross-division teams to conduct planning, policy, legislative, research, and evaluation activities in the civil rights area as well as other crosscutting activities assigned to the Office by the Secretary or Assistant Secretary or the Deputy Assistant Secretary for Evaluation and Technical Analysis.

c. The Division of Asian American Affairs serves as the principal advisor to the Secretary, the Assistant Secretary, and the Deputy Assistant Secretary for Evaluation and Technical Analysis on all policy matters relating to the Asian community. The Division brings this perspective to the development and implementation of a basic social science research, evaluation, and policy strategy program for the Office of Special Concerns designed to increase the effective impact of Departmental programs on minorities and women. Specific functions include: Design and conduct of research and evaluation studies on the needs of the Asian American populations and on the impact of Department policies and programs on these groups, advice and assistance in the design of research and evaluation studies conducted elsewhere within the Office of the Assistant Secretary and the Department; identification of policy issues relevant to impact on these groups; conduct of or assistance in analysis of these policy issues; preparation of reports issue papers and decision memoranda for the Secretary; advice and assistance in policy analyses elsewhere within the Department's programs, such as: Beneficiary data to assess the equity of service delivery to Asian Americans and development of recommendations to the Deputy Assistant Secretary for Evaluation and Technical Analysis, Assistant Secretary, and Secretary, indicating the need for improvement; provision of information and advice on programatic and policy issues impacting on this population to the Department's principal regional officials, heads of principal operating components and their staffs, and to other agencies of Federal and State governments; provision of advice to the Secretary on methods of building and sustaining effective communication with Asian American communities including the appropriate degree of their participation in the implementation and evaluation of Department programs. Division staff also serve on cross division teams to conduct the planning, policy, legislative, research, and evaluation activities in civil rights as well as other crosscutting activities assigned to the Office by the Secretary or Assistant Secretary or the Deputy Assistant Secretary for Evaluation and Technical Analysis.

d. The Women's Action program serves as the principal advisor to the Secretary in all policy matters relating to women. The Division brings this perspective to the development and implementation of a basic social science research, evaluation, and policy strategy program for the Office of Special Concerns designed to increase the effective impact of Department programs on minorities and women. Specific functions include: Design and conduct of research and evaluation studies on the needs of women and on the impact of Department policies and programs on women; advice and assistance in the design of research and evaluation studies conducted elsewhere within the Office of the Assistant Secretary and the Department; identification of policy issues relevant to impact on these groups; conduct of or assistance in analysis of these policy issues; preparation of reports, issue papers and decision memoranda for the Secretary; advice and assistance on policy analyses conducted elsewhere within the Department; periodic analyses of the standard performance indicators of the Department's programs such as beneficiary data to assess the equity of service delivery to women and development of recommendations to the Deputy Assistant Secretary for Evaluation and Technical Analysis, the Assistant Secretary, and the Secretary indicating the need for improvement; provision of information and advice on programmatic and policy issues impacting on this population to the Department's principal regional officials, heads of principal operating components and their staffs, and to other agencies of Federal and State governments; provision of advice to the Secretary on methods of building and sustaining effective communication with women including the appropriate degree of their participation in the implementation and evaluation of Department programs. Division staff also serve on cross-division teams to conduct crosscutting activities assigned to the Office by the Secretary, or the Assistant Secretary, or the Deputy Assistant Secretary for Evaluation and Technical Analysis.

Dated: September 5, 1978.

LEONARD D. SCHAEFFER,
Assistant Secretary for Management and Budget.

OFFICE FOR CIVIL RIGHTS

Statement of Organization, Functions, and Delegation of Authority

This notice amends the statement of organization, functions, and delegations of authority of the Department of Health, Education, and Welfare, Office of the Secretary, to delete in its entirety Chapter AT, Office for Civil Rights (42 FR 31647-52, June 22, 1977), and to replace it with a new chapter AT, which reflects a functional realignment of the headquarters and regional organization of the Office for Civil Rights.

The Office for Civil Rights enforces several laws and authorities which prohibit discrimination on the basis of race, color, national origin, sex, age, and physical and mental handicap in federally assisted programs.

The beneficiaries protected by the nondiscrimination provisions number in the millions. For example, they include approximately 44 million children in the public schools; 11 million students in colleges and universities; and more than 30 million needy, aged, sick, and disabled individuals who benefit from the Department's programs of assistance and services.

The universe of institutions subject to the provisions also is far reaching and includes approximately 16,000 school systems; 2,600 institutions of higher education; 7,000 hospitals; 6,700 nursing homes and home health agencies; hundreds of libraries, day care centers, educational broadcasting facilities, medical laboratories, and various State and local governmental agencies.

In light of the unprecedented staff increases and management needs of the Office for Civil Rights, as well as the increasing complexity of OCR's caseload, organizational arrangements and relationships between units are critical to the success of OCR's compliance program. This functional realignment provides a structure and a definition of authority and functions that will permit the Office to meet its current enforcement responsibilities more efficiently and effectively, and will provide for better management and more coordination with the Department's civil rights attorneys.

The new statement reads as follows:

SECTION AT.00 *Mission.* The primary mission of the Office for Civil Rights is to eliminate unlawful discrimination and to insure equal opportunities for the beneficiaries and potential beneficiaries of Federal financial assistance. This shall be accomplished as quickly and as effectively as possible, but with careful review and meaningful efforts at voluntary compliance.

SEC. AT.10 *Organization.* The Office for Civil Rights is under the supervision of the Director, who reports

termines policies and standards for the civil rights compliance program in coordination with the Secretary and

pretation of the Office's compliance program, including the preparation of news releases, articles, and other infor-

delegations of authority; insures that major Office communications with groups representing government orga-

for improving regional program activity; informs the Division of Training,

plementation of programs and operating procedures.

F. *Office of Deputy Director, Program, Review and Assistance.* Plans

V 43 / 178 SE 13 78

SEC. AT.10 *Organization.* The Office for Civil Rights is under the supervision of the Director, who reports to the Secretary. The Director also serves as the Secretary's Special Assistant for Civil Rights, responsible for overall coordination of the Department's external civil rights activities. The Office is comprised of the following headquarters and regional components:

A. HEADQUARTERS ORGANIZATION

OFFICE OF THE DIRECTOR AND PRINCIPAL DEPUTY DIRECTOR

Executive Secretariat.
Office of Public Affairs.
Office of Intergovernmental Affairs.

OFFICE OF THE DEPUTY DIRECTOR, COMPLIANCE AND ENFORCEMENT

Elementary and Secondary Education Division.
Postsecondary Education Division.
Health and Human Development Division.
Special Projects and Procedures Division.

OFFICE OF THE DEPUTY DIRECTOR, PROGRAM REVIEW AND ASSISTANCE

Program Planning, Appraisal, and External Technical Assistance Division.
Intradepartmental Technical Assistance Division.

OFFICE OF THE DEPUTY DIRECTOR, STANDARDS, POLICY, AND RESEARCH

Standards and Policy Development Division.
Research and Analysis Division.

OFFICE OF THE DEPUTY DIRECTOR, MANAGEMENT AND ADMINISTRATION

Management Division.
Field Management Division.
Planning, Budget, and Evaluation Division.

Training Division.
Administration Division.

B. REGIONAL ORGANIZATION

OFFICE OF THE REGIONAL DIRECTOR (REGIONS I-X)

Elementary and Secondary Education Division.
Postsecondary Education Division.
Health and Human Development Division.
Program Review and Management Support Division.

SEC. AT.20 *Functions.* A. Office of the Director and Principal Deputy Director. As the Department's chief officer for the enforcement of the nondiscrimination provisions of law and adviser to the Secretary on civil rights, the Director is responsible for the overall operations of the Office for Civil Rights (the Office); establishes policy and serves as adviser to the Secretary on civil rights matters, including intradepartmental activities aimed at incorporating civil rights compliance in the programs which the Department administers; sets overall direction and priorities of the Office by formulating budget requests and long-range and annual operating plans; determines policies and standards for the civil rights compliance program in coordination with the Secretary and other Federal agencies; determines cases for enforcement action; in consultation with the Office of the General Counsel (OGC) identifies the cases for referral to the Department of Justice for legal action and cases for the institution of administrative enforcement proceedings; consults with and advises the Assistant General Counsel for Civil Rights concerning the workload and priorities of the Office of the General Counsel, Civil Rights Division; represents the Secretary in congressinal and Executive Office of the President matters relating to civil rights; and solicits the participation of beneficiaries and recipients in the conduct of the Department's civil rights compliance program.

B. *Executive Secretariat.* Reviews completeness and responsiveness of all documents forwarded to the Director for approval; establishes and monitors proedures for insuring that the Office furnishes complete and timely responses to informational requests from the Secretary, Under Secretary, Department components, Congress, governmental agencies, and public; in conjunction with the Director, assigns responsibility for the preparation of documents and completion dates; determines internal clearance procedures for documents and correspondence, insuring legal clearances and necessary coordination with other Departmental components; insures that Office priorities are met with respect to matters referred to OCR for action. Follows up on the work assignments made by the Director; insures the communication in headquarters of the Director's decisions; serves as point of contact with the Secretary's executive secretariat; and maintains official Office correspondence files and records.

C. *Office of Public Affairs.* In coordination with the Assistant Secretary for Public Affairs, plans and directs a comprehensive civil rights public information program, provides advice and counsel from a public affairs perspective in Office planning and decisionmaking, performs a variety of editorial services and disseminates informational materials for print and audiovisual media in connection with Office activities.

Serves as the primary channel for dissemination of civil rights news to recipients and the general public; provides access for interested groups and citizens to participate in Office planning, policy, and operational activities; develops short- and long-range public information programs; plans and carries out the Office's publications program; maintains liaison with the media to facilitate coverage and interpretation of the Office's compliance program, including the preparation of news releases, articles, and other informational material; conducts a speaker's bureau; designs and maintains an exhibits program; provides technical assistance on public affairs matters to Office personnel and clears all informational materials intended for public dissemination, including administration of the Privacy Act and Freedom of Information Act for the Office. Advises all Office components on the preparation of materials intended for the various publics served.

D. *Office of Intergovernmental Affairs.* Maintains liaison with Congress, Federal departments and agencies, and State and local governments (including organizations representing such units of government). In coordination with the Assistant Secretary for Legislation, establishes processes to facilitate exchange of information between the Office and the Congress; reviews pending legislation for civil rights implications; develops position statements; coordinates policy and legal or statutory interpretation issues with the Deputy Director, Office of Standards, Policy and Research. Assists the Division of Planning, Budget and Evaluation in the development of civil rights legislative proposals. Coordinates with the Director and appropriate departmental offices the preparation of testimony and briefing materials for congressional hearings pertaining to civil rights; monitors the status of pending civil rights legislation and congressional (including appropriations) hearings related to civil rights matters and arranges for Office input as necessary; arranges and participates in briefings of congressional members and staffs on civil rights matters; notifies appropriate congressional committees of significant civil rights developments and informs members of compliance developments affecting Federal fund recipients in their congressional districts. Attends and provides summaries of legislative hearings; coordinates preparation of responses to congressional inquiries; develops tracking system for legislative purposes; maintains legislative library; and reviews CONGRESSIONAL RECORD and FEDERAL REGISTER, preparing summaries for Office use.

Facilitates communication of civil rights-related matters with Federal departments and non-HEW agencies, and State and local governments (including organizations representing such units of government); arranges and participates in briefings of State and local governments on civil rights matters and coordinates participation of office program officials in regional or national conferences which relate to Office enforcement authority; coordinates activities related to interagency

delegations of authority; insures that major Office communications with groups representing government organizations are coordinated within the Office before release; facilitates participation of organizations on Office planning, policy, and operational activities; and coordinates Office review of documents submitted by such organizations.

E. *Office of Deputy Director, Compliance and Enforcement.* Oversees the day-to-day conduct of compliance reviews, complaint investigations and other enforcement activities assigned by the Director. Supervises substantive program activities of the Directors, Regional Civil Rights Offices (Regional Offices). Assures preparation and distribution of manuals containing case-related procedural guidelines. Insures that regulations, guidelines, and standards developed by the Office of Standards, Policy and Research and approved by the Director are implemented in a uniform, effective, and timely manner. Establishes and implements quality control systems to insure that enforcement activities are carried out consistent with Office substantive, investigatory and case-related goals. Assures Regional Offices of necessary headquarters assistance and serves as the focal point for directing, coordinating, and interacting with Regional Offices regarding substantive program matters. Reviews cases recommended for enforcement and makes final enforcement recommendations to the the Director and the Office of the General Counsel.

(1) *Elementary and Secondary Education Division.* Directs program of substantive case-related technical assistance and case-related quality assurance for the Office's elementary and secondary education compliance programs. Insures that determinations related to a recipient's compliance status are reached in an appropriate and timely manner and that policies and procedures are applied consistently.

Advises regional personnel during all stages of case development, including determination and approval of appropriate remedies when discrimination is documented; responds to field inquiries on program matters, referring policy issues to the Office of Standards, Policy and Research, and obtaining advice from the Office of the General Counsel, as necessary; coordinates regional office participation in headquarters policy and program development activities; and resolves program problems and priorities affecting one or more regions.

Develops and directs ongoing substantive quality assurance program, including review and analysis of selected cases to insure consistent application of Office policies and procedures; prepares reports and recommendations for improving regional program activity; informs the Division of Training, Office of Management and Administration, of staff training needs as identified from quality assurance review of regional office performance; identifies areas in which new or modified compliance policies are necessary to respond to problems encountered by Regional Offices and makes appropriate recommendations to the Division of Standards and Policy Development.

Develops and directs a preenforcement case review program by examining cases recommended by Regional Offices for enforcement action; conducts negotiations with recipients, in conjunction with Regional Offices, to secure voluntary compliance in such cases; recommends manner of enforcement (i.e., referral to the Department of Justice for court action or initiation of administrative enforcement proceedings); provides necessary liaison with Office of the General Counsel regarding initiation of enforcement actions and cases already in enforcement action; and secures resource persons for preparation of expert testimony in cases involved in enforcement.

(2) *Postsecondary Education Division.* Conducts the same general functions as the Elementary and Secondary Education Division, except that functions are related to institutions of higher education.

(3) *Health and Human Development Division.* Conducts the same general functions as the Elementary and Secondary Education Division, except that functions are related to health and human development services institutions.

(4) *Special Projects and Procedures Division.* In conjunction with the Division of Standards and Policy Development, and with other Divisions of the Office of Compliance and Enforcement, initiates and implements program development and special compliance reviews. Coordinates complex or unique compliance activities.

Directs program of manual development delineating case-development and investigatory procedures. Consults with Division of Standards and Policy Development on procedures which impact on existing policy or development of new policy. Field tests all new procedures.

Develops and directs a program of expert/consultative services for Regional Offices and headquarters units; identifies required resources and obtains such resources either in-house or externally; maintains a register of in-house and external experts (e.g., statisticians, psychologists, linguists, educators, physicians) and secures their services as necessary; provides expert staff for consultation during investigations and in the development and implementation of programs and operating procedures.

F. *Office of Deputy Director, Program Review and Assistance.* Plans, coordinates, reviews, and appraises the departmentwide initiative to incorporate civil rights activities into the program operations of Principal Operating Components (POC's). Serves as coordinator for OCR interactions with departmental POC's in civil rights matters. Develops and promotes civil rights program policies for implementation by POC's; provides technical assistance and support services to POC's for civil rights policy implementation, including securing support from other OCR components; reviews and appraises civil rights activities undertaken by POC's. Plans departmental programs to provide financial and technical assistance to beneficiaries and recipients to support civil rights compliance; coordinates the Department's efforts to deliver such civil rights technical assistance; serves as liaison to other Federal agencies technical assistance efforts. Provides direct technical assistance to recipients, beneficiaries, and their organizations; designs and manages OCR's external technical assistance contracts.

(1) *Program Planning, Appraisal, and External Technical Assistance Division.* Develops long-range priorities, plans, and civil rights program requirements for POC's, including data management and survey activities, that are consistent with OCR's long-range planning activities. Develops the implementation of external technical assistance in cooperation with other Federal agencies.

Reviews and appraises the civil rights activities implemented by the POC's. Oversees establishment and implementation of a coordinated departmental civil rights system and development of appropriate procedures for advising the Director and Secretary regarding civil rights performance of POC's; conducts special program appraisal of civil rights performance of POC staff.

Coordinates the delivery of external technical assistance to HEW beneficiaries and recipients by OCR Technical Assistance Units (Units) in the HEW Regional Offices. Designs a communications system so that Units can learn of recipient problems directly from recipients; designs, in cooperation with the Division of Intradepartmental Technical Assistance, a system to insure that recipient compliance problems discovered by POC program monitoring staff in the regions and in headquarters are effectively communicated to the Units; develops a set of objectives and a work plan for the Units; monitors and evaluates the accomplishment of objectives; provides advice to the Units on specific prob-

lems; monitors the effectiveness of the technical assistance delivered in meeting recipients' needs and beneficiaries'

policy implications of legislative proposals and budget documents submitted to the Director for approval. Ap-

compliance reviews and participates with that Division in the conduct of such reviews when necessary to collect

most effective and efficient methods of using resources to accomplish the program goals and mission of the

(4) *Management Information Division.* Determines needs of OCR components for management information.

components. Identifies specific training needs of OCR employees; directs program for locating appropriate

lems; monitors the effectiveness of the technical assistance delivered in meeting recipients' needs and beneficiaries' concerns.

Develops and disseminates technical assistance materials to beneficiaries and recipients; maintains communication channels with recipients and beneficiaries to identify technical assistance needs; secures the cooperation of Office of the Secretary staff and carries out other special projects as defined by the Deputy Director, Office of Program Review and Assistance.

(2) *Intradepartmental Technical Assistance Division.* Assists the POC's in carrying out their civil rights responsibilities and activities by: Developing procedures for implementing civil rights responsibilities in POC program operations; designing civil rights management systems and operational criteria to guide the POC's in the administration of their civil rights programs; negotiating memorandums of understanding; developing annual work plans; establishing information systems to improve the management of POC civil rights efforts; and administrating contracts and conducting programs to train POC staff to carry out their civil rights responsibilities.

Reviews POC program regulations, directives, and instructions to assure support of the Department's civil rights authorities; serves on program regulation panels and prepares guidelines for POC civil rights review of their program regulations. Coordinates with POC's the review of grants to be awarded to assure consistency with civil rights agreements negotiated by the Department with recipients. Develops with POC's and related components in the Office of the Secretary the preparation of pregrant and postgrant review procedures. Secures OCR response to POC civil rights issues and concerns.

Guides the POC's in establishing technical assistance programs to explain civil rights compliance to recipients, including contracting; works with POC's to identify broad issues hindering the civil rights compliance of recipients and the delivery of services to beneficiaries; develops with the POC's new projects to monitor the civil rights compliance of their recipients and to assume responsibility for the monitoring of existing civil rights agreements.

G. *Office of Deputy Director, Standards, Policy and Research.* Serves as the Director's chief adviser on civil rights policy; directs the development and dissemination of compliance policies, policy-related procedures, legal standards, regulations, guidelines, and statements; directs policy development and research processes; provides policy interpretations and research to other units of the Office; and reviews the policy implications of legislative proposals and budget documents submitted to the Director for approval. Approves, with the concurrence of the Director, all civil rights surveys and forms and procedures for conducting such surveys.

(1) *Standards and Policy Development Division.* Formulates policies, policy-related procedures, legal standards, regulations, guidelines, and interpretations establishing actions required by the statutes OCR enforces. Assures that beneficiaries and recipients of HEW funds contribute to the development of such policy. Identifies information needed to formulate and implement policies, regulations, guidelines, and statements and communicates these needs to the Division of Research and Analysis. Participates with the Office of Compliance and Enforcement to target, design, and conduct special compliance reviews to formulate new policies and procedures. Consults with the Special Projects and Procedures Divison during the development of investigatory procedures by that Division.

Reviews policies and procedures developed by the Office of Program Review and Assistance defining the civil rights responsibilities of POC's and their respective program agencies and civil rights legislative proposals developed by the Divison of Budget, Planning and Evaluation to assure adherence to OCR policy and legal standards. Provides information for the development of OCR training programs and participates in these programs. Provides policy guidance to other OCR offices and clears policy-related materials prepared by these offices.

(2) *Research and Analysis Division.* Plans and conducts research on recipient and beneficiary populations to identify unresolved policy issues and provide to the Division of Standards and Policy Development information needed as a foundation for policy formulation. Plans and implements all OCR national surveys and data collection projects on recipient and beneficiary populations and performs analyses of resulting data. Performs research on a quick turnaround basis to support time-constrained policy formulation tasks. Serves as the primary OCR information resource on recipient and beneficiary populations. Coordinates the development and implementation of all research and information collection projects with appropriate OCR components. Shares the products of information collection and analysis activities and research studies with all OCR components to support the recipient and beneficiary population information needs of those offices. Assists the Division of Special Projects and Procedures in targeting special compliance reviews and participates with that Division in the conduct of such reviews when necessary to collect and analyze data needed to formulate new policy. Coordinates, supports, and monitors civil rights data collection and analysis and research activities of the Department and other Federal agencies to avoid unnecessary duplication of effort and to insure maximum use of available information on recipient and beneficiary populations. Maintains technical supervision over all contracts designed to support the information collection, analysis, and research of the Office of Standards, Policy and Research. Disseminates data and formal analytical and research reports to interested parties outside OCR. Develops and administers a roster of consultants and experts to support the Division's activities.

H. *Office of Deputy Director, Management and Administration.* Serves as Director's principal advisor on budget, administrative, management, planning, evaluation, training, and information systems for the Office. Supervises resource planning, long-range planning, budget development, and execution for headquarters and the regions. Monitors adherence of Office to goals and objectives, advises Director on alternatives and shifts in goals and objectives and recommends corrective actions for shortfalls in meeting goals and objectives. Appraises efficiency and effectiveness in meeting program and management objectives and recommends methods for improvements. Formulates management policies and procedures for development and implementation of management, budget, and information systems. Supervises the provision of training either through courses offered at the OCR training institute or other available programs. Supervises provision of full range of information management, personnel liaison, administrative, records maintenance and planning and evaluation systems for the Office. Advises Director on financial and other resource commitments of the Office and recommends alternative expenditure plans.

(1) *Management Division.* Establishes policies, procedures, and guidelines for the development and implementation of management systems and programs. Develops operating objectives and plans for programs which involve more than one headquarters unit or which involve more than one headquarters unit and the regions. Administers and staffs OCR resource management system and tracks Director and Secretary level initiatives. Conducts management analyses and researches management techniques and programs to improve Office operation. Advises Deputy Director on the

most effective and efficient methods of using resources to accomplish the program goals and mission of the Office. Provides management guidance to headquarters offices and components. Recommends operational, resource, and organizational adjustments and improvements to increase Office efficiency and effectiveness. In coordination with Field Management Division, analyzes Office-wide management programs, recommending corrective action where appropriate.

(2) *Field Management Division.* Develops, implements, and monitors regional management systems. Provides management guidance to and analysis of regional offices and components. Recommends operational resource and organizational adjustments and improvements to increase regional office management efficiency and effectiveness. Serves as principal advisor to the Deputy Directors, Office of Management and Administration and Compliance and Enforcement, on management approaches appropriate to regional needs. Participates with Management Division in the analysis of Office-wide management programs. Maintains management and administrative liaison with regional offices. Conducts studies and designs and implements model programs to increase the effectiveness of regional office managemet.

(3) *Plannning, Budget, and Evaluation Division.* Develops Office-wide long-range goals and national priorities and translates them into long-range plans, budgets, and legislative plans. Sets Office-wide planning calendar and develops long-range planning, budget, and legislative development guidelines within framework established by OMB and the Department. Coordinates Office-wide participation in HEW's legislative planning process in conjunction with the Office of Intergovernmental Affairs. Advises Deputy Director for Management and Administration on out-year effects of shifting goals and priorities and recommends courses of action which will insure an effective program and an efficient use of resources. Establishes evaluation systems and conducts studies to determine the impact, effectiveness, and benefits of OCR's programs on beneficiaries and client groups. Coordinates evaluation studies with appropriate OCR components. Serves as principal advisor to the Deputy Director, Office of Management and Administration, on planning, budget development, and evaluation matters emanating from the Office of the Secretary and as principal staff coordinator on such matters with the staffs of the Offices of the Assistant Secretaries for Planning and Evaluation, Management and Budget, and Legislation.

(4) *Management Information Division.* Determines needs of OCR components for management information. Designs and operates manual and automated systems which meet those needs. Assures that all components of the management information system are coordinated and comply with established professional standards and departmental and Federal requirements. Prepares regular and special reports and analyses on OCR's workload, actions, resources, and use of resources, using data available in the management information system. Maintains a library of reports. Directs contracted services for meeting management information system requirements when they are needed to augment in-house capabilities.

Establishes procedures and controls and provides guidance and direction to offices entering data into the management information system. Assures that data in the management information system conform to established requirements. Applies standard statistical tests to establish the validity of statistical analyses performed by this Division. Establishes controls to assure the security of automated data processing equipment and the data in the management information system. Conducts management studies on OCR procedures for collecting, storing, retrieving, and analyzing information, whether program or management, automated, or manual, and recommends methods for reducing costs and improving quality and effectiveness. Establishes Office-wide standards for the use of automated data processing, and participates in the evaluations of all external service proposals for automated data processing.

Provides a full range of support services to assist other OCR offices in the design, development, and operation of data systems; the acquisition, storage, and retrieval of data; the preparation of reports and analyses; and the acquisition and use of external services for obtaining, processing and analyzing data.

Maintains assurances of compliance with civil rights requirements filed with the Department by recipients of Federal financial assistance. Advises recipients on requirements for filing assurances. Maintains assurance files, and compiles lists of agencies filing assurances. Identifies recipients which have failed to file assurances and informs Office of Compliance and Enforcement of need to negotiate with or initiate enforcement action against recipients.

(5) *Training Division.* Directs and develops Civil Rights staff development and training programs for headquarters, regional offices, and other departmental components in coordination with appropriate departmental components. Identifies specific training needs of OCR employees; directs program for locating appropriate sources for outside training or consultant instruction for internal programs. Directs development of Office training materials and manuals and participates with other Office components in planning, scheduling, and preparing materials for training professional personnel in headquarters and regional offices. Directs and develops counseling activities concerning employees' career development opportunities, staff development, executive development, and other developmental programs. Directs all Office training activities to insure their educational validity; manages OCR Training Institute.

(6) *Administration Division.* Functions as liaison with the Office of the Assistant Secretary for Personnel Administration, the Office of the Secretary Personnel Office, and the regional personnel office. Provides full range of property management services including space, equipment, and supplies management. Manages central mailroom and duplicating services. Manages records retention, transfer, retirement, and disposal systems of the Office and establishes and monitors files and records maintenance systems used throughout the Office. Sets standards for forms and reports development and control and provides technical assistance to Office components in the development and use of forms and reports. Maintains directives system. Assesses effectiveness of paperwork management processes; recommends changes to increase efficiency. Insures adherence to Federal and departmental policies and standards regarding security of records, files, and equipment. Develops and implements Office budget control system to insure conformance with allotments and timely reporting on commitments and expenditures. Establishes policies, procedures, and reports on fiscal matters including pay, travel, contract services, supplies, and space. Manages and implements Office's contracts program.

Serves as liaison with departmental fiscal management units. Assists offices and operating divisions in the development of financial resource requirements and justifications; provides actual cost data and estimates of future obligations to the Planning and Budget Branch for incorporation into budget.

Manages national budget execution system and insures Office control and reprograming of allocated funds. Advises Deputy Director of fiscal effect of reallocations of funds. Submits regular financial status reports.

Implements Office contracts program; establishes policies, procedures,

and standards for award of contracts, including contract development and reviews; coordinates contract processes

annual operating plan (AOP); in conjunction with Deputy Director, Office of Compliance and Enforcement, de-

(3) *Health and Human Development Division.*[1] Conducts the same general functions as the Elementary and Sec-

listed provisions including, but not limited to, (1) the conduct of investiga-

Sec. SP.20 *Office of Program Operations*—(Functions).

G. Bureau of Data Processing (SPP).

ties relative to operations in the central EDP facility.

(2) Directs the development of com-

and standards for award of contracts, including contract development and reviews; coordinates contract processes with planning and resource management processes; reviews and makes recommendations on all contract proposals; reviews all awarded contracts to assure conpliance with programmatic requirements; implements responsibilities within guidelines and authority set by the Office of the Secretary, Division of Contracts and Grants; and maintains liaison with GSA, GPO, SBA, and other executive agencies, contractors, and vendors of administrative services as they relate to contracts.

B. *Regional Organization—Office of Regional Director.* Manages the staff and other resources allocated to the regional office to meet the OCR production objectives for the regional office activities with respect to: The number of compliance activities completed; the completion of compliance activities within established time frames; maintenance of an acceptable level of quality in all compliance decisions; and adherence to OCR compliance policies. Establishes priorities for the assigns work to the chief of the civil rights unit in the regional attorney's office.

Implements public policy regarding nondiscrimination; targets, schedules, and conducts complaint investigations and compliance reviews; determines compliance of recipients of Federal financial assistance and Federal contractors; negotiates for voluntary compliance; approves, disapproves, and monitors implementation of voluntary compliance and corrective plans; recommends to Deputy Director, Office of Compliance and Enforcement, administrative and/or judicial enforcement actions when voluntary compliance cannot be obtained; determines the most efficient enforcement method, including conciliation of differences between complainants and recipients/contractors; participates in headquarters policy and program development.

Provides technical assistance to promote understanding of OCR legal responsibilities and compliance programs. Such assistance is provided to recipients/contractors to help them correct noncompliance; to beneficiaries and other interested persons to help them deal with recipients/contractors on civil rights matters; to regional offices of other Federal agencies where their responsibiities overlap with those of OCR; to non-Federal agencies in the region whose responsibilities are analogous to those of OCR.

Prepares regional budget proposal and supporting resource and work measurement justifications; implements final budget allotment for region; implements regional portion of annual operating plan (AOP); in conjunction with Deputy Director, Office of Compliance and Enforcement, develops the part of the AOP pertaining to the conduct of complaint investigations, compliance reviews, staff training and other regional office activities.

Provides input on civil rights matters at principal regional official's (PRO) request; requests and receives administrative, supply, personnel, payroll, and other support services from PRO; works with PRO and Office of Program Review and Assistance to establish and maintain effective relations with POCs, especially regarding crosscutting enforcement and compliance responsibilities; works with PRO on Freedom of Information Act requests and news media inquiries; solicits chief regional civil rights attorney's legal opinion on investigations and compliance reviews as appropriate during all stages of those activities.

Establishes and maintains effective relations with civil rights arms of offices of Governors, mayors, county officials, and other key State and local officials; furnishes advice and assistance to them in civil rights matters, and strives to develop mutually beneficial Federal-State-local partnerships. Responds promptly and thoroughly to congressional inquiries; implements court decisions as they pertain to region.

Recruits, selects, and trains employees in program areas; maintains and effectively manages staff of supervisory personnel, equal opportunity specialists, and support and clerical employees; provides input into and implements PRO's affirmative action plan.

(1) *Elementary and Secondary Education Division.* Conducts complaint investigations and compliance reviews of preschool, elementary, and secondary institutions pursuant to the authorities the Office enforces; determines compliance of recipients; negotiates for voluntary compliance; advises regional civil rights director on critical compliance matters, and recommends cases for enforcement action; provides technical assistance for corrective action to recipients; monitors implementation of corrective plans; interfaces with the Regional Civil Rights Attorney's Division, POC regional officials, State, local, and other Federal agencies, and, as appropriate, headquarters offices and divisions; represents the regional office to promote understanding of Office's responsibilities and compliance programs.

(2) *Post Secondary Education Division.* Conducts the same general functions as the Elementary and Secondary Education Division except that functions are related to institutions of higher education.

(3) *Health and Human Development Division.*[1] Conducts the same general functions as the Elementary and Secondary Education Division except that functions are related to health and human development services institutions.

(4) *Program Review and Management Support Division.* Provides the Regional Director with evaluative reports and advice concerning the Office's immediate achievement of its production objective, specifically with regard to: The number of compliance activities completed; the completion of compliance activities within established time frames; maintenance of an acceptable level of quality in all compliance decisions; and adherence to OCR compliance decisions and compliance policies.

Evaluates the effectiveness of regional civil rights enforcement effort; prepares and monitors regional AOP; oversees regional resource planning; analyzes programs; conducts regional data collections, support services, computer programing, analysis, and research; assesses and assists in meeting regional training needs; provides administrative support services related to personnel, reproduction, space and supply acquisition and utilization, maintenance, correspondence control, safety, and travel. Responsible for complaint intake, including determination of jurisdiction and completeness; coordination and implementation of OCR case counting system; internal program quality control and liaison with headquarters quality control functions, including followup and monitoring; and information dissemination.

SEC. AT.30 *Delegations of authority.* The following authorities have been delegated by the Secretary to the Director, Office for Civil Rights:

1. Title VI of the Civil Rights Act of 1964, Pub. L. 88-352.
2. Section 504 of the Rehabilitation Act of 1973, Pub. L. 93-112.
3. Titles VII and IX of the Education Amendments of 1972, Pub. L. 92-318.
4. Sections 799A and 855 of the Public Health Service Act, Pub. L. 92-157 and 92-158.
5. Section 407 of the Drug Abuse Office and Treatment Act of 1972, Pub. L. 92-255.
6. Section 321 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, as amended, Pub. L. 91-616 and 93-282.
7. Section 606 of the Education of the Handicapped Act, Pub. L. 91-230, as amended by Pub. L. 94-142.
8. Executive Order 11246, as amended. (As of October 1, 1978, OCR's Executive Order 11246 enforcement duties will be transferred to the Department of Labor.)

This delegation includes all powers necessary to effectuate the above

[1] In larger regions, responsibilities may be divided between a Human Development Division and Health Division.

listed provisions including, but not limited to, (1) the conduct of investigations, (2) the conduct of negotiations to secure voluntary compliance, (3) the determination that such voluntary compliance cannt be secured, (4) the evaluation and acceptance or rejection of corrective action plans, and (5) the conduct of enforcement activities. With respect to the Executive order, the delegation also includes the authority to evaluate and accept or reject affirmative action programs. The Director of the Office for Civil Rights is authorized to redelegate the authority delegated to him subject to the review and concurrence of the Secretary.

Dated: September 1, 1978.

HALE CHAMPION,
Acting Secretary.

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part S (formerly part 4) of the statement of organization, functions, and delegations of authority for the Department of Health, Education, and Welfare contains the statement of organization, functions, and delegations of authority for the Social Security Administration (SSA). Sections SP.00, SP.10, and SP.20 of the SSA statement (formerly sections 4-05—00 through 4-05-20, respectively, of the SSA statement, published at 40 FR 4476-77, dated Jan. 30, 1975) describe the mission, organization, order of succession, and functions for SSA's Office of Program Operations (OPO).

Notice is hereby given that sections SP.10 G. 3. a.-c. and SP.20 G. 3. a.-c. originally published as sections 4-05-10 F and 4-05-20 F on January 30, 1975 (40 FR 4477), and as amended as sections SP.10 G. 3. a.-c. and SP.20 G. 3. a.-c. on March 28, 1977 (42 FR 16518-16521), of the OPO statement are hereby revised to reflect the reorganization of the Office of the Assistant Bureau Director, Electronic Data Processing Operations (EDP) in OPO's Bureau of Data Processing. This additional material reads as follows:

Sec. SP.10 *Office of Program Operations*—(Organization).

G. Bureau of Data Processing (SPP).

3. Office of the Assistant Bureau Director, EDP Operations (SPP1) which consists of the:

a. Immediate Office of the Assistant Bureau Director (SPP1).

b. Division of EDP Central Operations (SPP11).

c. Division of EDP Production Control and Support (SPP12).

Sec. SP.20 *Office of Program Operations*—(Functions).

G. Bureau of Data Processing (SPP).

3. The Office of the Assistant Bureau Director, EDP Operations (SPP1) plans and directs the nationwide operation of BDP's complex large scale computer processing operation and wire data transmission system, which is connected to over 1,300 field stations ranging from Hawaii to Puerto Rico. It exercises technical surveillance over EDP equipment in PSC's, including use, scheduling, and configuration. The Office utilizes a large variety of sophisticated EDP equipment for the establishment and maintenance of earnings accounts and beneficiary rolls; preparation of benefit computations and awards; provision of data to PSC's from benefit-in-force rolls; and establishment and maintenance of health insurance rolls and data. It generates, processes, and maintains the basic data utilized throughout SSA. The Office includes the following major components, whose functions are as indicated:

a. The immediate Office of the Assistant Bureau Director (SPP1), which provides executive-level leadership and direction to the Office of the Assistant Bureau Director, EDP Operations and its components.

b. The division of EDP Central Operations (SPP11).

(1) Maintains an extensive multisystem complex of computers, with responsibility for accomplishing SSA's EDP operations on a nationwide basis.

(2) Operates computer systems which perform computations for social security benefits, posts reported earnings to over 200 million master accounts, performs reinstating operations for improperly reported earnings records, maintains and updates computer tape files for health insurance, supplemental security income, and post-entitlement programs. Produces extensive statistical information relative to the administration of all social security programs.

(3) Operates the nationwide networks of communication systems linking the headqaurters computer facility with district offices, program service centers, health insurance carriers, and the Railroad Retirement Board. Operates specialized computer systems for the processing of optically scannable input documents and the preparation of computer output microforms.

c. The Division of EDP Production Control and Support (SPP12).

(1) Coordinates the establishment of standards and procedures for production which includes operation of the computers, testing computer programs, and operation of the nationwide online access system, SSADARS, and provides technical support activities relative to operations in the central EDP facility.

(2) Directs the development of computer utilization schedules within the entire EDP complex; has responsibility for the correct and timely execution of all schedules; and monitors the utilization of resources through performance measurement.

(3) Coordinates and interfaces workflow between customers and servicing areas; and maintains and controls the filing, maintenance, and retrieval of magnetic tapes from the tape library.

(4) Produces continuous coordination and liaison throughout EDP operations to achieve and maintain integration of production workflow; and audits all operating procedures and work processes to identify new trends and corrective actions to improve the operating environment.

Dated: September 5, 1978.

LEONDARD D. SCHAEFFER,
Assistant Secretary for Management and Budget.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

WESTERN AND CENTRAL GULF OF MEXICO OUTER CONTINENTAL SHELF (TENTATIVE SALE NO. 62)

Call for Nominations of and Comments on Areas for Oil and Gas Leasing

Pursuant to the authority prescribed in 43 CFR 3301.3, nominations are hereby requested for areas on the Gulf of Mexico Outer Continental Shelf for possible oil and gas leasing under the Outer Continental Shelf Lands Act (43 U.S.C. 1331-1343). Nominations will be considered for any or all of that part of the following mapped areas seaward of the submerged lands of the adjacent States.

1. Outer Continental Shelf Leasing Maps—Texas Nos. 1 through 8.

These maps are arranged in two sets (Nos. 1 through 4-7 maps, which sells for $5 per set and Nos. 5 through 8-9 maps, which will sell for $7 per set).

2. Outer Continental Shelf Leasing Maps—Louisiana Nos. 1 through 12.

This is a set of 27 maps which sells for $17.

3. Outer Continental Shelf Official Protraction Diagrams:

NG 14-3—Corpus Christi.
NG 14-6—Port Isabel.
NG 15-1—East Breaks.
NG 15-2—Garden Banks.
NG 15-12—Ewing Bank.
NG 15-3—Green Canyon.
NH 16-4—Mobile.
NH 16-7—Viosca Knoll.
NH 16-10—Mississippi Canyon.

These official protraction diagrams may be purchased individually for $2 each.

All these maps and diagrams may be purchased from the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, Suite 841, Hale Boggs Federal Building, 500 Camp Street, New Orleans, La. 70130.

All nominations must be described in accordance with the Outer Continental Shelf Leasing Maps or Official Protraction Diagrams prepared by the Bureau of Land Management, Department of the Interior and referred to above. Only whole blocks or properly described subdivisions thereof, not less than one quarter of a block, may be nominated.

Those nominating 12 blocks or more that they wish to see considered for offering in this proposed lease sale, are requested to arrange their nominations into 3 groups according to the priority of their interest.

In addition to requesting nominations of blocks for possible oil and gas leasing within the specified areas, this notice also requests comments identifying particular blocks recommended to be either specifically excluded from oil and gas leasing or leased only under special conditions because of conflicting values or environmental concerns. Particular geological, environmental, biological, archaeological, socioeconomic, or other information which might bear upon potential leasing and development of particular blocks is requested where available. Information on these subjects will be used in the tentative selection of tracts which precedes any final selection by the Director pursuant to 43 CFR 3301.4. This information is requested from Federal, State, and local governments, industry, universities, research institutes, environmental organizations, and members of the general public. Comments may be submitted on blocks or subdivisions thereof, as required for nominations, or on all areas or portions thereof as described above. They should be directed to specific factual matters which bear upon the Department's decision whether to make a preliminary selection of particular tracts within these areas for further environmental analysis pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4347) and possible leasing. Comments relating to general matters which would be applicable to oil and gas operations in any part of the OCS are not sought at this time.

Nominations and comments must be submitted not later than November 10, 1978, in envelopes labeled "Nominations of Tracts for Leasing in the Outer Continental Shelf-Western and Central Gulf of Mexico," or "Comments on Leasing in the Outer Continental Shelf-Western and Central Gulf of Mexico," as appropriate. They must be submitted to the Director, Attention 720, Bureau of Land Management, Department of the Interior, Washington, D.C. 20240. Copies must be sent to the Conservation Manager, Gulf of Mexico OCS Operations, Geological Survey, Suite 336, Imperial Office Building, 3301 North Causeway Boulevard, Metairie, La. 70011 and to the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management at his New Orleans address cited above.

Final selection of tracts for competitive bidding will be made only after compliance with established Departmental procedures and all requirements of the National Environmental Policy Act of 1969. Notice of any tracts finally selected for competitive bidding will be published in the FEDERAL REGISTER stating the conditions and terms for leasing and the place, date, and hour at which bids will be received and opened.

Dated: September 5, 1978.

FRANK GREGG,
Director, Bureau of Land Management.

Approved: September 8, 1978.

HEATHER L. ROSS,
Deputy Assistant Secretary of the Interior.

LITTLE MOUNTAIN SERVICE CENTER

Intention To Extend Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that thirty (30) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to extend the concession contract with Little Mountain Service Center, Inc., authorizing it to continue to provide facilities and services for the public within the Natchez Trace Parkway for a period of one (1) year from January 1, 1979, through December 31, 1979.

It has been determined that the proposed extension of this contract does not have potential for causing significant environmental impact and therefore preparation of an environmental assessment is not required.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1978, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Little Mountain Service Center, Inc., as the present satisfactory concessioner, the right to meet the terms of responsive offers for the proposed new contract and a preference in the award of the contract, if, thereafter, the offer of Little Mountain Service Center, Inc., is substantially equal to others received. The Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted within thirty (30) days after the publication date of this notice.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: September 7, 1978.

DANIEL J. TOBIN, Jr.,
Associate Director, National Park Service.

INTERNATIONAL TRADE COMMISSION

[332-101]

AGREEMENTS BEING NEGOTIATED AT THE MULTILATERAL TRADE NEGOTIATIONS IN GENEVA

Study of Probable Effects of Implementation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of an investigation under the authority of section 332(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1332(b)), to prepare an analysis of the effects on U.S. industrial and agricultural sectors of nontariff barrier agreements and tariff reductions currently being negotiated at the multilateral trade negotiations (MTN) in Geneva.

EFFECTIVE DATE: September 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Kenneth R. Mason, Secretary, Office of the Secretary, U.S. International Trade Commission, 202-523-0161.

SUPPLEMENTARY INFORMATION: In response to requests by the Committee on Finance of the U.S. Senate and the Committee on Ways and Means of the U.S. House of Representatives, the Commission will analyze the nontariff barrier and tariff reduction agreements and describe the impact of implementation of these agreements, by this country and by our trading partners, upon the domestic economy and upon U.S. export opportunities.

At the completion of this investigation, the Commission will transmit reports to the Committee on Finance of the U.S. Senate and the Committee on Ways and Means of the U.S. House of Representatives. The reports will not be made public in order not to interfere with the negotiations.

The purpose of this notice is to inform the public of the existence of this study in the event that the Commission finds it necessary to obtain commercial information pertaining to such investigation from domestic firms. Any requests for such information will be made of individual firms in a timely manner pursuant to section 333 of the Tariff Act of 1930 (19 U.S.C. 1333).

Copies of the requests of the committees of Congress are available to the public from the Commission's Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436.

By order of the Commission.

Issued: September 8, 1978.

KENNETH R. MASON,
Secretary.

[AA1921-Inq.-19]

AUTHOMOTIVE AND MOTORCYCLE REPAIR MANUALS FROM THE UNITED KINGDOM

Commission Determines "a Reasonable Indication of Injury"

On August 7, 1978, the U.S. International Trade Commission received advice from the Department of the Treasury that, in accordance with section 201(c)(1) of the Antidumping Act of 1921, as amended, an antidumping investigation was being initiated with respect to automotive and motorcycle repair manuals from the United Kingdom and that, pursuant to section 201(c)(2) of the act, information developed during Treasury's preliminary investigation led to the conclusion that there is substantial doubt that an industry in the United States is being or is likely to be injured by reason of the importation of such merchandise into the United States. Accordingly, the Commission, on August 10, 1978, instituted inquiry No. AA1921-Inq.-19 under section 201(c)(2) of the act to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on August 24, 1978, in Washington, D.C. Public notice of both the institution of the inquiry and of the hearing was duly given by posting copies of the notice at the Secretary's Office in the Commission in Washington, D.C., and at the Commission's office in New York City, and by publishing the original notice in the FEDERAL REGISTER of August 16, 1978 (43 FR 36335).

The Treasury Department instituted its investigation after receiving a properly filed complaint on June 30, 1978, from counsel acting on behalf of Clymer Publications Inc., Los Angeles, Calif. Treasury's notice of its antidumping proceeding was published in the FEDERAL REGISTER of August 8, 1978 (43 FR 35139).

On the basis of information developed during the course of the inquiry the Commission determines that there is a reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of automotive and motorcycle repair manuals into the United States from the United Kingdom allegedly sold at less than fair value as indicated by the Department of the Treasury.[1]

VIEWS OF CHAIRMAN JOSEPH O. PARKER AND COMMISSIONERS GEORGE M. MOORE AND CATHERINE BEDELL

On August 7, 1978, the U.S. International Trade Commission received advice from the Secretary of the Treasury that, during the course of a preliminary investigation with respect to automotive and motorcycle repair manuals from the United Kingdom, he had concluded on the basis of the information available that there is substantial doubt whether an industry in the United States is being, or is likely to be, injured by reason of the importation of this merchandise into the United States. Acting upon this advice, the Commission, on August 10, 1978, instituted inquiry No. AA1921-Inq.19 under section 201(c)(2) of the Antidumping Act, 1921, as amended, to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States allegedly sold at less than fair value (LTFV). Inquiries involving issues under this section of the Antidumping Act are required to be completed within 30 days.

DETERMINATION

On the basis of information developed during the course of this inquiry, we determine that the standards set forth in section 201(c)(2) of the Antidumping Act, 1921, as amended, for continuing the investigation have been met.

---

[1] Commissioners George M. Moore and Catherine Bedell determine that, on the basis of information developed during the course of this inquiry, there is a reasonable indication that an industry in the United States is being, or is likely to be injured by reason of the importation of automotive and motorcycle repair manuals from the United Kingdom, allegedly sold at less than fair value, as indicated by the Department of the Treasury. Chairman Joseph O. Parker, voting to continue the investigation, does not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of automotive and motorcycle repair manuals from the United Kingdom, allegedly sold at less than fair value, as indicated by the Department of the Treasury. Vice Chairman Bill Alberger and Commissioner Italo H. Ablondi determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of automotive and motorcycle repair manuals from the United Kingdom, allegedly sold at less than fair value as indicated by the Department of the Treasury. Commissioner Daniel Minchew did not participate in the determination.

DISCUSSION

The petition to the Department of the Treasury which resulted in the advice from the Secretary of the Treasury which was the basis for this inquiry was filed by Clymer Publications, Los Angeles, Calif. Clymer alleges that the subject merchandise is being sold in the United States at LTFV margins ranging from approximately 27 to 29 percent. Information developed during the Commission's inquiry indicates that U.S. imports of automotive and motorcycle repair manuals from the United Kingdom, all of which are alleged to be sold in the United States at LTFV, rose by 276 percent between 1974 and 1977. The ratio of such imports to apparent U.S. consumption rose by two-thirds during 1975–77 and continued to increase substantially during January–June 1978.

U.S. producers' shipments decreased 5 percent from January–June 1977, to January–June 1978, while the volume of imports from the United Kingdom increased 27 percent.

Although the value of U.S. producers' net sales of automotive and motorcycle repair manuals grew annually from 1975 to 1977, data submitted by the domestic producers indicate net operating profit on those sales in 1977 was about a third lower than operating profit in 1974 or 1975. The ratio of net operating profit to net sales in 1977 was only about half that experienced in 1975.

Specific pricing data for automotive and motorcycle repair manuals are not available. Data on average unit values of shipments, however, indicate that since 1976, imported manuals have been generally valued about 9 percent less than manuals produced in the United States. The LTFV margin alleged is large enough to account for the difference in value.

The suggested retail prices of the imported product and the U.S. produced product are virtually identical. Generally, U.S. producers provide a variety of discounts to their major customers, based on the volume of each title purchased. The U.S. producers' discounts range from 40 percent of the list price for the smallest customers to 65 percent for those purchasing more than 5,000 volumes. The importer, however, often offers discounts of 62½ percent on initial orders regardless of the volume purchased. Information was submitted to support the contention that a higher proportion of the importers' sales than of the U.S. producers' sales are subject to discounts greater than 60 percent.

A continuation of discounting policies, as alleged, of LTFV automotive and motorcycle repair manuals from the United Kindom may result in their making greater inroads into the U.S. market. Such LTFV pricing may result in the enhancement of the competitive position of imported manuals over domestically produced manuals and contribute to increased market penetration. In additon, there appears to be no limitation on the ability to produce the alleged LTFV merchandise for export to the United States.

CONCLUSION

We determine that, on the basis of the indications of injury described above, the investigation should be continued to determine whether the Antidumping Act is being violated.

STATEMENT OF REASONS OF COMMISSIONER BILL ALBERGER [1]

STATUTORY CRITERIA OF SECTION 201(c)(2)

If the Secretary of the Treasury concludes, during a preliminary investigation under the Antidumping Act, 1921, as amended, that there is substantial doubt regarding possible injury to an industry in the United States, he shall forward to the U.S. International Trade Commission (Commission) his reasons for such doubt. Within 30 days of receipt of the Secretary's reasons, the Commission shall determine whether there is no reasonable indication that and industry in the United States is being or is likely to be injured, or is prevented from being established,[2] by reason of the importation of merchandise allegedly sold in the United States at less than fair value (LTFV). This inquiry, instituted on August 10, 1978, concerns automotive and motorcycle repair manuals from the United States.

DETERMINATION

On the basis of information developed during the course of this inquiry, I determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of automotive and motorcycle repair manuals into the United States from the United Kingdom allegedly sold at less than fair value as indicated by the Department of the Treasury (Treasury).

THE IMPORTED ARTICLE AND THE DOMESTIC INDUSTRY

Automotive and motorcycle repair manuals are technical, illustrated "do-it-yourself" type work manuals used to maintain and repair machines. In this inquiry, the majority are paperback publications. There are currently six firms publishing automotive repair manuals in the United States, with two of the firms accounting for the majority of publications.

INFORMATION REGARDING ALLEGED MARGINS OF LTFV SALES

Treasury advised the Commission that the petition alleged margins of LTFV sales of 26.9 to 28.6 percent of the prices in the home market.

A REASONABLE INDICATION OF INJURY

Imports from the United Kingdom. Since 1974, U.S. imports of automotive and motorcycle repair manuals have nearly quadrupled. For the first 6 months of 1978, imports increased 27 percent over the corresponding period for 1977.

U.S. production and shipments. Since 1975, U.S. production of automotive and motorcycle repair manuals has increased annually. For January–June 1978, production is up 10 percent over the same period in 1977. Shipments by U.S. producers declined very slightly from 1975 to 1976 before climbing nearly 30 percent in 1977. The value of shipments rose by nearly 20 percent from 1975 to 1977.

Inventories. Yearend inventories for U.S. producers rose slightly from 1975 to 1976, but dropped sharply during 1977.

Profitability. The value of net sales of reporting U.S. producers automotive and motorcycle repair manuals rose annually from 1974 through 1977, with an overall increase of 18 percent, most of the increase occurring between 1976 and 1977, the year of the greatest increase in imports from the United Kingdom. Net profits on sales of automotive and motorcycle repair manuals increased by nearly half between 1976 and 1977, resulting in a substantial increase in the ratio of profits to sales. Profit margins for reporting U.S. producers, in the aggregate, have been above the level for most U.S. industries throughout the period covered by the inquiry. One U.S. producer that responded to the Commission's questionnaires appeared to be in substantial financial difficulty in 1974, 1975, and 1976, but has improved its financial position significantly in 1977 and in January–June 1978, the period when the alleged LTFV imports were increasing most rapidly.

Prices. Comparative price data are available only for the first two quarters of 1978. These data indicate that, for the three leading customers of the U.S. importer, the weighted average price of automotive and motorcycle repair manuals was about 15 percent higher than the reporting U.S. producers' prices to their three leading customers. The differential between U.S. producers' and the U.S. importers' prices arises from variations in their discount policy to similar classes of customers. The greatest discount offered by the leading U.S. importer of alleged LTFV automotive and motorcycle repair manuals is 62½ percent, whereas the greatest discount offered by the U.S. producer is 65 percent. In addition, the importer of alleged LTFV manuals concentrates on smaller customers that may not be eligible for the maximum 62½-percent discount.

Likelihood of injury. In view of the current health of the domestic industry—with production and profits increasing, and inventories declining—concurrent with increasing imports of alleged LTFV automotive and motorcycle repair manuals from the United Kingdom, we find no indication of injury to the domestic industry in the forseeable future as a result of the alleged LTFV imports.

Employment. This category is difficult to measure since printing is contracted out by the publishing houses and, therefore, the publishers' number of employees do not necessarily reflect changes in production levels. The small number of employees in the publishing houses has slightly increased in the 1975–77 period.

CONCLUSION

Based on increased production and shipments by U.S. producers, reduced inventories, good profits and prices by domestic producers below those of the imported product. I find no reasonable indication of injury to the domestic industry that may be attributed to imports of automotive and motorcycle repair manuals from Great Britain.

By order of the Commission.

Issued: September 8, 1978.

KENNETH R. MASON,
Secretary.

[FR Doc. 78-25780 Filed 9-12-78; 8:45 am]

[1] Commissioner Italo H. Ablondi concurs in the result.

[2] Prevention of establishment of an industry in this inquiry is not in question and will not be discussed further in these views.

STATEMENT OF REASONS OF VICE CHAIRMAN BILL ALBERGER AND COMMISSIONERS GEORGE M. MOORE AND CATHERINE BEDELL

STATUTORY CRITERIA OF SECTION 201(c)(2)

If the Secretary of the Treasury concludes during a preliminary investigation under the Antidumping Act, 1921, as amended, that there is substantial doubt regarding possible injury to an industry in the United States, he shall forward to the U.S. International Trade Commission (Commission) his reasons for such doubt. Within 30 days of receipt of the Secretary's reasons, the Commission shall determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of merchandise allegedly sold in the United States at less than fair value (LTFV). Therefore, The Commission, on August 10, 1978, instituted inquiry AA1921–Inq.–18, under section 201(c)(2) of that act, concerning standard household incandescent lamps (light bulbs) from Hungary.

DETERMINATION

On the basis of information developed during the course of this inquiry, we determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of light bulbs into the United States from Hungary allegedly sold at less than fair value, as indicated by the Department of the Treasury.

THE IMPORTED ARTICLE AND THE DOMESTIC INDUSTRY

Standard household incandescent bulbs consist of single wattage light bulbs ranging from 15 to 150 watts, as well as three-way bulbs which offer a choice of three wattages, all the above operating at more than 100 volts. Eight companies currently report production of standard household incandescent bulbs in the United States. Four of these companies also produce special application bulbs, which differ from "standard" bulbs in their longer life, reliability characteristics, and are produced by lower speed processes which are also more labor intensive. Consequently, these special bulbs command higher prices than "standard" household bulbs and are marketed for commercial and industrial applications.

Four companies, General Electric Co. (GE), GTE Sylvania (Sylvania), that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of standard incandescent light bulbs from Hungary that may be sold in the United States at less than fair value (LTFV) within the meaning of the Antidumping Act, 1921, as amended.

The Treasury Department had instituted its investigation after receiving a properly filed complaint on June 21, 1978, from counsel acting on behalf of Westinghouse Electric Corp. The Treasury notice of its antidumping proceeding was published in the FEDERAL REGISTER of August 7, 1978 (43 FR 34861).

Accordingly, on August 10, 1978, the Commission instituted inquiry No. AA1921–Inq.–18 under section 201(c)(2) of the Act to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on August 22, 1978, in Washington, D.C. Public notice of both the institution of the inquiry and of the hearing was duly given by posting copies of the notice at the Secretary's Office in the Commission in Washington, D.C., and at the Commission's office in New York City, and by publishing the original notice in the FEDERAL REGISTER, August 16, 1978 (43 FR 36336).

On the basis of information developed during the course of this inquiry, the Commission determines that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of standard incandescent light bulbs from Hungary allegedly sold at less than fair value as indicated by the Department of the Treasury. [1]

[1] Vice Chairman Bill Alberger and Commissioners George M. Moore and Catherine Bedell determine that, on the basis of information developed during the course of this inquiry, there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of standard household incandescent lamps from Hungary allegedly sold at less than fair value as indicated by the Department of the Treasury. Chairman Joseph O. Parker, voting in the statutory language, does not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of standard household incandescent lamps from Hungary allegedly sold at less than fair value, as indicated by the Department of the Treasury. Commissioner Italo H. Ablondi, dissenting in this determination, determines that there is a reasonable indication that an industry in the United States is being, or is likely to be injured by reason of the importation of standard household incandescent lamps from Hungary allegedly sold at less than fair value as indicated by the Department of the Treasury. Commissioner Daniel Minchew did not participate in the determination.

[7020–02]

[AA1921–Inq.–18]

STANDARD HOUSEHOLD INCANDESCENT LAMPS FROM HUNGARY

Commission Determines "No Reasonable Indication of Injury"

On August 4, 1978, the U.S. International Trade Commission received advice from the Department of the Treasury that an antidumping investigation had been initiated on August 1, 1978, with respect to standard household incandescent light bulbs from Hungary, in accordance with section 201(c)(1) of the Antidumping Act, 1921, as amended. Pursuant to section 201(c)(2) of the Act, information developed during the Treasury's preliminary investigation led to the conclusion that there is substantial doubt

Westinghouse Electric Corp. (Westinghouse), and North America Philips (Philips) account for more than 95

falling from 1973–75, then rising from 1976 through the first half of 1978. The inventory to sales ratios fell from

from Action Industries (the importing agent of Hungarian bulbs).

North American Philips listed four

light bulbs from Hungary will not injure the domestic industry.

We have therefore determined that

from Hungary are being imported with margins of dumping ranging from 234 to 357 percent. The light bulbs allegedly sold at LTFV are pro-

facts, in my opinion, are indicative of injury and compel the conclusion that the investigation should be continued to determine whether the Antidump-

Westinghouse Electric Corp. (Westinghouse), and North America Philips (Philips) account for more than 95 percent of domestic shipments of standard incandescent bulbs. Of the four companies, only Westinghouse filed a petition with the Treasury Department.

INFORMATION RECEIVED FROM THE DEPARTMENT OF THE TREASURY ON LTFV SALES

In this investigation, we are dealing with imports from a Hungarian company which is wholly owned by and part of a state-controlled economy country. Because of this Westinghouse asserted that the foreign market value of the bulbs should be measured by prices of similar merchandise sold in a non-state-controlled economy. Using prices charged by a major West German supplier and comparing their foreign market prices to the estimated prices paid to the Hungarian company, Tungsram, by the importer, Action Industries, dumping margins as computed by Westinghouse allege a range from 234 percent to 357 percent.

NO REASONABLE INDICATION OF INJURY OR LIKELIHOOD OF INJURY TO U.S. INDUSTRY

Imports from Hungary. Over the period 1973-77, total imports of household light bulbs steadily declined from 187 million units in 1973 to 89.5 million units in 1977—a decrease of 52 percent. Despite this decline in overall imports, the volume of imports from Hungary increased over the same period by 73 percent—from 31 million units to 53 million units.

U.S. production and shipments. After reaching a peak in the boom year, 1973, U.S. production of light bulbs dropped nearly 20 percent (from 1.4 billion units to 1.1 billion units) by the recession year, 1975. Output improved after that, increasing by 19.2 percent from 1975 through 1977—with the 1977 level being only 3.4 percent below 1973's peak. Half-yearly data for 1978 indicate that current output is running at a level slightly higher than that of 1977. Shipments, by volume, have followed a pattern similar to that of production, except that by 1977 the recovery to the 1973 level was virtually complete.

Utilization of productive capacity. Capacity utilization has changed little since 1973, the year in which most agree that output represented maximum economic use of capacity. Since then, capital expenditures by U.S. producers have been concentrated on increased automation and efficiency for existing production lines rather than on the creation of new capacity.

U.S. producers' inventories. U.S. producers' inventories have paralleled trends in production and shipments, falling from 1973-75, then rising from 1976 through the first half of 1978. The inventory to sales ratios fell from about 27 percent in 1973 to about 24 percent in 1977.

Employment. The data available show that since 1973 employment and man-hours worked by production and related workers making standard household lamps have decreased by 11.2 percent and 15.3 percent, respectively, or by 329 persons and 891,000 man-hours. The number of workers did not change from the January-June 1977 period to the corresponding period of 1978, but man-hours worked during the first half of 1978 decreased by 39,000 (1.5 percent) from the first half of 1977. These declines in employment and man-hours have been accompanied by substantial increases in productivity, however; implying that it is was automation, not import competition, that displaced the employees. Productivity increased over 17 percent in the 4½ years between 1973 and June 1978.

Profitability—Profit-and-loss figures for the domestic light bulb industry are not available since Westinghouse was the only respondent to the Commission questionnaire supplying such data.

Westinghouse's profit experience has been • • • since 1973 with a • • • since 1976. Based on the information developed during this inquiry, we cannot attribute these • • • to import competition.

Market share—In terms of volume, Hungary increased its share of the U.S. import market from 16 percent in 1973 to 59 percent in 1977. Imports from Hungary also increased as a percentage of apparent domestic consumption—from 2.1 percent in 1973 to 3.9 percent in 1977—but this increase in market share displaced other imports, not domestic producers. U.S. producers' share of apparent domestic consumption during this period actually increased from 87.3 percent to 93.4 percent.

Lost sales—Westinghouse cited 11 instances of sales allegedly lost to imported Hungarian light bulbs. The Commission verified that four of these accounts did place some orders for Hungarian light bulbs, but that they nevertheless continued to place orders with Westinghouse and/or other domestic manufacturers. A fifth purchaser (of the 11 cited) stated that he still dealt exclusively with Westinghouse, while another indicated that he had switched to a different domestic producer.

General Electric cited five customers with whom sales had been lost to Hungarian light bulbs. The two customers who could be reached stated that GE was still their principal supplier and that they did not purchase light bulbs from Action Industries (the importing agent of Hungarian bulbs).

North American Philips listed four customers with whom it had allegedly lost sales to Hungarian light bulbs. One of the two companies reached had not yet purchased any bulbs from Action, while the other had turned to Hungarian light bulbs for reasons of both • • • on the part of Philips.

Prices—GE light bulbs were priced anywhere from • • • cents to • • • cents • • • light bulbs from Hungary during the period 1976 to June 1978. These differentials are not insignificant, but they may be explained by the fact that there are actually two distinct U.S. light bulb markets—the oncounter market (e.g., supermarkets) and the offcounter, promotion market (e.g., discount stores). GE, selling at or near list price, dominates the oncounter market; while Hungarian light bulbs are sold at lower prices in the offcounter market. It is more appropriate, therefore, to compare Hungarian prices to the prices of domestic companies that sell in the offcounter market, and in so doing, the price differentials become minimal. • • • prices on white lamps, for example, were actually • • • than those of Hungarian bulbs in some cases and • • • than • • • cents • • • the Hungarian price from 1976 through June of 1978.

• • • three-way lamps were priced from • • • cents to • • • cents • • • Hungarian three-way lamps during this period; while the price differences on inside frost lamps were from • • • cent to • • • cents (• • • being higher).

Westinghouse prices fell roughly between those of GE and Philips.

CONCLUSION

The indices we have examined do not reveal any injury within the domestic light bulb industry that may be attributed to imports of light bulbs from Hungary.

As for likelihood of injury, the most significant evidence is a report that Hungary intends to expand its capacity to 840 million units with a 2.4-fold increase in exports to capitalist countries over the next 5 years. There is no evidence, however, that the expanded capacity will be devoted entirely to incandescent lamps. Nor is it likely that the 2.4-fold increase in exports to "capitalist countries" will go exclusively to the United States. These imports could be allocated to Western European countries, the United States, or any other of a number of potential markets. In testimony before the Commission, Counsel for Action Tungsram stated that imports of incandescent bulbs from Hungary into the United States would not exceed 65 million bulbs each year. As long as that objective prevails, and we have no reason for believing otherwise, imports of light bulbs from Hungary will not injure the domestic industry.

We have therefore determined that the Treasury Department investigation of incandescent lamps from Hungary allegedly sold at LTFV should be terminated on the basis that there is no reasonable indication that an industry in the United States is being, or is likely to be, injured by reason of such imports.

VIEWS OF CHAIRMAN JOSEPH O. PARKER AND COMMISSIONER ITALO H. ARLONDI

On August 4, 1978, the U.S. International Trade Commission received advice from the Secretary of the Treasury that, in the course of a preliminary investigation with respect to standard incandescent lamps from Hungary, he had concluded on the basis of the information developed that there is substantial doubt whether an industry in the United States is being or is likely to be injured by reason of the importation of this merchandise into the United States. Acting upon this advice, the Commission, on August 19, 1978, instituted inquiry No. AA1921-Inq.-18 under section 201(c)(2) of the Antidumping Act, as amended, to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. The preliminary antidumping investigation was initiated by the Secretary of the Treasury upon the basis of a petition filed by Westinghouse Electric Corp.

DETERMINATION

On the basis of information developed during the course of inquiry No. AA1921-Inq.-18, I determine that the standards set forth in section 201(c)(2) of the Antidumping Act, 1921, as amended, for continuing the investigation have been met.

DISCUSSION

Pursuant to section 201(c)(2) of the Antidumping Act, an investigation under the Antidumping Act may be terminated if the U.S. International Trade Commission determines there is "no reasonable indication that an industry in the United States is being or is likely to be injured • • • by reason of the importation" of the subject merchandise into the United States. In my judgment, this investigation has not established that there is no reasonable indication that an industry is likely to be injured by reason of the importation of standard incandescent lamps (light bulbs) from Hungary alleged to be sold at less than fair value (LTFV).

The petitioner, Westinghouse Electric Corp., has alleged that light bulbs from Hungary are being imported with margins of dumping ranging from 234 to 357 percent. The light bulbs allegedly sold at LTFV are produced by United Incandescent Lamp & Electrical Co., Ltd. (commonly known as Tungsram), Budapest, Hungary. This is a state-owned and state-controlled organization. It is the sole manufacturer and exporter of light bulbs from Hungary. Tungsram is one of Hungary's largest manufacturing organizations and is among the top 10 light bulb manufacturers in the world. During the course of the Commission's investigation, information was received which indicates that Tungsram may increase its annual productive capacity and significantly increase its exports to the United States.

Imports of light bulbs from Hungary increased consistently during 1973-76. In 1973, approximately 31 million units were imported from Hungary. Such imports increased steadily during the next 3 years and totaled 60 million units in 1976, or more than 4.5 percent of apparent U.S. consumption. Although imports of light bulbs from Hungary decreased slightly in 1977, they still accounted for approximately 4 percent of apparent U.S. consumption. The evidence indicates that the share of apparent U.S. consumption accounted for by such imports in January-June 1978 increased over the 1977 level.

Pricing information gathered during the Commission's investigation indicates that light bulbs from Hungary generally undersell domestically produced light bulbs. Because of the present structure of the domestic light bulb market, imports from Hungary appear to be directly competitive with light bulbs produced by Westinghouse and North American Philips and undersell the products of both these producers. The limited information available from this 30-day inquiry also indicates an increase in inventory levels for January-June 1978, although apparent U.S. consumption appears to continue to be rising.

In my judgment the information developed during the Commission's investigation does not warrant a determination that there is no reasonable indication that an industry in the United States is likely to be injured. There is unrebutted evidence that establishes the fact that imports from Hungary are increasing and capturing a larger share of the market. There is also evidence which indicates underselling in the market with alleged LTFV margins ranging from 234 to 357 percent. In addition, there is evidence which indicates that the capacity of Tungsram, a state-controlled company, may be substantially expanded with increased production available for export to the United States. These facts, in my opinion, are indicative of injury and compel the conclusion that the investigation should be continued to determine whether the Antidumping Act is being violated.

By order of the Commission.

Issued: September 8, 1978.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration

OFFICE OF CRIMINAL JUSTICE EDUCATION AND TRAINING

Proposed Change in Guideline

The Office of Criminal Justice Education and Training is currently circulating a draft of the reviesed guideline 5500.1C for the internship program for commentaries. The intership program is intended to enhance a student's college education by bridging theoretical and educational concepts with practical work experience in a criminal justice agency. All students interested in criminal justice careers are encouraged to participate in this program. The program provides financial support up to $65 a week to interns working in criminal justice agencies for a minimum of 8 weeks. Criminal justice agencies employing interns are encouraged to supplement the internship grant by providing additional salary. An intern must work a minimum of 30 hours per week.

The Law Enforcement Assistance Administration (LEAA) provides limited funds to college students to work as interns in criminal justice agencies either during their summer recess or while they are on academic leave from their degree program. The purpose of the internship program is to promote an interest in criminal justice as a career, to assist agencies with their recruiting activities, and to reinforce academic concepts through practical work experience.

Federal funds in the amount of $267,000 will be awarded to selected institutions on the basis of their application describing the proposed internship project. Institutions chosen to conduct internship projects select the student participants.

Should you desire to comment by September 25, 1978, you may obtain a copy and/or further information from J. Robert Lewis, Office of Criminal Justice Education and Training, Law Enforcement Assistance Administration, U.S. Department of Justice, Washington, D.C. 20531, telephone 202-376-3563.

NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION

Meeting

The seventh meeting of the NCUC will be held in the Westward Hilton Hotel, Anchorage, Alaska on September 22, 23, and 24. The meeting will begin at 9 a.m. on September 22 and will conclude at 1 p.m. on September 24.

TENTATIVE AGENDA—SEPTEMBER MEETING

FRIDAY, SEPTEMBER 22 (9 A.M.)

1. NCUC meeting with Executive Board and other members of Interstate Conference of Employment Security Agencies (ICESA). The topics for discussion include: cost equalitzation, reinsurance, pension deductions, agricultural workers, substitute teachers, solvency standards, taxable wage base and tax rate under FUTA, duration period, administrative financing. 9 a.m.-5:30 p.m.

SATURDAY, SEPTEMBER 23 (9 A.M.)

2. Continuation of NCUC meeting with ICESA. 9 a.m.-1 p.m.
3. Commission discussion of First Interim Report. 2:15 p.m.-5:30 p.m.

SUNDAY, SEPTEMBER 24 (9 A.M.)

4. Continuation of discussion of First Interim Report. 9 a.m.-11:30 a.m.
5. Commission Business Session, 11:30 a.m.-1 p.m.
   a. Legislative report.
   b. Old business.
   c. New business.

Telephone inquiries and communications concerning this meeting should be directed to:

James M. Rosbrow, Executive Director, National Commission on Unemployment Compensation, Room 440, 1815 Lynn Street, Rosslyn, Va. 22209, phone, 703-235-2782.

Signed at Washington, D.C., this 7th day of September, 1978.

JAMES M. ROSBROW,
Executive Director, National Commission on Unemployment Compensation.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

EXPANSION ARTS ADVISORY PANEL

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the expansion arts advisory panel to the National Council on the Arts will be held October 5, 1978, from 9 a.m. to 6 p.m., at the Henry Street Settlement, 265 Henry Street, New York, N.Y.; October 6, 1978, from 9 a.m. to 6 p.m.; and October 7, 1978, from 9 a.m. to 5 p.m. at the Warwick Hotel, 54th Street and Avenue of the Americas, New York, N.Y.

A portion of this meeting will be open to the public on October 5, 1978, from 9 a.m. to 6 p.m.; October 6, 1978, from 11:30 a.m. to 6 p.m.; and October 7, 1978, from 9 a.m. to 5 p.m. topics of discussion will be policy and reports, Q. & A. with the public, and on-site visits.

The remaining sessions of this meeting on October 6, 1978, from 9 a.m. to 11:30 p.m. are for the purpose of panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER March 17, 1977, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call 202-634-6070.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-556 and STN 50-557]

PUBLIC SERVICE COMPANY OF OKLAHOMA, BLACK FOX STATION, UNIT NOS. 1 AND 2

Issuance of Amendment to Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Public Service Co. of Oklahoma to conduct certain site activities in connection with the Black Fox Station, unit Nos. 1 and 2, prior to a decision regarding the issuance of construction permits. Notice of the limited work authorization was published in the FEDERAL REGISTER on August 11, 1978 (43 FR 35762).

On August 24, 1978, the Atomic Safety and Licensing Board (Board) issued an order which changed one of the conditions in the limited work authorization. The change eliminates the prohibition against open and/or open pit burning on the site.

A copy of: (1) The Board's order granting applicant's motion for reconsideration and clarification; (2) the partial initial decision authorizing limited work authorization; (3) the applicant's preliminary safety analysis report and amendments thereto; (4) the applicant's environmental report and amendments thereto; (5) the staff's final environmental statement dated February 1977; (6) the Commission's letter of authorization dated July 26, 1978; and (7) the Commission's letter amending the authorization dated September 6, 1978, are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW, Washington, D.C. and at the Tulsa City County Library, 400 Civic Center, Tulsa, Okla.

Dated at Bethesda, Md., this 6th day of September 1978.

For the Nuclear Regulatory Commission.

WM. H. REGAN, Jr.,
Chief, Environmental Projects Branch 2, Division of Site Safety and Environmental Analysis.

[NUREG-75/087]

REVISION TO THE STANDARD REVIEW PLAN

Issuance and Availability

As a continuation of the updating program for the standard review plan (SRP) previously announced (FEDERAL REGISTER notice dated December 8, 1977), the Nuclear Regulatory Commission's (NRC's) Office of Nuclear Reactor Regulation has published revision No. 1 to section No. 6.2.6 (containment leakage-testing) of the SRP for the NRC staff's safety review of applications to build and operate light-water-cooled nuclear power reactors. The purpose of the plan, which is composed of 224 sections, is to improve both the quality and uniformity of the NRC staff's review of applications to build new nuclear power plants, and to make information about regulatory matters widely available, including the improvement of communication and understanding of the staff review process by interested members of the public and the nuclear power industry. The purpose of the updating program is to revise sections of the SRP for which changes in the review plan have been developed since the original issuance in September 1975 to reflect current practice.

Copies of the standard reivew plan for the review of safety analysis reports for nuclear power plants, which has been identified as NUREG-75/087, are available from the National Technical Information Service, Springfield, Va. 22161. The domestic price is $70, including first-year supplements. Annual subscriptions for supplements alone are $30. Individual sections are available at current prices. The domestic price for revision No. 1 to section No. 6.2.6 is $4.00. Foreign price information is available from NTIS. A copy of the standard review plan including all revisions published to date is available for public inspection at the NRC's Public Document Room at 1717 H Street, NW, Washington, D.C. 20555 (5U.S.C. 552(a)).

Dated at Bethesda this 5th day of September 1978.

For the U.S. Nuclear Regulatory Commission.

R. J. MATTSON, *Director,*
Division of Systems Safety, Office of Nuclear Reactor Regulation.

OFFICE OF MANAGEMENT AND BUDGET

CUMULATIVE REPORT ON RESCISSIONS AND DEFERRALS

September 1978

This report is submitted in fulfillment of the requirements of Section 1014(e) of the Impoundment Control Act of 1974 (Public Law 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of September 1, 1978, of 4 rescissions contained in the 14th, 15th, and 17th special messages of fiscal year 1977 and 7 rescissions and 66 deferrals contained in the 10 special messages for fiscal year 1978. These messages were transmitted to the Congress on July 19 (both the 14th and 15th messages), July 26, September 23, October 3, November 10, December 15, 1977, January 27, February 23, March 10, May 12, June 5, and July 20, 1978.

Rescissions (Table A and Attachment A)—One rescission proposal totalling $500 million in budget authority is presently before the Congress. Table A summarizes the status of rescissions proposed by the President as of September 1, 1978, while Attachment A shows the history and status of each rescission proposed for fiscal year 1978. Also included are four rescission proposals totalling $643.4 million made in 1977 but carried into fiscal year 1978 and a single fiscal year 1978 rescission for $2.7 million which has been reclassified as a deferral.

Deferrals (Table B and Attachment B)—As of September 1, 1978, $2,561.0 million in 1978 budget authority was being deferred from obligation and another $2.7 million in 1978 obligations was being deferred from expenditure. Table B summarizes the status of deferrals reported by the President, and Attachment B shows the history and status of each deferral reported during fiscal year 1978.

Information from special messages—The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the FEDERAL REGISTERS of: Friday, July 22, 1977 (Vol. 42, No. 141, Part V) (both the 14th and 15th 1977 special messages); Friday, July 29, 1977 (Vol. 42, No. 146, Part VIII) 17th 1977 special message); Thursday, September 29, 1977 (Vol. 42, No. 189, Part IX); Friday, October 7, 1977 (Vol. 42, No. 195, Part IV); Thursday, November 15, 1977, (Vol. 42, No. 220, Part IV); Wednesday, December 21, 1977, (Vol. 42, No. 245, Part IV); Wednesday, February 1, 1978 (Vol. 43, No. 22, Part VII); Wednesday, March 1, 1978 (Vol. 43, No: 41, Part VII); Thursday, March 16, 1978 (Vol. 43, No. 52, Part VII); Thursday, May 18, 1978 (Vol. 43, No. 97, Part III); Friday, June 9, 1978 (Vol. 43, No. 112, Part V); Tuesday, July 25, 1978 (Vol. 43, No. 143, Part V).

JAMES T. MCINTYRE, Jr.,
Director.

TABLE A—*Status of 1978 rescission proposals*

[In millions of dollars*]

	Amount
Rescissions proposed by the President	*$1,279.3
Reclassified (from R78-1 to D78-54)*	-2.7
Rescinded by the Congress (R77-17, R77-18, R77-19, R78-2, R78-3, and R78-4)	*-593.7
Rejected by the Congress (R77-20, R78-5, and R78-6)	-183.0
Pending before the Congress	500.0

*This amount includes $643.4 million in rescission proposals for fiscal year 1977 which were still pending in fiscal year 1978.

*This rescission proposal, originally transmitted in conjunction with a rquest for transfer within the Department of Justice, was superseded by a deferral (D78-54) submitted to report the extension of this withholding pending final action on the transfer. The transfer was approved in the First Supplemental Appropriations Act, 1978, and the deferred funds were made available.

*Of this amount, $463.3 million, for B-1 Bomber and SRAM missile procurement, was originally proposed for rescission on July 19, 1977. These funds were made available for obligation on October 5, 1977, following the 45-day Congressional consideration period. Subsequently, the funds were rescinded by the first Supplemental Appropriations Act, 1978, (Pub. L. 95-240).

*Detail does not add to total due to rounding.

TABLE B—*Status of 1978 deferrals*

[In millions of dollars]

	Amount
Deferrals proposed by the President	$4,966.8
Routine Executive releases (-$1,761.1 million) and adjustments (-$585.5 million) through September 1, 1978	-2,346.6
Overturned by the Congress	-58.5
Currently before the Congress	*2,563.7

*This amount includes $2.7 million in outlays for two Department of the Treasury deferrals (D78-28B and D78-66).

FOOTNOTES

a. This amount was initially deferred (D78-47) in a special message transmitted to the Congress on December 15, 1977.

b. P.L. 95-254.

c. The 45-day Congressional consideration period for this proposal expired on July 30, 1978. However, the funds are not available for obligation pursuant to section 22(c) of the International Security Assistance Act, 1977 (P.L. 95-92).

d. These funds, originally proposed for rescission on July 19, 1977, were made available for obligation on October 5, 1977, following the 45-day Congressional consideration period. Subsequently, the funds were rescinded by the First Supplemental Appropriations Act, 1978, (P.L. 95-240).

e. An opinion issued by the Comptroller General on October 28, 1977, holds that this proposal should have been classified as a deferral.

f. This rescission proposal was transmitted in conjunction with a request for transfer of the same funds within the Department of Justice (contained in the First Supplemental Appropriations Act, 1978, P.L. 95-240). The proposal was superceded by a deferral (D78-54) submitted to report the extension of this withholding pending final action on the transfer. The President signed the Act on March 7, approving the transfer.

g. This amount was initially deferred (D78-55) in a special message transmitted to the Congress on January 27, 1978.

n. Public Law 95-186.

j. Of this amount $643,400,000 was proposed for rescission in FY 1977.

k. This amount is net of $48 million proposed for rescission on June 5, 1978. The Congressional consideration period for this proposal expired on July 30, 1978. The funds are not available for obligation, however, pursuant to section 22(c) of P.L. 95-92.

FOOTNOTES

a. This amount is included in two rescission proposals: R78-2, for $40,200, transmitted to the Congress on January 27, 1978; and R78-6, for $48,000, transmitted to the Congress on June 5, 1978.

b. See also Energy Research and Development Administration.

c. The amount previously reported in this deferral, $2.3 million, is now contained in another Department of Energy deferral, D78-62.

d. The supplementary report changed the deferral from the Energy Research and Development Administration to the Department of Energy.

e. The amount previously reported in this deferral, $1.5 million, is now contained in another Department of Energy deferral, D78-62.

f. The supplementary report changed the budget account title under which this deferral had been previously reported from the Limitation on construction to the Limitation on salaries and expenses.

g. Impoundment resolution S. Res. 525 passed the Senate on August 9, 1978, rejecting this deferral.

h. The supplementary report changed the bureau title under which this deferral had been previously reported from the Bureau of Outdoor Recreation to the Heritage Conservation and Recreation Service.

i. This amount is included in a rescission proposal (R78-7) transmitted to the Congress on July 20, 1978.

k. This account, previously displayed in the Funds Appropriated to the President section of this report, was moved to the Depart-

ment of State section to reflect a corresponding change in its location in the President's budget.

m. Impoundment resolution S. Res. 282 passed the Senate on November 1, 1977, rejecting this deferral. The funds, however, were made available for obligation on October 31, 1977.

n. This amount is net of a release of $40,000 that was made prior to the transmittal of this supplementary report.

p. See also Department of Energy.

q. Impoundment resolution H. Res. 851 passed the House on November 2, 1977, rejecting this deferral.

r. Impoundment resolution H. Res. 852 passed the House on November 2, 1977, rejecting this deferral.

s. Impoundment resolution H. Res. 853 passed the House on November 2, 1977, rejecting this deferral.

t. Impoundment resolution H. Res. 854 passed the House on November 2, 1977, rejecting this deferral.

u. On April 1, 1978, the functions and budgetary resources of the United States Information Agency were transferred to the International Communication Agency, pursuant to Reorganization Plan No. 2 of 1977 and Executive Order No. 12048 of March 27, 1978. The supplementary report reflects this change.

POSTAL RATE COMMISSION

stitute major Federal actions as defined by NEPA.

ROGER P. CRAIG,
Deputy General Counsel

The possible impact of volume changes due to the proposed bulk third-class carrier-route presort subclass is examined primarily from the standpoint of the use of resources:

In noise level, air pollution, and fuel consumption will be dispersed throughout the country. The diffused effect will tend to occur in intercity travel, where mileage is

ed to purchased electricity would hardly be affected. The highest concentration of transportation emissions (SO_x) are only 0.3 percent of the national total (see tables 3

LAND USE

There would be little effect, if any, on current Postal Service use of land and facilities. Indeed, at present many of our facilities are

[7715-01]

POSTAL RATE COMMISSION

VISITS TO POSTAL FACILITIES

SEPTEMBER 7, 1978.

Notice is hereby given that members of the Postal Rate Commission and of the Commission advisory staff made or will make visits to the following postal facilities for the purpose of acquiring general background knowledge of postal operations.

September 7—Washington, D.C., BMC.
September 7—Jacksonville BMC.
September 21—Fairbanks, Alaska, Post Office.
September 22—Anchorage, Alaska, Post Office.

A report of the visits will be on file in the Commission's Docket Room.

DAVID F. HARRIS,
Secretary.

POSTAL SERVICE

BULK THIRD-CLASS CARRIER-ROUTE PRESORT CLASSIFICATION

Negative Declaration

On September 7, 1978, the Board of Governors of the U.S. Postal Service authorized Postal Service management to file a bulk third-class carrier-route presort classification request with the Postal Rate Commission. In making its determination to file the request, the Board had before it a declaration by Assistant Postmaster General Edward J. McCaffrey that the classification would have no significant effect on the quality of the human environment and a statement of the reasons for Mr. McCaffrey's declaration. The document which appears below is Mr. McCaffrey's declaration and the statement of the reasons on which he based it.

This notice should not be construed as an admission by the Postal Service of the applicability of the National Environmental Policy Act (NEPA) to it. See 39 CFR 775.1(b) (1977). Even assuming the applicability of NEPA to the Postal Service generally, this notice should not be construed as an admission that the Act applies to this classification proposal, or to classification proposals generally. Neither should it be construed as an admission that this classification proposal, or classification proposals generally, constitute major Federal actions as defined by NEPA.

ROGER P. CRAIG,
Deputy General Counsel.

NEGATIVE DECLARATION CONCERNING BULK THIRD-CLASS CARRIER-ROUTE PRESORT CLASSIFICATION

The National Environmental Policy Act (NEPA) directs agencies of the Federal Government to include in recommendations or reports for major Federal actions significantly affecting the human environment, a detailed statement of the environmental impact of the proposed action. Without taking a position on the applicability of NEPA to this classification proposal, and rates and classification proceedings in general, but in the spirit of the policy enunciated in NEPA, I have studied the possible environmental effects associated with changes of the kind and magnitude of those in the Postal Service's request to the Postal Rate Commission for a recommended decision on the bulk third-class carrier-route presort classification, and I conclude that they will have no significant effect on the human environment. This memorandum constitutes my negative declaration. It states my reasons for finding that the proposed bulk third-class carrier-route presort classification will have no significant effect on the quality of the human environment, and that no environmental impact statement is required.

Under the mandate of the Postal Reorganization Act, the Postal Service is obligated to receive, transmit, and deliver mail adequately and efficiently at fair and reasonable rates, while serving as nearly as practicable the entire population of the United States. 39 U.S.C. 403(a). I believe that establishment of the bulk third-class carrier-route presort subclass is an important means to the statutory goal of ensuring a viable, efficient nationwide system for the delivery of mail.

Changes in mail classifications and rates do not, in themselves, have a measurable environmental effect. Impacts from postal classification and rate changes—if they exist at all—are the secondary result of changes in the use of the mails, reflecting the effect of new classifications and rates on mailers. The most visible manifestation of mail use is volume. The projected volume increase directly attributable to the proposed bulk third-class carrier-route presort classification is 2 billion pieces in the test year, which amounts to a 2-percent increase in total volume.[1]

This volume increase may produce some miniscule environmental effects. Many of these effects, if they exist at all, will be substantially offset by a decrease in the volume handled by substitute services, and thus a decrease in the environmental externalities generated by their activity. There may be some modest increase in overall market volume resulting from the proposed new classification.

In assessing the environmental impact of the proposed bulk third-class carrier-route presort subclass, I considered the effects of the classification change on substitute services as well as ourselves, and placed these effects in a national perspective.

[1] Figures based on fiscal year 1979 projections by the Postal Service. Aggregate volume is forecast to approximate 96 billion pieces.

The possible impact of volume changes due to the proposed bulk third-class carrier-route presort subclass is examined primarily from the standpoint of the use of resources: Human resources, transportation, materials, and land. Pollution is considered an unwanted byproduct of resource and energy consumption.

SOCIOECONOMIC EFFECTS

Because third-class mail is handled throughout the postal system, it is assumed that employment will be affected according to volume variability estimates for the system as a whole, given in docket No. R77-1 as 70.4 percent for bargaining unit employees and 45.9 percent for nonbargaining unit employees. The increase in employment produced by a 2-percent increase in mail volume is then an estimated 9,212 persons.[2] This is, of course, a beneficial effect of the proposed discount. This increase in employment might be offset, at least in part, by further presortation of current volumes.

The competitors of third-class bulk mail are private delivery services and advertising in newspapers and magazines and over radio and television. Perhaps the most significant socioeconomic impact on the competition will be a reduction in employment, or at least in employment opportunities. Employment for newspapers, radio, television, and periodical media was about 580,000 in 1977. Even if we assume a "worst case" analysis that labor in these industries is, as in the Postal Service, 70-percent volume variable, and that they suffer a 2-percent volume loss, employment might drop by 8,120. However, wage agreements and other factors tend to restrict drastic employment cutbacks. Thus the effect would most likely be in terms of future hiring.

TRANSPORTATION

Third-class mail travels almost exclusively by motor vehicle and railroad. Total mileage by all Postal Service-owned or Postal Service-hired vehicles in 1977 was 2.178 billion miles (see table 1, attached). Highway contracts and driveout agreements, which constituted 710 million of those miles, are believed to be 100 percent volume variable. The incremental third-class discount-mail volume would increase mileage by 26.3 million in 1979.[3] This represents an addition to the 1975 total national mileage of only 0.002 percent,[4] and is less than 0.1 percent of annual national mileage growth.[5]

The primary environmental effects of increased mileage would be increased fuel usage, noise and air pollution (see below), and traffic congestion. The last of these would increase only marginally, since the total mileage increase is small to begin with. Any effects of a small percentage increase

[2] $(0.02 \times 0.704 \times 560{,}000) + (0.02 \times 0.459 \times 97{,}000) = 9{,}212$. The employment figures are for 1977.

[3] $0.02 \times [(0.37)(1{,}468) + (1)(710)]$.

[4] 26.3 million ÷ 1,307,723 million.

[5] Automobile registration is growing at 4 percent per year. If mileage were directly related to the number of automobiles, then a 0.002 percent-mileage increase is $0.002 \div 4 = 0.05$ percent of the total annual increase. Although mileage probably does not increase as fast as automobile numbers, a liberal allowance still places a 0.002 percent increase at under 0.1 percent of the total annual increase.

in noise level, air pollution, and fuel consumption will be dispersed throughout the country. The diffused effect will tend to occur in intercity travel, where mileage is particularly sensitive to volume changes, but where the environment has a great capacity to absorb pollutants. Since carrier routes are relatively insensitive to changes in mail volume, the marginal impact of increased mileage will be more attenuated in the populated areas where advertising mail is delivered.

Increased transportation by the mail system would be partially offset by lesser resource use by competitive services. The net effect, for the entire market, would be an increase in use of transportation even less than that attributed solely to the increased in mail volume.

I conclude that the proposed bulk third-class carrier-route presort subclass would result in no significant environmental impact due to Postal Service transportation use.

MATERIALS AND SERVICES

The Postal Service purchased about $400 million worth of materials and supplies in 1977, amounting to only 2.58 percent of its total expenditures. Moreover, most items purchased constituted less than 0.01 percent of the total national expenditure for each item, and the highest percentage for any of the products purchased (not surprisingly, mailhandling equipment) was only 2.0 percent. A 2-percent increase in volume therefore will result in very negligible increases in the purchase of motor vehicles, office equipment and paper.

ENERGY

Energy can be divided into main categories of use: Facilities and transportation. Current overcapacity in many facilities will allow increased handling of volume with almost no additional energy required in facilities. The increased fuel consumption for transportation will be small. In 1977 the Postal Service consumed 0.08 percent of the total national energy production of $76{,}505 \times 10^{12}$ Btu's (see table 2, attached). Even if energy were 100 percent volume variable—and it most certainly is not—a 2-percent mail-volume increase would constitute less than a 0.002-percent increase in the national energy consumption.[6] This is less than one-twentieth of the fuel burned by a single, small-size electric generating plant in 1 year.[7]

POLLUTANTS

The three broad categories of pollutants to be considered are air pollution, noise pollution, and liquid and solid wastes. Air pollution emissions from facilities and attributed to purchased electricity would hardly be affected. The highest concentration of transportation emissions (SO_x) are only 0.3 percent of the national total (see tables 3 and 4, attached).

Increases in emissions due to an increase in mail transportation would amount to only 0.002 percent of the national total, assuming a direct relationship between mileage and emissions (see the transportation section supra). Emissions due to usage of steel, rubber, and paper are negligible and would not change appreciably with volume. Tire wear and burning would increase marginally, with emissions and particulates increasing by only 12.4 tons and 0.008 ton, respectively, in 1979 due to the projected volume change in third-class mail.[8] These amounts are of negligible effect, especially since they are dispersed over the entire country. The Postal Service purchases only 0.0008 percent of the tires delivered in the United States. Paper use by the Service is almost entirely unaffected by mail volume.

With respect to third-class mail volume, noise pollution may increase with regard to motor vehicles and railroad service. Local delivery service would be slightly affected (see the transportation section, supra), and intercity transportation, if affected at all, is in any case confined to mostly noise-insensitive areas. Moreover, Postal Service truck mileage is a very small (0.17) percentage of total national yearly mileage (see table 1).

The Postal Service is not a fabricating industry, and consequently produces low levels of liquid and solid wastes. An estimated 67 percent of Postal Service water use is unaffected by volume. The remainder used (about 1.6 billion gallons per year) will increase somewhat, but the amount is insignificant. Most solid waste is paper or paper products.

We are aware that some mail matter (primarily third-class bulk circulars) is routinely discarded at postal facilities if it is undeliverable as addressed or is not to be returned to the sender. However, even assuming some increase in the volume of such solid waste mail matter due to the presort discount proposal, it is clear that the waste disposal capacities of postal facilities are more than adequate to cope with some additional, incremental waste material dispersed over the country. Moreover, some of this additional paper waste would be sold as scrap or recycled, thereby benefiting the environment.[9]

The Postal Service also purchases steel, paper, and textile products (0.009, 0.09, and 0.004 percent, respectively, of the national totals) and therefore contributes a marginal amount to waste in the related industries. Mail volume changes are unlikely to change these levels of pollutants noticeably. As a safeguard against whatever additional pollution might be generated, most States and municipalities regulate such wastes. Also, liquid wastes are regulated by the rules of the National Permit Discharge Elimination System.

LAND USE

There would be little effect, if any, on current Postal Service use of land and facilities. Indeed, at present many of our facilities are operating with a substantial reserve of capacity.

CONCLUSION

Therefore, it is evident that the increase in volume projected to be generated by the proposed bulk third-class carrier-route presort subclass will have no perceptible or significant effect on the Nation's human environment. Even if the increase in Postal Service volume exceeds the decrease in substitute service volume, the net environmental impact wold be dispersed over thousands of facilities and vehicles throughout the Nation, and would constitute an insignificant increase to national totals.

I find that as a result of the bulk third-class carrier-route presort subclass:

(1) Postal Service's employment levels would increase, offset to some extent by potential employment losses in competitive industries;

(2) Resource use, energy use, and pollution levels will not be altered to a significant extent due to any increases in transportation mileage;

(3) Resource use and pollution will not be increased to a significant extent due to any additional utilization of raw materials;

(4) Existing land use patterns will not be altered and any increases in the intensity of land use will be insignificant.

It is my considered judgment that any environmental harm that could be caused by the proposed bulk third-class carrier-route presort subclass must be balanced against the Federal policy it will serve. In light of the Postal Service's statutory duty of providing mail service efficiently and at adequate levels throughout the Nation, no alternative proposal with a more beneficial environmental impact appears to be feasible. For these reasons I find that the proposed bulk third-class carrier-route presort subclass would not significantly affect the quality of the human environment. This constitutes my negative declaration pursuant to 39 CFR 775.5 and 775.14(c) (1977).

EDWARD J. MCCAFFREY,
Assistant Postmaster General, Rates and Classification Department.

SEPTEMBER 6, 1978.

[6] 0.02×0.08.

[7] A 400-magawatt powerplant operating for 85 percent of a year at 33 percent efficiency burns over 30 trillion Btu's. The Postal Service's incremental energy use will be $0.08 \times 0.02 = 0.0016$ percent of the national consumption of 76,505 trillion Btu's or 1.53 trillion Btu's. $1.53 \div 30 = 0.05$.

[8] The Postal Service purchases, in tires, about 1,400 tons of rubber a year, all of which are used by postal vehicles, which are in turn 37 percent volume variable. Additional purchases produced by a 2-percent volume increase are thus: $0.02 \times 0.37 \times 1{,}400 = 10.9$ tons. Ten percent of this will be incinerated, generating 14 pounds of pollutants per ton. Total additional emissions are thus (14 pounds/ton) × (0.10) × (10.9 tons) = 0.008 ton/year. This constitutes $0.008 \div 119{,}000 = 0.000006$ percent of total national emissions.

Estimated yearly tire wear is 590 tons. Assuming a "worst case" of 100 percent volume variability, the additional wear is (590 tons/year) × (0.02) = 12.4 tons/year.

[9] About 8 million cubic yards of Postal Service paper or paper product waste is scrapped annually.

ELECTRONIC COMPUTER ORIGINATED MAIL CLASSIFICATION

Negative Declaration

On September 7, 1978, the Board of Governors of the U.S. Postal Service authorized Postal Service management to file an electronic computer originated mail classification request with the Postal Rate Commission. In making its determination to file the request, the Board had before it a declaration by Assistant Postmaster General Edward J. McCaffrey that the classification would have no signficant effect on the quality of the human environment and a statement of the reasons for Mr. McCaffrey's declaration. The document which appears below is Mr. McCaffrey's declaration and the statement of the reasons on which he based it.

This notice should not be construed as an admission by the Postal Service of the applicability of the National Environmental Policy Act (NEPA) to it. See 39 CFR 775.1(b) (1977). Even

assuming the applicability of NEPA to the Postal Service generally, this notice should not be construed as an admission that the act applies to this classification proposal, or to classification proposals generally. Neither should it be construed as an admission that this classification proposal, or classification proposals generally, constitute major Federal actions as defined by NEPA.

ROGER P. CRAIG,
Deputy General Counsel.

NEGATIVE DECLARATION CONCERNING ELECTRONIC COMPUTER ORIGINATED MAIL CLASSIFICATION

The National Environmental Policy Act (NEPA) directs agencies of the Federal Government to include in recommendations or reports for major Federal actions significantly affecting the human environment, a detailed statement of the environmental impact of the proposed action. Without taking a position on the applicability of NEPA to this classification proposal, and rates and classification proceedings in general, but in the spirit of the policy enunciated in NEPA, I have studied the possible environmental effects associated with changes of the kind and magnitude of those in the Postal Service's request to the Postal Rate Commission for a recommended decision on an electronic computer originated mail classification, and I conclude that they will have no signficant effect on the human environment. This memorandum constitutes my negative declaration. It states my reasons for finding that the proposed electronic computer originated mail classification will have no significant effect on the quality of the human environment, and that no environmental impact statement is required.

The electronic transmission of messages by carriers is regulated by the Federal Communications Commission. Further, that body normally addresses the environmental impact of proposed actions in the electronic-transmission field.

Under the mandate of the Postal Reorganization Act, the Postal Service is obligated to receive, transmit, and deliver mail adequately and efficiently, at fair and reasonable rates, while serving as nearly as practicable the entire population of the United States. 39 U.S.C. 403(a). I believe that the proposed electronic computer originated mail subclass is an important means to the statutory goal of ensuring a viable, efficient nationwide mail-delivery system.

Changes in mail classification and rates do not, in themselves, have a measurable environmental effect. Impacts from postal classification and rate changes—if they exist at all—are the secondary result of changes in the use of the mails, reflecting the effect of new classifications and rates on mailers. The most visible manifestation of mail use is volume. The projected volume of electronic computer originated mail is 12.6 million pieces in the first year of operation. By postal standards, this volume is very small. Moreover, most of this volume is expected to consist of diversions from first-class mail. Thus, no new letter-mail volumes are forecast.

The possible impact of volume changes due to the proposed electronic computer originated mail classification is examined primarily from the standpoint of the use of resources: human resources, transportation, land and materials. Pollution is considered an unwanted by product of resource and energy consumption.

SOCIOECONOMIC EFFECTS

The effect of the proposed electronic computer originated mail classification upon employment levels would be negligible. As indicated above, most of the volume is expected to displace first-class volume. Though there is little, if any, net change in aggregate forecast mail volume, certain mail-handling functions, particularly in mail acceptance, would be eliminated. The effect of this change in workload, for a limited volume and spread over the Nation, is expected to be negligible.

TRANSPORTATION

Electronic computer originated mail messages would be accepted by the communications common carrier from the customer and transmitted electronically to 25 serving post offices. Upon receipt at these offices, the messages would be printed and envelopes processed through the normal mailstream. They would be delivered by regular mail carriers to recipients. The most significant transportation change is elimination of the need for transport from the point of origin to the post office receiving the message. As a result, there may be some negligible decline in fuel consumption as well as lessened air pollution and traffic congestion. To the extent that the modest forecast volumes impact upon fuel consumption, air pollution, and traffic congestion, the impact will be favorable.

MATERIALS, ENERGY

Some saving in paper is anticipated as a result of introduction of electronic computer originated mail. This saving would be experienced at the customers' locations where paper files are now retained for each mailing. These files would now be in the form of magnetic tape. The paper savings, though not expected to be significant, will favorably affect the environment.

There may be some increase in the use of electric power to transmit, receive, and process electronic messages. This increase in electric-power use is expected to be minimal.

LAND USE

No effect is foreseen upon the Postal Service's use of land. In fact, many of our facilities are now operating below capacity.

CONCLUSION

It is evident that the negligible volume change attributable to the proposed electronic computer originated mail classification would have no perceptible or significant effect on the Nation's human environment. Whatever small changes may be realized would be dispersed over the Nation and would constitute an insignificant change in national totals for these various environmental factors.

In conclusion, I find that as a result of the proposed electronic computer originated mail classification:

(1) Postal Service, national and regional employment levels would not change to a significant extent;

(2) Resource use, energy use, and pollution levels would not be altered to a significant extent due to any increases in transportation mileage; in fact, they might decline;

(3) Resource use and pollution would not be increased to a significant extent due to any additional utilization of raw materials; in fact, they might decline;

(4) Existing land use patterns would not be altered, and any increases in the intensity of land use would be insignificant.

For these reasons I find that the proposed electronic computer originated mail classification would not significantly affect the quality of the human environment. This constitutes my negative declaration pursuant to 39 CFR 775.5 and 775.14(c) (1977).

EDWARD J. MCCAFFREY,
Assistant Postmaster General, Rates and Classification Department.

PARCEL POST RECLASSIFICATION

Negative Declaration

On September 7, 1978, the Board of Governors of the U.S. Postal Service authorized Postal Service management to file a parcel post reclassification request with the Postal Rate Commission. In making its determination to file the request, the Board had before it a declaration by Assistant Postmaster General Edward J. McCaffrey that the reclassification would have no significant effect on the quality of the human environment and a statement of the reasons for Mr. McCaffrey's declaration. The document which appears below is Mr. McCaffrey's declaration and the statement of the reasons on which he based it.

This notice should not be construed as an admission by the Postal Service of the applicability of the National Environmental Policy Act (NEPA) to it. See 39 CFR 775.1(b) (1977). Even assuming the applicability of NEPA to the Postal Service generally, this notice should not be construed as an admission that the act applies to this classification proposal, or to classification proposals generally. Neither should it be construed as an admission that this classification proposal, or classification proposals generally, constitute major Federal actions as defined by NEPA.

ROGER P. CRAIG,
Deputy General Counsel.

NEGATIVE DECLARATION CONCERNING PARCEL POST RECLASSIFICATION

The National Environment Policy Act (NEPA) directs agencies of the Federal Government to include in recommendations or reports for major Federal actions significantly affecting the human environment, a detailed statement of the environmental impact of the proposed action. Without taking a position on the applicability of NEPA to this classification proposal, and rates and classification proceedings in general, but in the spirit of the policy enunciated in NEPA, I have studied the possible environmental effects associated with changes of the kind and magnitude of those in the Postal Service's request to the Postal Rate Commission for a recommended decision on parcel post reclassification, and I conclude that they will have no significant effect on the human environment. This memorandum constitutes my negative declaration. It states my reasons for finding

that the proposed bulk parcel post reclassification will have no significant effect on the quality of the human environment, and that no environmental impact statement is required.

Under the mandate of the Postal Reorganization Act, the Postal Service is obligated to receive, transmit, and deliver parcels adequately and efficiently, at fair and reasonable rates, while serving as nearly as practicable the entire population of the United States. 39 U.S.C. 403(a). I believe that the restructuring of the bulk parcel post subclass is an important means to the statutory goal of insuring a viable, efficient nationwide surface parcel delivery system.

Changes in mail classifications and rates do not, in themselves, have a measurable environmental effect. Impacts from postal classification and rate changes—if they exist at all—are the secondary result of changes in the use of the mails, reflecting the effect of new classifications and rates on mailers. The most visible manifestation of mail use is volume. The projected volume increase directly attributable to the proposed bulk parcel post classification change is 30 million pieces in the test year, which amounts to a negligible 0.03 percent increase in total postal volume.[1]

This volume increase may produce some minuscule environmental effects. Most of these effects, if they exist at all, will be substantially offset by a decrease in the volume handled by substitute services, and thus a decrease in the environmental externalities generated by their activity.[2] There may be some slight increase in overall market volume resulting from the new parcel post rate structure.

In assessing the environmental impact of the proposed restructuring of the bulk parcel post subclass, I considered the effects of the classification change on substitute services as well as ourselves, and placed these effects in a national perspective.

The possible impact of volume changes due to the restructuring of the bulk parcel post subclass is examined primarily from the standpoint of the use of resources: human resources, transportation, land, and materials. Pollution is considered an unwanted byproduct of resource and energy consumption.

SOCIOECONOMIC EFFECTS

National and regional unemployment rates are not expected to change to any measurable extent because of the proposed bulk parcel post subclass. Postal Service employment levels may increase slightly while employment by substitute services may decrease slightly. This finding is based on a consideration of past employment-volume relationships within the Postal Service, a comparison between the usual methods of parcel processing by the Postal Service and substitute services, and the nationwide distribution of both the Postal Service's and substitute services' parcel processing facilities.

The predicated 0.03 percent increase in total mail volume associated with the proposed bulk parcel post subclass, coupled with a Postal Service employment variability coefficient of 0.065, could lead to a 0.002 percent increase in employment by the Postal Service. However, a much lower level of personnel increase is probable. A substantial portion of the new volume will be machine processed, and does not require increased labor inputs. Moreover, through increased efficiency and attrition, the Postal Service has been able to reduce its labor force over the last several years despite increased volume. Therefore, the most likely effect of the proposed subclass would be to help keep Postal Service employment at constant levels by partially recapturing previously lost volume and stemming the tide of diversion to substitute services.

Regional employment and unemployment figures would not change, because both the Postal Service and its competitors are national scope. Any possible increase in unemployment would be geographically dispersed throughout the country. Thus, human resource utilization cannot reasonably be expected to change in either intensity or locality to any significant degree due to the proposed restructuring of the bulk parcel post subclass.

TRANSPORTATION—RESOURCE USE, ENERGY, AND POLLUTION

The overall effects of the proposed restructuring of the bulk parcel post subclass on transportation use and, consequently, on resource use and pollution levels, would be negligible. Postal Service transportation mileage could increase to a minor extent, while substitute services' transportation mileage could decrease to a minor extent.

Even when considered alone, the Postal Service's transportation system would not entail important environmental change merely in the delivery of additional parcels. Trucks move most of this subclass of mail; gasoline consumption, noise, and air pollution vary in almost direct proportion to miles driven.

Highway contracts and driveout agreements, which constitute one-third of the more than two billion miles traveled by Postal Service-owned or hired vehicles each year, have been estimated to have a 100 percent longer run volume variability for periods extending beyond the test year. Postal Service owned vehicles, accounting for the remainder of the mileage, have been estimated to be 37 percent volume variable over the longer run.

Assuming these volume variability relationships on a worst case basis, the increase in transportation mileage attributable to a 0.03 percent increase in total mail volume would be less than 0.00003 percent of the national total.[3] This negligible increase is much less than the Nation's total 0.1 percent annual mileage increase.

However, inter=bulk mail center (BMC) trucks do not operate at full capacity. In this respect, the increased volume predicted to result from the restructured bulk parcel post subclass will serve to increase the use of existing truck capacity instead of contributing to an increase in transportation mileage.

The source of the anticipated parcel post volume increase will primarily be decreased diversions to substitute services. To the extent the anticipated increase is a result of possible volume losses of substitute carriers, its environmental effects will be substantially offset. Thus, the net effect of the increased volume attributable to the proposed bulk parcel post subclass would be even less significant than the 0.00003 percent increase hypothesized above.

Any effects of a small percentage increase in noise level, air pollution, and fuel consumption will be dispersed throughout the country. The diffused effect will tend to occur in intercity travel, where mileage is particularly sensitive to volume changes, but where the environment has a great capacity to absorb pollutants. Since carrier routes are relatively insensitive to changes in mail volume, the marginal impact of increased mileage will be more attenuated in the populated areas where parcels are delivered.

Further environmental effects could result from the increased purchase of trucks for expansion and replacement, but such effects would also be minuscule. The Postal Service spends only 0.9 percent of all nationwide money spent on small transportation equipment and accessories, which suggests that a small change in its consumption would have very negligible environmental ramifications.

I conclude that the proposed bulk parcel post subclass change would result in no significant environmental impact due to Postal Service transportation use.

MATERIALS—UTILIZATION AND POLLUTION

The Postal Service uses many different goods in providing services to the nation. Since consumption of any particular good is an extremely small portion of total national consumption of that good, any change in Postal Service consumption of that good cannot sizably affect overall national consumption. The volume increase under consideration as a consequence of the proposed bulk parcel post subclass restructuring may cause minor insignificant changes in the nationwide consumption of certain goods. In my estimation, the increased use of machines, facilities, and papers are the only resource commitments which arguably could have some environmental effect.

The Postal Service would purchase no new machines due to the projected volume increase alone, as the machines which currently exist in our bulk mail facilities are capable of processing the increased volume at higher speeds. The energy and fuel required to operate at higher speeds would be negli-

[1] Figures based on fiscal year 1979 projections by the Postal Service. The projected volume for parcel post before change is approximately 151 million pieces. These figures compare with an overall forecast postal volume of over 96 billion pieces.

[2] In addition to possible diversion of parcels from substitute businesses to parcel post after change, a negligible amount of our own third-class single-piece mail may be diverted to parcel post for the following reason. Under the proposed structure, mailers will have the option of including parcels weighing between 8 and 16 ounces, which currently are third-class mail, in bulk parcel post mailings. However, the volume in this weight range is small to begin with, and third-class rates for those parcels are generally lower than the proposed parcel post rates.

[3] [0.0003 × [(0.37) (1,468) + (1)(710)]] ÷ 1,307,723 = 0.0000286 percent.
0.0003 = expected volume increase.
0.37 = volume variability of Service owned vehicles.
1,468 = annual mileage of Service owned vehicles ÷ 1 million.
1 = volume variability of Service hired vehicles.
710 = annual mileage of Service hired vehicles ÷ 1 million.
1,307,723 = total yearly national mileage ÷ 1 million.

gible. At present, Postal Service facilities consume only 0.170 percent of the Nation's electrical output (see table 1). The share of the 0.170 percent which is attributable to

sons I find that the proposed bulk parcel post reclassification will not significantly affect the quality of the human environment. This constitutes my negative declara-

cation-declaration, which is summarized below, for a complete statement of the proposed transaction.

[8010-01]

[Rel. No. 10387; 812-4142]

CONTINENTAL ASSURANCE CO. & CONTINENTAL ASSURANCE CO. SEPARATE ACCOUNT

in the Texas public institutions of higher education.

Because of uncertainty regarding the effect of these amendments, the

gible. At present, Postal Service facilities consume only 0.170 percent of the Nation's electrical output (see table 1). The share of the 0.170 percent which is attributable to bulk mail processing facilities is an indeterminable small fraction, and the share which is attributable to machines in those facilities is at a simularly insignificant level. The bulk mail centers will continue to operate their normal shifts, and thus will not require increased fuel and electricity to accommodate the increased volume.

Microscopic increases in electricity and fuel consumption would cause a correspondingly insignificant increase in pollutants generated by electricity production and fuel consumption.

Parcel post consists primarily of merchandise and contains a significantly lower proportion of paper in relation to the other classes of mail. Therefore, the increase in paper use generated by the proposed bulk parcel post subclass would be even less than the 0.03 percent predicted increase in total mail volume. Even that minor increment will be largely offset by decreased diversion to substitute services and the possibility of lower volumes for substitute services.

Whatever effects may exist with regard to resource use, any resulting pollution will be dispersed over wide areas. In short, the environmental effects of the bulk parcel post subclass proposal on materials are negligible and imperceptible.

LAND USE

Twenty-one bulk mail centers and 10 auxiliary service facilities (ASF's) have the capability to increase the mail volumes they handle. The absorption of new volume would make these existing facilities more efficient and would not require an increase in their number or size. Thus, no net increase or decrease in land use, or change in existing land use patterns would result from the proposed bulk parcel post subclass. Moreover, the increase in parcels handled at the BMC's and ASF's would not materially affect the use of other types of Postal Service facilities.

CONCLUSION

In conclusion, I find that as a result of the parcel post reclassification:

(1) Postal Service, national and regional employment levels will not change to a significant extent;

(2) Resource use, energy use, and pollution levels will not be altered to a signficant extent due to any increases in transportation mileage;

(3) Resource use and pollution will not be increased to a significant extent due to any additional utilization of raw materials;

(4) Existing land use patterns will not be altered and any increases in the intensity of land use will be insignificant.

Therefore, it is evident that the increase in volume projected to be generated by the proposed bulk parcel post subclass will have no perceptible or significant effect on the nation's human environment. Even if the increase in Postal Service volume exceeds the decrease in substitute service volume, the net environmental impact would be dispersed over thousands of facilities and vehicles throughout the Nation, and would constitute an insignficant increase to national totals.

It is my considered judgment that any environmental harm that could be caused by the proposed bulk parcel post subclass must be balanced against the Federal policy it will serve. In light of the Postal Service's statutory duty of providing parcel post service efficiently and at adequate levels throughout the Nation, no alternative proposal with a more beneficial environmental impact appears to be feasible. For these reasons I find that the proposed bulk parcel post reclassification will not significantly affect the quality of the human environment. This constitutes my negative declaration pursuant to 39 CFR 775.14(c).

EDWARD J. McCAFFREY,
Assistant Postmaster General, Rates and Classification Department.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 20696; 70-6205]

AMERICAN ELECTRIC POWER CO., INC.

Proposed Issuance and Sale of Common Stock at Competitive Bidding

SEPTEMBER 6, 1978.

Notice is hereby given that American Electric Power Co., Inc. ("AEP"), 2 Broadway, New York, N.Y. 10004, a registered holding company, has filed with this Commission an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6, 7, and 12(c) of the Act and rules 42 and 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

AEP proposes to issue and sell up to 6,000,000 shares of its authorized but unissued common stock, par value $6.50 per share, at competitive bidding. It is stated that the proceeds from the sale of such stock will be used to repay, at or before maturity, an equivalent amount of AEP's short term indebtedness. As of August 23, 1978, AEP's short term debt was $50,140,000, and it is estimated that such short term debt will be $140,000,000 as of the anticipated date of sale of such stock.

The fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 5, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulations, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Rel. No. 10387; 812-4142]

CONTINENTAL ASSURANCE CO. & CONTINENTAL ASSURANCE CO. SEPARATE ACCOUNT (B)

Application for an Order of Exemption

SEPTEMBER 1, 1978.

Notice is hereby given that Continental Assurance Co. and Continental Assurance Co. separate account (B) (hereinafter collectively referred to as "Applicants"), CNA Plaza, Chicago, Ill., filed an application on June 2, 1977, and an amendment thereto on August 7, 1978, pursuant to section 6(c) of the Act for an order exempting Applicants from the provisions of sections 22(e), 27(c)(1) and 27(d) of the Act to the extent necessary to permit compliance by Applicants with certain provisions of the Education Code of the State of Texas. All interested persons are referred to the application on file with the Commission for a statement of the representations therein which are summarized below.

Continental Assurance Co. separate account (B) ("SAB") was established in connection with the sale of certain variable annuity contracts (the "Contracts"). Continental Assurance Co. allocates to SAB net purchase payments received under the Contracts which are designed and offered for annuity purchase plans adopted by public school systems and certain tax exempt organizations pursuant to Section 403(b) of the Internal Revenue Code. SAB is registered under the Act as an open-end diversified management investment company.

In 1967, the State of Texas directed the governing boards of all Texas institutions of higher education to make available to certain employees an optional retirement program ("Program"), codified as Subchapter G of Chapter 51 of the Texas Education Code. The statute provides as the funding media for the Program fixed or variable annuity contracts purchased from any insurance or annuity company qualified to do business in Texas. In 1973, the Texas legislature made two amendments in the Program legislation, which amendments became effective on June 14, 1973. The statutory definition of the Program was amended to provide that the benefits of such annuities are to be available only upon termination of employment in the Texas public institutions of higher education, retirement, death or total disability of the participant. The other amendment added a new section 51.358 to subchapter G which also provides that the benefits of such annuities will be available only if the participant dies, terminates his employment due to total disability, accepts retirement, or terminates employment in the Texas public institutions of higher education.

Because of uncertainty regarding the effect of these amendments, the university of Texas System ("System") requested the opinion of the Attorney General of Texas with respect to several questions concerning such amendments. The Attorney General rendered an opinion dated February 18, 1975, in response to the System's letter. The Attorney General interpreted section 51.358 to prohibit provisions in a variable annuity contract issued in connection with the Program on or after June 14, 1973, which provide for making available the redemption value of such contract prior to the occurrence of one of the conditions specified in the statute, i.e., termination of employment, retirement, death or total disability. Moreover, the opinion further stated that the prohibitions of section 51.358 were impliedly in effect upon the establishment of the Program (in 1967) and that notwithstanding any language which may be contained in existing contracts, a participant in the Program has never had the right to redeem his annuity contract otherwise than in accordance with the limitations described above. The opinion did not affect the right of a participant to transfer the redemption value of his annuity contract from one carrier to another; accordingly, the granting of the relief requested in the application would not affect such right.

SECTIONS 27(c)(1), 22(e) AND 27(d)

Section 27(c)(1) of the Act makes it unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless such certificate is a redeemable security. Section 2(a)(32) of the Act defines "redeemable security" to mean any security under the terms of which the holder upon its presentation to the issuer or to a person designated by the issuer is entitled to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent thereof.

Section 22(e) of the Act provides that no registered investment company shall suspend the right of redemption or postpone the date of payment or satisfaction upon redemption of any redeemable security in accordance with its terms for more than 7 days after the tender of such security to the company or its agent designated for that purpose for redemption except in certain prescribed circumstances.

Section 27(d) of the Act makes it unlawful for any registered investment company issuing periodic payment

plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless the certificate provides that the holder

these Contracts is suitable for that participant, to sign a statement indicating that he/she is aware that these restrictions will be placed on his/her

[8010-01]

[Rel. No. 20695; 70-6201]

will have been expended for repairs and replacements necessitated by flood damage. The proceeds will be ap-

[8010-01]

[Release No. 15124; SR-PSE-78-16]

transactions effected by members of the national securities exchanges and the amended provision became effec-

plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless the certificate provides that the holder thereof may surrender the certificate at any time within the first 18 months after the issuance of the certificate and receive in payment thereof, in cash, the sum of (1) the value of his account, and (2) an amount, from such underwriter or depositor equal to that part of the excess paid for sales loading which is over 15 per centum of the gross payments made by the certificate holder.

Applicants request exemptions from the provisions of sections 22(e), 27(c)(1) and 27(d) of the Act to the extent necessary to permit compliance with section 51.358 as it pertains to (i) redemption values under Contracts issued to participants in the Program subsequent to the date of such exemptive order and (ii) redemption values under Contracts issued prior thereto but attributable to payments made subsequent to the date of such order.

Applicants assert that if such exemptions are not granted, persons participating in the Program effectively will be denied an opportunity to select as a funding medium for their retirement benefits one of two funding media (the other being fixed annuity contracts) specifically provided in the Texas statute for such purpose. Additionally, participants will be unable to obtain the State's matching contributions for the purchase of an equity-based retirement vehicle. In this respect, the Attorney General's opinion indicated that these matching contributions will encourage participation in the retirement plan but that unrestricted withdrawals prior to retirement might be detrimental to an effective retirement vehicle. In view of the foregoing, Applicants assert that the Commission should grant the requested exemptions because: (1) The limited restriction on redemption would be voluntarily assumed by participants, i.e., eligible employees are not required to participate in the Program; (2) the restrictions were not formulated nor suggested by Applicants; and (3) participants' relinquishment of the full right of redemption is a reasonable requirement in exchange for the benefits bestowed by the matching contributions of the State of Texas.

Applicants will insure that appropriate disclosure is made to persons who consider participation in the Program, informing them of the restriction on the availability of redemption values under Contracts to be issued to them. This disclosure will take the form of an appropriate reference in each prospectus to the restrictions on redemption of these Contracts, as well as requiring each participant, as a part of the determination that the sale of these Contracts is suitable for that participant, to sign a statement indicating that he/she is aware that these restrictions will be placed on his/her Contract when it is issued. In addition, Applicants will review all sales literature that is to be used in conjunction with the sales of these contracts for the existence of material representations that are inconsistent with the restrictions to be placed on these contracts and will instruct the salespeople involved in soliciting in this market specifically to bring this restriction to the attention of the potential participants.

Section 6(c) authorizes the Commission to exempt any person, security or transaction or any class or classes of persons, securities or transactions, from the provisions of the Act and rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 26, 1978, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney at law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following September 26, 1978, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20695; 70-6201]

NINEVEH WATER CO. AND GENERAL PUBLIC UTILITIES CORP.

Proposed Issuance of Note by Subsidiary and Guarantee Thereof by Parent and Holding Company; Request for Exemption From Competitive Bidding

SEPTEMBER 6, 1978.

Notice is hereby given that General Public Utilities Corp. ("GPU"), 260 Cherry Hill Road, Parsippany, N.J. 07054, a registered holding company, Pennsylvania Electric Co. ("Penelec"), 1001 Broad Street, Johnstown, Pa. 15907, an electric utility subsidiary of GPU, and Nineveh Water Co. ("Nineveh") a water company subsidiary of Penelec, have filed with this Commission an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6, 7, and 12 of the Act and rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

Nineveh proposes to enter into a loan agreement with the Small Business Administration ("SBA") for the purpose of borrowing up to $775,600 for repairs and replacement to its property and equipment damaged by rain and flood in July 1977. Such loan was authorized by the SBA on January 5, 1978, under the Disaster Relief Act of 1969. Under the loan agreement Nineveh would issue the SBA a note ("Note"), the first $250,000 bearing interest at the annual rate of 3 percent and the balance bearing interest at the annual rate of 6⅝ percent. The monthly payments on the Note, to begin 5 months from the date of issuance, would be $12,500 based upon a borrowing of $775,000, with each payment being applied first to accrued interest and the balance, if any, being applied to principal (such principal reductions first being applied to reduce the $250,000 principal component bearing interest at the annual rate of 3 percent). The Note will mature 78 months from the date of issuance and will be prepayable at any time without premium or penalty.

The Note will be secured by a mortgage on all of the real estate, improvements and fixtures of Nineveh. As further security for the loan the SBA authorization also requires that Penelec and GPU enter into respective agreements with the SBA unconditionally guaranteeing Nineveh's payment of principal and interest on the loan.

Pursuant to the SBA authorization the proceeds from the loan are to reimburse Nineveh for amounts which will have been expended for repairs and replacements necessitated by flood damage. The proceeds will be applied by Nineveh to reduce or pay in full the notes issued by Nineveh to Penelec pursuant to order of this Commission dated December 22, 1977 (HCAR No. 20333), which order authorized borrowings by Nineveh from Penelec pending disposition of Nineveh's SBA loan request.

Nineveh requests exemption from the competitive bidding requirements of rule 50 under the Act pursuant to rule 50(a)(5).

The fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. The Pennsylvania Public Utility Commission has jurisdiction over the proposed transaction. No other State commission and no Federal commission, other than this Commission and the SBA, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 5, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 15124; SR-PSE-78-16]

PACIFIC STOCK EXCHANGE INC.

Filing of Proposed Rule Change and Order Approving Proposed Rule Change

SEPTEMBER 1, 1978.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act"), notice is hereby given that on August 28, 1978, the Pacific Stock Exchange Inc. ("PSE"), 618 South Spring Street, Los Angeles, Calif. 90014, filed with the Commission copies of a proposed rule change which amends PSE rule XIII, sections 2 and 3 to provide that no rule, stated policy or practice of the PSE shall prohibit, condition or otherwise limit the ability of a member acting as agent to effect any transaction other than on the PSE with another person in any equity security listed on the PSE or to which unlisted trading privileges on the PSE have been extended, except when such member also is acting as agent for such other person in the transaction.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of this publication. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to file No. SR-PSE-78-16.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and of all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the proposed rule change is intended to conform PSE rule XIII, sections 2 and 3 to amended Commission rule 19c-1 (17 CFR 240.19c-1) under the Act. Rule 19c-1 governs certain off-board agency transactions effected by members of the national securities exchanges and the amended provision became effective March 1, 1978.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 10388; 812-4317]

TRUSTEES' EQUITY FUND, INC. AND WINDSOR FUND, INC.

Filing of Application for an Order Exempting a Proposed Transaction

SEPTEMBER 1, 1978.

Notice is hereby given that Trustees' Equity Fund, Inc. ("Trustees' Equity") and Windsor Fund, Inc. ("Windsor"), P.O. Box 1100, Valley Forge, Pa. 19482, both registered under the Investment Company Act of 1940 ("Act") as open-end, diversified management investment companies ("Applicants"), filed an application on May 30, 1978, and an amendment thereto on August 7, 1978, pursuant to section 17(b) of the Act for an order exempting from the provisions of section 17(a) of the Act the proposed sale by Trustees' Equity of substantially all of its assets to Windsor in exchange for shares of Windsor. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that Trustees' Equity was organized in 1966 and that Wellington Management Co. has served as Trustees' Equity's investment adviser since August 1, 1968. Currently, Wellington Management Co. receives an annual basic advisory fee which may not exceed 0.325 percent of Trustees' Equity's average net assets. The basic fee may be increased or decreased depending on Trustees' Equity's investment performance relative to the Standard & Poor's 500 Composite Stock Index ("S&P Index"). Applicants represent that Trustees' Equity's investment objective is to realize long-term investment return by investing in common stocks. Current income is a secondary factor. Trustees' Equity is designed for tax-exempt investors, pension and profit sharing plans, retirement plans under the Keogh Act, and charitable, educational, and religious organizations.

Applicants state that Windsor was organized in 1958 and that Wellington

Management Co. has served as Windsor's investment adviser since Windsor's inception. Currently, Wellington

approval by the affirmative vote of at least a majority of the outstanding shares of Trustees' Equity. Applicants

the proposed transaction had been consummated on March 3., 1978, each share of Trustees' Equity would have

the purchase and sale of securities and other property between affiliated registered investment companies and,

such request shall be served personally of by mail upon Applicant at the address stated above. Proof of service (by

office under normal conditions within 48 hours, e.g., if received before noon on Monday must be available for

Management Co. has served as Windsor's investment adviser since Windsor's inception. Currently, Wellington Management Co. receives an annual basic advisory fee which may not exceed 0.350 percent of Windsor's average net assets. Such fee is scaled down at various asset levels. Applicants state that Windsor's previous investment advisory agreement provided for an investment performance adjustment formula identical to that applicable to Trustees' Equity. On May 18, 1978, Windsor's board of directors approved a new investment advisory agreement with Wellington Managment Co. which went into effect on August 1, 1978. This agreement provides for a slightly higher advisory fee rate at Windsor's present asset levels and a change in the performance adjustment formula. Applicants represent that Windsor's investment objective is to seek long-term growth of capital and income by investing primarily in equity securities. As a secondary objective, Windsor also endeavors to provide current income.

Applicants further state that Trustees' Equity and Windsor are both members of the Vanguard Group of investment companies ("Vanguard Funds"). The directors of Trustees' Equity and Windsor are identical. With certain minor exceptions, such directors also serve as directors of the other Vanguard Funds, as well as the directors of the Vanguard Group, Inc., a corporation organized by the Vanguard Funds to provide them with corporate management and administrative services at cost. The officers of Trustees' Equity, Windsor, the Vanguard Group, Inc. and the other Vanguard Funds are identical. Accordingly, Applicants state that they may be deemed to be under common control and, therefore, that they may be affiliated persons of each other. Section 2(a)(3)(C) of the Act defines affiliated person of another person to include any person under common control with such other person.

Windsor and Trustees' Equity state that they have entered into articles of transfer and agreement and plan of reorganization, dated April 20, 1978 ("Agreement"), providing for the acquisition by Windsor of substantially all the assets of Trustees' Equity in exchange for shares of Windsor, and for the liquidation and subsequent dissolution of Trustees' Equity. Applicants state that the reorganization is contingent upon receipt of either a ruling from the Internal Revenue Service or an opinion of counsel to the Applicants, to the effect that such acquisition will constitute a tax-free reorganization, and that no gain or loss will be recognized by Applicants or their shareholders as a result of the transaction. The Agreement is subject to approval by the affirmative vote of at least a majority of the outstanding shares of Trustees' Equity. Applicants represent that a special meeting of shareholders of Trustees' Equity will be held on September 29, 1978, to vote upon the Agreement and that if it is approved, the reorganization is expected to be consummated on the same day, although a later date may be mutually agreed upon by the parties.

The Agreement provides that the number of shares of Windsor to be issued to shareholders of Trustees' Equity will be determined on the basis of the relative net asset values per share of the funds, computed as of the close of the New York Stock Exchange on the day of the closing. In computing the net asset value of Trustees' Equity and Windsor for the purpose of the exchange, the Applicants have agreed to apply, in part, a tax adjustment formula that is based on a practice which has been used in the past in connection with similar combinations of investment companies in an attempt to take into account the potential tax effect of the disproportion in realized and unrealized capital gains and losses of the combining funds. Applicants propose to use this formula only to reflect the realized capital losses which Trustees' Equity has in its portfolio; they do not propose to make an adjustment for the unrealized gains or losses which either fund may have. They assert that the impact upon individual shareholders of an adjustment for these factors cannot be determined with sufficient accuracy. Applicants further state that because Windsor has realized substantial net gains in the current fiscal year, the capital losses which Trustees' Equity would bring to the combined fund have an immediate, determinable value to Windsor shareholders, and should, therefore, be taken into account in calculating the relative net asset values for purposes of the exchange. Applicants further state that as of March 31, 1978, Trustees' Equity had a capital loss carry forward of $5,062,000, of which $168,000 would, according to section 383 of the Code, be available to Windsor for purposes of the tax adjustment formula. In accordance with the further application of the formula, Trustees' Equity's shareholders would have received, if the reorganization had occurred on March 31, 1978, an additional value of $32,106, or $0.02 per share.

As of March 31, 1978, Trustees' Equity had total net assets of approximately $11,815,000, 1,372,009 shares outstanding and a net asset value per share of $8.61. As of the same date, Windsor had total net assets of $536,178,793, 54,521,413 shares outstanding and a per share net asset value of $9.83. Applicants state that if the proposed transaction had been consummated on March 3., 1978, each share of Trustees' Equity would have been valued, after application of the tax adjustment formula, at $8.73 for purposes of computing the exchange ratio. Using that value, each share of Trustees' Equity would have been exchanged for 0.8881 shares of Windsor.

Applicants state that immediately following the closing, Trustees' Equity will dissolve and distribute pro rata to its shareholderes of record the shares of Windsor received at the closing. Applicants represent that such liquidation and distribution will be accomplished by establishing open accounts on the share records of Windsor in the names of such Trustees' Equity shareholders and representing the respective pro rata number of shares of Windsor due such shareholders. New certificates will be issued only upon written request.

Applicants state that prior to consummation of the transaction Trustees' Equity intends to sell securities with a market value of approximately $3.8 million. The proceeds of such sales will be reinvested in securities appropriate for Windsor's portfolio and transferred to Windsor at closing. Trustees' Equity and Windsor will each bear such expenses of entering into and carrying out the provisions of the Agreement as will be separately incurred by it. The expense of Windsor will include legal and accounting fees estimated not to exceed $5,000. Trustees' Equity's expense will include the cost of the special meeting; proxy costs (including all costs of solicitation, printing and mailing of a proxy statement); the expenses of its proposed liquidation and dissolution; legal and accounting fees; and the brokerage costs incurred in the realignment of its portfolio securities. These expenses are estimated not to be in excess of $20,000.

Section 17(a) of the Act provides, in pertinent part, that it is unlawful for any affiliated person of a registered investment company, or any affiliated person of such a person, knowingly to sell to or purchase from such registered investment company any security or other property. Section 17(b) of the Act provides however, that the Commission shall grant an exemption from such prohibition if the evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Applicants state that the proposed acquisition may be deemed to involve

the purchase and sale of securities and other property between affiliated registered investment companies and, therefore, may be deemed to violate section 17(a) of the Act. However, Applicants state that the terms of the Agreement are reasonable and fair and do not involve overreaching on the part of any person concerned in that Windsor will be issuing its shares in exchange for the assets of Trustees' Equity on the basis of their respective net asset values with a minor adjustment to account for the potential tax effect of the disproportion in realized capital losses of the two funds.

Applicants state that the principal factors contributing to the decision of the board of directors of Trustees' Equity to merge the fund into another investment company was Trustees' Equity's investment record and the declining trend in its assets. Trustees' Equity's board of directors also believes that future prospects are for a continued rise in the fund's expense ratio since many of its costs are relatively fixed and it is unlikely that the fund's assets will increase significantly during the years ahead. Applicants assert that Windsor should, based on past results, provide Trustees' Equity's shareholders with improved capital performance and an increase in dividend income. Applicants further represent that Windsor's investment objective and policies are consistent with those of Trustees' Equity. Applicants also state that although the basic advisory fee rate paid by Windsor at lower asset levels is higher than the rate applicable to Trustees' Equity, the effective basic fee rate paid by Windsor is lower because of its declining fee rate at larger asset levels. Applicants represent that the expense ratio for Trustees' Equity's shareholders will be substantially reduced as shareholders of Windsor because of Windsor's larger asset base over which it may spread its operating expenses.

Applicants state that the proposed reorganization will also benefit Windsor because it will reduce the expense ratio of Windsor to a modest extent by providing a larger asset base over which it may spread certain of its fixed operating costs.

Notice is further given that any interested person may, not later than September 25, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally of by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-1511-9; File No. SR-Amex-78-18]

AMERICAN STOCK EXCHANGE, INC.

Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), as amended by Pub. L. No 94-29, 16 (June 4, 1975), notice is hereby given that on August 21, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

TEXT OF PROPOSED RULE CHANGE

The American Stock Exchange, Inc., proposes to amend its transfer agent Rule 891 as set forth below. [Italics indicate words to be added.]

RULE 891

REQUIREMENTS IN ORDER TO QUALIFY AS A TRANSFER AGENT FOR SECURITIES LISTED ON THE AMERICAN STOCK EXCHANGE (WHERE THE LISTED COMPANY DOES NOT ACT AS ITS OWN TRANSFER AGENT) IN RESPECT OF: (I) ALL TRANSFER AGENTS LOCATED IN NEW YORK CITY, AND (II) TRANSFER AGENTS LOCATED OUT-OF-TOWN WHERE THE LISTED COMPANY HAS NO TRANSFER AGENT IN NEW YORK CITY

1. Office facilities (hereinafter referred to as the "office") satisfactory to the Exchange and the issuer to receive and redeliver securities must be located south of Chambers Street in the Borough of Manhattan, city of New York.

2. Routine transfers are to be processed and available for pickup at the office under normal conditions within 48 hours, e.g., if received before noon on Monday must be available for pickup not later than immediately after 1 p.m. on Wednesday.

3. The transfer agent must assume total responsibility and liability for securities from the time of deposit at the office until redelivery at the window. The transfer agent must maintain insurance coverage of at least $10,000,000 (*or such lesser amount as the Exchange may approve because of the limited volume of transfers handled*) to protect securities while in transit or in process of transfer, and it must be in a position to demonstrate that it has a substantial net worth. If the transfer agent does not have capital, surplus (both capital and earned), undivided profits and/or capital reserves aggregating at least $3,000,000, it will be required to furnish additional evidence of its ability to meet financial obligations (*such as an unconditional guarantee of performance from a parent, affiliate, or other party acceptable to the Exchange*) and it may be required to maintain insurance coverage in excess of $10,000,000. In this regard, all relevant factors will be considered such as its past record of operations as a transfer agent, the experience of its management and supervisory personnel, its security and recordkeeping procedures, the nature and scope of any other activities in which it is engaged and the amount of its capital in relation to its overall business activities.

4. Out-of-town agents having a drop in New York must make appropriate arrangements to pickup from and deliver to the Central Certificate Service normally within the 48-hour period and framework mentioned above.

5. Personnel at the office must have sufficient experience to respond promptly to inquiries regarding transfers, including legal items.

6. Securities received before the close of business at the office on a record date or any other date involving the rights of a securityholder must be recorded as of that date so as to establish the transferee's rights.

7. Facilities should be available for expediting transfer service when needed. No objection will be made if a reasonable charge is made for such special service.

8. The Exchange reserves the right to request a company with securities listed on the Exchange to terminate the appointment of its transfer agent in the event of the failure of such transfer agent to conform to all of the foregoing requirements.

* * * Commentary

.01 Insurance—It is the policy of the Exchange to require a minimum of $10 million of insurance coverage pursu-

ant to the provisions of paragraph (3) of Rule 891 in all cases where the

available for inspection and copying in the Public Reference Room, 1100 L

No comments have been or are to be solicited; however, an organization

[8010-01]

[Release No. 34-15118; File No. SR-DTC-78-13]

facilitate the prompt and accurate settlement of securities transactions.

The proposed W/T mismatch service was publicized in DTC's December

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change involves implementation of a third party deliv-

ant to the provisions of paragraph (3) of Rule 891 in all cases where the transfer agent handles a substantial volume of transfers. In the case of a transfer agent which acts for fewer than ten public companies and can demonstrate on the basis of experience that it regularly has less than $10 million face value of certificates in process of transfer at any given time, the Exchange will consider a request to maintain lower insurance coverage, but in no event less than $5 million.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The SEC has stated that the financial standards set forth in paragraph (3) of rule 891 are unduly restrictive because they exclude transfer agents that deal with a limited number of issuers and whose volume of transfers therefore make it reasonable to require either a lower amount of assets or a lower insurance coverage. Since a transfer agent generally subjects itself to less exposure where it handles a limited number of issuers, it appears appropriate in such situations for the Exchange to ease its standards for potential transfer agents seeking to qualify under the rule. The amendments to rule 891 are being proposed to allow an added measure of flexibility in demonstrating a transfer agent's financial responsibility.

The proposed amendments to rule 891 are intended to eliminate any burden on competition among transfer agents that is not necessary or appropriate in furtherance of the Act, consistent with section 6(b) of the Act.

No comments were solicited or received with respect to the proposed rule change.

The Amex has determined that no burden on competition will be imposed by the proposed rule change.

On or before October 18, 1978, or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer periods to be appropriate and publishes its reasons for so finding; or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change; or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

All submissions should refer to the file number referenced in the caption above and should be submitted by October 4, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS
Secretary.

SEPTEMBER 1, 1978.

[8010-01]

[Release No. 34-15120; File No. SR-BSECC-78-2]

BOSTON STOCK EXCHANGE CLEARING CORP.

Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 30, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS AND SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change imposes a fee for trades through the Intermarket Trading System ("ITS"). The text of the proposed rule change is attached herein as exhibit No. 1.

STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to reimburse the clearing agency for the additional expenses it incurs due to its participation in the ITS system.

The proposed rule change relates to the capacity of Boston Stock Exchange Clearing Corp. to facilitate the prompt and accurate clearance and settlement of securities transactions by enabling it to carry on its functions in a profitable manner. The clearing agency will incur additional expenses in connection with its clearing of ITS trades. These expenditures are principally for the additional personnel required to report and reconcile ITS trades. Additional finance charges will be incurred due to the fact that payments for ITS trades must be made by the clearing agency in New York and other cities before payment is made by the users of the system in Boston.

No comments have been or are to be solicited; however, an organization representing specialists on the floor of the Boston Stock Exchange has expressed opposition to the amendment.

No burden on competition is expected.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 4, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1978.

TEXT OF PROPOSED RULE CHANGE

The schedule of charges set forth at exhibit E of the form CA-1 filed for Boston Stock Exchange Clearing Corp. is hereby amended by imposing the following additional charges on the clearance and settlement of trades made through the intermarket trading system: 2 cents per share on settled transactions plus an amount equal to the interest rate charged at the time of any such trade by the clearing agency's principal lender times the dollar amount of any such trade.

[8010-01]

[Release No. 34-15118; File No. SR-DTC-78-13]

DEPOSITORY TRUST CO.

Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 28, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change modifies the administration of the Depository Trust Co.'s (DTC) withdrawal by transfer service by increasing assistance to participants to resolve misdeliveries of certificates physically withdrawn from DTC in other than Cede & Co. name. Participant operating procedures are attached as exhibit 2 to DTC's filing on form 19b-4A, file No. SR-DTC-78-13.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to modify the administration of DTC's withdrawal by transfer (W/T) service with regard to "mismatches." "Mismatched" certificates, as distinguished from missorted, misplaced, and lost certificates, are those where two or more participants receive certificates registered to another participant's customer, without identification of the intended receiving participant. Currently, upon receiving notification of a mismatch from one participant, DTC does the research necessary to identify the other side or sides of the mismatch. Where only two in-town participants are involved, DTC supplies its research conclusions to the participants and they resolve the mismatch between themselves. Where one participant is out of town or more than two participants are involved, DTC takes a more active role in resolving the mismatch.

The new service modifies an existing practice by introducing a form to be used to report the mismatch and by extending DTC's active participation in mismatch resolution to cases where only two in-town participants are involved.

The proposed rule change would carry out the purposes of section 17A of the Securities Exchange Act of 1934 because DTC's increased assistance in resolving securities misdeliveries will facilitate the prompt and accurate settlement of securities transactions.

The proposed W/T mismatch service was publicized in DTC's December 1977 newsletter. No written comments were received from participants. The substance of oral comments was that the service would be useful.

DTC perceives no burden on competition by reason of the proposed rule change.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 4, 1978.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1978.

[8010-01]

[Release No. 34-15121; File No. SR-DTC-78-4]

DEPOSITORY TRUST CO.

Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 25, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change involves implementation of a third party delivery service in the interface between the Depository Trust Co. (DTC) and Pacific Securities Depository Trust Co. (PSDTC). The proposed rule change is attached as exhibits 2A and 2B to DTC's filing on form 19b-4A, file No. SR-DTC-78-4, as amended.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to implement a third party delivery service in the interface between DTC and PSDTC. This third party delivery service permits any participant in one depository to deliver securities to, or receive securities from, and participant in the other depository, either free (without settlement) or for payment. Previously, only a participant affiliated with both depositories could use the interface and then only to move positions between its accounts in DTC and PSDTC. The third party delivery service between DTC and PSDTC is substantially similar to, and involves the same DTC fee as, the third party delivery service between DTC and Midwest Securities Trust Co., which is the subject of amendment No. 1 to DTC's filing on form 19b-4A, file No. SR-DTC-76-8.

The proposed rule change would carry out the purposes of section 17A of the Securities Exchange Act of 1934 by facilitating the prompt and accurate clearance and settlement of securities transactions for which DTC is responsible in that the proposed rule change eliminate the need for dual participants in DTC and PSDTC to initiate multiple book-entry deliver orders with attendant charges to effect interdepository movements and the proposed rule change enable sole participants of one depository to effect book-entry deliveries to sole participants of the other depository, which would otherwise necessitate physical deliveries by intercity securities drafts.

As DTC announced in its newsletter of September-October 1976, to accommodate the needs of participants expansion of the interface between DTC and PSDTC has been planned in stages to achieve a full interface capability, including a third party delivery service. All participants have been notified of the proposed rule change by the DTC important notices attached as exhibits 2A and 2B to DTC's filing on form 19b-4A, file No. SR-DTC-78-4, as amended.

DTC perceives no burden on competition by reason of the proposed rule change.

On or before October 18, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such

STATEMENT OF BASIS AND PURPOSE

NEW ENGLAND SECURITIES DEPOSITORY TRUST CO.

Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on September 1, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change changes certain of the fees which the self-regulatory organization charges for its securities clearance service. The text of the proposed rule change is attached herein as exhibit No. 1.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to raise the fees for the securities clearance service in such a manner as to enable such service to be operated in a break-even or profitable manner or will encourage use of the clearing agency's book-entry settlement system.

The proposed rule change relates to the capacity of New England Securities Depository Trust Co. to facilitate the prompt and accurate clearance and settlement of securities transactions by enabling it to carry on it functions in a profitable manner.

No comments have been or are to be solicited.

New England Securities Depository Trust Co. does not believe the proposed rule change will impose burdens on competition.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purpose of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 4, 1978.

[8120-01]

TENNESSEE VALLEY AUTHORITY

REHABILITATION OF THE OCOEE NO. 2 HYDRO PLANT, POLK COUNTY, TENN.

Public Hearing

The Tennessee Valley Authority will conduct a public hearing October 2, 1978, in Cleveland, Tenn., concerning the agency's plans to rehabilitate the Ocoee No. 2 hydroelectric plant. The hearing will begin at 7 p.m., e.d.t., in the Bradley County Courthouse, located on Ocoee Street.

A draft environmental impact statement on the proposed project was issued in August. The notice of availability of the draft statement was published in the FEDERAL REGISTER on August 28, 1978. Copies of the statement are available from the TVA Information Office, 400 Commerce Avenue, Knoxville, Tenn. 37902.

The Ocoee No. 2 hydroelectric project, which was constructed in 1912, is located on the Ocoee River in Polk County, Tenn. The project consists of a rock-filled timber dam at river mile 24.2, a powerhouse at river mile 19.7, and a 4.6 mile-long wooden flume connecting the reservoir intake to the penstock intake at the powerhouse.

During normal operation for power, the water is diverted by the crib dam into the flume which transports the water to the two units in the powerhouse where approximately 17 megawatts of power can be produced. The Ocoee No. 2 project was shut down in September 1976, when field inspections revealed that the project did not meet design criteria to assure reasonable safety factors for operation. Since cessation of the project operation, the water has been spilled at the dam and has flowed in the portion of the natural riverbed which is bypassed when Ocoee No. 2 is operated for power production. This stretch of the river provides excellent whitewater recreation conditions.

TVA proposes to restore the Ocoee No. 2 hydro plant to operation by repairing or replacing the trestles of the flume and reinforcing the crib dam with rockfill. In addition, TVA proposes to provide special releases for recreation during the summer months. A minimum water release of 1,000 ft³ per second would be provided for recreation between the hours of 10 a.m. and 6 p.m., on 46 days from May 1 through September 30, consisting of all Saturdays, Sundays, and national holidays.

The public is invited to attend and comment on TVA's plans and the draft environmental statement. A record will be made of the hearing. All statements and comments made will be considered by TVA in finalizing its plans for the project and in developing the final environmental statement. All written statements submitted to the following address on or before October 12, 1978, will be included in the record:

Herbert S. Sanger, Jr., General Counsel, Tennessee Valley Authority, 400 Commerce Avenue, Knoxville, Tenn. 37902.

Dated: September 7, 1978.

H. N. STROUD, JR.,
Acting General Manager.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 78- ; Reference: ATF O 1100.95]

AUTHORITY TO SETTLE ALCOHOL, TOBACCO AND FIREARMS TAX CLAIMS

Delegation Order

1. *Purpose.* This order delegates certain authority to the Assistant Director (Regulatory Enforcement) to settle alcohol, tobacco, and firearms tax claims.

2. *Cancellation.* Delegation order No. 29 (corrected), delegation of authority to settle alcohol, tobacco, and firearms tax claims, dated July 1, 1972, is canceled.

3. *Delegation.* Pursuant to the authority vested in the Director, Bureau of Alcohol, Tobacco and Firearms, by Treasury Department order No. 221, dated June 6, 1972, by 26 U.S.C. 7851(b)(3) and 26 CFR 301.7701.9, authority is hereby delegated to the Assistant Director (Regulatory Enforcement):

a. To allow or to reject, in whole or in part:

(1) Claims for drawback of tax paid or determined on distilled spirits used in nonbeverage products and filed under the provisions of 26 U.S.C. 5134(b).

(2) Claims for allowance, abatement, remission, refund, or credit of taxes imposed under chapters 51 and 52 of title 26 of the United States Code.

b. To determine tax liabilities and to allow or reject claims for abatement or refund of taxes or penalties, or for redemption of stamps, prescribed by chapter 53 of title 26 of the United States Code.

4. *Redelegation.* The authority delegated herein may be redelegated to regional regulatory administrators. Regional regulatory administrators may redelegate this authority to regional Regulatory Enforcement personnel not lower than the position of chief, technical services.

Effective date: This order becomes effective on September 1, 1978.

JOHN S. KROGMAN,
Acting Director.

Fiscal Service

[Dept. Circ. 570, Rev., Supp. No. 3]

SURETY COMPANIES ACCEPTABLE ON FEDERAL BONDS

Certificate of Authority

A certificate of authority as an acceptable surety on Federal bonds is hereby issued to the following company under Sections 6 to 13 of Title 6 of the United States Code. An underwriting limitation of $2,280,000 has been established for the company.

Name of Company, Business Address, and State in Which Incorporated

Ranger Insurance Company, Post Office Box 2807, Houston, Texas 77001; New York.

Certificates of authority expire on June 30 each year, unless sooner revoked, and new certificates are issued on July 1 so long as the companies remain qualified (31 CFR, Part 223). A list of qualified companies is published annually as of July 1 in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: September 6, 1978.

D. A. PAGLIAI,
Commissioner, Bureau of Government Financial Operations.

ASSIGNMENT OF HEARINGS

SEPTEMBER 8, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 113678 (Sub-739), Curtis, Inc., application dismissed.

MC 144119, Hansen Consolidators, Inc., now assinged for hearing on October 11, 1978, at Chicago, IL, is canceled and transfered to modified procedure.

MC 143546, Atlantic Marketing Cooperative Association, now assigned for September 14, 1978, at San Francisco, CA, is postponed indefinitely.

AB 12 (Sub-56), Southern Pacific Transportation Co., abandonment between Brenham and Giddings in Washington, Fayette and Lee Counties, TX, now being assigned for further hearing on September 27, 1978 (2 days), at Brenham, TX, in room B-100,

Federal Building, Main and Market Streets.

MC 2226 (Sub-113F), Red Arrow Freight Lines, Inc., now being assigned October 31,

motor carriers of passengers to publish non-predatory fare reductions[1] without notice. Its proposal envisions that any bus carrier availing itself of these

[Nos. 36990 and 36991]

DOWNWARD FARE FLEXIBILITY IN THE INTERCITY PASSENGER MARKET AND FLEXIBILITY OF CHARTER PRICES

Petition of Trailways for the Institution of Rulemaking Proceedings

SEPTEMBER 5, 1978.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of requests for rulemakings.

SUMMARY: Public comment is invited upon the requests by Trailways, Inc., that the Commission institute rulemakings to accord the bus industry (1) downward fare flexibility in the intercity passenger market, and (2) flexibility in charter prices.

DATES: Comments should be filed with the Commission on or before October 13, 1978.

ADDRESS: An original and 10 copies, if possible, of each submission should be forwarded to: Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak or Harvey Gobetz, telephone 202-275-7693.

SUPPLEMENTARY INFORMATION: *Downward fare flexibility in the intercity passenger market.* In No. 36990, Trailways requests a rulemaking to develop special procedures to allow motor carriers of passengers to publish non-predatory fare reductions[1] without notice. Its proposal envisions that any bus carrier availing itself of these special procedures would, in so doing, agree to the exercise of the Commission's power to suspend and/or investigate within 30 days after the effective date upon a finding that the fare is predatory.

The proposal is characterized as one to "institutionalize" certain aspects of existing Commission practices. Trailways points out that 49 CFR §§ 1306.4 and 1306.14 authorize publication on less than statutory notice under certain circumstances. In addition, it notes that outstanding special permission order No. 75-4370-M, as amended April 20, 1977, permits reductions in bus fares on five days' notice to meet Amtrak reductions.

Benefits to the industry and the public foreseen by Trailways as resulting from adoption of its proposal include: (1) More timely responsiveness by the bus industry to reductions in fares by Amtrak and the airlines, (2) more competition within the bus industry, and (3) the elimination of unnecessary paperwork by the Commission and the industry.

By eliminating the requirement of advance notice for fare reductions, Trailways contends, a deterrent to fare reductions will be eliminated. The existing notice requirement is said to be a deterrent to the extent it provides competitors with time to meet a reduction, thereby defeating the purpose of the reduction. Since only reductions are involved, the individual consumer it is said, will not be harmed by the elimination of notice.

Flexibility in charter prices. In No. 36991, Trailways requests a rule to accord the carriers complete flexibility (upward and downward) in charter pricing.

Essential features of its proposal are:

(1) Negotiated prices in lieu of publication of fixed charges in tariffs;

(2) Reliance on the market place to control the prices; (3) and monitoring by the Commission to ensure no abuses.

Trailways presents three chief grounds as justification:

(1) That the Commission's liberalized entry requirements ensure sufficient competition to let the market determine the price;

(2) That the purchaser of charter service is more sophisticated and the travel involves more discretion than other services offered by the intercity bus industry, thereby lessening the need for regulation; and (3) that the requested rule would enable regulated carriers to meet competition from illegal operators.

As authority for adoption of its proposal Trailways cites section 217(c) of the Interstate Commerce Act, as precedent, it refers to school charters, where Commission policy is said to accord such pricing flexibility, The State of Florida is also alleged currently to permit such flexibility.

Trailways further comments that the approach can be that of a "controlled experiment" by requiring the carriers to retain copies of charter contract orders for a reasonable period. If abuses are found in free marketing, Trailways notes, the Commission can order resumption of the traditional practice of tariff filing.

H.G. HOMME, Jr.,
Acting Secretary.

[7035-01]

IRREGULAR—ROUTE MOTOR COMMON CARRIERS OF PROPERTY—ELIMINATION OF GATEWAY LETTER NOTICES

SEPTEMBER 6, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's gateway elimination rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission by September 25, 1978. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

MC 25869 (Sub-E2), filed August 15, 1978. Applicant: NOLTE BROS. TRUCK LINE, INC., 6217 Gilmore Avenue, P.O. Box 7184, South Omaha Station, Omaha, NE 68107. Representative: J. F. Crosby (same as above). *Meats, meat products, and meat byproducts and articles* distributed by meat-packinghuses, as described in parts A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except liquid commodities, in bulk, in tank vehicles), (1) from the facilities of Cornland Dressed Beef Co. at or near Lexington and Minden, NE, to points in KY; (2) from the facilities of American Beef Packers, Inc., Pottawattamie County, IA, to points in KY and WI. (Gateways eliminated: Council Bluffs, IA and Saunders County, NE.)

MC 61825 (Sub-E293) (correction), filed May 13, 1974, published in the FEDERAL REGISTER issue of October 29, 1975, and republished, as corrected, this issue. Applicant: ROY STONE TRANSFER CORP. P.O. Box 385, Collinsville, Va. 24078. Representative: Harry J. Jordan, 1000 Sixteenth Street NW., Washington, D.C. 20036. *New furniture*, between point in GA on and north of a line beginning at the GA-SC State line at GA Hwy 13, then west along GA Hwy 13 to junction US Hwy 23, then southwest along US Hwy 23 to junction US Hwy 78, then west and US Hwy 78 to the GA-AL State line, on the one hand, and, on the other, points in CA, ID, MT, NV, ND, OR, SC, UT, WA, and WY on and west of a line beginning at the Mexico-United States International boundary line, and extending along Interstate Hwy 5, to junction Interstate Hwy 8, then east along Interstate Hwy 8 to junction CA Hwy 79, then north along CA Hwy 79 to junction CA Hwy 71, then east along CA Hwy 71 to junction CA Hwy 74, then north along CA Hwy 74 to junction CA Hwy 111, then east along CA Hwy 111 to junction Interstate Hwy 10, then northwest along Interstate Hwy 10 to junction CA Hwy 62, then north along CA Hwy 62 to junction unnumbered hwy, then north through Old Woman Springs, CA, along unnumbered hwy to junction Interstate Hwy 40 at Dagget, CA, then west along Interstate Hwy 40 to junction Interstate Hwy 15, then northeast along Interstate Hwy 15 to junction CA Hwy 127, then north along CA Hwy 127 to the CA-NV State line, then north along NV Hwy 29 to junction US Hwy 95, then north along US Hwy 95 to junction US Hwy 6, then east along US Hwy 6 to junction NV Hwy 25, then east along NV Hwy 25 to junction NV-UT State line, then east along UT Hwy 56 to junction U.S. Hwy 18, then north along UT Hwy 18 to junction UT Hwy 21, then east along UT Hwy 21 to junction US Hwy 91, then north along US Hwy 91 to junction U.S. Hwy 89, then north along U.S. Hwy 89 to junction ID-WY State line, then north along US Hwy 89 to junction US Hwy 14, then east along US Hwy 14 to junction Big Horn River, then north along Big Horn River to junction MT Hwy 47, then north along MT Hwy 47 to junction US Hwy 10, then east along US Hwy to junction US Hwy 12, then east along US Hwy 12 to junction MT-ND State line, then southeast along US Hwy 12 to junction ND-SD State line, then along US Hwy 12 to junction SD Hwy 65, then north along SD Hwy 65 to junction ND-SD State line, then north along ND Hwy 31 to junction ND Hwy 21, then east along ND Hwy 21 to junction ND Hwy 6, then north along ND Hwy 6 to junction US Hwy 10, then east along US Hwy 10 to junction ND Hwy 3, then north along ND Hwy 3 to junction ND Hwy 19, then east along ND Hwy 19 to junction ND Hwy 20, then north along ND Hwy 20 to junction ND Hwy 5, then along ND Hwy 5 to junction US Hwy 81, then north along US Hwy 81 to the United States-Canadian International boundary line. (Gateway eliminated: points in Smyth County, VA.)

NOTE.—The purpose of this republication is to state the correct territorial description.

MC 61825 (Sub-E294) (correction), filed May 13, 1974, published in the FEDERAL REGISTER issue of October 29, 1975, and republished, as corrected, this issue. Applicant: ROY STONE TRANSFER CORP. P.O. Box 385, Collinsville, VA 24078. Representative: Harry J. Jordon, 1000 Sixteenth Street NW., Washington, DC 20036. *New furniture*, between points in GA on, south and east of a line beginning at the GA-FL State line at US Hwy 441, then north along U.S. Hwy 441 to junction U.S. Hwy 23, then along U.S. Hwy 23 to junction GA Hwy 11, then along GA Hwy 11 to junction GA Hwy 211, then along GA Hwy 211 to junction Interstate Hwy 85, then west along Interstate Hwy 85 to junction GA Hwy 366, then north along GA Hwy 366 to junction GA Hwy 13, then east along GA Hwy 13 to the GA-SC State line, on the one hand, and, on the other, points in CA, CO, ID, MT, NE, NV, ND, OR, SD, UT, WA, and WY on the west of a line beginning at the Mexico-United States International boundary line at Interstate Hwy 5 and extending north along Interstate Hwy 5 to the junction of Interstate Hwy 8, then east along Interstate Hwy 8 to junction CA Hwy 79, then north along CA Hwy 79 to junction CA Hwy 71, then east along CA Hwy 71 to junction CA Hwy 74, then north along CA Hwy 74 to junction CA Hwy 111, then east along CA Hwy 111 to junction Interstate Hwy 10, then east along Interstate Hwy 10 to junction unnumbered Hwy, then northeast along unnumbered Hwy to junction U.S. Hwy 95, then north along U.S. Hwy 95 to junction CA-NV State line, then north along U.S. Hwy 95 to junction Interstate Hwy. 15, then east along Interstate Hwy 15 to junction NV-AZ State line, then north along NV-AZ State line to the AZ-UT State line, then along the AZ-UT State line to junction U.S. Hwy 160, then along U.S. Hwy 160 to junction AZ-CO State line, then east along U.S. Hwy 160 to junction Interstate Hwy 25, then north along Interstate 25 to junction U.S. Hwy 24, then east along U.S. Hwy 24 to junction CO Hwy 71, then north along CO Hwy 71 to junction U.S. Hwy 6, then northeast along U.S. Hwy 6 to junction U.S. Hwy 138, then east along U.S. Hwy 138 to junction CO Hwy 113, then north along CO Hwy 113 to the CO-NE State line, then north along NE Hwy 10 to junction U.S. Hwy 385, then north along U.S. Hwy .385 to junction NE Hwy 2, then east along NE Hwy 2 to junction NE-Hwy 91, then east along NE Hwy 91 to junction U.S. Hwy 183, then north along U.S. Hwy 183 to the NE-SD State line, then east along the NE-SD State line to junction SD Hwy 37, then north along SD Hwy 37 to junction U.S. Hwy 18, then east along U.S. Hwy 18 to junction U.S. Hwy 77, then north along U.S. Hwy 77 to junction U.S. Hwy 16, then east along U.S. Hwy 16 to the SD-MN State line, then north along the SD-MN State line to the MN-ND State line, then north along the MN-ND State line to the Canadian-United States International boundary line. [Notice No. 161]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 30, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 51146 (Sub-609), filed July 7, 1978. Applicant: Schneider Transport, Inc., P.O. Box 2298, Green Bay, WI 54306. Representative: John R. Patterson, 2480 East Commercial Boulevard, Fort Lauderdale, FL 33308. [Notice No. 162]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 30, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 7555 (Sub-69TA), filed July 12, 1978. Applicant: TEXTILE MOTOR FREIGHT, INC., P.O. Box 70, Junction of U.S. 220 and 73, Elerbe, NC 28338. Representative: Terrence D. [Volume No. 114]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES),

SEPTEMBER 6, 1978.

PETITIONS FOR MODIFICATION, INTERPRETATION, OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

All pleadings and documents must clearly specify the suffix (e.g. M1 F, M2 F) numbers where the docket is so identified in this notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this notice. Such protests shall comply with special rule 247(e) of the Commission's general rules of practice (49 CFR 1100.247) [1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

MC 2129 (Sub-4) (M1 F) (notice of filing of petition to modify permit), filed July 18, 1978. Petitioner: PIEDMONT FREIGHT CO., INC., Bumpass, VA 23024. Representative: Eugene Malkin, Suite 6193, 5 World Trade Center, New York, NY 10048. Petitioner holds a motor *contract carrier* permit in MC 2129 (Sub-4), issued August 28, 1974, authorizing transportation, over irregular routes, of: *Lumber and lumber products*, from points in Louisa County, VA, to points in CT, DE, IL, IN, KY, MD, MA, MI, NJ, NY, NC, OH, PA; RI, TN, and WV and DC, under a continuing contract(s) with Woolfolk Bros., Lumber Co., Inc., of Pendleton, VA, and Dick Purcell Lumber Corp., of Louisa, VA. By the instant petition, petitioner seeks to add Tega industries as a contracting shipper.

MC 32505 (M1 F) (notice of filing of petition to modify certificate), filed July 28, 1978. Petitioner: VINCI'S EXPRESS, INC., 402 Jefferson Avenue, Woodbine, NJ 08270. Representative: Morton Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. Petitioner holds a motor *common carrier* certificate in MC 32505 issued July 12, 1951, authorizing transportation, over irregular routes, as pertinent of: *General commodities* (except those of unusual value, and except livestock, dangerous explosives, household goods as defined in Practices of Motor Common Carriers of Household Goods, 17 MCC 467, commodities in bulk, commodities requiring special equipment) between points in the Philadelphia, PA, commercial zone, as defined by the Commission in 17 MCC 533, on the one hand, and, on the other, points in NJ south of U.S. Hwy 322, not including points on said hwy, and not including Mays Landing or points within 10 miles of Atlantic City. By the instant petition, petitioner seeks to remove the language "not including Mays Landing."

MC 50935 (Sub-12) (M1 F) (notice of filing of petition to modify certificate), filed June 22, 1978. Petitioner: WOLVERINE TRUCKING CO., a corporation, 2605 Woodward Avenue, Bloomfield, MI 48013. Representative: William Elmer, 21635 East Nine Mile Road, St Clair Shores, MO 48080. Petitioner holds a motor *common carrier* authority in MC 50935 (Sub-12), issued December 26, 1967 authorizing transportation over irregular routes as pertinent: *Malt beverages* from Detroit, MI, to points in MD, TN, WV, and WV, and PA and that part of IN on and south of U.S. Hwy 30 (except points in that part of IN beginning at the IN-OH State line and extending along U.S. Hwy 30 to junction U.S. Hwy 31, then south along U.S. Hwy 31 to Indianapolis, IN, then east along U.S. Hwy 40 to the IN-OH State line, then along the IN-OH State line to the point of beginning). By the instant petition, petitioner seeks to delete the word "malt" from the commodity description.

MC 95540 (Sub-999) (M1F) (notice of filing of petition to modify certificate), filed July 5, 1978. Petitioner: WATKINS MOTOR LINES, INC., P.O. Box 1636, 1144 West Griffin Road, Lakeland, FL 33801. Representative: Paul Daniell, 235 Peachtree Street NE., Atlanta, GA 30303. Petitioner holds motor *common carrier* authority in MC 95540 (sub-999), issued August 18, 1978, authorizing transportation over regular routes, as pertinent, of: (A) *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between New York, NY, and Bainbridge, GA, serving the intermediate points of Philadelphia, PA, Wilmington, DE, Baltimore, MD, Washington, DC, and all intermediate points in GA, NC, and SC, with service at Washington, DC, restricted to the transportation of traffic moving from or to points south thereof: From NY over Interstate Hwy 95 to junction In

[1] Copies of special rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

terstate Hwy 85 at Petersburg, VA, then over Interstate Hwy 85 to Newnan, GA then over U.S. Hwy 29 to La Grange GA, then over U.S. Hwy 27 boro, GA: From Greenville, over U.S. Hwy 25 to Statesboro and return over the same route. (14) Between Atlanta, GA, and Rossville, GA, serving all intion: The authority granted in (A) (1) through (23) above is restricted as follows: (1) Service at points in NC (except from and to points within 15

Hwy 403, then along NC Hwy 403 to junction U.S. Hwy 421, then along U.S. Hwy 421 to junction U.S. Hwy 1, then along U.S. Hwy 1 to the NC-SC State Charlotte, Prince Edward, and Nottoway Counties, VA. By the instant petition, petitioner seeks to delete the restrictions as set forth over irregular routes, of: (1) *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by

(10) Between Atlanta, GA, and Wilmington, NC, serving all intermediate points: From Atlanta, over Interstate Hwy 20 to Columbia, SC, then over U.S. Hwy 76 to Wilmington, and return over the same route. (11) Between Charlotte, NC, and Savannah, GA, serving all intermediate points: From Charlotte over U.S. Hwy 21 to Columbia, SC, then over U.S. Hwy 321 to Savannah, and return over the same route. (12) Between Asheville, NC, and Charleston, SC, serving all intermediate points: From Asheville, over U.S. Hwy 25 to Greenville, SC, then over U.S. Hwy 276 to junction Interstate Hwy 26 near Clinton, SC, then over Interstate Hwy 26 to Charleston, and return over the same route. (13) Between Greenville, SC, and Statesboro, GA: From Greenville, over U.S. Hwy 25 to Statesboro and return over the same route. (14) Between Atlanta, GA, and Rossville, GA, serving all intermediate points: From Atlanta, over U.S. Hwy 41 to Rossville, and return over the same route. (15) Between Atlanta, GA, and Thomasville, GA, serving all intermediate points: From Atlanta, over GA Hwy 85 to Manchester, GA, then over U.S. Hwy Alternate 27 to Columbus, GA, then over U.S. Hwy 280 to Richland, GA, then over GA Hwy 55 to Dawson, GA, then over U.S. Hwy 82 to Albany, GA, then over U.S. Hwy 19 to Thomasville, and return over the same route.

(16) Between Atlanta, GA, and Valdosta, GA, serving all intermediate points: From Atlanta, over Interstate Hwy 75 to Valdosta, and return over the same route. (17) Between Macon, GA, and Folkston, GA, serving all intermediate points: From Macon, over U.S. Hwy 23 to Folkston, and return over the same route. (18) Between Columbus, GA, and Savannah, GA, serving all intermediate points: From Columbus, over U.S. Hwy 80 to Savannah and return over the same route. (19) Between Macon, GA, and the junction of U.S. Hwy 441 and Interstate Hwy 85 near Commerce, GA, serving all intermediate points: From Macon, over U.S Hwy 129 to Athens, GA, then over U.S. Hwy 441 to junction Interstate Hwy 85 near Commerce, and return over the same route. (20) Between Bainbridge, GA, and Midway, GA, serving all intermediate points: From Bainbridge, over U.S. Hwy 84 to Waycross, GA, then over U.S. Hwy 82 to Midway, and return over the same route. (21) Between Statesboro, GA, and Folkston, GA, serving all intermediate points: From Statesboro over U.S. Hwy 301 to Folkston, and return over the same route. (22) Between Waycross, GA, and Brunswick, GA, serving all intermediate points: From Waycross, over U.S. Hwy 84 to Brunswick, and return over the same route. (23) Between Macon, GA, and Savannah, GA, serving all intermediate points: From Macon, over Interstate Hwy 16 to Soperton, GA, then over U.S. Hwy 221 to junction U.S. Hwy 280, then over U.S. Hwy 280 to Savannah, and return over the same route. Service is authorized at all points in GA, SC, and NC, and those points in Lunenburg, Mecklenburg, Halifax, Charlotte, Prince Edward, Pittsylvania, Henry, Franklin, and Nottoway Counties, VA, and those in Cumberland, Gloucester, Salem, Hudson, Bergen, Passaic, Sussex, Essex, Morris, Union, Middiesex, Monmouth, and Somerset Counties, NJ, not on the above-described regular routes, as off-route points in connection with the regular route operations described in (A) (1) through (23) above. Restriction: The authority granted in (A) (1) through (23) above is restricted as follows: (1) Service at points in NC (except from and to points within 15 miles of Atlanta, GA, and points in SC) restricted to the transportation of traffic moving from or to points within the territory bounded (a) by a line extending east along the NC-VA State line to junction U.S. Hwy 1, then along U.S. Hwy 1 to junction U.S. Hwy 158, then along U.S. Hwy 158 to Warrenton, NC, then along NC Hwy 58 to Wilson, NC, then along U.S. Hwy 301 to junction U.S. Hwy 117, then along U.S. Hwy 117 to Wilmington, NC, then along U.S. Hwy 421 to Fort Fisher, NC, and (b) by a line extending west along the NC-TN State line to junction U.S. Hwy 25, then along U.S. Hwy 25 to the NC-SC State line. (2) Service from or to points in NC as described in (1) above on traffic moving from and to points in GA restricted, except as set forth in (3) below, to the transportation of traffic moving from or to points beyond.

(3) Service authorized between points in NC and points in GA is restricted to the transportation of traffic moving only: (a) Between points in that part of GA on and bounded by a line beginning at the GA-AL State line, then along U.S. Hwy 80 to junction GA Hwy 96, then along GA Hwy 96 to Fort Valley, then along GA Hwy 49 to junction Interstate Hwy 75, then along Interstate Hwy 75 to Atlanta, then along U.S. Hwy 78 to the GA-AL State line, on the one hand, and, on the other, points in that part of NC on and bounded by a line beginning at the NC-VA State line, then along U.S. Hwy 1 to junction U.S. Hwy 158, then along U.S. Hwy 158 to Warrenton, then along NC Hwy 58 to Wilson, then along U.S. Hwy 301 to junction U.S. Hwy 117, then along U.S. Hwy 117 to Wilmington, then along U.S. Hwy 421 to Fort Fisher, then along the NC-SC State line to junction NC Hwy 18, then along NC Hwy 18 to Morganton, then along NC Hwy 181 to junction NC Hwy 194, then along NC Hwy 194 to junction U.S. Hwy 19E, then along U.S. Hwy 19E to the NC-TN State line; or (b) between points in that part of GA, south and west of a line beginning at the GA-AL State line, then along U.S. Hwy 80 to junction GA Hwy 96, then along GA Hwy 96 to Fort Valley, then along GA Hwy 49 to junction Interstate Hwy 75, then along Interstate Hwy 75 to Tifton, then along U.S. Hwy 41 to the GA-FL State line on the one hand, and, on the other, points in that part of NC on and bounded by a line beginning at the NC-VA State line, then along U.S. Hwy 1 to junction U.S. Hwy 158, then along U.S. Hwy 158 to Warrenton, then along NC Hwy 58 to Wilson, then along U.S. Hwy 117 to junction NC Hwy 403, then along NC Hwy 403 to junction U.S. Hwy 421, then along U.S. Hwy 421 to junction U.S. Hwy 1, then along U.S. Hwy 1 to the NC-SC State line, then along NC-SC State line to junction NC Hwy 18, then along NC Hwy 18 to the NC-VA State line; or (c) between points in that part of GA bounded by a line beginning at Atlanta, then along Interstate Hwy 75 to the GA-FL State line, then along the GA-FL State line to junction U.S. Hwy 23, then along U.S. Hwy 23 to Waycross, then along U.S. Hwy 1 to Wrens, then along GA Hwy 17 to Thompson, then along U.S. Hwy 78 to Atlanta, on the one hand, and, on the other, points in that part of NC bounded by a line beginning at the NC-SC State line at Interstate Hwy 85, then along Interstate Hwy 85 to Charlotte, then along Interstate Hwy 77 to Statesville, then along NC Hwy 115 to junction NC Hwy 18, then along NC Hwy 18 to the NC-VA State line, then along the NC-VA State line to junction Interstate Hwy 85, then along Interstate Hwy 85 to Henderson, then along U.S. Hwy 1 to the NC-SC State line, then along the NC-SC State line to Interstate Hwy 85, point of beginning; or (d) between points in that part of GA north of a line beginning at the GA-AL State line, thene along U.S. Hwy 78 to Atlanta, then on and north of U.S. Hwy 78 to Athens, then on and north of GA Hwy 72 to the GA-SC State line, on the one hand, and, on the other, points in that part of NC on and bounded by a line beginning at the NC-VA State line, then along U.S. Hwy 1 to junction U.S. Hwy 158, then along U.S. Hwy 158 to Warrenton then along NC Hwy 58 to Wilson, then along U.S. Hwy 301 to junction U.S. Hwy 117, then along U.S. Hwy 117 to junction U.S. Hwy 421, then along U.S. Hwy 421 to Fort Fisher, then along the Atlantic Ocean to the NC-SC State line, then along the NC-SC State line to junction Interstate Hwy 85, then along Interstate Hwy 85 to Charlotte, then along U.S. Hwy 21 to Statesville, then along U.S. Hwy 601, then along U.S. Hwy 601 to Mount Airy, then along U.S. Hwy 52 to the NC-VA State line to point of beginning. (4) Service at points in GA is restricted against the transportation of traffic moving between points in GA. (5) Service at Wilmington, DE, and points in Cumberland, Gloucester, and Salem Counties, NJ, is restricted against the transportation of traffic moving from or to points in VA. (6) Service at points in Cumberland, Gloucester, and Salem Counties, NJ, is restricted against the transportation of traffic moving from points in NC, GA, and SC. (7) Service at Norfolk, VA, is restricted against the transportation of traffic destined to points in Lunenburg, Mecklenburg, Halifax, Charlotte, Prince Edward, and Nottoway Counties, VA. By the instant petition, petitioner seeks to delete the restrictions as set forth above.

MC 103926 (Sub-29M1F) (notice of filing of petition to remove a restriction), filed July 17, 1978. Petitioner: W. T. MAYFIELD SONS TRUCKING CO., a corporation. Representative: William H. Driskell, P.O. Box 947, Mableton, GA 30059. Petitioner holds a motor *common carrier* certificate in No. MC 103926 (Sub-29) issued August 8, 1975, authorizing transportation, over irregular routes, of: *Cranes, derricks, power shovels, drag lines, front-end loaders, backhoes,* and *related parts* and *attachments* moving in connection therewith, which because of size or weight require the use of special equipment or special handling, from the plantsite of Bucyrus-Erie Co. at Evansville, IN, to points in AL, FL, GA, LA, MS, NC, and SC, with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the named plantsite and destined to points in the above-described destination territory. By the instant petition, petitioner seeks to delete the restriction reading "the operations authorized herein are restricted to the transportation of traffic originating at the named plantsite and destined to points in the above-described destination territory."

MC 126458 (Sub-10M1F) (notice of filing of petition to modify permit), filed July 31, 1978. Petitioner: NICHOLAS J. ASCENZO INC., 1544 Boone Avenue, Bronx, NY 10460. Representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, NY 10048. Petitioner holds a motor *contract carrier* authority in MC 126458 (Sub-10) issued July 17, 1978, authorizing transportation over irregular routes of: *Contractors equipment, materials, and supplies* (except commodities in bulk), between points in CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA, WV, and DC, under continuing contract or contracts with Slattery Associated, Inc. By the instant petition, petitioner seeks to add Grand Iron Works, Inc., Bronx, NY, as an additional contracting shipper.

MC 127346 (Sub-2M1F) (notice of filing of petition to modify certificate), filed June 23, 1978. Petitioner: HALL'S FAST MOTOR FREIGHT INC., 330 Oak Tree Avenue, South Plainfield, NJ 07080. Representative: George Olsen, 69 Tonnele Avenue, Jersey City, NJ 07306. Petitioner holds a motor *common carrier* certificate in MC 127346 (Sub-2), issued February 15, 1967, authorizing transportation, over irregular routes, of: (1) *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment), (a) between points in Bergen, Passaic, Hudson, Essex, Union, Middlesex, Hunterdon, Warren, and Somerset Counties, NJ, on the one hand, and, on the other, New York, NY, and points in Westchester and Nassau Counties, NY, and Berks, Lehigh, and Northampton Counties, PA, (b) between New York, NY, and points in Westchester and Nassau Counties, NY, on the one hand, and, on the other, points in Berks, Lehigh, and Northampton Counties, PA, and (2) *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities requiring special equipment) between points in Middlesex, Somerset, and Union Counties, NJ, on the one hand, and, on the other, points in New Castle County, DE, and Philadelphia, Montgomery, Bucks, and Lancaster Counties, PA. By the instant petition, petitioner seeks to modify the above authority by broadening the base territorial description in (1)(a) and (2) to include all points in NJ.

MC 141538 (Sub-1M1F) (notice of filing of petition to modify permit) filed July 19, 1978. Petitioner: GEORGE BROS., INC., P.O. Box 492, Sutton, NE 68979. Representative: Arlyn L. Westergren, Suite 610, 7171 Mercy Road, Omaha, NE 68106. Petitioner holds a motor *contract carrier* permit in MC 141538 Sub 1, issued August 21, 1977, authorizing transportation, over irregular routes, of: *Grain bins, metal buildings, grain handling equipment,* and *materials and equipment* used in the erection of grain bins and metal buildings, from the facilities of Hymark Industries, Inc. at or near Henderson, NE, to points in the United States (except AK and HI). *Augers and grain handling equipment,* from Clay Center, KS, to the facilities of Hymark Industries, Inc. at or near Henderson, NE. *Iron and steel articles,* from Chicago and Hennepin, IL, and Sheffield, IA to the facilities of YORK Manufacturing Co. at or near Henderson, NE. Restriction: The service authorized herein is subject to the following conditions: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with Hymark Industries, Inc. of Henderson, NE. The purpose of the modification is to add the authority to transport iron and steel articles from Chicago and Hennepin, IL, and Sheffield, IA to the facilities at YORK Manufacturing Co. at or near Henderson, NE.

S E 1 3 7 8

NOTE.—Petitioner has pending a modification of its permit to change the corporate name of the supporting shipper Hymark Industries, Inc. to YORK Manufacturing Co.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such pleading shall comply with special rule 247(e) of the Commission's General Rules of Practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 136605 (Sub-39) (republication), filed November 16, 1977, published in the FEDERAL REGISTER issue of January 12, 1978, and republished this issue. Applicant: DAVIS BROS., INC., P.O. Box 8058, Missoula, MT 59807. Representative: W. E. Seliski (same address as applicant). A Decision of the Commission, Review Board Number 2, decided July 13, 1978, and served August 17, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: (1) *Materials and supplies* used in the construction, installation, and packaging of pre-cut log buildings, from points in the United States in and west of MI, IN, IL, MO, AR, and TX (except AK, HI, and MT), to the facilities of Real Log Homes, Inc., at Missoula, MT; and (2) *windows, doors, and millwork*, from the facilities of Real Log Homes, Inc., t Missoula, MT, to the facilities of Real Log Homes, inc., at Reno, NW, and Mena, AR, restricted in (1) and (2) above to the transportation of Traffic originating at the named origins and destined to the named destinations, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republican is to indicat the addition of NV as a destination point in part (2) above.

MC 143121 (Sub-4) (republication), filed August 24, 1977, published in the FEDERAL REGISTER issue of November 10, 1977, and republished this issue. Applicant: TILLAMOOK CARRIERS, INC., 8023 East Slausen Avenue, Montevello, CA 90640. Representative: Miles L. Kavaller, 315 South Beverly Drive, Suite 315, Beverly Hills, CA 90212. A decision of the Commission, by the initial decision of Administrative Law Judge Geraldine R. Keyes, served June 28, 1978, becomes effective August 17, 1978, finds that the present and public convenience and necessity require operations by applicant in interstate or foreign commerce as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of: (1) *Such commodities as are dealt in by retail and chain grocery, hardware and drugstores*, and (2) *materials and supplies* (except commodities in bulk), used in the manufacture and distribution of such commodities as follows: (1) Between the facilities of Boyle-Midway Division of American Home Products, in Chicago, IL and Los Angeles, CA, and points in IA, Kansas City, MO, Denver, CO, Salt Lake City, UT, and Phoenix, AZ, (2) from the facilities of Boyle-Midway Division of American Home Products, in Chicago, IL, to Fargo, ND, (3) from the facilities of Boyle-Midway Division of American Home Products, in Los Angeles, CA and in Chicago, IL, to points in MT, ID, OR, and WA, (4) from Portland, OR, to points in MT, WY, ID, WA, and OR, (5) from the facilities of Peterson-Puritan and Aerosol Techniques, in Danville, IL, to the facilities of Boyle-Midway Division of American Home Products, in Chicago, IL and Los Angeles, CA, and (6) between the facilities of Boyle-Midway, in Canton, OH, Chicago, IL, and Cranford, NJ, under a continuing contract or contracts with Boyle-Midway Division of American Home Products in items (1) through (6) above, will be consistent with the public interest and the national transportation policy, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to modify the commodity and territorial description.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

The following applications are governed by special rule 247 of the Commission's general rules of practice (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use a such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally, protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. All pleadings and documents must clearly specify the F suffix where the docket is so identified in this notice. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(e)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission decision which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

MC 51146 (Sub-594F), filed April 5, 1978, and previously noticed as Sub-494F in the FEDERAL REGISTER issue of July 6, 1978. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, Green Bay, WI 54306. Representative: John R. Patterson, 2480 East Commercial Boulevard, Fort Lauderdale, FL 33308. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products, and cellulose materials and products* (except commodities in bulk), (a) from the facilities of International Paper Co., at or near (i) Bastrop and Springhill, LA, and (ii) Moss Point and Redwood, MS, to points in IL, IN, IA, KY, MN, MO, ND, SD, TN, and WI, and (b) from the facilities of International Paper Co., at or near Moss Point and Redwood, MS, to points in MI and OH, and (2) *equipment, materials, and supplies* used in the manufacture or distribution of paper and paper products, and cellulose materials and products (except commodities in bulk), from points in the destination States named in (1) (a) and (b) above, to the facilities of International Paper Co., at or near (i) Mobile, AL, (ii) Bastrop and Springhill, LA, and (iii) Moss Point and Redwood, MS. (Hearing site: Chicago, IL.)

NOTE.—This republication shows the correct sub-number.

MC 83539 (Sub-485F), filed March 8, 1978, and previously noticed in the FEDERAL REGISTER issue of July 20, 1978. Applicant: C & H TRANSPORTATION CO., INC., 9757 Military Parkway, P.O. Box 270535, Dallas, TX 75227. Representative: Thomas E. James (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) (a) *Buildings*, complete, knocked down, or in sections, (b) *building sections and building panels*, and (c) *metal prefabricated structural components and panels*, from the facilities of American Buildings Co., in Carson County, NV, to points in AZ, CA, CO, ID, MT, NV, NM, OR, TX, UT, WA, and WY, and (2) *materials, supplies, and parts*, used in the manufacture and servicing of commodities in (1) (a), (b), and (c) except commodities in bulk), from points in the United States (except AK and HI), to points in Carson County, NV. (Hearing site: Birmingham, AL, or Dallas, TX.)

NOTE.—This republication shows that the facilities of American Buildings Co. are located in Carson County, NV.

MC 83539 (Sub-493F), filed April 14, 1978, and previously noticed as Sub-193F in the FEDERAL REGISTER issue of July 27, 1978. Applicant: C & H TRANSPORTATION CO., INC., 9757 Military Parkway, P.O. Box 270535, Dallas, TX 75227. Representative: Thomas E. James (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bulk material handling equipment and parts and components* for bulk material handling equipment, from points in Buchanan County, MO, to points in the United States (except AK and HI). (Hearing site: Kansas City, MO, or Dallas, TX.)

NOTE.—This republication shows the correct sub-number.

MC 140024 (Sub-126F), filed April 14, 1978, and previously noticed as Sub-104 in the FEDERAL REGISTER issue of August 17, 1978. Applicant: J. B. MONTGOMERY, INC., 5565 East 52d Avenue, Commerce City, CO 80022. Representative: Charles J. Kimball, 350 Capitol Life Center, 1600 Sherman Street, Denver, CO 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from ports of entry on the international boundary line between the United States and Canada, at or near Champlain, NY, to Dallas and Grand Prairie, TX, Lincoln, NE, Elk Grove Village, IL, Los Angeles, CA, and New Orleans, LA. (Hearing site: Denver, CO, or Chicago, IL.)

NOTE.—Common control may be involved. This republication indicates the correct sub-number.

MC 144232 (Sub-1F), filed April 14, 1978. Applicant: TRANS-NATIONAL TRUCK, INC., P.O. Box 4168, Amarillo, TX 79105. Representative: Warren Troupe, 2480 East Commercial Boulevard, Fort Lauderdale, FL 33308. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in or used by manufacturers and distributors of paint, chemicals, and related articles, between points in the United States (except AK and HI), under a continuing contract with the Sherwin-Williams Co., of Cleveland, OH. (Hearing site: Chicago, IL.)

NOTE.—Dual operations may be at issue in this proceeding.

MC 144342 (Sub-2F), filed March 30, 1978, and previously noticed in the FEDERAL REGISTER issue of May 25, 1978. Applicant: CONTAINER TRANSPORT, INC., 630 Terminal Tower Building, Cleveland, OH 44113. Representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, OH 44114. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Steel drums*, from the facilities of Republic Steel Corp., at or near Nitro, WV, to points in IN, KY, OH, and TN under a continuing contract with Republic Steel Corp., of Cleveland, OH. (Hearing site: Washington, DC.)

NOTE.—Common control may be involved. This republican indicates applicant's correct name.

FINANCE APPLICATIONS

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with special rules 240(c) or 240(d) of the Commission's general rules of practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

MC-F-3694F. Authority sought for purchase by COOPER MOTOR LINES, 301 Hammett Street, Greenville, SC 29608, a portion of the operating rights of Crescent Motor Lines, P.O. Box 2625, Spartanburg, SC 29302, and for acquisition by Cooper Motor Lines, Inc., also of Greenville, SC, of control of the rights through the purchase. Applicant's attorneys: Francis W. McInerny Esq., 1000–16th Street NW., Washington, DC 20036 and Frank B. Hand, Jr., Esq., P.O. Drawer C, Berryville, VA 22611. Operating rights sought to be purchased: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, as a *common carrier*, over irregular routes, between Spartanburg and Lyman, SC, on the one hand, and, on the other, points in NC on and west of Interstate Hwy 77 extending between the NC-SC State line and the VA-NC State line. Approval of the proposed transaction will result in vendee acquiring operating authority to handle traffic which it is presently handling in interline service by interchange with other motor carriers at Spartanburg, SC. Vendor proposes to split its authority to serve the entire State of NC and vendee the portion west of U.S. Hwy 77. Vendee is authorized to operate as a common carrier in NY, NJ, PA; DE MD, DC, VA, NC, SC, and WV. Application has not been filed for temporary authority under section 210a(b) of the Act.

NOTE.—MC-47171 (Sub-114F) is a directly related matter.

MC-F-13713F. Authority is sought for purchase by RONALD HACKENBERGER, d.b.a. RON'S TRUCKING SERVICE, Route 3, Norwalk, OH, 44957, of a portion of the operating rights of BREYER EXCHANGE, INC., 236 Front Street, Southwest,

New Philadelphia, OH, 44663. Applicant's attorney: Richard H. Brandon, 220 West Bridge Street, P.O. Box 97,

Trucking Co., Inc., 161 West Wisconsin Avenue, Milwaukee, WI 53201. Applicant's attorneys: A. N. Jacobs, P.O.

rights. Applicant's attorney: Richard H. Champlin, P.O. Box 12750, Oklahoma City, OK, 73157, and Carl L.

ing special equipment), between points in NC on and west of U.S. Hwy 77, on the one hand, and, on the other, Culpeper, Suffolk, Windsor, Norfolk,

Geysers; (b) State Hwy 17 between San Rafael and Santa Cruz, inclusive; (c) Interstate Hwy 80 between San Francisco and Roseville, inclusive; (d)

hicles. (4) Livestock, viz: barrows, boars, bulls, butcher hogs, calves, cattle, cows, dairy cattle, ewes, feeder pigs, gilts, goats, heifers, hogs, kids,

New Philadelphia, OH, 44663. Applicant's attorney: Richard H. Brandon, 220 West Bridge Street, P.O. Box 97, Dublin, OH, 43017. Operating rights sought to be purchased: Under certificate MC-138579 authorizing the transportation of: *Lime, limestone* and *limestone products*, as a *common carrier* over irregular routes from the facilities of the National Lime and Stone Co., located at or near Carey (Wyandotte County) OH to points in MI, IN, IL, KY, NJ, PA, TN, WV, WI and MO. Vendee is authorized to operate as a contract carrier under permit MC 113654 in the States of OH, PA, and WV. Application has been filed for temporary authority under section 210a(b).

MC-F-13717F. Authority sought for purchase by AMERICAN TRANSFER & STORAGE CO., 2665 Villa Creek Drive, P.O. Box 34410, Dallas, TX 75234, a portion of the operating rights of Central Forwarding Inc., 310 South 13th Street, P.O. Box 1519, Waco, TX 76703, and for acquisition by W. N. McKinney, also of Dallas, TX, of control of the rights through the purchase. Applicant's attorney: Phillip Robinson, P.O. Box 2207, Austin, TX 78768. Operating rights sought to be purchased: *Household goods*, as defined by the Commission, as a *common carrier*, over irregular routes, between points in TX, on the one hand, and, on the other, points in OK, KS, and MO, and between Houston, TX, on the one hand, and, on the other, points in AR, LA and OK, *explosives and blasting supplies* from Joplin, MO, and points in MO within 5 miles of Joplin, to points in TX, and from Dallas and Houston, TX, and Joplin, MO, and points within 20 miles Dallas and Houston and within 15 miles of Joplin, to powder maganizes and construction job sites in AR and LA; *replacement engines* for disabled aircraft, and *parts* necessary for the installation thereof, from Dallas, TX, to points in NM, AR, OK, KS, and LA, and *defective aircraft engines* from points in MN, AR, OK, KS and LA, to Dallas, TX, *telephone equipment, materials, and supplies*, as a *contract carrier*, over irregular routes, between Dallas, TX, on the one hand, and, on the other, points in 36 Texas counties as more specifically described in permit MC 136577 (Sub-2). Vendee is authorized to operate pursuant to certificate No. MC 126246 as a *common carrier* in AR and TX. Application has been filed for temporary authority under section 210a(b).

MC-F-13719F. Authority sought for purchase by TRI-STATE MOTOR TRANSIT CO., P.O. Box. 113 (Business I-44), Joplin, MO 64801, of the operating rights of Henry Lambert Trucking Co., d.b.a. Henry Lambert Trucking Co., Inc., 161 West Wisconsin Avenue, Milwaukee, WI 53201. Applicant's attorneys: A. N. Jacobs, P.O. Box 113, Joplin, MO 64801, and Paul F. Sullivan, Suite 711, Washington Building, Washington, D.C. 20005. Operating rights sought to be purchased in MC 94597: *Heavy industrial machinery and contractor's equipment, materials, and supplies*, as a *common carrier*, over irregular routes, between points and places in MN, SD, ND, and WI, and Sub-No. 2, *Crude vermiculite ore*, in bulk, in dump vehicles, from Seneca, IL, to Minneapolis, MN. Vendee is authorized to operate pursuant to certificate No. MC 109397 as a *common carrier*, by motor vehicles, throughout the United States. Approval of the proposed transaction will result in vendee acquiring no duplicating authority. Application has not been filed for temporary authority under section 210a(b).

MC-F-13720F. Authority sought for purchase by CHIZEKELEVATOR & TRANSFORT, INC., P.O. Box 147, Cleveland, WI 53063, of a portion of the operating rights of Ralph H. Boelk, an individual, d.b.a. Boelk Truck Lines, Route 2, Mendota, IL 61342, and for acquisition by Carmen and Janic Chizek, both of Route 1, Newton, WI 53063, of control of such rights through the transcation. Applicants' attorneys: Wayne W. Wilson, 150 East Gilman Street, Madison, WI 53703, and Walter Kobos, 1016 Kehoe Drive, St. Charles, IL 60174. Operating rights sought to be transferred: *Canned vegetables and cranberry products*, as a *common carrier*, over irregular routes, from Manitowoc, WI, to points in IL, KY, and OH, and points in that part of IA and MO on and east of U.S. Hwy 61, from Plainview, MN, to points in KY and OH, and *canned vegetables*, from Bloomer, WI, to points in IL, points in that part of IN north of IN Hwy 26, points in that part of OH north of U.S. Hwy 36, and points in that part of IA and MO on and east of U.S. Hwy 61. Restriction: The authority granted herein is restricted to the transportation of shipments originating at the above-named origins and destined to the above-named destinations. Vendee is authorized to operate as a *common carrier* in MO, IA, WI, IL, OH, IN, MI, MN, PA, AR, KS, KY, MI, and TN. Application has not been filed for temporary authority under section 210a(b).

MC-F-13726F. Authority sought for purchase by LEE WAY MOTOR FREIGHT, INC., 3401 Northwest 63d Street, Oklahoma City, OK 73116, of a portion of the operating rights of O.K. Motor Service, Inc., 5450 South Center Avenue, Summit, IL 60501, and PepsiCo, Inc., Andersonhill Road, Purchase, NY 10577, of control of such rights. Applicant's attorney: Richard H. Champlin, P.O. Box 12750, Oklahoma City, OK, 73157, and Carl L. Steiner, 30 South LaSalle Street, Chicago, IL 60603. Operating rights sought to be purchased: *General commodities*, with exceptions, as a *common carrier* over irregular routes, between Chicago, IL, and its commercial zone and Milwaukee, WI, and points in its commercial zone, serving all intermediate points, and Waukesha, WI, as more fully described in Docket MC 52587 and Sub-1 thereto. Vendee is authorized to operate as a *common carrier* of general commodities over primarily regular routes in AL, AR, AZ, CA, CO, GA, IL, IN, IA, KS, KY, MN, MS, MO, NM, NC, NY, OH, OK, PA, SC, TN, TX, VA, and WV, as more fully described in MC 61440. Application has been filed for temporary authority under section 210(a)(b). Vendee proposes to tack the authority sought herein at Chicago, IL, to provide a through service.

Operating Rights Application(s) Directly Related to Finance Proceedings

The following operating rights application(s) are filed in connection with pending finance applications under section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this Federal Register notice. Such protests shall comply with Special Rule 247(e) of the Commission's general rules of practice (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

MC 47171 (Sub-114F), filed August 4, 1978. Applicant: COOPER MOTOR LINES, INC., 301 Hammett Street, Greenville, SC 29608. Representative: Frank B. Hand, Jr., P.O. Drawer C, Berryville, VA 22611. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in NC on and west of U.S. Hwy 77, on the one hand, and, on the other, Culpeper, Suffolk, Windsor, Norfolk, Madison Heights, Petersburg, Lester Manor, Richmond, Fredericksburg, Warrenton, Franklin, Lynchburg, Farmville, Smithfield, Danville, South Boston, Victoria, and Roanoke, VA, DC, Baltimore, and Cumberland, MD, Wilmington and Cheswold, DE, Philadelphia, Biglerville, and York, PA, and points in that part of PA east of the Susquehanna River, Camden and Trenton, NJ, points in Cumberland, Salem, Warren, Sussex, Morris, and Somerset Counties, NJ, New York, NY, and points in NJ and NY within 25 miles of New York, NY, and points in Connecticut west of the Connecticut River. (Gateway to be eliminated: Spartanburg and Lyman, SC.) (Hearing site: Asheville, NC or DC.)

Note.—The purpose of this application is to eliminate the gateway as indicated above. This application is directly related to a finance proceeding docketed MC-F-13694F published in a previous section of this Federal Register issue.

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 206(a)(6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's General Rules of Practice (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State commission with which the application is filed and shall not be addressed to or filed with the Interstate Commerce Commission.

California Docket 58281 (amendment), filed August 7, 1978. Applicant: KELLER'S FREIGHT LINE, INC., 2270 McKinnon Avenue, San Francisco, CA 94124. Representative: Steven H. Herman, 235 Montgomery Street, Suite 2210, San Francisco, CA 94104. Certificate of public convenience and necessity sought to operate a freight service, as follows: transportation of: *general commodities*, (1) between all points and places in the San Francisco-East Bay Cartage Zone as described in Note A hereof; (2) between all points and places on and within 10 statute miles of the following routes: (a) U.S. Hwy 101 between Asti and Salinas, inclusive, with no service authorized to points north of Asti or to the Geysers; (b) State Hwy 17 between San Rafael and Santa Cruz, inclusive; (c) Interstate Hwy 80 between San Francisco and Roseville, inclusive; (d) State Hwy 238 and Interstate Hwy 580 between San Lorenzo and junction of Interstate Hwy 5, inclusive; (e) State Hwy 120 and Interstate Hwys 5 and 205 between Manteca and junction with Interstate Hwy 580; (f) State Hwy 12 between Santa Rosa and Lodi, inclusive: (g) State Hwy 4 between Pinole and junction with State Hwy 160. inclusive; (h) State Hwy 160 and State Hwy 12 between junction with State Hwy 4 and Rio Vista, inclusive; (i) State Hwy 24 between Oakland and junction with State Hwy 4, inclusive; (j) Interstate Hwy 680 between Vallejo and Warm Spring, inclusive; (k) State Hwy 29 between Vallejo and Rutherford, inclusive, with no service authorized to points north of Rutherford; (l) State Hwy 99 between Sacramento and Modesto, inclusive; (m) Interstate Hwy 5 between Woodland and Sacramento, inclusive; (n) State Hwys 99 and 120 between Stockton and Manteca, inclusive; (o) U.S. Hwy 50 and Folsom Boulevard between Sacramento and Rancho Cordova, inclusive; (p) Interstate Hwys 80, 505 and State Hwy 128 between Vacaville and Winters, inclusive; (q) State Hwy 120 between Manteca and Oakdale, inclusive; (r) State Hwy 1 between San Francisco and Carmel, inclusive; (s) State Hwy 156 between Castroville and Hollister, inclusive; (t) State Hwy 68 between State Hwy 1 and Salinas, inclusive; in performing the service herein authorized, carrier may make use of any and all streets, roads, highways, and bridges necessary or convenient for the performance of said service. Except that purusant to the authority herein granted carrier shall not transport any shipments of: (1) Used household goods, personal effects and office, store and institution furniture, fixtures and equipment not packed in salesmen's hand sample cases, suitcases overnight or boston bags, brief cases, hat boxes, valises, traveling bags, trunks, lift vans, barrels, boxes, cartons, crates, cases, baskets, pails, kits, tubs, drums, bags (jute, cotton, burlap or gunny) or bundles (completely wrapped in jute, cotton, burlap, gunny, fiberboard, or straw matting); (2) Automobiles, trucks, and buses, viz.: new and used, finished or unfinished passenger automobiles (including jeeps), ambulances, hearses and taxis, freight automobiles, automobile chassis, trucks, truck chassis, truck trailers, trucks and trailers combined, buses and bus chassis. (3) Liquids compressed gases, commodities in semiplastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semi-trailers or a combination of such highway vehicles. (4) Livestock, viz: barrows, boars, bulls, butcher hogs, calves, cattle, cows, dairy cattle, ewes, feeder pigs, gilts, goats, heifers, hogs, kids, lambs, oxen, pigs, rams (bucks), sheep, sheep camp outfits, sows, steers, stags, swine or wethers. (5) Commodities when transported in bulk in dump-type trucks or trailers or in hopper-type trucks or trailers. (6) Commodities when transported in motor vehicles equipped for mechanical mixing in transit. (7) Logs. (8) Articles of extraordinary value. (9) Commodities requiring the use of special refrigeration or temperature control in specially designed and constructed refrigerator equipment.

Note A—San Francisco-East Bay Cartage Zone

The San Francisco-East Bay Cartage Zone includes the area embraced by the following boundary: Beginning at the point where the an Francisco-San Mateo County boundary line meets the Pacific Ocean; then easterly along said boundary line to Lake Merced Boulevard; then southerly along said Lake Merced Boulevard to South Mayfair Avenue; then westerly along said South Mayfair Avenue to Crestwood Drive; then southerly along Crestwood Drive to Southgate Avenue; then westerly along Southgate Avenue to Maddux Drive; then southerly and easterly along Maddux Drive to a point 1 mile west of State Hwy 82; then southeasterly along an imaginary line 1 mile west of and paralleling State Hwy 82 (El Camino Real) to its intersection with the southerly boundary line of the city of San Mateo; then along said boundary line to U.S. Hwy 101 (Bayshore Freeway); then leaving said boundary line proceeding to the junction of Foster City Boulevard and Beach Park Road, then northerly and easterly along Beach Park Road to a point 1 mile south of State Hwy 92; then easterly along an imaginary line 1 mile southerly and paralleling State Hwy 92 to its intersection with State Hwy 17 (Nimitz Freeway); then continuing northeasterly along an imaginary line 1 mile southerly of and paralleling State Hwy 92 to its intersection with an imaginary line 1 mile easterly of and paralleling State Hwy 238; then northerly along said imaginary line 1 mile easterly of and paralleling State Hwy 238 to its intersection with "B" Street, Hayward; then easterly and northerly along "B" Street to Center Street; then northerly along Center Street to Castro Valley Boulevard; then westerly along Castro Valley Boulevard to Redwood Road; then northerly along Redwood Road to Somerset Avenue; then westerly along Somerset Avenue and 168th Street to Foothill Boulevard; then northwesterly along Foothill Boule-

vard to the southerly bolundary line of the city of Oakland; then easterly and northerly along the Oakland boundary line to its intersection with (except the following); (a) used household goods and personal effects not packed in accordance with the crated property requirements; (b) livestock; Jose-Los Gatos Road); northeasterly along South Bascom Avenue to Foxworthy Avenue; easterly along Foxworthy Avenue to Almaden Road;

sunshine act meetings

vard to the southerly bolundary line of the city of Oakland; then easterly and northerly along the Oakland boundary line to its intersection with the Alameda-Contra Costa County boundary line; then northwesterly along said county line to its intersection with Arlington Avenue (Berkeley); then northwesterly along Arlington Avenue to a point 1 mile northeasterly of San Pablo Avenue (State Hwy 123); then northwesterly along an imaginary line 1 mile easterly of and paralleling San Pablo Avenue to its intersection with County Road 20 (Contra Costa County); then westerly along County Road 20 to Broadway Avenue; then northerly along Broadway Avenue to San Pablo Avenue (State Hwy 123) to Rivers Street; then westeriy along Rivers Street to 11th Street; then northerly along 11th Street to Johns Avenue; then westerly along Johns Avenue to Collins Avenue; then northerly along Collins Avenue to Morton Avenue, then westerly along Morton Avenue to the Southern Pacific Co. right-of-way and continuing westeriy along the prolongation of Morton Avenue to the shoreline of San Pablo Bay; then southerly and westerly along the shoreline and waterfront of San Pablo Bay to Point San Pablo; then southerly along an imaginary line to the San Francisco waterfront at the foot of Market Street; then westerly along said waterfront and shoreline to the Pacific Ocean; then southerly along the shoreline of the Pacific Ocean to point of beginning. (Hearing: Date, time, and place not yet fixed. Requests for procedural information should be addressed to California Public Utilities Commission, California State Building, 350 McAllister Street, San Francisco, CA 94102, and should not be directed to the Interstate Commerce Commission.)

NOTE.—The purpose of this publication is to amend applicant's present authority by the removal of the restriction. Intrastate, interstate and foreign commerce authority sought.

California Docket 58307, filed August 22, 1978. Applicant: T & K EXPRESSWAYS & MOVING CO., 2537 Hartley Road, Vacaville, CA 95688. Representative: Daniel W. Baker, 100 Pine Street, Suite 2550, San Francisco, CA 94111. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: transportation of *general commodities* (except the following); (a) used household goods and personal effects not packed in accordance with the crated property requirements; (b) livestock; (c) liquids, compressed gases, commodities in semi-plastic form and commodities in suspension in liquid in bulk, in tank trucks, tank trailers, tank semitrailers or a combination of such highway vehicles; (d) commodities when transported in bulk in dump trucks or in hopper-type trucks; (e) commodities when transported in motor vehicles equipped with mechanical mixing in transit; (f) logs; (g) fresh fruits and vegetables; (h) articles of extraordinary value; (i) automobiles, trucks, busses, and trailer coaches and campers. Between points in the San Francisco Territory, as described in note A, on the one hand, and, on the other, hand, points on within 10 miles of points on the following routes: (1) Points on Interstate Hwy 80, between Oakland and Sacramento, inclusive; (2) points on State Hwy 4, between Interstate Hwy 80 and Stockton, inclusive; (3) points on State Hwy 99, between Chico and Sacramento, inclusive. In performing the service, applicant may make use of any and all streets, roads, highways and bridges necessary or convenient for the performance of such service.

SAN FRANCISCO TERRITORY

San Francisco Territory includes all the City of San Jose and that area embraced by the following boundary: Beginning at the point the San Francisco-San Mateo County Line meets the Pacific Ocean; thence easterly along said county line to a point 1 mile west of State Hwy 82; southerly along an imaginary line 1 mile west of and paralleling State Hwy 82 to its intersection with Southern Pacific Co. right-of-way at Arastradero Road; southeasterly along the Southern Pacific Co. right-of-way to Pollard Road, including industries served by the Southern Pacific Co. spur line extending approximately 2 miles southwest from Simla to permanente; easterly along Pollard Road to West Parr Avenue; easterly along West Parr Avenue to Capri Drive; southerly along Capri Drive to Division Street; easterly along Division Street to the Southern Pacific Co. right-of-way; southerly along the Southern Pacific right-of-way to the Campbell-Los-Gatos City Limits; easterly along said limits and the prolongation thereof to South Bascom Avenue (formerly San Jose-Los Gatos Road); northeasterly along South Bascom Avenue to Foxworthy Avenue; easterly along Foxworthy Avenue to Almaden Road; southerly along Almaden Road to Hillsdale Avenue; easterly along Hillsdale Avenue to State Hwy 82; northwesterly along State Hwy 82 to Tully Road; northeasterly along Tully Road and the prolongation thereof to White Road; northwesterly along White Road to McKee Road; southwesterly along McKee Road to Capitol Avenue; northwesterly along Capitol Avenue to State Hwy 238 (Oakland Road); northerly along State Hwy 238 to Warm Springs; northerly along State Hwy 238 (Mission Boulevard) via Mission San Jose and Niles to Hayward; northerly along Foothill Boulevard and MacArthur Boulevard to Seminary Avenue; easterly along Seminary Avenue to Mountain Boulevard; northerly along Mountain Boulevard to Warren Boulevard (State Hwy 13); northerly along Warren Boulevard to Broadway Terrace; westeriy along Broadway Terrace to College Avenue; northerly along College Avenue to Dwight Way; easterly along Dwight Way to the Berkeley-Oakland boundary line; northerly along said boundary line to the campus boundary of the University of California; westerly, northerly, and easterly along the campus boundary to Euclid Avenue; northerly along Euclid Avenue to Marin Avenue; westerly along Marin Avenue to Arlington Avenue; northerly along Arlington Avenue to San Pablo Avenue (State Hwy 123); northerly along San Pablo Avenue to and including the city of Richmond to Point Richmond; southerly along an imaginary line from Point Richmond to the San Francisco waterfront at the foot of Market Street; westerly along said waterfront and shoreline to the Pacific Ocean; southerly along the shoreline of the Pacific Ocean to point of beginning. Intrastate, Interstate and foreign commerce authority sought. Hearing: Date, time, and place not yet fixed. Requests for procedural information should be addressed to California Public Utilities Commission, California State Building, 350 McAllister Street, San Francisco, CA 94102, and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[3410-11]

Title 36—Parks, Forests, and Public Properties

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 214—GRANTS TO STATES FOR ESTABLISHING YOUTH CONSERVATION CORPS PROGRAMS

AGENCY: USDA, Forest Service.

ACTION: Final rule.

SUMMARY: The Forest Service and the Department of the Interior have adopted final regulations relating to grants to States for establishing youth conservation corps programs. After 5 years of program operation, changes in policies and procedures have necessitated the issuance of revised regulations. The revised rules will assure a closer alinement between Federal and State grant program characteristics and will update current procedures to reflect the policy and grants-in-aid requirements. The Department of the Interior will publish the same revision under title 43 of the Code of Federal Regulations, subpart A, part 26 which is published elsewhere in this issue.

EFFECTIVE DATE: These regulations become effective October 1, 1978.

FOR FURTHER INFORMATION, CONTACT:

Hollis Hardy, State Grant Officer, P.O. Box 2417, Washington, D.C. 20013, 202-447-7783.

NOTE.—The Department of Agriculture has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

An impact analysis indicates that there will be no economic or social effects except for an improvement in the quality of the program for the youth involved.

SUPPLEMENTARY INFORMATION: On October 5, 1977, a document was published in the FEDERAL REGISTER (36 CFR Part 214) proposing to revise the rules for Youth Conservation Corps grants to States to assure a closer alinement between Federal and State grant program characteristics and to update current procedures to reflect policy and grants-in-aid requirements. All comments submitted with respect to the proposed revised rules were given due consideration:

A. As a result of comments received, the following changes in the proposed rules are made in addition to language changes for clarification:

SECTION 214.2

1. The definition of subgrantee has been expanded to include the word "county" as suggested by the National Association of Counties.

2. Use of the words "program" and "project" throughout the regulations have been changed to be consistent with their definitions in § 214.2. In addition, the word "camp" has been changed to "project" throughout the regulations.

SECTION 214.3

1. The requirement in § 214.3(3)(c) required a group-living component has been clarified. Recommendations from several States that nonresidential projects be exempt from the group-living requirement is not consistent with the project characteristics of YCC as stated in this section.

SECTION 214.5

1. The wording in the first paragraph of § 214.5(a) has been revised to clarify the requirements for recruitment, as recommended by several program agents, and to clarify the principle that each project should have as near as possible an equivalent number of enrollee positions assigned to males and females.

2. Also, it states that enrollees must have attained the age of 15 by June 1 but not have attained the age of 19 by August 30 as suggested by the Delaware program agent.

3. As suggested by several States, the required workweek for enrollees and the method for calculating enrollee pay in § 214.5(e) has been revised to accommodate States and subgrantees which have established workweeks of less than 40 hours.

4. In § 214.5(f), a statement has been included that, to the maximum extent possible, the grantee should apply the same meal and lodging deduction as used by the Federal program, to standardize enrollee earnings.

5. Requirements for submission of budget revisions, in accordance with attachment K, A-102, are specified in § 214.5(n) when a reduction of 5 percent of enrollees occurs, when grant funds in excess of $5,000, or 5 percent, will not be utilized by the grantee, or when the State matching ratio is reduced.

6. Coverage in the grant of enrollees for accidential injury and tort claims, under State laws, is made mandatory in § 214.5(s), as provided for by FMC 74-4, attachment B, C. 4.

SECTION 214.6

The wording in §§ 214.6(c) and 214.7 has been revised to clarify the requirements for grant application as requested by several States. Only Part III—(Program Narrative Statement) must be included for each project.

SECTION 214.7

1. In accordance with direction from OMB, the grant application procedure for Part II—(Budget Data) has been changed. The standard object class categories printed on the form are to be used. This eliminates the supplemental budget sheet. Definitions of the object class categories are found in the YCC State Grant Procedures Handbook.

2. Project Profile, Part V of the application, has been eliminated. This information has been incorporated into the Program Narrative, Part III.

SECTION 214.8

The requirements for an interim financial status report and an interim performance report have been eliminated. The instructions for submitting enrollee statistical and work accomplishment data have been removed from this section and are placed in the YCC State Grant Procedures Handbook.

B. Certain other recommendations have been carefully considered but have not been accepted. The following suggestions were not adopted for the reasons given:

The recommendation that "adequate assurances should be required from the State to insure that counties and cities receive funds from this pot" is rejected. The YCC Act itself only provides for grants to States, who are then responsible for meeting the objectives of the program. It has proven possible in a number of States to meet the objectives of the YCC State grant program without using subgrantees.

A recommendation that the State recruiter's role be described in the regulations has not been accepted, since these responsibilities are established by a joint Federal-State cooperative agreement. This does not preclude States from including recruitment costs in grants.

SECTION 214.2

The suggestion that §214.2(10) be modified to include a third type of project which would be a residential-nonresidential combination is rejected. Such projects may be established but must be designated as either residential or nonresidential, whichever condition predominates.

SECTION 214.3

The many recommendations regarding the project characteristics covered in § 214.3(c) are rejected. The Secretaries' designated representatives have the authority to allow exceptions to these project characteristics.

SECTION 214.5

1. The recommendation that disabled persons be specifically included under § 214.5 is rejected. Under our present legislation and recruitment and selection policy, handicapped individuals do participate in the program. Every effort is made to insure that no discrimination exists in the program. This includes the handicapped.

2. Recommendations from several States concerning requirements in § 214.5(a) that "the grantee will assure that not more than 10 percent of the enrollees in a project have been YCC enrollees in previous years and that all returnees shall be designated as youth leaders" be modified because some applicants falsify their applications regarding previous participation are rejected. The project director has the authority and obligation to disqualify selected applicants who do not meet the eligibility requirements.

3. A recommendation that the requirement in § 214.5(a) that an equal number of males and females be selected for each project not be required of nonresidential projects since a larger number of males than females apply is rejected as being inconsistent with national YCC program policy. The objective is to have an equivalent number of females and males enrolled in individual projects as well as programwide.

4. Proposals that the provision in the § 214.5(a) requiring an increment of $1.50 per day for youth leaders be modified is rejected in the interest of a uniform pay plan for both Federal and State enrollees.

5. An objection by one State to the stipulation in § 214.5(e) establishing a weekly pay rate based on 30 hours times the current minimum wage rate as being contradictory to the Fair Labor Standards Act and labor contract with State employees is rejected. The Office of the Solicitor, USDI, and the Office of General Counsel, USDA, have advised that this is not contradictory to the Fair Labor Standards Act.

SECTION 214.7

Objections to the requirements of § 214.7(c) that a separate program narrative statement be submitted for each project as being unnecessary and requiring too much paperwork on the part of the program agent are rejected. Under the revised requirements for submitting grant applications, the program narrative statement is the only document now required for each project. This information is needed on a project-by-project basis for the following reasons:

1. It establishes that adequate preliminary planning of work projects has been accomplished by the camp and reviewed by the program agent,

2. It permits the Secretaries' designated representatives to evaluate each proposed project,

3. It provides the basis for the representatives to evaluate the project performance during the operating season,

4. It provides a means for determining when a budget revision is necessary.

SECTION 214.9

1. The recommendation that "the method or formula used to allocate funds to each State" be included in the regulations is rejected. The basis for present allocations is complex and has been covered in several letters sent to the States. The present policy is to prorate the grant share of an annual appropriation is excess of $32 million to all States based on eligible youth population.

2. A recommendation that geographic location be added as a criterion for awarding grants is not accepted. Section 214.9(b), which provides that "the quality of the proposed program in terms of meeting program characteristics and objectives" encompasses consideration of geographic location.

3. A recommendation was made that limits be set for the cost of an enrollee 8-week position as one of the criteria in § 214.9 for awarding grants. The suggestion was that the average national cost per enrollee for the State grant program be listed for both resident and nonresident programs with the provision that a State could deviate by up to 20 percent. Exceptions to the guide figures would require a justification statement by the State program agent. This proposal has to be rejected at this time as there was no opportunity for other States to consider and respond to it.

Accordingly, 36 CFR Part 214, is revised as set forth below:

PART 214—GRANTS TO STATES FOR ESTABLISHING YOUTH CONSERVATION CORPS PROGRAMS

Sec.
214.1 Introduction.
214.2 Definitions.
214.3 Program purpose and objectives.
214.4 Legislation.
214.5 Administrative requirements.
214.6 Request for grant.
214.7 Application format and instructions.
214.8 Program reporting requirements.
214.9 Consideration and criteria for awarding grants.

AUTHORITY: Sec. 4, 86 Stat. 1320, as amended, 88 Stat. 1067 (16 U.S.C. 1704).

§ 214.1 Introduction.

(a) The Youth Conservation Corps (YCC) is a program of summer employment for young men and women, aged 15 through 18, who work, earn, and learn together by doing projects which further the development and conservation of the natural resources of the United States. The Corps is open to youth of both sexes, and youth of all social, economic, and racial classifications who are permanent residents of the United States, its territories, possessions, trust territories, or commonwealths.

(b) The Youth Conservation Corps Act of 1970 (Pub. L. 91-378) provided for a 3-year pilot program to be carried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Pub. L. 92-597 amended the 1970 Act to include a pilot program (beginning in fiscal year 1974) of grants to States to assist them in meeting the cost of Youth Conservation Corps projects on non-Federal public lands and waters within the States. Pub. L. 93-408 made the Youth Conservation Corps program permanent.

§ 214.2 Definitions.

(a) Terms used in these regulations are defined as follows:

(1) *Act.* The Youth Conservation Corps Act of 1970. Pub. L. 91-378, as amended.

(2) *Secretaries.* The Secretaries of Agriculture and the Interior, or their designated representatives, who jointly administer the grant program. Within the Department of Agriculture, the YCC program is administered by the Forest Service; within the Department of the Interior, it is administered by the Office of Youth Programs.

(3) *States.* Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(4) *Grant.* Money or property provided in lieu of money, paid or furnished by the Secretaries pursuant to the Act to a State to carry out a YCC program on non-Federal public lands and waters. The amount of any grant shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 per centum of the cost (as determined by the Secretaries) of said project.

(5) *Grantee.* Any State which is a recipient of a Federal grant for the operation of a YCC program.

(6) *Subgrantee.* Any public organization, municipality, county or agency which administers non-Federal public lands and waters which successfully applied through a State for the operation of a Youth Conservation Corps project within that State.

(7) *Contractor.* Any public agency or organization or any private nonprofit agency or organization which has been

in existence for at least 5 years which operates a YCC project for a grantee or subgrantee.

(8) *Program agent.* Individual desig-

(3) Develop an understanding and appreciation of the Nation's environment and heritage in participating youth.

ies, possessions, or the Trust Territory of the Pacific Islands, (iii) be employed without regard to the personnel laws, rules, and regulations applicable to full-time employees of the applicant, (iv) be employed for a

(d) Operation of a project or session will be for a minimum of 26 consecutive calendar days. Projects during noncummer periods may be authorized

ies by March 31 of the following operating year.

(l) Allowable costs under the grant program are defined in FMC 74-4 and

standards, or conditions, the Secretaries may jointly suspend the grant, in whole or in part, pending corrective action. Subsequent to or during any

V 43 / 178 SE 13 78

in existence for at least 5 years which operates a YCC project for a grantee or subgrantee.

(8) *Program agent.* Individual designated in writing by the Governor to have program responsibility for all aspects of YCC operations in that State except for those projects conducted under Federal auspices.

(9) *State grant program.* That part of the YCC program carried out on non-Federal public lands and waters by States receiving YCC grants-in-aid.

(10) *Project.* The operating unit of the State YCC grant program. A project will be designated as either residential or nonresidential.

(i) *Residential project.* One in which youth reside either 7 or 5 days per week at a site on or in proximity to the public lands where they conduct their work-learning program.

(ii) *Nonresidential project.* One in which youth reside at home and daily commute to the public lands to conduct their work-learning program.

(11) *Operating year.* January 1 through December 31.

(12) *Non-Federal public lands and waters.* Any lands or waters within the territorial limits of a State owned either in fee simple by a State or political subdivision thereof or over which a State or political subdivision thereof has, as determined by the Secretaries, sufficient long-term jurisdiction so that improvements made as the result of a grant will accrue primarily to the benefit of the public as a whole. Federally owned public lands and waters administered by a State or political subdivision thereof under agreement with a department or agency of the Federal Government are eligible under such definition if the Secretaries determine that the State or political subdivision thereof is entitled to or is likely to retain administrative responsibility for an extended period of time sufficient to justify classification as non-Federal public lands or waters.

§ 214.3 Program purpose and objectives.

(a) The purpose of the Act is to further the development and maintenance of the natural resources of the United States by American youth and in so doing prepare them for the ultimate responsibility of maintaining and managing these resources for the American people. The Departments of Agriculture and the Interior have stressed the following three equally important objectives of the Youth Conservation Corps as reflected in the law:

(1) Accomplish needed conservation work on public lands.

(2) Provide gainful employment for 15- through 18-year-old males and females from all social, economic, and racial backgrounds.

(3) Develop an understanding and appreciation of the Nation's environment and heritage in participating youth.

(b) These objectives will be accomplished in a manner that will provide the youth with an opportunity to acquire increased self-dignity and self-discipline, better work and relate with peers and supervisors, and build lasting cultural bridges between youth from various social, ethnic, racial, and economic backgrounds.

(c) Each YCC project will have, to the maximum extent possible as determined by the Secretaries' representatives, the following characteristics:

(1) A properly balanced and integrated environmental work-learning program in which environmental knowledge and awareness derives principally from meaningful work activities on public lands.

(2) A mixture of youth of both sexes from various social, economic, ethnic, and racial backgrounds which is representative of the youth residing within the recruiting area.

(3) A group-living component, both in residential and nonresidential programs, wherein enrollees have an opportunity to relate to each other and to staff during nonworking hours in activities which promote social interaction and group learning (e.g., evening cookouts, overnight or weekend camping).

(4) An enrollment of sufficient size (not less than 10 enrollees) that will permit social interaction and group learning. The program encourages projects of a size of 20 to 50 enrollees as the most desirable size.

§ 214.4 Legislation.

State programs must meet all of the requirements of section 4 of the Act. Section 4 of the Act which applies to the grant program reads as follows:

SEC. 4 (a). The Secretary of the Interior and the Secretary of Agriculture shall jointly establish a program under which grants shall be made to States to assist them in meeting the cost of projects for the employment of young men and women to develop, preserve, and maintain non-Federal public lands and waters within the States. For purposes of this section, the term "States" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa.

(b) (1) No grant may be made under this section unless an application therefor has been submitted to, and approved by, the Secretary of the Interior and the Secretary of Agriculture. Such application shall be in such form, and submitted in such manner, as the Secretaries shall jointly by regulation prescribe, and shall contain—

(A) Assurances satisfactory to the Secretaries that individuals employed under the project for which the application is submitted shall: (i) Have attained the age of 15 but not attained the age of 19, (ii) be permanent residents of the United States or its territories, possessions, or the Trust Territory of the Pacific Islands, (iii) be employed without regard to the personnel laws, rules, and regulations applicable to full-time employees of the applicant, (iv) be employed for a period of not more than 90 days in any calendar year, and (v) be employed without regard to their sex or social, economic, or racial classification; and

(B) Such other information as the Secretaries may jointly by regulations prescribe.

(2) The Secretaries may approve applications which they determine (A) meet the requirements of pargraph (1), and (B) are for projects which will further the development, preservation, or maintenance of non-Federal public lands or waters within the jurisdiction of the applicant.

(c) (1) The amount of any grant under this section shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 per centum of the cost (as determined by the Secretaries) of such project.

(2) Payments under grants under this section may be made in advance or by way of reimbursement and at such intervals and on such conditions as the Secretaries find necessary.

(d) Thirty per centum of the sum appropriated under section 6 for any fiscal year shall be made available for grants under this section for such fiscal year.

§ 214.5 Administrative requirements.

The following administrative requirements must be met:

(a) Recruitment and selection will be conducted in accordance with a statewide plan designed to assure:

(1) An equal opportunity for both sexes, for all urban and rural youth regardless of social, economic, ethnic, or racial background, with special outreach efforts toward minority, disadvantaged, nonpublic school youth, and youth having left school before graduation;

(2) That selections will be made on a random basis, without consideration of race, creed, religion, or national origin. Each project should be assigned as near as possible an equal number of slots for males and females;

(3) That enrollees have attained age 15 by June 1 but not age 19 by August 30;

(4) That not more than 10 percent of the enrollees in a project have been YCC enrollees in previous years and all returnees be designated as youth leaders and paid $1.50 per day in addition to their hourly rate of pay.

(b) To the maximum extent practicable, enrollees should be selected from an area within 1 day's surface travel from their home to a residential YCC project.

(c) Capital outlays for facilities should be kept at a minimum. No grant is to be made for construction of residential facilities other than to provide temporary facilities and their necessary basic infrastructure, and necessary renovation or modification of existing facilities.

(d) Operation of a project or session will be for a minimum of 26 consecutive calendar days. Projects during nonsummer periods may be authorized by the Secretaries when it can clearly be demonstrated that enrollment will not interfere with the established educational systems.

(e) The enrollee is an employee of the grantee or subgrantee. Depending on grantee's or subgrantee's work week, grantees will insure that enrollees are engaged in up to 40 hours of work-learning activities each week, 25 percent of which will be in environmental awareness.

(f) To arrive at the enrollee weekly pay rate, the Federal or State minimum hourly wage (whichever is higher) should be multiplied by 30 hours per week, or 75 percent of the number of hours in the grantee or subgrantee established work week, if less than 40 hours. To the maximum extent possible, the grantee should apply the same meal and lodging deduction as used by the Federal program.

(g) The Federal Government will cost-share as part of the grant enrollee pay based on up to 30 hours per week; any cost based on enrollee compensation for more than 30 hours per week will be assumed by the grantee or subgrantee and will not be part of the grant.

(h) Grantees must provide for an effective accident control, health, and safety program. As a minimum, grantees shall follow U.S. Department of Labor Bulletin No. 101, "A Guide to Child Labor Provisions of the Fair Labor Standards Act."

(i) Grantees will have a financial management system which will provide the information called for in attachment G of the Office of Management and Budget (OMB) Circular A-102 (formerly FMC 74-7).

(j) "Request for Advance or Reimbursement," as outlined in OMB Circular A-102, attachment H, item 4(a), will be used to obtain an advance to start and/or maintain the program. It can also be used to obtain a reimbursement during or at the end of a project. An advance, not to exceed 1 month's needs, may be made after approval of the grant application.

(k) Grantees will prepare a "Financial Status Report" required by OMB Circular A-102, attachment H, item 3(a). This report will be prepared on a cash basis. Instructions and forms will be supplied each grantee at the time of grant award. Grantees shall require similar reports from all subgrantees and contractors to facilitate their own reporting to the grantor agencies. The financial status report will be prepared as of December 31 of each operating year. This report will be forwarded in time to reach the Secretaries by March 31 of the following operating year.

(l) Allowable costs under the grant program are defined in FMC 74-4 and OMB Circular A-102.

(m) Records retention and custodial requirements for records are prescribed by attachment C to OMB Circular A-102.

(n) A budget revision is required in advance when the scope of the grant is to be changed through (1) addition or elimination of a project, (2) reduction in the State's grant program of 5 percent or more of enrollees, and/or (3) determination that the grantee will not utilize Federal funds in an amount in excess of $5,000, or 5 percent of the Federal grant, whichever is greater. A budget revision must also be submitted when the State's matching ratio is reduced. No budget revision may be submitted later than March 31 following the end of the operating year. Procedures in attachment K of OMB Circular A-102 will be followed.

(o) Grantees shall comply with the provisions of attachments N and O of OMB Circular A-102 in regard to nonexpendable personal property and procurement standards.

(p) The Secretaries or their designees shall periodically review the conduct of the program of the State.

(q) Grantees will supervise those projects in the State being administered by subgrantees and contractors. Subgrantees and contractors will be required to operate in accordance with the procedures outlined in these regulations and the grant agreement with the State. Periodic inspection of subgrantee projects will be made by the grantee under the direction of the program agent or his designee. Grantees or subgrantees may contract with any public agency or organization or any private nonprofit agency or organization which has been in existence for at least 5 years.

(r) Grantees will meet the financial audit requirements of attachment G to OMB Circular A-102 and will require the same of subgrantees. Copies of audits will be made available to the Secretaries upon request.

(s) Grantees shall provide accidental injury compensation and tort claims coverage under State laws for its enrollees. Enrollees shall be employed without regard to State personnel laws, rules, and regulations applicable to full-time employees. It is not intended that State enrollees be covered for retirement, unemployment compensation, health and life insurance purposes, or that they earn or be granted leave-with-pay or sick leave; such charges shall not be considered a qualifying expense for Federal cost-share purposes.

(t) If the grantee fails to comply with the grant award stipulations, standards, or conditions, the Secretaries may jointly suspend the grant, in whole or in part, pending corrective action. Subsequent to or during any period of suspension of the grant, the Federal Government shall not be obliged to reimburse the grantee for any incurrence of obligations for suspended projects other than direct pay of enrollees and then only for a period of time which both the Secretaries shall determine to be reasonable. In addition, the Secretaries may jointly terminate the grant, in whole or in part. Termination shall be effected by notice of termination. Upon receipt of a notice of termination, the grantee shall:

(1) Discontinue further commitments of grant funds for the terminated project(s).

(2) Cancel all subgrants or contracts, where possible, scheduled for payment with funds budgeted for the terminated project(s).

(3) Within 90 days after receipt of the notice of termination for the entire grant, supply either of the Secretaries with a fincncial status report, along with a refund check for any unused portion of funds advanced, or a request for reimbursement for allowable expenditures incurred in the grant program.

§ 214.6 Request for grant.

(a) Of the amount available for Youth Conservation Corps projects, 30 percent will be allocated for State projects. All States will be given an opportunity to participate in the program. Allocated funds not needed by a State will be reallocated, based on the merit of proposals submitted in accordance with paragraph (c) of this section.

(b) Pursuant to section 4(c)(1) of Pub. L. 93-408, States may receive grants up to but not to exceed 80 percent of the cost of funding any project from the Federal Government. The combined Federal/State costs of individual projects and other program expenses as established in the State grant application determine the Federal-State cost-sharing ratio. Matching State costs can consist of either direct expenditures or services of an inkind nature.

(c) Application for Federal assistance (standard form 424) will be used by applicants in applying for grants under this program. Application forms will be supplied to program agents. Only a program agent may submit an application. A single grant application must be submitted for the entire summer program within each State. A separate application must be used for nonsummer projects. A nonsummer project is defined as one which extends beyond September 30, or begins prior to May 1.

(d) The Secretaries have designated individuals for each State who will jointly represent them. Grant applica-

(3) Project location (nearest city or town and county).

printed and must be included by the grantee in the grant application:

The grantee agrees to administer tests and

WEDNESDAY, SEPTEMBER 13, 1978
PART III

V 43 / 178 SEP 13 78

(d) The Secretaries have designated individuals for each State who will jointly represent them. Grant applications (original and two copies) must be submitted to the designated representatives of either Secretary. January 1 has been established as the deadline date for acceptance of applications for each operating year. Names and addresses of designated representatives will be furnished to each State. The Secretaries' representatives must jointly approve grant proposals. Approval or disapproval of proposals will be documented by a formal letter to the program agent. The Secretaries' representatives will also be available for technical assistance and will monitor the program.

§ 214.7 Application format and instructions.

Grant application must be made using the Office of Management and Budget approval form (SF-424) entitled "Federal Assistance." Specific instructions and requirements which must be followed are included in the Secretaries' State Grant Procudures Handbook. General instructions for completing the form by part numbers are:

(a) Part I—(SF-424 Cover Sheet, Sections I and II) shall be completed.

(b) Part II—(Budget Data). See YCC State Grant Procedures Handbook for definitions of cost categories and for budget narrative instructions.

(c) Part III—(Program Narrative Statement). Complete a separate description of each project, which will include the following information (items 13, 14, 15, and 16 may be consolidated, if common to all projects):

(1) Project number.

(2) Project name and address.

(3) Project location (nearest city or town and county).

(4) Name of grantee, subgrantee and/or contractor.

(5) Landownership class(es) benefiting from the program—State, county, municipal, or other non-Federal public lands (identify).

(6) Number of male and female youth planned for project, including youth leaders.

(7) Type of project (7-day residential; 5-day residential; nonresidential; other).

(8) Length of session(s) (e.g., number of weeks) and proposed beginning and ending dates per session.

(9) Cost of project.

(10) Description of living conditions, if residentail project (types of facilities, age, condition, tents, cabins, dormitories, food services).

(11) Project staff (number and position titles).

(12) Work-learning program. (Describe major projects, planned units of production if applicable, and any constraints that are anticipated. Explain how environmental learning will be integrated into projects.)

(13) Complete calculation for daily rate of enrollee pay, including deduction for food and lodging.

(14) Description of health and safety program.

(15) Description of enrollee recruiting and selection system. (The statewide recruiting and selection plan may be substituted.)

(16) Description of staff recruiting and selection system, including affirmative action measures to be taken.

(d) Part IV—(Assurances) is preprinted within attachment M, exhibit M-5, OMB Circular A-102, and is to be included as part of the application. The following assurance is not preprinted and must be included by the grantee in the grant application:

The grantee agrees to administer tests and questionnaires; conduct interviews; submit enrollee statistical and work accomplishment data; and otherwise assist the Federal Government in collecting information.

§ 214.8 Program reporting requirements.

(a) Monitoring and reporting of program performance will be in accordance with attachment I of OMB Circular A-102.

(b) The reporting and/or record-keeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

§ 214.9 Consideration and criteria for awarding grants.

The decision by both of the Secretaries' representatives on grants on individual States will consider the following:

(a) The amount of grant funds allocated to the State.

(b) The quality of the proposed program in terms of meeting program characteristics and objectives.

(c) The overall cost per enrollee 8-week position.

(d) Actual prior performance of the State in administering YCC projects.

(e) The performance of the grantee in meeting the conditions of the grant and the requirements of OMB Circular A-102 and FMC 74-4.

DAVID G. UNGER,
Deputy Assistant Secretary for Conservation, Research, and Education.

enrollees in a project have been YCC enrollees in previous years and that all returnees shall be designated as youth leaders" be modified because some applications

for present allocations is complex and has been covered in several letters sent to the States. The present policy is to prorate the grant share of an annual

ried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Pub. L. 93-597 amended the 1970

Title 43—Public Lands: Interior

SUBTITLE A—OFFICE OF THE SECRETARY OF THE INTERIOR

PART 26—GRANTS TO STATES FOR ESTABLISHING YOUTH CONSERVATION CORPS PROGRAMS

AGENCY: Office of Youth Programs, Interior.

ACTION: Final rule.

SUMMARY: The Department of the Interior and the Department of Agriculture have adopted final regulations relating to grants to States for establishing Youth Conservation Corps programs. After 5 years of program operation, changes in policies and procedures have necessitated the issuance of revised regulations. The revised rules will assure closer alinement between the Federal and State grant program characteristics and will update current procedures to reflect policy and grants-in-aid requirements. The Department of Agriculture has published similar regulations elsewhere in this issue.

EFFECTIVE DATE: These regulations become effective October 1, 1978.

FOR FURTHER INFORMATION, CONTACT:

Vivian Bower, 202-343-8086.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

SUPPLEMENTARY INFORMATION: On October 5, 1977, a document was published in the FEDERAL REGISTER (43 CFR Part 26) proposing to revise the rules for Youth Conservation Corps grants to States to assure a closer alinement between Federal and State grants program characteristics and to update current procedures to reflect policy and grants-in-aid requirements. All comments submitted with respect to the proposed revised rules were given due consideration:

A. As a result of comments received, the following changes in the proposed rules are made in addition to language changes for clarification:

SECTION 26.2

1. The definition of subgrantee has been expanded to include the word "county" as suggested by the National Association of Counties.

2. Use of the words "program" and "project" throughout the regulations have been changed to be consistent with their definitions in § 26.2. In addition, the word "camp" has been changed to "project" throughout the regulations.

SECTION 26.3

1. The requirement in § 26.3(c)(3) requiring a group-living component has been clarified. Recommendations from several States that nonresidential projects be exempt from the group-living requirement is not consistent with the project characteristics of YCC as stated in this section.

SECTION 26.5

1. The wording in the first paragraph of § 26.5(a) has been revised to clarify the requirements for recruitment, as recommended by several program agents, and to clarify the principles that each project should have as near as possible an equivalent number of enrollee positions assigned to males and females.

2. Also, it states that enrollees must have attained the age of 15 by June 1 but not have attained the age of 19 by August 30 as suggested by the Delaware program agent.

3. As suggested by several States, the required workweek for enrollees and the method for calculating enrollee pay in § 26.5(e) has been revised to accommodate States and subgrantees which have established workweeks of less than 40 hours.

4. § 26.5(f), a statement has been included that to the maximum extent possible, the grantee should apply the same meal and lodging deduction as used by the Federal program, to standardize enrollee earnings.

5. Requirements for submission of budget revisions, in accordance with attachment K, A-102, are specified in § 26.5(n) when a reduction of 5 percent of enrollees occurs, when grant funds in excess of $5,000 or 5 percent will not be utilized by the grantee, or when the State matching ratio is reduced.

6. Coverage in the grant of enrollees for accidental injury and tort claims, under State laws, is made mandatory in § 26.5(s), as provided for by FMC 74-4, attachment B, C. 4.

SECTION 26.6

The wording in § 26.6(c) and 26.7 has been revised to clarify the requirements for grant application as requested by several States. Only Part III—(Program Narrative Statement) must be included for each project.

SECTION 26.7

1. In accordance with direction from OMB, the grant application procedure for Part II—(Budget Data) has been changed. The standard object class categories printed on the form are to be used. This eliminates the supplemental budget sheet. Definitions of the object class categories are found in the YCC State Grant Procedures Handbook.

2. Project Profile, Part V of the application, has been eliminated. This information has been incorporated into the Program Narrative, Part III.

SECTION 26.8

The requirements for an interim financial status report and an interim performance report have been eliminated. The instructions for submitting enrollee statistical and work accomplishment data have been removed from this section and are placed in the YCC State Grant Procedures Handbook.

B. Certain other recommendations have been carefully considered but have not been accepted. The following suggestions were not adopted for the reasons given:

The recommendation that "adequate assurances should be required from the State to insure that counties and cities receive funds from this pot" is rejected. The YCC Act itself only provides for grants to States, who are then responsible for meeting the objectives of the program. It has proven possible in a number of States to meet the objectives of the YCC State grant program without using subgrantees.

A recommendation that the State recruiter's role be described in the regulations has not been accepted, since these responsibilities are established by a joint Federal-State cooperative agreement. This does not preclude States from including recruitment costs in grants.

SECTION 26.2

The suggestion that § 26.2(10) be modified to include a third type of project which would be a residential-nonresidential combination is rejected. Such projects may be established but must be disignated as either residential or nonresidential, whichever condition predominates.

SECTION 26.3

The many recommendations regarding the project characteristics covered in § 26.3(c) are rejected. The Secretaries' designated representatives have the authority to allow exceptions to these project characteristics.

SECTION 26.5

1. The recommendation that disabled persons be specifically included under § 26.5 is rejected. Under our present legislation, recruitment and selection policy, handicapped individuals do participate in the program. Every effort is made to insure that no discrimination exists in the program. This includes the handicapped.

2. Recommendations from several States concerning requirements in § 26.5(a) that "the grantee will assure that not more than 10 percent of the enrollees in a project have been YCC enrollees in previous years and that all returnees shall be designated as youth leaders" be modified because some applicants falsify their applications regarding previous participation are rejected. The Project Director has the authority and obligation to disqualify selected applicants who do not meet the eligibility requirements.

3. A recommendation that the requirement in § 26.5(a) that an equal number of males and females be selected for each project not be required of nonresidential projects since a larger number of males than females apply is rejected as being inconsistent with National YCC program policy. The objective is to have an equivalent number of females and males enrolled in individual projects as well as programwide.

4. Proposals that the provision in the § 26.5(a) requiring an increment of $1.50 per day for youth leaders be modified is rejected in the interest of a uniform pay plan for both Federal and State enrollees.

5. An objection by one State to the stipulation in § 26.5(e) establishing a weekly pay rate based on 30 hours times the current minimum wage rate as being contradictory to the Fair Labor Standards Act and labor contract with State employees is rejected. The Office of the Solicitor, USDI, and the Office of General Counsel, USDA, have advised that this is not contradictory to the Fair Labor Standards Act.

SECTION 26.7

Objections to the requirements of § 26.7(c) that a separate program narrative statement be submitted for each project as being unnecessary and requiring too much paperwork on the part of the program agent are rejected. Under the revised requirements for submitting grant applications, the program narrative statement is the only document now required for each project. This information is needed on a project-by-project basis for the following reasons:

1. It establishes that adequate preliminary planning of work projects has been accomplished by the camp and reviewed by the Program Agent.

2. It permits the Secretaries' designated representatives to evaluate each proposed project.

3. It provides the basis for the representatives to evaluate the project performance during the operating season.

4. It provides a means for determining when a budget revision is necessary.

SECTION 26.9

1. The recommendation that "the method or formula used to allocate funds to each State" be included in the regulations is rejected. The basis for present allocations is complex and has been covered in several letters sent to the States. The present policy is to prorate the grant share of an annual appropriation in excess of $32,000,000 to all States based on eligible youth population.

2. A recommendation that geographic location be added as a criterion for awarding grants is not accepted. Section 26.9(b), which provides that "the quality of the proposed program in terms of meeting program characteristics and objectives" encompasses consideration of geographic location.

3. A recommendation was made that limits be set for the cost of an enrollee 8-week position as one of the criteria in § 26.9 for awarding grants. The suggestion was that the average National cost per enrollee for the State grant program be listed for both resident and nonresident programs with the provision that a State could deviate by up to 20 percent. Exceptions to the guide figures would require a justification statement by the State Program Agent. This proposal has to be rejected at this time as there was no opportunity for other States to consider and respond to it.

AUTHORITY: Sec. 4, 86 Stat. 1320, as amended, 88 Stat. 1067 (16 U.S.C. 1704)

§ 26.1 Introduction.

(a) The Youth Conservation Corps (YCC) is a program of summer employment for young men and women, aged 15 through 18, who work, earn, and learn together by doing projects which further the development and conservation of the natural resources of the United States. The corps is open to youth of both sexes, and youth of all social, economic, and racial classifications who are permanent residents of the United States, its territories, possessions, trust territories or commonwealths.

(b) The Youth Conservation Corps Act of 1970 (Pub. L. 91-378) provided for a 3-year pilot program to be carried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Pub. L. 92-597 amended the 1970 Act to include a pilot program (beginning in fiscal year 1974) of grants to States to assist them in meeting the cost of Youth Conservation Corps projects on non-Federal public lands and waters within the States. Pub. L. 93-408 made the Youth Conservation Corps program permanent.

§ 26.2 Definitions.

(a) Terms used in these Regulations are defined as follows:

(1) *Act.* The Youth Conservation Corps Act of 1970. Pub. L. 91-378, as amended.

(2) *Secretaries.* The Secretaries of Agriculture and the Interior, or their designated representatives, who jointly administer the grant program. Within the Department of Agriculture, the YCC program is administered by the Forest Service; within the Department of the Interior it is administered by the Office of Youth Programs.

(3) *States.* Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(4) *Grant.* Money or property provided in lieu of money, paid or furnished by the Secretaries pursuant to the Act to a State to carry out a YCC program on non-Federal public lands and waters. The amount of any grant shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 per centum of the cost (as determined by the Secretaries) of said project.

(5) *Grantee.* Any State which is a recipient of a Federal grant for the operation of a YCC program.

(6) *Subgrantee.* Any public organization, municipality, county, or agency which administers non-Federal public lands and waters which successfully applied through a State for the operation of a Youth Conservation Corps project within that State.

(7) *Contractor.* Any public agency or organization or any private nonprofit agency or organization which has been in existence for at least 5 years which operates a YCC project for a grantee or subgrantee.

(8) *Program agent.* Individual designated in writing by the Governor to have program responsibility for all aspects of YCC operations in that State except for those projects conducted under Federal auspices.

(9) *State grant program.* That part of the YCC program carried out on

non-Federal public lands and waters by States receiving YCC grants-in-aid.

(10) *Project.* The operating unit of the State YCC grant program. A project

from various social, ethnic, racial and economic backgrounds.

(c) Each YCC project will have, to the maximum extent possible as deter-

(2) The Secretaries may approve applications which they determine (A) meet the requirements of paragraph (1), and (B) are for projects which will further the develop-

on grantee's or subgrantee's workweek, grantees will insure that enrollees are engaged in up to 40 hours of work-learning activities each week, 25

(n) A budget revision is required in advance when the scope of the grant is to be changed through (1) addition or elimination of a project, (2) reduction in the State's grant program of 5 per-

enrollees and then only for a period of time which both the Secretaries shall determine to be reasonable. In addition, the Secretaries may jointly terminate the grant, in whole or in part.

non-Federal public lands and waters by States receiving YCC grants-in-aid.

(10) *Project.* The operating unit of the State YCC grant program. A project will be designated as either residential or nonresidential.

(i) *Residential project.* One in which youth reside either 7 or 5 days per week at a site on or in proximity to the public lands where they conduct their work-learning program.

(ii) *Nonresidential project.* One in which youth reside at home and daily commute to the public lands to conduct their work-learning program.

(11) *Operating year.* January 1 through December 31.

(12) *Non-Federal public lands and waters.* Any lands or waters within the territorial limits of a State owned either in fee simple by a State or political subdivision thereof or over which a State or political subdivision thereof has, as determined by the Secretaries, sufficient long-term jurisdiction so that improvements made as the result of a grant will accrue primarily to the benefit of the public as a whole. Federally owned public lands and waters administered by a State or political subdivision thereof under agreement with a Department or Agency of the Federal Government are eligible under such definition if the Secretaries determine that the State or political subdivision thereof is entitled to or is likely to retain administrative responsibility for an extended period of time sufficient to justify classification as non-Federal public lands or waters.

26.3 Program purpose and objectives.

(a) The purpose of the Act is to further the development and maintenance of the natural resources of the United States by American youth and in so doing prepare them for the ultimate responsibility of maintaining and managing these resources for the American people. The Departments of Agriculture and the Interior have stressed the following three equally important objectives of the Youth Conservation Corps as reflected in the law:

(1) Accomplish needed conservation work on public lands.

(2) Provide gainful employment for 15- through 18-year-old males and females from all social, economic, and racial backgrounds.

(3) Develop an understanding and appreciation of the Nation's environment and heritage in participating youth.

(b) These objectives will be accomplished in a manner that will provide the youth with an opportunity to acquire increased self-dignity and self-discipline, better work and relate with peers and supervisors, and build lasting cultural bridges between youth from various social, ethnic, racial and economic backgrounds.

(c) Each YCC project will have, to the maximum extent possible as determined by the Secretaries' representatives, the following characteristics:

(1) A properly balanced and integrated environmental work-learning program in which environmental knowledge and awareness derives principally from meaningful work activities on public lands.

(2) A mixture of youth of both sexes from various social, economic, ethnic, and racial backgrounds which is representative of the youth residing within the recruiting area.

(3) A group-living component, both in residential and nonresidential programs, wherein enrollees have an opportunity to relate to each other and to staff during nonworking hours in activities which promote social interaction and group learning (e.g., evening cookouts, overnight or weekend camping).

(4) An enrollment of sufficient size (not less than 10 enrollees) that will permit social interaction and group learning. The program encourages projects of a size of 20 to 50 enrollees as the most desirable size.

§ 26.4 Legislation.

State programs must meet all of the requirements of section 4 of the act. Section 4 of the act which applies to the grant program reads as follows:

Sec. 4(a). The Secretary of the Interior and the Secretary of Agriculture shall jointly establish a program under which grants shall be made to States to assist them in meeting the cost of projects for the employment of young men and women to develop, preserve, and maintain non-Federal public lands and waters within the States. For purposes of this section, the term "States" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa.

(b)(1) No grant may be made under this section unless an application therefor has been submitted to, and approved by, the Secretary of the Interior and the Secretary of Agriculture. Such application shall be in such form, and submitted in such manner, as the Secretaries shall jointly by regulation prescribe, and shall contain—

(A) Assurances satisfactory to the Secretaries that individuals employed under the project for which the application is submitted shall: (i) Have attained the age of 15 but not attained the age of 19, (ii) be permanent residents of the United States or its territories, possessions, or the Trust Territory of the Pacific Islands, (iii) be employed without regard to the personnel laws, rules, and regulations applicable to full-time employees of the applicant, (iv) be employed for a period of not more than 90 days in any calendar year, and (v) be employed without regard to their sex or social, economic, or racial classification; and

(B) Such other information as the Secretaries may jointly by regulation prescribe.

(2) The Secretaries may approve applications which they determine (A) meet the requirements of paragraph (1), and (B) are for projects which will further the development, preservation, or maintenance of non-Federal public lands or waters within the jurisdiction of the applicant.

(c)(1) The amount of any grant under this section shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 per centum of the cost (as determined by the Secretaries) of such project.

(2) Payments under grants under this section may be made in advance or by way of reimbursement and at such intervals and on such conditions as the Secretaries find necessary.

(d) Thirty per centum of the sum appropriated under section 6 for any fiscal year shall be made available for grants under this section for such fiscal year.

§ 26.5 Administrative requirements.

The following administrative requirements must be met:

(a) Recruitment and selection will be conducted in accordance with a Statewide plan designed to assure:

(1) An equal opportunity for both sexes, for all urban and rural youth regardless of social, economic, ethnic or racial background, with special outreach efforts toward minority, disadvantaged, non-public school youth, and youth having left school before graduation;

(2) That selections will be made on a random basis, without consideration of race, creed, religion, or national origin. Each project should be assigned as near as possible an equal number of slots for males and females;

(3) That enrollees have attained age 15 by June 1 but not age 19 by August 30;

(4) That not more than 10 percent of the enrollees in a project have been YCC enrollees in previous years and all returnees be designated as youth leaders and paid $1.50 per day in addition to their hourly rate of pay.

(b) To the maximum extent practicable, enrollees should be selected from an area within 1 day's surface travel from their home to a residential YCC project.

(c) Capital outlays for facilities should be kept at a minimum. No grant is to be made for construction of residential facilities other than to provide temporary facilities and their necessary basic infrastructure, and necessary renovation or modification of existing facilities.

(d) Operation of a project or session will be for a minimum of 26 consecutive calendar days. Projects during nonsummer periods may be authorized by the Secretaries when it can clearly be demonstrated that enrollment will not interfere with the established educational systems.

(e) The enrollee is an employee of the grantee or subgrantee. Depending on grantee's or subgrantee's work-week, grantees will insure that enrollees are engaged in up to 40 hours of work-learning activities each week, 25 percent of which will be in environmental awareness.

(f) To arrive at the enrollee weekly pay rate, the Federal or State minimum hourly wage (whichever is higher) should be multiplied by 30 hours per week, or 75 percent of the number of hours in the grantee or subgrantee established work-week, if less than 40 hours. To the maximum extent possible, the grantee should apply the same meal and lodging deduction as used by the Federal program.

(g) The Federal Government will cost-share as part of the grant enrollee pay based on up to 30 hours per week; any cost based on enrollee compensation for more than 30 hours per week will be assumed by the grantee or subgrantee and will not be part of the grant.

(h) Grantees must provide for an effective accident control, health, and safety program. As a minimum, grantees shall follow U.S. Department of Labor Bulletin No. 101, "A Guide to Child Labor Provisions of the Fair Labor Standards Act."

(i) Grantees will have a financial management system which will provide the information called for in attachment G of the Office of Management and Budget (OMB) circular A-102 (formerly FMC 74-7).

(j) "Request for Advance or Reimbursement," as outlined in OMB circular A-102, attachment H, item 4(a), will be used to obtain an advance to start and/or maintain the program. It can also be used to obtain a reimbursement during or at the end of a project. An advance, not to exceed 1 month's needs, may be made after approval of the grant application.

(k) Grantees will prepare a "Financial Status Report" required by OMB circular A-102, attachment H, item (3)a. This report will be prepared on a cash basis. Instructions and forms will be supplied each grantee at the time of grant award. Grantees shall require similar reports from all subgrantees and contractors to facilitate their own reporting to the grantor agencies. The Financial Status Report will be prepared as of December 31 of each operating year. This report will be forwarded in time to reach the Secretaries by March 31 of the following operating year.

(l) Allowable costs under the grant program are defined in FMC 74-4 and OMB circular A-102.

(m) Records retention and custodial requirements for records are prescribed by attachment C to OMB circular A-102.

(n) A budget revision is required in advance when the scope of the grant is to be changed through (1) addition or elimination of a project, (2) reduction in the State's grant program of 5 percent or more of enrollees, and/or (3) determination that the grantee will not utilize Federal funds in amount in excess of $5,000 or 5 percent of the Federal grant, whichever is greater. A budget revision must also be submitted when the State's matching ratio is reduced. No budget revision may be submitted later than March 31 following the end of the operating year. Procedures in attachment K of OMB circular A-102 will be followed.

(o) Grantees shall comply with the provisions of attachments N and O of OMB circular A-102 in regard to nonexpendable personal property and procurement standards.

(p) The Secretaries or their designees shall periodically review the conduct of the program of the State.

(q) Grantees will supervise those projects in the State being administered by subgrantees and contractors. Subgrantees and contractors will be required to operate in accordance with the procedures outlined in these regulations and the grant agreement with the State. Periodic inspection of subgrantee projects will be made by the grantee under the direction of the program agent or his designee. Grantees or subgrantees may contract with any public agency or organization or any private nonprofit agency or organization which has been in existence for at least 5 years.

(r) Grantees will meet the financial audit requirements of attachment G to OMB circular A-102 and will require the same of subgrantees. Copies of audits will be made available to the Secretaries upon request.

(s) Grantees shall provide accidental injury compensation and tort claims coverage under State laws for its enrollees. Enrollees shall be employed without regard to State personnel laws, rules, and regulations applicable to full-time employees. It is not intended that State enrollees be covered for retirement, unemployment compensation, health and life insurance purposes, or that they earn or be granted leave-with-pay or sick leave; such charges shall not be considered a qualifiying expense for Federal cost-share purposes.

(t) If the grantee fails to comply with the grant award stipulations, standards, or conditions, the Secretaries may jointly suspend the grant, in whole or in part, pending corrective action. Subsequent to or during any period of suspension of the grant, the Federal Government shall not be obligated to reimburse the grantee for any incurrence of obligations for suspended projects other than direct pay of enrollees and then only for a period of time which both the Secretaries shall determine to be reasonable. In addition, the Secretaries may jointly terminate the grant, in whole or in part. Termination shall be effected by notice of termination. Upon receipt of a notice of termination, the grantee shall:

(1) Discontinue further commitments of grant funds for the terminated project(s).

(2) Cancel all sub-grants or contracts, where possible, scheduled for payment with funds budgeted for the terminated project(s).

(3) Within 90 days after receipt of the notice of termination for the entire grant, supply either of the Secretaries with a financial status report, along with a refund check for any unused portion of funds advanced, or a request for reimbursement for allowable expenditures incurred in the grant program.

§ 26.6 Request for grant.

(a) Of the amount available for Youth Conservation Corps projects, 30 percent will be allocated for State projects. All States will be given an opportunity to participate in the program. Allocated funds not needed by a State will be reallocated, based on the merit of proposals submitted in accordance with paragraph (c) of this section.

(b) Pursuant to section (4)(c)(1) of Pub. L. 93—408, States may receive grants up to but not to exceed 80 percent of the cost of funding any project from the Federal Government. The combined Federal/State costs of individual projects and other program expenses as established in the grant application determine the Federal/State cost-sharing ratio. Matching State costs can consist of either direct expenditures or services of an in-kind nature.

(c) Application for Federal Assistance (Standard Form 424) will be used by applicants in applying for grants under this program. Application forms will be supplied to Program Agents. Only a Program Agent may submit an application. A single grant application must be submitted for the entire summer program within each State. A separate application must be used for non-summer projects. A non-summer project is defined as one which extends beyond September 30, or begins prior to May 1.

(d) The Secretaries have designated individuals for each State who will jointly represent them. Grant applications (original and two copies) must be submitted to the designated reresentative of either Secretary. January 1 has been established as the deadline date for acceptance of applications for each operating year. Names and addresses of designated representatives will be

furnished to each State. The Secretaries' representatives must jointly approve grant proposals. Approval or disapproval of proposals will be docu-

county, municipal or other non-Federal public lands (identify).

(6) Number of male and female youth planned for project, including

grantee in the grant application: The grantee agrees to administer tests and questionnaires; conduct interviews; submit enrollee statistical and work accomplishment data; and otherwise

WEDNESDAY, SEPTEMBER 13, 1978

PART IV

furnished to each State. The Secretaries' representatives must jointly approve grant proposals. Approval or disapproval of proposals will be documented by a formal letter to the Program Agent. The Secretaries' representatives will also be available for technical assistance and will monitor the program.

§ 26.7 Application format and instructions.

Grant application must be made using the Office of Management and Budget approved form (SF-424) entitled "Federal Assistance." Specific instructions and requirements which must be followed are included in the Secretaries' State Grant Procedures Handbook. General instructions for completing the form by part numbers are:

(a) Part I—(SF-424 Cover Sheet, Sections I and II) shall be completed.

(b) Part II—(Budget Data). See YCC State Grant Procedures Handbook for definitions of cost categories and for budget narrative instructions.

(c) Part III—(Program Narrative Statement). Complete a separate description of each project, which will include the following information (Items 13, 14, 15, and 16 may be consolidated, if common to all projects):

(1) Project number.

(2) Project name and address.

(3) Project location (nearest city or town and county).

(4) Name of Grantee, Sub-Grantee and/or Contractor.

(5) Land Ownership class(es) benefiting from the program—State, county, municipal or other non-Federal public lands (identify).

(6) Number of male and female youth planned for project, including youth leaders.

(7) Type of project (7-day residential; 5-day residential; non-residential; other).

(8) Length of session(s) (e.g., number of weeks) and proposed beginning and ending dates per session.

(9) Cost of project.

(10) Description of living conditions, if residential project (types of facilities, age, condition, tents, cabins, dormitories, food service).

(11) Project staff (number and position titles).

(12) Work-learning program. (Describe major projects, planned units of production if applicable, and any constraints that are anticipated. Explain how environmental learning will be integrated into projects.)

(13) Complete calculation for daily rate of enrollee pay, including deduction for food lodging.

(14) Description of health and safety program.

(15) Description of enrollee recruiting and selection system. (The Statewide recruiting and selection plan may be substituted.)

(16) Description of staff recruiting and selection system, including affirmative action measures to be taken.

(d) Part IV—(Assurances) is preprinted within Attachment M, Exhibit M-5, OMB Circular A-102, and is to be included as part of the application. The following assurance is not preprinted and must be included by the grantee in the grant application: The grantee agrees to administer tests and questionnaires; conduct interviews; submit enrollee statistical and work accomplishment data; and otherwise assist the Federal Government in collecting information.

§ 26.8 Program reporting requirements.

(a) Monitoring and reporting of program performance will be in accordance with Attachment I of OMB Circular A-102.

(b) The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

§ 26.9 Consideration and criteria for awarding grants.

The decision by both of the Secretaries' representatives on grants to individual States will consider the following:

(a) The amount of grant funds allocated to the State.

(b) The quality of the proposed program in terms of meeting program characteristics and objectives.

(c) The overall cost per enrollee 8-week position.

(d) Actual prior performance of the State in administering YCC projects.

(e) The performance of the grantee in meeting the conditions of the grant and the requirements of OMB Circular A-102 and FMC 74-4.

DEPARTMENT OF AGRICULTURE

Forest Service

ROADLESS AREA REVIEW AND EVALUATION (RARE II)

RARE II Update

RARE II is an accelerated land management planning process designed to determine which of more than 2,600 tracts of roadless and undeveloped national forest system land should be allocated to: (1) wilderness use, (2) nonwilderness use, or (3) further planning for all uses. A national draft environmental statement, tied to 20 regional and State supplements, was issued June 15 for public comment.

Building on the Department of Agriculture's commitment to keep the public as fully up to date as possible on the developments and status of the national forest system roadless area review and evaluation (RARE II) project, we have prepared this progress report.

Some questions have arisen about: (1) availability of additional data, (2) clarity of some points in the draft environmental statement, (3) adequacy of displayed alternatives, and (4) the final date when public comments will be accepted on the RARE II draft environmental statement. Following is clarification of these subjects:

Availability of Data

Although the draft environmental statement has been issued, the Forest Service has continued to improve its information base as a means of making the final product (the final environmental statements) as sound as possible. Data are being refined continuously during the 3½ month public comment period. As data are revised or refined, they are immediately made available to the public through any Forest Service regional or forest supervisor's office. Examples of this data refinement include:

1. DEVELOPMENT OPPORTUNITY RATING SYSTEM (DORS)

As part of the economic analysis for the final RARE II product, DORS is a system to establish relative ratings of areas on the basis of their cost-effectiveness relationships. Through a range of ratings (0 to 15), it expresses relative potentials for development of known nonwilderness resources, and it gauges opportunity costs based on estimates of total present net values of nonwilderness resources which could be lost through wilderness classification. We anticipate these indices, based on data available in late August, will be available in mid-September at regional and forest supervisors' offices.

2. MINERALS, OIL, AND GAS

Steps are being taken to refine data on critical mineral and oil and gas areas, particularly those with high potential. Nearly 500 areas with high critical mineral potential and 400 with high energy potential were identified in the draft statement. Information on how these data are being refined will be available in mid-September at regional forester and forest supervisor offices.

3. RPA RELATIONSHIPS

The Forest Service is working on determination of the relationship of the RARE II roadless areas and the resource Planning Act program goals. When this task is complete, an announcement to that effect will be made, including a very short resume of the relationships and the public will be informed as to where more detailed information might be obtained.

4. ADDITIONAL DISPLAY

The Forest Service is presently preparing a display of those roadless areas, amounting to nearly two-thirds of the roadless acreage, which are in the top half of the wilderness attributes ratings scale of each of the nine regions. It will be used as an evaluation reference point. Previously, it had been an intermediate phase of alternative I. Alternative I placed all areas in the top half of the wilderness attributes ratings in the wilderness recommendation category, except for those having a high level of nonwilderness resource potential. These exceptions were allocated to further planning. This display being prepared shows those areas with the high wilderness attributes rating before any of them were moved into further planning. The display and its associated data will be available for public review in mid-September—again at regional or forest supervisors' offices.

5. DRAFT ENVIRONMENTAL STATEMENT DATA BASE AVAILABLE

A great deal of detailed data was compiled to prepare the draft environmental statement and the State and regional supplements. All of it was, of course, not displayed because of the great volume involved. It was organized and summarized so the documents would be readily understandable by the public in a reasonably manageable package. The background and other supporting data which went into the June 15 publications can be reviewed and studied at regional forester or forest supervisors' offices right now.

6. ROADLESS AREAS TRADEOFFS STUDY

The Forest Service has been conducting a study into the potential for offsetting the reductions in levels of timber harvest which would be caused by leaving areas roadless by intensifying investments in timber production within areas already roaded. This study has now been completed and the results are expected to be published by mid-September. Copies of the study are available from Pacific Northwest experiment station and will be made available by the Forest Service upon request.

Clarity of Draft Environmental Statement Information

Erroneous conclusions have been drawn by some reviewers on two subjects in the draft statement—grazing in wilderness and changing of area boundaries. To clarify these points, the following explanations are offered:

1. EFFECTS OF WILDERNESS DESIGNATION ON GRAZING

A number of persons have expressed concerns that the displays in the draft environmental statement overstate the effects on grazing of wilderness designation. Actually, they are not necessarily overstated, but they do not make obvious the time frames involved. The effects would not take immediately, as some draft environmental statement reviewers might conclude. A number of years may pass before the grazing outputs under a wilderness management situation reach the levels displayed in the tables. The display tables show the entire effect, leading some to believe the effect will be immediate. Among the factors which might cause a reduction in grazing capacity over a period of time under wilderness management are prohibition of use of motorized vehicles and equipment, prohibition of vegetation manipulation, and possible conversion of some existing improvements to those having less adverse impact on wilderness values.

2. BOUNDARY ADJUSTMENT IN RARE II

The RARE II process contemplates that some roadless areas may have their boundaries adjusted prior to decisionmaking as to whether wilderness or nonwilderness uses should be directed. Many of these would occur where the presence of significant nonwilderness output potential conflicts with high wilderness value, resulting in controversy over allocation of the area. Several Forest Service regions have made boundary adjustments during the DES process to reduce such controversy.

The Forest Service will consider additional situations where modification of boundaries might result in segregating the features which cause an area allocation to be controversial. Any such boundary adjustments will be suggested in the final course of action recommended. Also, any such modifications suggested by the public will be strongly considered.

3. AREAS PLACED IN FURTHER PLANNING

Many people have asked how areas placed in further planning will be handled in the future. Provision for the further planning category acknowledges that decisions cannot be issued on all areas during the RARE II process. There are a number of reasons why an area might be placed in further planning. Examples include: insufficient data available, significant public disagreement on an area, the need for additional steps required for congressionally designated study areas, etc.

Except for the specific procedural steps required for congressionally designated studies, these areas are simply remanded to regular national forest land management planning.

This planning will occur at the national forest level under the guidance of planning regulations provided for in the National Forest Management Act. Congressionally mandated study areas will follow the procedures outlined in the statute directing the study.

The resource opportunities represented in the further planning category will provide additional flexibility when considering the 1980 update for the Resource Planning Act (RPA) program alternatives. The final RPA program will provide direction to national forest land management planning.

Adequacy of Displayed Alternatives

The Forest Service realistically concluded there was no way to display all possible alternatives in the DES. It did select 10 alternatives ranging from recommendation of all 62 million acres of national forest roadless areas as wilderness to recommendation of all 62 million acres for nonwilderness allocation, as well as a no-action alternative. These three extremes and the seven other alternatives were designed to illustrate ways that the areas might be allocated. Since the final recommendation will be determined on an area-by-area and approach basis, public reviewers should not be constrained by the acreage ranges in the DES alternative groupings. The public can influence the process most by commenting on the individual areas and on the criteria and approaches which should be used in forming the final recommendation.

Deadline for Public Comments

Because of this administration's commitment to completing the final environmental statement by the end of this year, the Forest Service had earlier decided it would need to analyze the public comment, complete the evaluation of this comment and other data, and go through the complex process of decisionmaking on 2,600 areas within a period of less than 3 months. For this reason, the Forest Service concluded all comment must be received by the agency by October 1. This restriction of time is still critical, but because of possible mail delays and activities attendant with the conclusion of summer vacations, the agency has decided to accept written comment if it is postmarked no later than October 1. The practicality of incorporating these comments into the analysis while still meeting the remaining deadlines will require that the written comments reach the Forest Service by October 6.

It must be emphasized, however, that every effort should be made by the reviewing and commenting public to submit comments as early as possible, so a last-minute crush can be avoided.

Conclusion

Printed copies of this update of the RARE II process are available at every Regional Office and at every National Forest Supervisor's office. Comments by the public are welcome on it, as well as on the draft environmental statement, the State and regional supplements, or any of the informational material on which they are based.

Dated: September 7, 1978.

JOHN R. MCGUIRE,
Chief.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected) the "Federal Register Index," or both.

LSA (List of CFR Sections Affected) $10.00 per year

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00 per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the LSA (List of CFR Sections Affected) will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4595

Veterans Day, 1978

By the President of the United States of America

A Proclamation

Among the great days of national remembrance, none is more deeply moving to Americans than Veterans Day. On this occasion, our nation traditionally joins together to salute those valiant individuals who have served in the Armed Forces.

This is a very special day. It symbolizes the debt of gratitude we owe our veterans. It reminds us that the freedom we enjoy has endured intact because millions of patriotic men and women answered their country's call to service and sacrifice.

Our veterans have not sought glory for themselves, but peace and freedom for us all. They represent the spirit that has preserved us as a great nation. They deserve our recognition for all they have done.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, invite all Americans to observe Saturday, November 11, 1978, as Veterans Day and on this historic occasion, let us resolve anew to keep faith with those whose love of country has set them in an imperishable roll of honor.

I urge all the families and friends of our sick and disabled veterans to visit them and extend to them a grateful nation's promise that they will not be forgotten.

I call upon Federal, State, and local Government officials to mark Veterans Day by displaying the flag of the United States, and by encouraging and supporting public involvement in appropriate ceremonies throughout the country.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of September, in the year of our Lord, nineteen hundred and seventy-eight, and of the Independence of the United States of America, the two hundred and third.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Q]

PART 217—INTEREST ON DEPOSITS

Order Granting Temporary Suspension of Early Withdrawal Penalty

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Temporary suspension of the regulation Q penalty normally imposed upon the withdrawal of funds from time deposits prior to maturity.

SUMMARY: The Board of Governors, acting through its Secretary, pursuant to delegated authority, has suspended temporarily the regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks for depositors affected by the severe storms, flooding, hail, and tornadoes beginning on or about June 25, 1978, in the State of Wisconsin.

EFFECTIVE DATE: July 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Anthony F. Cole, Attorney, Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3711.

SUPPLEMENTARY INFORMATION: On July 7, 1978, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order 11795 of July 11, 1974, the President, acting through the Administrator of the Federal Disaster Assistance Administration, designated the following counties of the State of Wisconsin a major disaster area: Buffalo, Crawford, Dane, Green, Iowa, Juneau, La Crosse, Lafayette, Monroe, Pepin, Pierce, Richland, Rock, Sauk Trempealeau, and Vernon. The Board regards the President's action as recognition by the Federal Government that a disaster of major proportions has occurred. The President's designation enables victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional measure of assistance to victims by temporarily suspending the regulation Q early withdrawal penalty.[1] The Board's action permits a member bank, wherever located, to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has suffered property or other financial loss in the disaster area as a result of the severe storms, flooding, hail, and tornadoes. A member bank should obtain from a depositor seeking to withdraw a time deposit pursuant to this action a signed statement describing fully the disaster-related loss. This statement should be approved and certified by an officer of the bank. This action will be retroactive to July 7, 1978, and will remain in effect until 12 midnight December 31, 1978.

Section 19(j) of the Federal Reserve Act (12 U.S.C. 371b) provides that no member bank shall pay any time deposit before maturity except upon such conditions and in accordance with such rules and regulations as may be prescribed by the Board. The Board has determined it to be in the overriding public interest to suspend the penalty provision in § 217.4(d) of regulation Q for the benefit of depositors suffering disaster-related losses within those geographical areas of the State of Wisconsin officially designated a major disaster area by the President. The Board, in granting this temporary suspension, encourages member banks to permit penalty-free withdrawal before maturity of time deposits for depositors who have suffered disaster-related losses within the designated disaster areas.

In view of the urgent need to provide immediate assistance to relieve the financial hardship being suffered by persons directly affected by the severe damage and destruction occasioned by the storms and flooding in the designated counties of Wisconsin, the Board finds that good cause exists for dispensing with notice and public participation referred to in section 553(b) of title 5 of the United States Code with respect to this action and that public procedure with regard to this action would be contrary to the public interest. Because of the need to provide assistance as soon as possible and because the Board's action relieves a restriction, the Board finds that there is good cause to make the action effective immediately.

By order of the Board of Governors, acting through its Secretary, pursuant to delegated authority (12 CFR 265.2(a)(18)), September 5, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 78-25885 Filed 9-13-78; 8:45 am]

[1] Sec. 217.4(d) of regulation Q provides that where a time deposit, or any portion thereof, is paid before maturity, a member bank may pay interest on the amount withdrawn at a rate not to exceed that currently prescribed for a savings deposit and that the depositor shall forfeit 3 months of interest payable at such rate.

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official staff interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretation of regulation Z, regarding the necessity of separate disclosure of certain finance charges described under Ohio law. The agency is taking this action in response to a request for interpretation of this regulation.

EFFECTIVE DATE: On or after October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Section Chief, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-3867.

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

(2) An opportunity for public comment on an official staff interpreta-

tion may be provided upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2)(ii). As

Cleveland, Cleveland, Ohio 19105.

Sincerely,

NATHANIEL E. BUTLER,
Associate Director.

ation Regulations (14 CFR Part 39) by adding a new AD applicable to Lockheed L-1011-385 series airplanes (42

Aviation Regulations (14 CFR 39.13) is amended, by adding the following new

(e)(2) of this AD. Revert to routine maintenance/inspection practices.

EFFECTIVE DATE: November 2, 1978.

tion may be provided upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2)(ii). As provided by 12 CFR Part 226.1(d)(3) every request for public comment must be in writing, should clearly identify the number of the official staff interpretation in question, should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 and must be postmarked or received by the Secretary's office before the effective date of the interpretation. The request must also state the reasons why an opportunity for public comment would be appropriate.

(3) 15 U.S.C. 1640(f).

12 CFR Part 226, FC-0153
§ 226.8(c)

Whether "base finance charge" and "service charge" are the same type of charge depends on interpretation of Ohio law. (Rescinds FC-0029 and Letter 1114.)

AUGUST 31, 1978.

On * * *, you requested an official staff interpretation of regulation Z regarding the requirement of § 226.8(c)(8)(i) of the regulation that a creditor provide a "description of the amount of each type" of finance charge where the total finance charge consists of "two or more types of charges."

At that time, you questioned whether the regulation requires a creditor to separately disclose the finance charges described under the Ohio Retail Installment Sales Act, ORC 1317.06, as a "base finance charge" and a "service charge." The position taken in Official Staff Interpretation FC-0029 answered your question affirmatively. However, in response to several requests, the staff has reconsidered the matter and is hereby rescinding FC-0029 and Public Information Letter 1114 which deals with the same subject.

The staff is of the opinion that if under the Ohio Retail Installment Sales Act, the "base finance charge" and the "service charge" constitute the same type of charge, regulation Z would not require separate disclosure of each charge. The answer to the question regarding whether the "base finance charge" and the "service charge" are the same type of charge depends on an interpretation of Ohio law. We believe it is inappropriate for the staff to make that determination. However, if the two charges were determined to be different "types of charges" under Ohio law the staff is of the opinion that separate disclosure of the "base finance charge" and the "service charge," using those terms, would be proper. We believe this would also be permissible, in accordance with the additional information provisions of § 226.6(c), if a creditor simply elected to itemize the charges.

This is an official staff interpretation of regulation Z, issued in accordance with § 226.1(d)(2) of the regulation and limited in its applicability to the facts and issues discussed above. If you have additional questions, please contact this office or Mr. Harry W. Huning, Vice President, Supervision and Regulations, Federal Reserve Bank of Cleveland, Cleveland, Ohio 19105.

Sincerely,

NATHANIEL E. BUTLER,
Associate Director.

Board of Governors of the Federal Reserve System, September 5, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[4910-13]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-WE-3-AD; Amdt. 39-3296]

PART 39—AIRWORTHINESS DIRECTIVES

Lockheed-California Co. Model L-1011-385 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspection, protection, repair or replacement of the Lockheed Model L-1011 Series airplane center engine "S" duct flexible fire seal that could, if allowed to wear beyond certain limits, or become torn, compromise the function of the fire wall and permit the transfer of potentially hazardous quantities of vapors from the engine compartment into the afterbody section.

DATES: Effective October 13, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from: Lockheed-California Co., P.O. Box 551, Burbank, Calif. 91520, Attention: Commercial Support Contracts, Department 63-11, U-33, B-1. Also, a copy of the service information may be reviewed at, or a copy obtained from: Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. Telephone: 213-536-6351.

SUPPLEMENTARY INFORMATION: On April 21, 1978, the FAA proposed to amend Part 39 of the Federal Aviation Regulations (14 CFR Part 39) by adding a new AD applicable to Lockheed L-1011-385 series airplanes (42 FR 17366). This AD establishes inspections of the flexible fire seal and provides for repair, repetitive inspections and terminating action. The proposal was prompted by discovery of a torn seal and subsequent evaluations of hazard and repair possibilities.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all comments received in response to the notice of proposed rulemaking. Comments were received from the manufacturer and from the Air Transport Association of America (ATA). The ATA presented the views of three operators.

Both commenters stated their agreement with the proposal except as regards proposed compliance requirements if a seal is found worn through or torn. These commenters proposed substitution of compliance recommendations contained in Lockheed L-1011 Service Bulletin 093-54-030. This position was predicated on their acceptance of a Lockheed analysis which purports to show that the combination of circumstances required to produce a hazardous condition is less than extremely improbable.

The FAA concurs that some additional time for compliance is appropriate. Therefore the "before further flight" requirement of paragraph (g) has been modified to "250 hours".

Other comments relative to economic burden due to scheduling problems have been considered by the FAA. Since some 10 months will have elapsed from initial discovery of the condition to the issuance of a final AD, the FAA believes that there is adequate time for the operators to conduct scheduling activities necessary to minimize economic burden.

The phrase "or later FAA approved revisions" has been deleted from the service bulletin citation in paragraph (c) of the AD and a note has been added indicating that this version of the service bulletin is the only version acceptable for demonstrating compliance with the AD under the terms of paragraphs (c) through (h).

After careful review of all available data including the comments above the FAA believes that sufficient evidence exists in the public interest in aviation safety to adopt the proposed rule, with relieving substantive changes and with minor editorial and clarifying changes of a nonsubstantive nature, as a final rule.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

LOCKHEED CALIFORNIA CO.: Applies to Lockheed-California Co. Model L-1011-385 Series airplanes certificated in all categories.

Compliance required as indicated, unless previously accomplished.

To prevent the transfer of potentially hazardous quantities of vapors from the engine compartment into the afterbody of the airplane, accomplish the following:

(a) For airplanes with 7,500 or more hours total time in service on the effective date of this AD, within the next 1,000 hours time in service, inspect the center engine "S duct" flexible fire seal Part No. 1506933-101 per paragraph (c) below.

(b) For airplanes with less than 7,500 hours total time in service on the effective date of this AD, prior to the accumulation of 8,500 hours total time in service, inspect the center engine "S" duct flexible fire seal per paragraph (c) below.

(c) Visually inspect the center engine "S" duct flexible fire seal for depth of groove and/or tears per the procedures set forth in paragraph 2.A of Lockheed California Service Bulletin 093-54-030 dated March 28, 1978 (hereinafter referred to as SB 093-54-030).

NOTE.—Service Bulletin 093-54-030 dated March 28, 1978 is the only version of Service Bulletin 093-54-030 suitable for demonstrating compliance with paragraphs (c) through (h) of this AD.

(d) If there are no tears, and evidence of grooving is observed, or if groove depth is determined to be less than 0.035 inch using the procedures of paragraph 2.A of SB 093-54-030, the seal may be retained in service with performance of repetitive inspections at intervals not to exceed 1500 hours total time in service.

(e) If there are no tears and seal is worn to a groove depth greater than 0.035 inch but less than 0.050 inch:

(1) Continue worn part in service and reinspect within 1000 hours additional time in service; or

(2) Repair seal per paragraph 2.C of SB 093-54-030, and reinspect within 8500 hours additional time in service; or

(3) Replace seal with like serviceable part per paragraph 2.B of SB 093-54-030 and reinspect per paragraph 2.A of SB 093-54-030 within 8500 hours additional time in service.

(f) If seal is worn to a groove depth equal to or greater than 0.050 inch but is intact, within 500 hours additional time in service, repair seals per paragraph 2.C of SB 093-54-030 or replace seal per paragraph 2.B of SB 093-54-030 and reinspect per paragraph 2.A of SB 093-54-030 within 8500 hours additional time in service.

(g) If seal is worn through or torn, within 250 hours additional time in service repair seal per paragraph 2.C of SB 093-54-030 or replace seal per paragraph 2.B of SB 093-54-030 and reinspect per paragraph 2.A of SB 093-54-030 within 8,500 hours additional time in service.

(h) Actions required per this AD may be terminated when chafing protection (Belt Assembly Part Number 1619429-101) is installed per paragraph 2.D of SB 093-54-030 in conjunction with a new, used, or repaired center engine "S" duct flexible fire seal which meets the criteria of paragraph (d) or (e)(2) of this AD. Revert to routine maintenance/inspection practices.

(i) Equivalent inspection procedures and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(j) Special flight permits may be issued in accordance with FARs 21.197 and 21.199 to operate aircraft to a base for accomplishment of inspections and/or maintenance required by paragraph B of this AD.

(k) Upon request of operator, an FAA maintenance inspector, subject to prior approval of the Chief, Aircraft Engineering Division, FAA Western Region may adjust the initial and repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

This amendment becomes effective October 13, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document is not significant in accordance with the criteria required by Executive Order 12044 and set forth in interim Department of Transportation guidelines.

Issued in Los Angeles, Calif., on September 30, 1978.

LEON C. DAUGHERTY,
Acting Director,
FAA Western Region.

[4910-13]

[Airspace Docket No. 78-GL-12]

PART 71—DESIGNATION OF FEDERAL AIRWAYS AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to designate additional controlled airspace near Lebanon, Ohio, to accommodate a new (NDB) instrument approach procedure into the Lebanon-Warren County Airport established pursuant to a request from the Lebanon-Warren County Airport officials to provide that facility with instrument approach capability. The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions.

EFFECTIVE DATE: November 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Clair M. Billington, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 456.

SUPPLEMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1,200 feet above ground to 700 feet above ground. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained in controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

DISCUSSION OF COMMENTS

On page 30068 of the FEDERAL REGISTER dated July 13, 1978, the Federal Aviation Administration published a notice of proposed rulemaking which would amend § 71.181 of part 71 of the Federal Aviation Regulations so as to designate a transition area at Lebanon, Ohio. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. As a result of the notice of proposed rulemaking docket issued June 26, 1978, a letter of objection was received from Mr. James T. VanDervort of Wilmington, Ohio. Mr. VanDervort objected to the establishment of an instrument approach procedure into the Lebanon-Warren County Airport because he felt the approach procedure would cause an increase in air traffic in the vicinity of the Waynesville Airport, Waynesville, Ohio. He expressed concern over the fact that the Waynesville Airport experiences a heavy volume of traffic due to pilot training, glider operations, parachute jumping, and business flying. He believes that the establishment of the instrument approach procedure would entice students to practice IFR approaches at the Lebanon-Warren County Airport and therefore cause the increase in air traffic at the Waynesville Airport.

Aeronautical study disclosed that the Waynesville Airport is located approximately 6 nmi northeast of the Lebanon-Warren County Airport. The approach procedure will be established on the northwest side of the Labanon-Warren County Airport. It will be ini-

tiated on the Oneida LOM located 7.4 nmi northwest of the Warren County

trolled airspace near Kenton, Ohio, to accommodate a [VOR-A] instrument

tential of aircraft delays at other adja-

vide controlled airspace for aircraft executing a proposed instrument ap-

pal Airport utilizing the Glenpool VOR.

DATES: An effective date for each SIAP is specified in the amendatory provisions

tiated on the Oneida LOM located 7.4 nmi northwest of the Warren County Airport and proceed direct to the airport. Aircraft utilizing the approach procedure will be directed away from, instead of toward, the Waynesville Airport thereby assisting in eliminating some of the possible traffic in the Waynesville area. There are presently 15 IFR approaches to airports within 25 nmi of the Waynesville Airport. The establishment of this new approach procedure and the designation of the transition area to accommodate the procedure should not cause student pilots to concentrate their training at Lebanon-Warren County.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended, effective November 2, 1978, as follows:

In § 71.181 (43 FR 440), the following transition area is added:

LEBANON, OHIO

That airspace extending upward from 700 feet above the surface within a 6.5 mile radius of the Lebanon-Warren County Airport (latitude 39°27'30" N., longitude 84°15'15" W.) excluding the portions which overlie the Dayton, Ohio, and Middletown, Ohio, transition areas.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Des Plaines, Ill., on August 30, 1978.

WAYNE J. BARLOW,
Acting Director,
Great Lakes Region.

[FR Doc. 78-25694 Filed 9-13-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-GL-8]

PART 71—DESIGNATION OF FEDERAL AIRWAYS AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to designate additional controlled airspace near Kenton, Ohio, to accommodate a [VOR-A] instrument approach procedure into the Hardin County Airport established on the basis of a request from Hardin County Airport officials to provide that facility with instrument approach capability. The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions.

EFFECTIVE DATE: November 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Clair M. Billington, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Ill. 60018, telephone 312-694-4500, extension 456.

SUPPLEMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1,200 feet above ground to 700 feet above ground. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

DISCUSSION OF COMMENTS

On page 21464 of the FEDERAL REGISTER dated May 18, 1978, the Federal Aviation Administration published a notice of proposed rule making which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Kenton, Ohio. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. As a result of the notice of proposed rule making docket issued May 8, 1978 a letter of aeronautical comment was received from the Trager Aviation Center, Lima, Ohio, expressing concern that the proposed instrument approach procedure would conflict with student training at Allen County Airport in Lima. Aeronautical study by the FAA reveals that the airspace docket action to designate additional controlled airspace is intended to enhance safety as it relates to the see-and-be-seen concept of visual weather condition operations. In addition, the comments were addressed to the potential of aircraft delays at other adjacent airports as a result of the new instrument approach procedure. As in the previous statement, the instrument approach procedure into Kenton Airport is intended to provide for a better movement of aircraft operations in the area and should reduce delays, particularly those now experienced by aircraft desiring to operate into Kenton Airport. The approach procedures and the designated airspace described in this docket will improve safety and should reduce delays in this area.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Adminstrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective November 2, 1978, as follows:

In § 71.181 (43 FR 440), the following transition area is added:

KENTON, OHIO

That airspace extending upward from 700 feet above the surface within a 7.5 mile radius of the center, latitude 40°36'48" N., longitude 83°38'39" W. of Hardin County Airport, Kenton, Ohio.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.61 of the Federal Aviation Regulations (14 CFR 11.61).)

NOTE.—The Federal Aviation Adminstration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Des Plaines, Ill., on August 30, 1978.

WAYNE J. BARLOW,
Acting Director,
Great Lakes Region.

[4910-13]

[Airspace Docket No. 78-ASW-20]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area: Sand Springs, Okla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of the action being taken is to designate a transition area at Sand Springs, Okla. The intended effect of the action is to provide controlled airspace for aircraft executing a proposed instrument approach procedure to the William R. Pogue Municipal Airport. The circumstance which created the need for the action was a requirement to provide capability for flight under instrument flight rules (IFR) procedures to the airport. Coincident with this action, the airport is changed from visual flight rules (VFR) to IFR status.

EFFECTIVE DATE: November 2, 1978.

FOR FURTHER INFORMATION CONTACT:

David Gonzalez, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101; telephone 817-624-4911, extension 302.

SUPPLEMENTARY INFORMATION:

HISTORY

On June 5, 1978, a notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 24324) stating that the Federal Aviation Administration proposed to designate the Sand Springs, Okla., transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Responses were received with one commenter objecting to the proposal.

DISCUSSION OF COMMENTS

The owner-operator of the Eagle's Nest Airport expressed concern that the proposed standard instrument approach procedure (SIAP) to the William R. Pogue Airport, designated on the Tulsa VORTAC, would traverse the Eagle's Nest traffic pattern. The commenter recommended realignment of the SIAP on a north-south flow to remove possible conflicts. The FAA concurred in the recommendation and redesigned the SIAP to the William R. Pogue Airport, basing the final approach course on the 318° radial of the Glenpool, Okla., VOR. The transition area airspace configuration as described in the notice was not affected by the action. Except for editorial changes, this amendment is that proposed in the notice.

THE RULE

This amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) designates the Sand Springs, Okla., transition area. This action provides controlled airspace from 700 feet above the ground for the protection of aircraft executing instrument approach procedures to the William R. Pogue Municipal Airport utilizing the Glenpool VOR.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 440) is amended, effective 0901 G.m.t., November 2, 1978, as follows:

In Subpart G, § 71.181 (43 FR 440), the following transition area is added:

SAND SPRINGS, OKLA.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the William R. Pogue Municipal Airport (latitude 36°10'25" N., longitude 96°08'55" W.) excluding that airspace that overlies the Tulsa, Okla., transition area.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Fort Worth, Tex., on August 31, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[4910-13]

[Docket No. 18267; Amdt. No. 1119]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAP's) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

FOR EXAMINATION

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

FOR PURCHASE

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

BY SUBSCRIPTION

Copies of all SIAP's, mailed once every 2 weeks, may be ordered from Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAP's). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. section 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FAR's). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAP's, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAP's but refer to their graphic depiction on charts printed by publishers of aeronautical materials.

Thus, the advantages of incorporation by reference are realized and publica-

Monmouth, IL—Monmouth Municipal, VOR-A, Amdt. 4

Denver, CO—Stapleton International, LOC BC Rwy 17R, Amdt. 13

Allentown, PA—Allentown-Bethlehem-Easton, NDB Rwy 6, Amdt. 14

4. By amending § 97.29 ILS-MLS follows: Knoxville, TN—McGhee Tyson, Radar-1, Amdt 18, is rescinded. Knoxville, TN—McGhee Tyson, Radar-1, Amdt 17 remains in effect.

DATES: Adopted: September 7, 1978. Effective: September 7, 1978.

FOR FURTHER INFORMATION

V 43 / 179 SE 14 78

Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAP's. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAP's which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective less than 30 days. For the remaining SIAP's, an effective date at least 30 days after publication is provided.

Further, the SIAP's contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERP's). In developing these SIAP's, the TERP's criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAP's and safety in air commerce, I find that notice and public procedure before adopting these SIAP's is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAP's effective in less that 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAP's identified as follows:

• • • effective November 2, 1978:

Fort Myers, FL—Page Field, VOR RWY 23, Amdt. 4
Galesburg, IL—Galesburg Municipal, VOR Rwy 2, Amdt. 9
Galesburg, IL—Galesburg Municipal, VOR Rwy 20, Amdt. 10

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER B—PROCEDURAL REGULATIONS

[Reg. PR-178; Amdt. No. 41]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

Applications for Route Authority

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., September 11, 1978.

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule clarifies and slightly modifies a recently adopted provision of the Board's procedural regulations. It changes the date for answers, from 30 working days, to 30 days (including weekends and holidays), and eliminates its applicability when the Board has already initiated a route case and the applicant is filing an application to be heard in that case. This action is being taken on the Board's own initiative.

DATES: Adopted: September 7, 1978. Effective: September 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Stephen Babcock, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: By PR-173, 43 FR 21873 (May 22, 1978), the Board adopted a new section 908 to its rules of practice in economic proceedings (14 CFR 302.908). This new section requires carriers to file motions for hearing, motions to consolidate, or petitions for orders to show cause, with almost all applications for new or modified certificated route authority. Experience under the new rule (which went into effect on June 21, 1978) has shown the need for two small changes.

The first of these is that we have decided to require answers to motions for hearing to be filed 30 days after the service date of the motion that they answer, rather than 30 days excluding Saturdays, Sundays, and holidays, as the rule now provides. We believe that 30 calendar days is sufficient time to prepare answers and this change will also conform this provision to our general rule, which is that the nonworking days are excluded from time computations only when a time of 7 days or less is specified.

Secondly, we are expecting from the coverage of this section applications "filed in response to, and conforming to, an order instituting a route investigation." We are taking this action because the economic data that section 908 requires are not needed when the Board has already decided to hear a case, and we believe that the service requirements contained in our generally applicable rules of practice (14 CFR 302.8(a)) are sufficient to give notice of applications to interested persons when a case has already been set down.

We are also eliminating subsection (f) because it is superfluous, and have changed the format of the section in order to clarify it.

Because of the need to clarify the present rule to avoid confusion on the part of applicants and their counsel, we find good cause to omit notice of proposed rulemaking and to make this rule effective immediately.

We will also instruct our docket section to continue to accept answers to motions served on or before the publication date of this rule on or before the dates determined in accordance with the existing provision. This should preclude any inconvenience to parties who may not immediately become aware of this change.

Accordingly, we revise section 908 of our rules of practice in economic proceedings (14 CFR 302.908) to read as follows:

§ 302.908 Applications for new or modified certificated route authority.

(a) This section applies to all applications for new or modified certificated route authority except those filed under subpart M or N of this part and those filed in response to, and conforming to, an order instituting a route investigation. Except as modified by this section, the rules in subpart A of this part continue to apply.

(b) A motion for hearing, a motion to consolidate, or a petition for an order to show cause shall be filed with every application.

(c) Applications and accompanying motions shall be served, for each point applied for, on the following:

(1) All air carriers authorized to regularly serve the point.

(2) All persons that have applications pending before the Board to regularly serve the point.

(3) All commuter air carriers operating at least five flights per week to or from the point, according to the current "Official Airline Guide" or "Air Cargo Guide."

(4) The aviation regulatory agency of the State, territory, or possession of the United States in which the point is located or, if there is no aviation regulatory agency, the Governor or other chief executive of the State, territory, or possession.

(5) The mayor or other chief executive of the point.

(6) The airport authority of each airport that the applicant proposes to use.

(7) Any other persons, as ordered by the Board in particular instances.

(d) Motions for hearing need not contain traffic and financial data for markets for which data has already been submitted by another person, if the applicant has moved to consolidate its application with the route proceeding that that other person has asked the Board to initiate. Otherwise, all motions shall include statements of all matters that the applicant believes justify the institution of a route proceeding. Matters of fact shall be sworn to, unless they are subject to official notice. Statements must include the following facts and projections:

(1) Present and proposed schedules by type of aircraft;

(2) Number of departures, plane-miles, passengers, and passenger-miles;

(3) Estimate of self-diversion or diversion from other carriers, if applicable;

(4) Anticipated operating revenues;

(5) Estimate of impact of proposal on operating expenses (for local service carriers, computed according to subpart K of this part);

(6) (For local service carriers only) estimate of allowance for return on investment and taxes, computed according to subpart K of this part; and

(7) (For local service carriers only) increase or decrease in subsidy requirements.

(e) Motions for hearing shall include a list of the names and addresses of all persons that will be served, and a notice that those persons can support or oppose the motion by filing an answer and serving a copy of it on all persons served with the motion. The notice shall also state the due-date for answers.

(f) Answers to motions for hearing shall be filed and served within 30 days of the service date of the motion that they answer. Answers to motions to consolidate and petitions for orders to show cause shall be filed within 7 days of the service date of the motion or petition that they answer.

(Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR
Secretary.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5973, 34-15135, 35-20699, IC-10389, AS 254]

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

Requirements for Form and Content of Financial Statements of Bank Holding Companies and Banks

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission is adopting new rules concerning the form and content of financial statements for bank holding companies and banks in view of the increased complexity of these companies. These rules are designated as article 9 of regulation S-X. It is expected that the rules being adopted will provide more informative financial statements for investors and potential investors in securities of these companies.

EFFECTIVE DATE: Effective for financial statements covering periods commencing after December 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Lawrence J. Bloch, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549, 202-472-3782.

SUPPLEMENTARY INFORMATION: In a release issued on December 8, 1977,[1] the Commission requested comment on a revision of its proposed article 9 of regulation S-X concerning the form and content of financial statements of bank holding companies and banks. In proposing the replacement of the existing article 9, the Commission intended to eliminate its reliance on the provisions of regulation F of the Board of Governors of the Federal Reserve System. The principal purpose of this proposal was to establish requirements in regulation S-X for statements of bank holding companies and banks in view of the increased complexity of their operations. An earlier proposal had been issued on April 21, 1977.[2]

Comments on this proposal have been received from 102 persons, including 83 from bank holding companies and banks. Letters have been received from banking associations, bank regulatory agencies, a financial analyst organization, and accounting organizations and accounting firms. The comments in these letters have been considered and changes have been made in the drafts. The Commission believes that at this time it is appropriate to adopt the revised Article 9.

COMMENTS AND CHANGES

INCOME STATEMENT FORMAT

A relatively small number of comments were concerned with the net interest income format of the income statement included in the proposal. These commentators felt that using this statement format without making an equivalency adjustment for tax-exempt interest made the statement confusing when compared to statistical data found elsewhere in reports. In particular, they referred to the statistical disclosure requirements for bank holding companies under guides 61 and 3 which permit the use of such adjustments. Some of those criticizing the proposed income statement format

[1] Release Nos. 33-5886, 34-14238, 35-20307, IC-10052 (42 FR 63578; Dec. 16, 1977).

[2] Release Nos. 33-5823, 34-13459, 33-19995; IC-9730 (42 FR 21809; Apr. 29, 1977).

suggested that article 9 adopt the single step income statement format found in the regulatory agency reports, while others favored the addition of tax equivalent amounts to securities interest income.

In reports for 1976 and 1977, a substantial number of bank holding companies used the net interest income format of income statements, and we believe that this format presents valuable information for analysis by investors even when it is not on a tax equivalent basis. The tax equivalency adjustment is not in accordance with generally accepted accounting principles but reflects theoretical income never actually realized by a company. Although such and adjustment may be appropriate for statistical analytical purposes, it is not appropriate for inclusion in financial statements. Consequently, we have not deemed it appropriate to change the format of the income statement.[3]

RECEIVABLES FROM OFFICERS, DIRECTORS AND OTHERS

Many letters of comment were concerned with the broad scope of the proposed requirements for reporting of loans to persons in such relationships to the registrant and its affiliates as officers, directors, employees, and principal stockholders. As proposed, this reporting would have extended also to certain associates of such persons. These letters argued that the information requested was not material and might be misleading, that sufficient regulatory safeguards exist, that this disclosure would breach traditional privacy and confidentiality relationships in banking, and that the scope of the disclosure was too broad and consequently unworkable. It was pointed out that many bank holding companies have several thousands of employees and obtaining information about them and their associates was extremely difficult, if not impossible in the case of associates. In addition, some commentators noted that the requirement for detail reporting of amounts receivable aggregating more than $500,000 or 2½ percent of stockholders' equity, whichever is less, in a schedule was not particularly material in the case of most bank holding companies.

These comments have been considered, and as a result the requirement has been changed so that it is now limited to persons related to the registrant and its principal subsidiaries as directors, executive officers or principal holders of equity securities and certain of their associates. For the purpose of this reporting principal subsidiaries include the subsidiary with the greatest amount of deposits and any other subsidiary with deposits which exceed 15 percent of consolidated deposits. The term "executive officer" has been defined for the purpose of this report to mean the president, secretary, treasurer, any vice president in charge of a principal business function and any other person who performs similar policymaking functions for the registrant. This is derived from a definition in form 10-K. A definition of "relative" has been provided. Neither the threshold of 5 percent of stockholders' equity for supplementary note reporting of the aggregate amount due from these persons nor the threshold of the lesser of $500,000 or 2½ percent of stockholders' equity for detail schedule reporting has been changed.

FOREIGN ACTIVITIES

There were many comments on aspects of the proposed requirements for disclosure of foreign activities. This is a relatively new reporting area resulting from the issuance of statement of financial accounting standards No. 14 by the Financial Accounting Standards Board in December 1976. In developing these requirements, we considered the general criteria of standard No. 14, the specific characteristics of banking and the developing reporting requirements of the banking regulatory agencies.

The letters of comment were principally concerned with the following matters:

(1) The definition of foreign activities differed from the one found in standard No. 14.

(2) In addition to asset and revenue tests the threshold tests included criteria based on income (loss) before income tax expenses and net income, which are not found in standard No. 14.

(3) The disclosure requirements in the proposal are more detailed than those in standard No. 14.

(4) Allocation of the allowance for loan losses to foreign activities.

The definition of foreign activities includes loans and other revenue producing assets and transactions in which the debtor or customer is domiciled outside of the United States. The definition covers operations located and conducted entirely outside the United States and also covers loans and transactions made from a location in the United States to a debtor or customer outside of the United States. The definition recognizes the ability of banks at times to place loans in a foreign or domestic office depending on the availability or funds. Although the definitions and details of items to be reported for foreign activities in Article 9 differ in certain respects from those in the reports of condition and income (call report) of the Federal bank regulatory agencies because of differences in the purposes for which the reports are required, we believe that there is no difference in details and totals of corresponding assets, liabilities, revenue, and income which are to be reported. The provisions of Article 9 have also been designed to reflect the application of the general provisions of standard No. 14 to the special nature of banking. Because of difficulties in defining "guarantee" we have changed the proposed definition by deleting from it the provision for exclusion from foreign activities of a loan to a debtor domiciled outside of the United States which is fully guaranteed by a U.S. Government agency or U.S. domiciled company.

The general requirement for disclosure of foreign activities has been changed by the deletion of a provision that disclosure be made if the appropriate criteria were met in each of the two most recent fiscal years. As revised, disclosure would be necessary only for those years in which the criteria are met. The requirement that disclosure be made if income before income tax expense or net income exceeds 10 percent of the corresponding amount in the related financial statement has not been deleted. These criteria are appropriate for bank holding companies and other financial type companies because their leveraged nature creates different relationships between assets, revenue and income as against the relationships existing in commercial and industrial companies.

The requirements for disclosure of particular assets and liabilities and revenue and income related to foreign activities has not been changed except in minor details; however, disclosure to be made by significant geographic area has been revised so that amounts will be called for only by identifiable assets, total revenue and income before income taxes and net income.

As was the case in the first exposure of article 9, many letters objected to the requirement for allocation of a portion of the allowance for loan losses to foreign loans. The December proposal would have necessitated disclosure not only as to allocation to foreign loans in the aggregate but also by significant geographic segment. The American Institute of Certified Public Accountants suggested limitation of disclosure to foreign loans in the aggregate only. A few other letters supported this but indicated that allocations were nevertheless made. By limiting the requirements for significant geographic segment reporting to one amount for identifiable assets, disclosure of the allocation of the

[3] The format of the income statement and also of the balance sheet are suggested presentations, but the statements may be filed in such form and order as will best indicate their significance and character. (See § 210.3-01(a).)

allowance for loan losses is limited to the aggregate amount applicable to

ported and stated that it would be difficult to implement accounting sys-

paragraph (c) is redesignated as (b) as set forth below:

ASSETS AND OTHER DEBITS

such person serves as trustee or in a similar fiduciary capacity, and (3) any relative or spouse of any of the foregoing persons, or

allowance for loan losses is limited to the aggregate amount applicable to foreign activities. In this connection, standard No. 14 states clearly that asset valuation allowances of this type shall be taken into account in computing the amount of an industry segment's identifiable assets.

INVESTMENT SECURITIES

Although many letters of comment took the view that parenthetical disclosure of market value of investment securities on the balance sheet was not necessary, we believe that this disclosure is valuable in the evaluation of this asset specifically and in relation to the balance sheet in its entirety. The significance of market value of investments is such that it should not be completely relegated to a note to the financial statements.

A number of other changes have been made to related areas of the proposal. The schedule which called for presentation of investment securities grouped by type and maturity has been changed by revising the definition of "issuer" to delete the provision for considering securities which are guaranteed by or moral obligations of a person to be securities of the guarantor or obligor as well as securities of their issuer. This has been replaced by a provision that debt securities which are payable from and secured by the same source of revenue shall be considered securities of a single issuer.

OTHER CHANGES

The requirement for reporting loans in several detailed categories has been revised by changing the consumer category to installment. A requirement for separate reporting of financial or agricultural loans if the total of either category exceeds 10 percent of total loans has been dropped. A provision has been made that unearned income shall be deducted separately from total loans.

Separate provisions have been made to report lease financing on the balance sheet and the related income on the income statement.

The requirement for disclosure of the amount of other real estate on the balance sheet or in a note regardless of materiality has been deleted. Other real estate need be disclosed only if the amount exceeds 30 percent of stockholders' equity. The suggestion in other letters of comment that other real estate be accounted for as part of loans has not been recognized.

A provision has been added for disclosure of the aggregate amount of time certificates of deposit in denominations of $100,000 or more.

A number of letters of comment questioned the information value of reporting loan interest income in the same categories by which loans are reported and stated that it would be difficult to implement accounting systems to produce this information. This proposed requirement has been deleted.

The provision in the proposal for separate reporting of equity and earnings of unconsolidated subsidiaries, gains or losses on investments in securities of subsidiaries and 50 percent or less owned persons, and minority interests has been changed so that these items are included with other income and other expense.

EFFECTIVE DATE

Many comments were concerned with the need for sufficient time to plan and install changes in accounting systems to provide new information called for in these requirements. Consequently the revised article 9 will be effective for financial statements for periods commencing after December 24, 1978. In this connection, because of the usefulness of some of the new provisions to investors, the Commission strongly encourages early compliance with them in statements for periods commencing prior to the effective date.

We believe that changes to the statement of income involve reclassification and presentation of information presently available to a registrant so that statements for prior periods can be recast without difficulty. The detailed information concerning foreign activities is such that it may not be available for 1978 and earlier years. Registrants should give as much information concerning foreign activities for 1978 and earlier years as is presently available and explain in a note that all of the currently prescribed information was not available earlier.

Commission action: The Commission hereby amends part 210 of chapter II of title 17 of the Code of Federal Regulations by revising the table of contents, § 210.5-01, §§ 210.9-01—9-05, § 210.12-01 and § 210.12-02 as indicated below:

1. The table of contents of part 210 is revised as set forth below:

APPLICATION OF REGULATION S-X (17 CFR PART 210)

* * * * *

BANK HOLDING COMPANIES AND BANKS

Sec.
210.9-01 Application of §§ 210.9-01 to 210.9-05.
210.9-02 Balance sheets.
210.9-03 Income statements.
210.9-04 Foreign activities.
210.9-05 What schedules are to be filed.

* * * * *

2. In § 210.5-01 paragraph (a)(7) is revised, paragraph (b) is deleted, and paragraph (c) is redesignated as (b) as set forth below:

§ 210.5-01 Application of §§ 210.5-01 to 210.5-04.

(a) * * *

(7) Bank holding companies consolidated and banks (see §§ 210.9-01 to 210.9-05). Unconsolidated financial statements and schedules filed for bank holding companies shall be prepared in accordance with this article (§§ 210.5-01 to 210.5-04), except as provided in § 210.9-01(b).

* * * * *

(b) [Deleted]

(c) [Redesignated as (b)]

3. Sections 210.9-01 through 210.9-05, are revised to read as follows:

BANK HOLDING COMPANIES AND BANKS

§ 210.9-01 Application of §§ 210.9-01 to 210.9-05.

(a) *Bank holding companies and banks.* This article shall be applicable to consolidated financial statements filed for bank holding companies and financial statements of banks.

(b) Financial statements filed for bank holding companies (unconsolidated) shall be prepared in accordance with §§ 210.5-01—210.5-04 except that:

(1) On the balance sheet, (i) current assets and current liabilities need not be separately classified from other assets and liabilities respectively, and (ii) the amounts presented for securities of, indebtedness of, and indebtedness to affiliates and other persons at §§ 210.5-02- 10, 11, and 31 and on schedules III, IV, and X shall show investments in and indebtedness of and to banks separately from amounts for other persons; and

(2) On the income statement, dividends received from unconsolidated subsidiaries and 50 percent or less owned persons shall be shown as the first item on the statement, and the amount to be reported at § 210.5-03-17 shall be the equity in undistributed earnings of unconsolidated subsidiaries and 50 percent or less owned persons. Dividends and equity in undistributed earnings related to banks shall be shown separately from amounts for other persons.

(c) The requirements of the general rules in §§ 210.1-01—210.1-02, 210.2-01—210.2-05, 210.3-01—210.3-17, and 210.4-01—210.4-08 shall be applicable except where they differ from requirements of § 210.9-01 to 9-05.

§ 210.9-02 Balance sheets.

Except as otherwise permitted by the Commission, the balance sheets filed for persons to whom this article is applicable shall comply with the following provisions (see paragraph (a) of § 210.3-01):

ASSETS AND OTHER DEBITS

1. *Cash and due from depository institutions.* (a) State separately (1) interest bearing deposits in other banks and (2) noninterest bearing deposits and cash.

(b) State in a note the amount and terms of any deposits in other banks held as compensating balances against long- or short-term borrowing arrangements (see § 210.5-02-1).

2. *Investment securities.* (a) State the aggregate book value of investment securities showing parenthetically or otherwise on the balance sheet the aggregate amount on the basis of market quotations or fair value at the balance sheet date.

(b) State in a note book value and value on the basis of market quotations or fair value of securities of (1) the U.S. Treasury and other U.S. Government agencies and corporations; (2) States of the U.S. and political subdivisions; and (3) other securities including bonds, notes, debentures and stock of business corporations, foreign governments and political subdivisions, intergovernmental agencies, and a Federal Reserve bank.

(c) State in a note the basis by which book value is determined. Bond premium shall be amortized and discount shall be accreted.

(d) Include securities pledged, loaned, or sold under repurchase agreements and similar arrangements. Exclude borrowed securities and securities purchased under resale agreements or similar arrangements.

(e) State in a note the name of issuer, aggregate book value, and aggregate amount on the basis of market quotations or fair value of the securities of any issuer for which the aggregate book value exceeds 10 percent of stockholders' equity of the person. For the purpose of this disclosure, the term "issuer" shall have the meaning given in section 2(4) of the Securities Act of 1933, except that debt securities issued by a State of the United States and its political subdivisions and agencies which are payable from and secured by the same source of revenue or taxing authority shall be considered to be securities of a single issuer. Information need not be given as to securities of the U.S. Government and U.S. Government agencies and corporations. Consideration shall be given to disclosure of risk characteristics of the securities of an issuer and of differences in risk characteristics of different issues of securities of an issuer as may be appropriate.

3. *Trading account securities.* State in a note whether securities in dealer trading accounts are valued at (a) cost, (b) lower of cost or market, or (c) market. If market is not used, state parenthetically or otherwise on the balance sheet the aggregate amount on the basis of the market quotations or fair value at the balance sheet date.

4. *Other short-term investments.* (a) State the aggregate value of Federal funds sold and securities purchased under resale agreement or similar arrangements. All securities purchased under transactions of this type shall be included regardless of (1) whether they are called simultaneous purchases and sales, buy-backs, turnarounds, overnight transactions, delayed deliveries, or other terms signifying the same substantive transaction, and (2) whether the transactions are with the same or different institutions if the purpose of the transaction is to resell identical or similar securities.

(b) Federal funds sold and purchases of securities under resale agreements shall be reported gross and not netted against purchases of Federal funds and sales of securities under repurchase agreements.

5. *Loans.* (a) State separately (1) total loans and (2) allowance for loan losses and (3) unearned income.

(b) State on the balance sheet or in a note the amount of loans in each of the following categories:

(1) Commercial, financial, and agricultural.

(2) Real estate—construction.

(3) Real estate—mortgage.

(4) Installment.

(5) Foreign.

(c) (1) Include under the real estate-construction category loans secured by real estate which are made for the purpose of financing construction of real estate and land development projects.

(2) Include under the real estate-mortgage category loans payable in monthly, quarterly, or other periodic installments and secured by developed income property and personal residences.

(3) Include under the installment category loans to individuals generally repayable in monthly installments. This category shall include but not be limited to credit card and related activities, individual automobile loans, other installment loans, mobile home loans, and residential repair and modernization loans.

(4) The amount to be reported for foreign loans shall agree with the total reported at § 210.9-04(c)(1).

(5) Include under the commercial, financial, and agricultural category all loans not included in another category. This category shall include but not be limited to loans to real estate investment trusts, mortgage companies, banks, and other financial institutions; loans for carrying securities; and loans for agricultural purposes. Do not include loans secured primarily by real estate.

(d) State separately any other loan category regardless of relative size if necessary to reflect any unusual risk concentration.

(e) If the amount exceeds 5 percent of stockholders' equity, state in a note the aggregate amount of loans owed by persons related to the reporting person or any of its principal subsidiaries as directors, executive officers,[1] or principal holders of equity securities. The aggregate amount shall include (but not be limited to) loans to the foregoing persons and to (1) any corporation, venture, or organization of which any of the foregoing persons is a general partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities, (2) any trust or other estate in which any of the foregoing persons has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity, and (3) any relative or spouse of any of the foregoing persons, or any relative of such spouse, who has the same home as such person. Amounts to be reported shall include loans from the parent company or any consolidated subsidiary. It shall not be necessary to disclose amounts related to installment loans as defined in subparagraph (c)(3) above made in the ordinary course of business that (i) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other persons, and (ii) did not involve more than normal risk of collectability or present other unfavorable features.

(f) Unearned income shall be deducted separately from total loans.

(g) A series of categories other than those specified in (b) above may be used to present details of loans if considered a more appropriate presentation. The provisions of (d), (e), and (f) above shall be complied with.

(h) For each period for which an income statement is filed furnish in a note a statement of changes in the allowance for loan losses showing balances at beginning and end of the period, provision charged to income, recoveries of amounts charged off, and losses charged to the allowance.

6. *Lease financing.* State separately in a note the net investment in (a) direct financing leases and (b) leveraged leases.

7. *Bank premises and equipment.* (a) State the net amount of bank premises, equipment, and leasehold improvements.

(b) State separately in a note each major class used in the ordinary course of business such as land, building, equipment, or leasehold improvements; the accumulated depreciation and amortization; and the basis of determining the amounts. Include premises and equipment under capital leases.

8. *Due from customers on acceptances.* (a) State amounts receivable from customers on drafts and bills of exchange that have been accepted by a consolidated subsidiary bank or by other banks for the account of a consolidated subsidiary and that are outstanding—that is, not held by the subsidiary bank, on the reporting date. (If held by the subsidiary bank, they should be reported as "loans.")

9. *Other assets.* (a) State separately any of the following assets which exceeds 30 percent of stockholders' equity or any other asset which exceeds 30 percent of stockholders' equity. The remaining assets may be shown in one amount.

(1) Excess of cost over assets acquired (net of amortization).

(2) Other intangible assets (net of amortization).

(3) Other real estate.

(4) Investments in and indebtedness of affiliates and other persons.

(b) Include under other real estate all real estate owned other than that used in the ordinary course of business and state the basis or bases at which it is carried. Any reduction in book value resulting from the recognition of fair market value at the time of acquisition of other real estate shall be accounted for as a loan loss. If an allowance for real estate losses subsequent to acquisition is maintained, the amount shall be disclosed, deducted from the other real estate owned and a statement of changes in the allowance showing balances at beginning

[1] For the purpose of the disclosures in §§ 210.9-02-5(e) and 14(c) and § 210.9-05 schedule I, the term "principal subsidiaries" includes the subsidiary with the greatest amount of deposits of all consolidated bank subsidiaries and any other consolidated subsidiary in which deposits exceed 15 percent of consolidated deposits as reported at § 210.9-02-11; the term "executive officer" means the president, secretary, treasurer, any vice president in charge of a principal business function (such as loans, investment, operations administration or finance) and any other person who performs similar policymaking functions; and the term "relative" means any relationship by blood, marriage, or adoption, not more remote than first cousin.

and end of period, provision charged to income and losses charged to the allowance shall be furnished for each period for which

standing during the period and the approximate weighted average interest rate (and a brief description of the means used to com-

on bank premises of a subsidiary bank or its consolidated subsidiaries which have not

ments to resell) and interest on bank deposits.

5. *Lease financing.*

State in a note the method followed in determining the cost of investments sold, e.g., "average cost," "first-in, first-out," or "iden-

coveries of amounts charged off and losses charged to the allowance.

(e) *Balances and deposits in banks located*

and end of period, provision charged to income and losses charged to the allowance shall be furnished for each period for which an income statement is filed.

(c) State in a note (1) amounts representing investments in affiliates and investments in other persons which are accounted for by the equity method and (2) indebtedness of affiliates and indebtedness of other persons the investments in which are accounted for by the equity method. State the basis of determining the amounts reported under (1). (See § 210.5-02-10 and 11).

10. *Total assets and other debits.*

LIABILITIES AND STOCKHOLDERS' EQUITY

LIABILITIES

11. *Deposits.* (a) State separately the following deposit categories:

(1) Demand deposits in domestic bank offices.

(2) Savings deposits in domestic bank offices.

(3) Time deposits in domestic bank offices.

(4) Deposits in foreign banking offices.

(b) Include under demand deposits—domestic all domestic deposits other than savings and time deposits.

(c) Include under the savings deposits—domestic category interest bearing deposits without specified maturity or contractual provisions requiring advance notice of intention to withdraw funds. Include deposits for which a bank, optionally, may require written notice of intended withdrawal not less than 30 days in advance.

(d) Include under the time deposits—domestic category deposits subject to provisions specifying maturity or other withdrawal conditions such as time certificates of deposits, open account time deposits and deposits accumulated for the payment of personal loans.

(e) State separately in a note the aggregate of time certificates of deposit in denominations of $100,000 or more.

(f) Subcaptions (a)(2) and (a)(3) above may be combined if either one is less than 10 percent of total deposits.

12. *Short-term borrowings.* (a) State separately here or in a note amounts payable for (1) Federal funds purchased and securities sold under agreements to repurchase; (2) commercial paper; and (3) other short-term borrowings.

(b) Federal funds purchased and sales of securities under repurchase agreements shall be reported gross and not netted against sales of Federal funds and purchases of securities under resale agreements.

(c) Include as securities sold under agreements to repurchase all transactions of this type regardless of (1) whether they are called simultaneous purchases and sales, buy-backs, turnarounds, overnight transactions, delayed deliveries, or other terms signifying the same substantive transaction, and (2) whether the transactions are with the same or different institutions if the purpose of the transactions is to repurchase identical or similar securities.

(d) The weighted average interest rate and general terms (as well as formal provisions for the extension of the maturity) of each category of short-term borrowings shall be disclosed along with the maximum amount of borrowings in each category outstanding at any month-end during each period for which an end-of-period balance sheet is required. In addition, the approximate average short-term borrowings outstanding during the period and the approximate weighted average interest rate (and a brief description of the means used to compute such averages) for such aggregate short-term borrowings shall be disclosed in the notes to the financial statements.

This information is not required to be given for any category of short-term borrowings for which the approximate average balance outstanding during the period was less than 30 percent of stockholders' equity.

(e) The amount and terms (including commitment fees and the conditions under which lines may be withdrawn) of unused lines of credit for short-term financing shall be disclosed, if significant, in the notes to the financial statements. The amount of these lines of credit which support a commercial paper borrowing arrangement or similar arrangements shall be separately identified.

13. *Bank acceptances outstanding.* State the aggregate of unmatured drafts and bills of exchange accepted by a subsidiary bank, or by some other bank as its agent, less the amount of such acceptances acquired by the subsidiary bank through discount or purchase and held on the reporting date.

14. *Accounts payable and accrued liabilities.* (a) State separately any of the following liabilities which exceeds 30 percent of stockholders' equity or any other liability which exceeds 30 percent of stockholders' equity. The remaining accounts payable and accrued liabilities may be shown in one amount (see note disclosure called for in subparagraph (c) below:)

(1) Income taxes payable.

(2) Deferred income taxes.

(3) Indebtedness to affiliates and other persons (see § 210.5-02-31).

(4) Indebtedness to directors, executive officers, and principal holders (other than affiliates) of equity securities.

(b) State in a note indebtedness to affiliates and indebtedness to other persons the investments in which are accounted for by the equity method. (See § 210.5-02-31.)

(c) If the amount exceeds 5 percent of stockholders' equity, state in a note the aggregate amount owed to persons related to the reporting person or any of its principal subsidiaries as directors, executive officers, or principal holders of equity securities. The aggregate amount shall include (but not be limited to) amounts owed to the foregoing persons and to (1) any corporation, venture or organization of which any of the foregoing persons is a general partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities, (2) any trust or other estate in which any of the foregoing persons has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity and (3) any relative or spouse of any of the foregoing persons, or any relative of such spouse, who has the same home as such person. Amounts to be reported shall include amounts owed by the parent company or any consolidated subsidiary.

15. *Bonds, mortgages and similar debt.* (a) Include bonds, capital notes, debentures, mortgages and similar debt.

(b) State in a note the information required under § 210.5-02-29 (see also § 210.5-02-30).

(c) State in notes with appropriate explanations (1) the title and amount of each issue of debt of a subsidiary included in (a) above which has not been assumed or guaranteed by the registrant; and (2) any liens on bank premises of a subsidiary bank or its consolidated subsidiaries which have not been assumed by the bank subsidiary or its consolidated subsidiaries.

16. *Total liabilities.*

17. *Commitments and contingent liabilities.* (a) See § 210.3-16(i).

(b) State in a note the amount of outstanding standby letters of credit. For the purpose of this disclosure "standby letters of credit" shall include every letter of credit (or similar arrangement however named or designated) which represents an obligation to the beneficiary on the part of an issuing consolidated subsidiary bank (1) to repay money borrowed by or advanced to or for the account of the account party; (2) to make payment on account of any evidence of indebtedness undertaken by the account party; or (3) to make payment on account of any default by the account party in the performance of an obligation. Do not include standby letters of credit for which the issuing bank has either been paid an amount equal to its liability under the standby letter of credit, or has set aside sufficient funds in a segregated deposit account to cover its maximum liability.

18. *Minority interest in consolidated subsidiaries.*

STOCKHOLDERS' EQUITY

19. *Capital shares.* The classification and disclosure required by § 210.5-02-38 shall be given.

20. *Other stockholders' equity.* The classification and disclosure required by § 210.5-02-39 shall be given (see subsection 210.3-16(h)).

21. *Total stockholders' equity.*

22. *Total liabilities and stockholders' equity.*

§ 210.9-03. Income statements.

Except as otherwise permitted by the Commission, the income statements filed for persons to whom this article is applicable shall comply with the provisions of this rule (see paragraph (a) of § 210.3-01).

INTEREST INCOME

1. *Interest and fees and loans.*

(a) Include interest and service charges and fees which are related to or are an adjustment of the loan interest rate. Include interest on notes, bills and drafts that have been rediscounted with Federal Reserve or other banks or pledged as collateral to secure bills payable or for any other purpose and profits or losses resulting from the sale of acceptances and commercial paper at discount rates other than those at which such paper was purchased.

(b) Current amortization of premiums on mortgages or other loans shall be deducted from interest on loans and current accretion of discount on such items shall be added to interest on loans.

2. *Interest (and dividends if material) on investment securities.* (a) State separately (1) taxable interest income, (2) interest income exempt from Federal income taxes, and (3) dividends (if material).

(b) Include accretion of discount on securities and deduct amortization of premiums on securities.

3. *Trading account interest.* Include interest from securities carried in a dealer trading account or accounts that are held principally for resale to customers.

4. *Other interest income.* Include interest on short-term investments (Federal funds sold and securities purchased under agreements to resell) and interest on bank deposits.

5. *Lease financing.*

6. *Total interest income.*

INTEREST EXPENSE

7. *Interest on deposits.* Include interest on all deposits. State separately on the income statement or in a note interest on deposits detailed in the same categories as those specified for deposits at § 210.9-02-11 (a) and (e).

8. *Interest on short term borrowings.* Include interest on borrowed funds including Federal funds purchased, securities sold under agreements to repurchase, commercial paper and other short-term borrowings.

9. *Interest on long-term debt.* Include interest on bonds, capital notes, debentures, mortgages on bank premises, capitalized leases and similar debt.

10. *Total interest expense.*

11. *Net interest income.*

12. *Provision for loan losses.*

13. *Net interest income after provision for loan losses.*

14. *Other income.* State separately any of the following items of income which exceeds 1 percent of revenue or any other item of income which exceeds 1 percent of revenue.[5] The remaining other income may be shown in one amount.

(a) Commissions and fees from fiduciary activities.

(b) Fees for other services to customers.

(c) Commissions, fees and markups on securities underwriting and other securities activities.

(d) Profit or loss on transactions in securities in dealer trading account.

(e) Equity in earnings of unconsolidated subsidiaries and 50 percent or less owned persons.

(f) Gains or losses on disposition of investments in securities of subsidiaries and 50 percent or less owned persons.

15. *Other expenses.* (a) State separately any of the following expenses which exceeds 1 percent of revenue or any other expense which exceeds 1 percent of revenue. The remaining expenses may be shown in one amount.

(1) Salaries and employee benefits.

(2) Net occupancy expense of premises.

(3) Net cost of operation of other real estate.

(4) Minority interest in income of consolidated subsidiaries.

(b) Report in one amount the net expense of occupancy of premises used in the ordinary course of business reduced by income from premises leased to others.

(c) Report in one amount the net expense of operation of other real estate reduced by rental or other related income. Include provisions for real estate losses resulting from revaluations, of assets subsequent to acquisition, if any, and gains or losses on disposition of assets.

16. *Income or loss before income tax expense, securities gains or losses (and appropriate items below).*

17. *Income tax expense.* (See § 210.3-16(o).)

18. *Income before securities gains or losses.*

19. *Investment securities gains or losses, less applicable tax.*

[5] For the purpose of the tests of materiality under §§ 210.9-03-14 and 15, the term "revenue" includes the total of amounts reported at §§ 210.9-03-6 and 14.

State in a note the method followed in determining the cost of investments sold, e.g., "average cost," "first-in, first-out," or "identified certificate." Related income taxes shall be shown parenthetically. Gains or losses on the person's own equity securities shall not be included under this caption.

20. *Income or loss before extraordinary items.*

21. *Extraordinary items, less applicable tax.* State separately (a) extrordinary items of the person and (b) equity in extraordinary items of (1) unconsolidated subsidiaries and (2) 50 percent or less owned persons for which the equity in earnings was reported under caption 14. Indicate the nature of any material items and disclose parenthetically or otherwise the tax applicable to each.

22. *Cumulative effects of changes in accounting principles.* State separately (a) changes of the person and (b) equity in changes of (1) unconsolidated subsidiaries and (2) 50 percent or less owned persons for which the equity in earnings was reported under caption 14. Indicate the nature of any material items and disclose parenthetically or otherwise the tax applicable to each.

23. *Net income or loss.* (See § 210.9-02-20.)

24. *Earnings per share data.* Refer to the pertinent requirements in the appropriate filing form.

§ 210.9-04. Foreign activities.

(a) *General requirement.* (1) Separate disclosure concerning foreign activities (banking, bank related and nonbanking) as specified in paragraphs (c), (d), (e), (f), (g), and (h) below shall be made if (i) assets, or (ii) revenue, or (iii) income (loss) before income tax expense, or (iv) net income (loss), each as associated with foreign activities, exceeded 10 percent of the corresponding amount in the related financial statements.

(2) If disclosure is required to be made under (1) above there shall be presented separately in a note for each significant geographic areas and in the aggregate for all other geographic area not deemed significant (i) total identifiable assets (net of valuation allowances), (ii) total revenue, (iii) income (loss) before income tax and (iv) net income (loss).

(b) *Definitions.* As used in this article the following terms shall have the meanings indicated:

(1) *Foreign activities.* The term "foreign activities" includes loans and other revenue producing assets and transactions in which the debtor or customer, whether an affiliated or unaffiliated person, is domiciled outside the United States.

(2) *Revenue.* The term "revenue" includes the total of amounts reported at §§ 210.9-03-6 and 14.

(3) *Significant geographic area.* A "significant geographic area" is one whose assets, revenue or income or net income exceed 10 percent of the comparable amount as reported in the related financial statements.

(c) *Loans.* State separately each of the following categories of loans which exceeds 10 percent of total loans related to foreign activities (1) governments and official institutions, (2) banks and other financial institutions, (3) commercial and industrial, and (4) all other loans.

(d) *Allowance for loan losses.* For each period for which an income statement is filed, furnish in a note a statement of changes in the allowance for loan losses applicable to loans related to foreign activities showing balances at beginning and end of the period, provision charged to income, recoveries of amounts charged off and losses charged to the allowance.

(e) *Balances and deposits in banks located outside the United States.* Show separately (1) interest bearing deposits and balances, and (2) all other balances.

(f) *Deposit liabilities.* State separately deposits of (1) banks in foreign countries (including balances of foreign branches of other United States banks), (2) deposits of foreign governments and official institutions, (3) other foreign demand deposits, and (4) other foreign time and savings deposits.

(g) *Other borrowings.* State separately (1) short-term borrowings and (2) bonds, mortgages and similar debt related to foreign activities corresponding to the amounts reported on the balance sheet at §§ 210.9-02-12 and 15.

(h) *Revenue and income or loss.* For each period for which an income statement is filed state the amount of revenue, expenses, and income (loss) before taxes and net income (loss) associated with foreign activities. Information may be presented in the form of the income statement in § 210.9-03. State in a note the method of pricing money transfers in adjusting for funds generated or used and the nature of significant estimates and assumptions made in allocating revenue and expenses to foreign activities.

§ 210.9-05. What schedules are to be filed.

(a) Except as expressly provided otherwise in the applicable form—

(1) The schedules specified below in this section as schedules III, IV, V, and VI shall be filed as of the dates of the most recent audited balance sheet and any subsequent unaudited balance sheeet being filed for each person or group, provided that any such schedule (other than schedule V) may be omitted if both of the following conditions exist:

(i) The financial statements are being filed as part of an annual or other periodic report; and (ii) the information that would be shown in the respective columns of such schedule would reflect no changes in any issue of securities of the registrant or any significant subsidiary in excess of 5 percent of the outstanding securities of such issue as shown in the most recently filed annual report containing the schedule.

(2) Schedule V, capital shares, may also be omitted if the above two conditions exist and any information required by column G of the schedule is shown in the related balance sheet or in a note thereto.

(3) The other schedules specified below in the rule as schedules I and II shall be filed for each period for which an income statement is required to be filed for each person or group.

(b) If the information required by any schedule (including the notes thereto) may be shown in the related financial statement or in a note thereto without making such statement unclear or confusing, that procedure may be followed and the schedule omitted.

(c) The schedules shall be examined by the independent accountant if the related financial statements are so examined.

(d) The schedules prescribed by §§ 210.12-04, 05 and 11 shall be filed in support of subcaptions 9(c) and 14(b) of each balance sheet and shall be designated schedules VII, VIII and IX, respectively. These schedules shall be filed for each period for which an income statement is required to be filed. These schedules may be omitted if (1) nei-

ther the amount required to be reported in a note under subcaption 9(c) in the related

notes, drafts, bills of exchange, or bankers' acceptances having a maturity at the time

be suspended because of noncompliance with the flood plain management

notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community.

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

ther the amount required to be reported in a note under subcaption 9(c) in the related balance sheet nor the amount required to be reported in a note under subcaption 14(b) in such balance sheet exceeds 5 percent of stockholders' equity as shown by the related balance sheet at either the beginning or end of the period, or (2) there have been no material changes in the information required to be filed from that last previously reported.

Schedule I. Amounts receivable from certain persons. The schedule prescribed by § 210.12-03 shall be filed with respect to indebtedness of more than $500,000 or 2½ percent of stockholders' equity, whichever is less, which is owed or, at any time during the period for which related income statements are required to be filed, was owed by each person (including those referred to below) related to the reporting person or any of its principal subsidiaries as director, executive officer,* or principal holder of equity securities. Indebtedness to be reported for a director, officer or principal holder of equity securities shall include the aggregate of indebtedness owed by such person and indebtedness owed by any of the following which are related to such person: (1) any corporation, venture or organization of which any of the foregoing persons is a general partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities, (2) any trust or other estate in which any of the foregoing persons has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity and (3) any relative or spouse of any of the foregoing persons, or any relative of such spouse, who has the same home as such person. Indebtedness to be reported shall include amounts owed to the parent company or any consolidated subsidiary. It shall not be necessary to disclose amounts related to installment loans as defined in § 210.9-05-5(c)(3) made in the ordinary course of business that (i) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other persons, and (ii) did not involve more than normal risk of collectability or present other unfavorable features.

Schedule II. Valuation and qualifying accounts and reserves. The schedule prescribed by § 210.12-13 shall be filed in support of valuation and qualifying accounts and reserves included in each balance sheet excluding the allowances for loan losses and real estate losses.

Schedule III. Bonds, mortgages, and similar debit. The schedule prescribed by § 210.12-10 shall be filed in support of caption 15 of a balance sheet.

Schedule IV. Guarantees of securities of other issuers. The schedule prescribed by § 210.12-12 shall be filed in support of caption 15 of a balance sheet.

Schedule V. Capital shares. The schedule prescribed by § 210.12-14 shall be filed in support of caption 19 of a balance sheet.

Schedule VI. Other securities. If there are any classes of securities not included in schedules III, IV, and V, set forth in this schedule information concerning such securities corresponding to that required for the securities included in such schedules. Information need not be set forth, however, as to notes, drafts, bills of exchange, or bankers' acceptances having a maturity at the time of issuance of not exceeding one year

§ 210.12-01 [Amended]

4. In § 210.12-01 the last listed section number "§ 210.9-04" is changed to "§ 210.9-05."

§ 210.12-02 [Amended]

5. Footnote 2(b) to the table in § 210.12-02 is deleted, and footnote 2(a) is redesignated as footnote 2.

§ 210.12.02 Marketable securities—Other security investments.

* * * * *

2(b) [Deleted]

These amendments are adopted pursuant to authority in sections 6, 7, 8, 10, and 19(a) [15 U.S.C. 77f, 77g, 77h, 77j, 77s] of the Securities Act of 1933; sections 12, 13, 15(d) and 23(a) [15 U.S.C. 78l, 78m, 78o(d), 78w] of the Securities Exchange Act of 1934; sections 5(b), 14, and 20(a) [15 U.S.C. 79e, 79n, 79t] of the Public Utility Holding Company Act of 1935; and sections 8, 30, 31(c) and 38(a) [15 U.S.C. 80a-8, 80a-30(c), 80a-37(a)] of the Investment Company Act of 1940. Pursuant to section 23(a)(2) of the Securities Exchange Act, the Commission has considered the impact of these amendments on competition and is not aware of any burden that they would impose.

By the Commission.

Dated: September 7, 1978.

GEORGE A FITZSIMMONS,
Secretary.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-4479]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligibility

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: This rule lists communities where the sale of flood insurance, as authorized under the National Flood Insurance Program (NFIP), will be suspended because of noncompliance with the flood plain management requirements of the program.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), administered by the Federal Insurance Administration, enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (24 CFR Part 1909 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date subsidized flood insurance is no longer available in the community.

In addition, the Federal Insurance Administration has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended, provides that no direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elapsed since publication of a flood insurance map. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that

notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community.

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

§ 1914.6 List of suspended communities.

State	County	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Hazard area identified	Date
Alabama	Cullman	Hanceville, town of	010059-B	Mar. 12, 1974, emergency, Sept. 15, 1978, regular, Sept. 15, 1978, suspended.	Apr. 12, 1974 Dec. 19, 1975	Sept. 15, 1978.

[Docket No. FI-4480]

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Md. 20034, phone 800-638-6620.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), administered by the Federal Insurance Administration, enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administration has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, section 102 of the Flood

Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

§ 1914.6 List of eligible communities.

State	County	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Hazard area identified	Date [1]

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) is promulgating a revision to the Arizona State Implementation Plan (SIP) for the Maricopa County Air Pollution Control District. This revision will control emissions of particulate matter from fugitive dust sources. The intended effect of this action is to bring about attainment of the national ambient air quality standards for particulate matter in the Phoenix area.

(Secs. 110, 301(a), Clean Air Act as amended (42 U.S.C. 7410 and 7601(a)).)

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 78-061]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Wading River, N.J.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Burlington County Board of Chosen Freeholders, the Coast Guard is changing the regulations governing the County Road 542 drawbridge across the Wading River, mile 5.0, New Jersey. This change is being made because of a decrease in requests for opening the draw. This action will relieve the bridge owner of the burden of having a person constantly available to open the draw.

EFFECTIVE DATE: This amendment is effective on October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-0942.

SUPPLEMENTARY INFORMATION: On May 25, 1978, the Coast Guard published a proposed rule (43 FR 22411) concerning this amendment. The Commander, 3d Coast Guard District also published these proposals as a public notice dated June 15, 1978. Interested persons were given until June 27, 1978, and July 17, 1978, respectively, to submit comments.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Lt. G. S. Karavitis, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

One comment which had no objection to the proposal was received.

In consideration of the foregoing, part 117 of title 33 of the Code of Federal Regulations is amended by adding a new subparagraph (9) to § 117.225(f) to read as follows:

§ 117.225 Navigable waters in the State of New Jersey; bridges where constant attendance of draw tenders is not required.

• • • • • •

(f) • • •

(9) Wading River, Burlington County Road 542, N.J. the draw shall open on signal if at least 24 hours' notice is given.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937 (33 U.S.C. 499, 49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: September 5, 1978.

R. H. SCARBOROUGH,
Vice Admiral, U.S. Coast Guard
Acting Commandant.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 966-2]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Ventura County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, takes no action on changes to the Ventura County Air Pollution Control District (APCD) portion of the California State implementation plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 215 Fremont Street, San Francisco, Calif. 94105, Attn: Wayne A. Blackard, 415-556-7882.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (43 FR 8809) EPA published a notice of proposed rulemaking for revisions to the Ventura County APCD's rules and regulations submitted on October 13, 1977, by the California Air Resources Board for inclusion in the California SIP.

The change contained in the above submittal that is acted upon by this notice is a new rule concerning continuous emissions monitoring.

The notice of proposed rulemaking for this submittal was published on March 3, 1978 (43 FR 8809). No comments were received during the comment period.

Under section 110 of the Clean Air Act, as amended, and 40 CFR part 51, the Administrator is required to approve or disapprove regulations submitted as SIP revisions. It is the purpose of this notice to approve rule 105 and incorporate it into the California SIP and take no action on rule 71 as discussed below.

Rule 105, Continuous Emissions Monitoring, submitted on October 13, 1977, is a new rule adopted to implement the continuous monitoring program in accordance with the requirements of 40 CFR 51.19(e). This rule is approved for Ventura County APCD. However, it should be noted that the rule does not satisfy all the requirements specified under § 51.19(e) and the plan is disapproved in part under 40 CFR 52.234.

No action is being taken on Rule 71, Transfer of Gasoline Into Vehicle Fuel Tanks, since it has been superseded by the June 22, 1978, submittal and the corresponding rule will be acted on in a separate FEDERAL REGISTER notice.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301(a), Clean Air Act as amended (42 U.S.C. 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220 is amended by adding paragraph (c)(41)(iv) as follows:

§ 52.220 Identification of plan.

• • • • • •

(c) • • •

(41) • • •

(iv) Ventura County APCD.

(A) New rule 105.

• • • • • •

2. Section 52.234 is amended by adding paragraph (e)(6) as follows:

§ 52.234 Source surveillance.

• • • • • •

(e) • • •

(6) Metropolitan Los Angeles Intrastate AQCR:

(i) Ventura County APCD.

• • • • • •

[FRL 966-3]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Merced County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove changes to the Merced County Air Pollution Control District (APCD) portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 215 Fremont Street, San Francisco, Calif. 94105, Attention: Wayne A. Blackard, 415-556-7882.

SUPPLEMENTARY INFORMATION: On April 7, 1978, EPA published a notice of proposed rulemaking for revisions to the Merced County APCD's rules and regulations submitted on November 4, 1977, by the California Air Resources Board for inclusion in the California SIP.

The State also submitted regulations concerning new source performance standards and national emission standards for hazardous air pollutants; however, no action is being taken at this time as these rules will be acted upon in separate FEDERAL REGISTER notices.

The changes contained in the above submittal that are acted upon by this notice include the following:

(a) A wording change made to the rule concerning the transfer of gasoline into stationary storage containers,

(b) Amendments to the rule concerning transfer of gasoline into vehicle fuel tanks.

The notice of proposed rulemaking for this submittal was published on April 7, 1978 (43 FR 14692). No comments were received during the comment period.

Under section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove regulations submitted as SIP revisions. It is the purpose of this notice to approve and disapprove the following rules.

The revision to rule 411(b) is approved and incorporated into the California SIP.

Rule 411.1, Gasoline Transfer Into Vehicle Fuel Tanks, is disapproved because it relaxes the control of emissions and no analysis has been submitted to demonstate that this relaxation will not interfere with the attainment and maintenance of the national ambient air quality standards. Rule 411.1, Gasoline Transfer Into Vehicle Fuel Tanks, previously approved in the August 2, 1976, submittal is retained.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301(a) of the Clean Air Act as amended (42 U.S.C. §§ 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of part 52 of chapter I, title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220 is amended by adding paragraph (c)(42)(v) as follows:

§ 52.220 Identification of plan.

November 10, 1976, by the California Air Resources Board for inclusion in the California SIP.

(A) Rule 412.1

posed rulemaking (42 FR 46555) and a further notice of proposed rulemaking (42 FR 62163) for revisions to the rules of the Sierra County APCD submitted (NAAQS) and thus is not appropriate for inclusion in the SIP.

Rule 211, Process Weight Per Hour, revises an analogous rule under the trol on open buring should not be allowed. Thus both rule 302(C) and rule 319 are disapproved.

Rule 322, Mechanized Burners, is

V 43 / 179 SEP 14 1978

§ 52.220 Identification of plan.

• • • • •

(c) • • •
(42) • • •
(v) Merced County APCD.
(A) Amended rules 411(b) and 411.1.

• • • • •

2. Section 52.269 is amended by adding paragraph (b)(1)(iv) as follows:

§ 52.269 Control strategy: photochemical oxidants (hydrocarbons) and carbon monoxide.

• • • • •

(b) • • •
(1) • • •
(iv) Merced County APCD.
(A) Rule 411.1, submitted on November 4, 1977, is disapproved. Rule 411.1, submitted on August 2, 1976, remains in effect.

[FRL 966-4]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Kern County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve the changes to the Kern County Air Pollution Control District (APCD) portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 215 Fremont Street, San Francisco, Calif. 94105, Attention: Wayne A. Blackard, 415-556-7882.

SUPPLEMENTARY INFORMATION: On April 7, 1978, EPA published a notice of proposed rulemaking for revisions to the Kern County APCD's rules and regulations submitted on October 13, 1977, and November 4, 1977, November 10, 1976, by the California Air Resources Board for inclusion in the California SIP.

The changes contained in the above submittals that are being acted upon by this notice include the following:

(a) Section number change in reference to the health and safety code,

(b) Establishment of sources and pollutants to be monitored and requirements for submission data,

(c) Amendments to the rules concerning transfer of gasoline into vehicle fuel tanks.

The notice of proposed rulemaking for this submittal was published on April 7, 1978 (43 FR 14692). No comments were received during the public comment period.

Under section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapproved regulations submitted as SIP revisions.

It is the purpose of this notice to approve all of the revisions and to incorporate the rules into the California SIP. These rules have met all the EPA requirements.

Rule 108, Stack Monitoring, is approved since it partially satisfies the requirements of 40 CFR 51.19(e). However, since the rule does not satisfy all the requirements, the plan is disapproved in part under 40 CFR 52.234.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, 301(a), Clean Air Act as amended (42 U.S.C. §§ 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of part 52 of chapter I, title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220 is amended by adding paragraphs (c)(35)(xiii)(B), (c)(41)(v), and (c)(42)(vi) as follows:

§ 52.220 Identification of plan.

• • • • •

(c) • • •
(35) • • •
(xiii) • • •
(B) Rule 504.

[FRL 966-5]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Sierra County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on revisions to the Sierra County Air Pollution Control District (APCD) portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations, and to correct certain deficiencies in the SIP.

DATES: Final rulemaking actions taken in this notice will be effective on October 16, 1978. Comments on rule 213 may be submitted up to November 13, 1978. See supplementary information section for details.

ADDRESS: Comments on rule 213 should be addressed to: Regional Administrator, Attn.: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section (A-4), U.S. Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, U.S. Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105, Attn.: Wayne A. Blackard, telephone: 415-556-7882.

SUPPLEMENTARY INFORMATION: On September 16, 1977 and December 9, 1977, EPA published a notice of proposed rulemaking (42 FR 46555) and a further notice of proposed rulemaking (42 FR 62163) for revisions to the rules of the Sierra County APCD submitted to EPA by the California Air Resources Board (ARB) on June 6, 1977 for inclusion in the California SIP.

The changes contained in the June 6, 1977 submittal that are acted on in this notice include the following:

(a) Some definitions are amended.

(b) The list of exceptions to the visible emission control rule is amended.

(c) New rules are added to control pathological incineration, abrasive blasting and equipment malfunction conditions.

(d) The pollutant coverage of the rule for controlling particulate emissions based on process weight rates is changed.

(e) Some rules for controlling open outdoor fires including agricultural burning are amended.

(f) A new rule is adopted to implement the continuous monitoring program.

(g) Several administrative and procedural changes are made in the procedures before the hearing board.

(h) Minor wording changes, that do not affect the degree of control, are made to a number of rules.

(i) The sections of the California Health and Safety Code referred to in the rules are renumbered to conform to the recodification of the Code.

(j) A number of rules are renumbered.

(k) The "severability" rule is deleted.

A list of the rules considered in this notice was published as part of the September 16, 1977 notice of proposed rulemaking and the December 9, 1977 further notice of proposed rulemaking. The proposed rulemaking provided 30 days for public comments. No comments have been received.

Under Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the submitted rules as SIP revisions. It is the purpose of this notice to approve all the revisions contained in the June 6, 1977, submittal, and incorporate them into the California SIP, with the exception of those rules not being acted upon and those rules being disapproved as discussed below.

No action is being taken on Rule 203 (D and G), Exceptions; Rule 304, Exceptions to Rule 303; and Rule 307, Exceptions to Rule 306, as these rules will be addressed in a future FEDERAL REGISTER notice.

Also, no action is being taken on Rule 205, Nuisance, because the rule is not specifically directed at the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS) and thus is not appropriate for inclusion in the SIP.

Rule 211, Process Weight Per Hour, revises an analogous rule under the same rule number and title, previously approved in the January 10, 1975, submittal, by narrowing the pollutant coverage from the more inclusive "dust and fumes" to the less inclusive "dust". Since no control strategy analysis has been submitted by the APCD to demonstrate that this relaxation in control will not interfere with the attainment and maintenance of the NAAQS, EPA is disapproving rule 211 in the June 6, 1977, submittal and retaining the analogous rule in the January 10, 1975, submittal for Federal enforcement purposes.

No action is being taken on Rule 213, Storage of Petroleum Products, because EPA is now in the process of reevaluating the appropriateness of applying the vapor recovery programs specified in 40 CFR 52.255 and 40 CFR 52.256 to the districts within the area presently known as the Mountain Counties Air Basin. Preliminary information supplied by the Mountain Counties Air Basin Control Council indicates that existing ambient air quality standard excursions for oxidant in the Mountain Counties Air Basin are due to transport from the Sacramento Valley and the San Joaquin Valley rather than to the emissions of hydrocarbons within the area. Thus, EPA, by this notice, is inviting public comments on this thesis for the purpose of promulgating final approval or disapproval of rule 213. Comments should be sent to the EPA Region IX Office at the address given above. Comments received oh or before November 13, 1978, will be considered, and made available for public inspection at the EPA Region IX Office and the EPA Public Information Reference Unit. In addition, copies of the proposed rule and the preliminary analysis are available for public inspection during normal business hours at the EPA Region IX Office and at the following locations:

Sierra County Air Pollution Control District, County Courthouse, Downieville, Calif. 95936.
California Air Resources Board, 1709 11th Street, Sacramento, Calif. 95814.
Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

Rule 302(C), Exceptions to Rule 301, allows the open burning of unsalable wood waste from property being developed for commercial or residential use, subject to requirements imposed by Rule 319, Open Burning of Wood Waste on Property Where Grown. Without any showing that this relaxation will not cause any interference with the attainment and maintenance of the NAAQS, this relaxation in control on open buring should not be allowed. Thus both rule 302(C) and rule 319 are disapproved.

Rule 322, Mechanized Burners, is disapproved because it exempts open outdoor fires in mechanized burners from "no-burn day" requirements. Although a visible emission limitation of Ringlemann No. 1 is set, there is no demonstration that this new rule will not interfere with the attainment and maintenance of the NAAQS.

Rule 404, Upset Conditions, Breakdown or Scheduled Maintenance, is disapproved because it permits the automatic exemption of sources from applicable emission limitations during equipment malfunction and scheduled maintenance, and therefore could render such limitations unenforceable.

Rule 409, Public Records, revises an analogous rule under the same rule number and title, previously approved in the January 10, 1975, submittal, with some minor wording changes that do not affect the degree of control. The rule is approved because it partially satisfies the requirements of 40 CFR 51.10(e). However, since the rule does not provide for the correlation of emission data with applicable emission limitations as required by § 51.10(e), paragraph (b)(4) of the federally promulgated regulation in 40 CFR 52.224, General requirements, is retained and shall remain in effect for the district.

Rule 507, Provision of Sampling and Testing Facilities, is a new rule adopted to implement the continuous monitoring program in accordance with the requirements of 40 CFR 51.19(e). The rule is now approved; however, since the rule does not satisfy all the requirements specified in 40 CFR Part 51, Appendix P, the plan will be disapproved in part under 40 CFR Part 52.

Regulation VI revisions (which include rules 600 to 617) are approved as part of a procedure for the granting of variances. Each variance, however, must satisfy the requirements of Section 110 of the Clean Air Act and 40 CFR Part 51 in order to be approved by EPA as a revision to the SIP.

The deletion of Rule 203(j), Exceptions, is approved because the rule permitted automatic exemption of sources from the visible emission limitations during equipment breakdown, and therefore rendered such limitations potentially unenforceable.

Rule 619, Order of Abatement, previously approved in the January 10, 1975, submittal, was mistakenly listed as a deletion in the September 16, 1977, Notice of Proposed Rulemaking. Actually, the rule is replaced by Rule 610(G), Notice of Public Hearing, in the June 6, 1977, submittal and the replacement is approved.

The deletion of Rule 620, Severability, previously approved in the January 10, 1975, submittal, is approved be-

cause the omission of this rule will not cause any relaxation in the control

(B) Rule 404, Upset Conditions, Breakdown or Scheduled Maintenance, submitted on June 6, 1977,

FOR FURTHER INFORMATION CONTACT:

the national ambient air quality standards.

It is the purpose of this final rule-

approved under 40 CFR 52.223 (37 FR 19812).

• • • • •

(b) The list of exceptions to the visible emission control rule is amended.

(c) New rules are added to control pathological incineration, abrasive

cause the omission of this rule will not cause any relaxation in the control regulations.

Certification has been received from the ARB that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of Part 52 of Chapter I, title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c)(39)(viii) is added as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *
(39) * * *
(viii) Sierra County APCD.
(A) New or amended rules 102(B), 102(E), 102(S), 102(II), 102(SS), 203 (with the exception of (D) and (G)), 206(B), 207, 208, 211, 215, 216, 301, 302, 303, 308, 319, 320, 321, 322, 324, 402, 404, 407, 409, 507, 514, 516, 600 to 617.
(B) Previously approved and now deleted (without replacement) rules 203(j) and 620.

* * * * *

2. Section 52.224, paragraph (a)(2)(ii)(B) is added as follows:

§ 52.224 General requirements.

(a) * * *
(2) * * *
(ii) * * *
(B) Sierra County APCD.

* * * * *

3. Section 52.234, paragraph (e)(3) is added as follows:

§ 52.234 Source surveillance.

* * * * *

(e) * * *
(3) Sacramento Valley Intrastate AQCR:
(i) Sierra County APCD.

* * * * *

4. Section 52.271, paragraph (a)(2)(viii)(B) is added as follows:

§ 52.271 Malfunction regulations.

(a) * * *
(2) * * *
(viii) * * *

(B) Rule 404, Upset Conditions, Breakdown or Scheduled Maintenance, submitted on June 6, 1977.

* * * * *

5. Section 52.273, paragraph (a)(1)(v) is added as follows:

§ 52.273 Open burning.

(a) * * *
(1) * * *
(v) Sierra County APCD.
(A) Rule 302(C), Exceptions to Rule 301; Rule 319, Open Burning of Wood Waste on Property Where Grown; and Rule 322, Mechanized Burners, Submitted on June 6, 1977.

* * * * *

6. Section 52.275, paragraph (b)(2)(iii) is added as follows:

§ 52.275 Particulate matter control.

(a) * * *
(b) * * *
(2) * * *
(iii) Sierra County APCD.
(A) Rule 211, Process Weight Per Hour, submitted on June 6, 1977, is disapproved; and the analogous Rule 211, Process Weight Per Hour, previously approved in the January 10, 1975, submittal is retained and shall remain in effect for Federal enforcement purposes.

[FRL 952-6]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Glenn County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, take no action on changes to the Glenn County Air Pollution Control District (APCD) portion of the California State implementation plan (SIP) submitted by the Governor's designee. In addition, a portion of a rule which is now part of the applicable SIP is being disapproved. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 215 Fremont Street, San Francisco, Calif. 94105, Attn: Wayne A. Blackard, 415-556-7288.

SUPPLEMENTARY INFORMATION: On May 15, 1978 EPA published a notice of proposed rulemaking for revisions to the Glenn County APCD's rules and regulations submitted on November 4, 1977, by the California Air Resources Board for inclusion in the California SIP. In addition, EPA proposed to disapprove a portion of a rule which is now part of the applicable SIP.

The changes contained in this submittal and being acted upon by this notice include the following: The deletion of an exemption which allowed the burning of garbage and administrative and procedural changes in fee requirements.

Under section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove regulations submitted as SIP revisions.

Rules concerning new source review have been revised; however, no action is being taken at this time and these rules will be acted upon in a separate FEDERAL REGISTER notice.

A list of the rules being considered by this action was published as part of the notice of proposed rulemaking and can be found in 43 FR 20823 (May 15, 1978). Comments were received from the Glenn County APCD during the 60-day public comment period. No other comments were received.

The APCD commented on the proposed disapproval of section 77(e), Exceptions. The APCD commented that enforcement of section 77(e) is not necessary while agreeing that the rule is vague. They commented that the rule cannot be precise or definite because to be specific would require a volume on agricultural practices within the county and that operations dealing with the growing of crops, raising of fowls or animals are not precise. EPA proposed to disapprove this exemption because the terms "agricultural operations" and "other equipment" are undefined. The lack of definition for these terms renders Rule 76, Visible Emissions potentially unenforceable. Section 77(e) could be interpreted to exempt stationary sources (e.g., alfalfa dehydration, fertilizer plants) to which rule 76 is now intended to apply, and must therefore be disapproved. Thus, while enforcement of section 77(e), an exception rule, may not be necessary, enforcement of rule 76, a prohibitions rule, is necessary for the attainment and maintenance of the national ambient air quality standards.

It is the purpose of this final rulemaking notice to approve all the changes contained in the November 4, 1977, submittal and incorporate them into the California SIP with the exception of those rules not being acted upon and section 77(e) as discussed below.

Section 77(e), Exceptions, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 is disapproved. Paragraph (e) exempts "the use of other equipment in agricultural operations" from the visible emissions rule. Because the term "other equipment" is not defined, the rule is vague and unenforceable and could be interpreted to exempt stationary sources to which the regulations now apply.

Section 78, Nuisance and section 79, Exception are not appropriate for inclusion in the SIP because they are not specifically directed at the attainment and maintenance of the national ambient air quality standards. Therefore, EPA is taking no action on these rules.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110 and 301(a), Clean Air Act as amended (42 U.S.C. 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c)(42)(viii) is added as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

* * * * *

(42) * * *
(viii) Glenn County APCD.
(A) New or amended rules 82, 152, and 154.

[FRL 966-7]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Plumas County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on revisions to the Plumas County Air Pollution Control District (APCD) portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations, and to correct certain deficiencies in the SIP.

DATES: Final rulemaking actions taken in this notice will be effective on October 16, 1978. Comments on rule 213 may be submitted up to November 13, 1978. See SUPPLEMENTARY INFORMATION section for details.

ADDRESS: Comments on rule 213 should be sent to: Regional Administrator, Attention: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section (A-4), U.S. Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air and Hazardous Materials Division, U.S. Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105, Attention: Wayne A. Blackard, telephone 415-556-7882.

SUPPLEMENTARY INFORMATION: On September 16, 1977 and December 9, 1977, EPA published a notice of proposed rulemaking (42 FR 46557) and a further notice of proposed rulemaking (42 FR 62163) for revisions to the rules of the Plumas County APCD submitted to EPA by the California Air Resources Board (ARB) on June 6, 1977, for inclusion in the California SIP.

The changes contained in the June 6, 1977, submittal that are being acted on in this notice include the following:

(a) Some definitions are amended.
(b) The list of exceptions to the visible emission control rule is amended.
(c) New rules are added to control pathological incineration, abrasive blasting and equipment malfunction conditions.
(d) The pollutant coverage of the rule controlling particulate emissions based on process weight rates is changed.
(e) Several rules controlling open outdoor fires including agricultural burning are amended.
(f) A new rule is adopted to implement the continuous monitoring program.
(g) New rules are adopted to set the permit fees.
(h) Some administrative and procedural changes are made in the procedures before the hearing board.
(i) Minor wording changes, that do not affect the degree of control, are made to a number of rules.
(j) The sections of the California Health and Safety Code referred to in the rules are renumbered to conform to the recodification of the Code.
(k) The language in the California Health and Safety Code is incorporated into a number of rules.
(l) A number of rules are renumbered.

A list of the rules considered in this notice was published as part of the September 16, 1977 notice of proposed rulemaking and the December 9, 1977 further notice of proposed rulemaking. The proposed rulemaking provided 30 days for public comments. No comments have been received.

Under section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapproved the submitted rules as SIP revisions. It is the purpose of this notice to approve all the revisions contained in the June 6, 1977 submittal, and incorporate them into the California SIP, with the exception of those rules not being acted upon and those rules being disapproved as discussed below.

No action is being taken on rule 203 (D and G), Exceptions, and rule 601, Permit Fees, as the rules will be addressed in a future FEDERAL REGISTER notice.

Also, no action is being taken on rule 205, Nuisance, because the rule is not specifically directed at the attainment and maintenance of the national ambient air quality standards (NAAQS) and thus is not appropriate for inclusion in the SIP.

Rule 211, Process Weight Per Hour, revises an analogous rule under the same rule number and title, previously approved in the January 10, 1975 submittal, by narrowing the pollutant coverage from the more inclusive "particulate matter" to the less inclusive "dust." Since no control strategy anal-

ysis has been submitted by the APCD to demonstrate that this relaxation in permit requirements without an adequate control strategy analysis demon-

Rule 507, Provision of Sampling and Testing Facilities, is a new rule adopt-

(ii) Plumas County APCD.

* * * * *

visions to the Nevada County Air Pollution Control District (APCD) portion of the California State implementation plan (SIP) submitted by the

the California SIP, with the exception of those rules not being acted upon and those rules being disapproved as discussed below.

ysis has been submitted by the APCD to demonstrate that this relaxation in control will not interfere with the attainment and maintenance of the NAAQS, EPA is disapproving rule 211 in the June 6, 1977 submittal and retaining the analogous rule in the January 10, 1975 submittal for Federal enforcement purposes.

No action is being taken on rule 213, Storage of Petroleum Products, because EPA is now in the process of reevaluating the appropriateness of applying the vapor recovery programs specified in 40 CFR 52.255 and 40 CFR 52.256 to the districts within the area presently known as the Mountain Counties Air Basin. Preliminary information supplied by the Mountain Counties Air Basin Control Council indicates that existing ambient air quality standard excursions for oxidant in the Mountain Counties Air Basin are due to transport from the Sacramento Valley and the San Joaquin Valley rather than to the emissions of hydrocarbons within the area. Thus, EPA, by this notice, is inviting public comments on this thesis for the purpose of promulgating final approval or disapproval of rule 213. Comments should be sent to the EPA Region IX Office at the address given above. Comments received on or before November 13, 1978, will be considered, and made available for public inspection at the EPA Region IX Office and the EPA Public Information Reference Unit. In addition, copies of the proposed rule and the preliminary analysis are available for public inspection during normal business hours at the EPA Region IX Office and at the following locations:

Plumas County Air Pollution Control District, County Courthouse, Quincy, Calif., 95971.
California Air Resources Board, 1709 11th Street, Sacramento, Calif., 95814.
Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460

Rule 302(C) Exceptions to rule 301, allows the open burning of unsalable wood waste from property being developed for commercial or residential use, subject to requirements imposed by rule 319, Open Burning of Wood Waste on Property Where Grown. Without any showing that this additional category of open burning will not cause any interference with the attainment and maintenance of the NAAQS, this relaxation in control on open burning should not be allowed. Thus both rule 302(C) and rule 319 are disapproved.

Rule 304, Exceptions to Rule 303, is disapproved because it exempts open burning of agricultural waste at altitudes above 3,000 feet mean sea level (m.s.l.) and agricultural burning in areas above 6,000 feet (m.s.l.) from permit requirements without an adequate control strategy analysis demonstrating that these exemptions will not interfere with the attainment and maintenance of the NAAQS.

Rule 307, Exceptions to Rule 306, is disapproved because it grants five exceptions to the general rule that specifies no burning on days designated by the ARB as "no-burn days." The most significant exception is set forth in 307(A)(1) which permits the air pollution control officer to grant a special burning permit upon a showing of threatened economic loss. Economic factors are an impermissible basis upon which to condition the granting of a variance from emission limitations absent a showing that all other requirements of section 110 of the Clean Air Act as well as the NAAQS will be met. In addition, 307(A)(2) exempts the burning of empty pesticide sacks and containers; 307(B) exempts range burning between January and May; 307(C) exempts open burning of agricultural waste at altitudes above 3,000 feet (m.s.l.); and 307(D) exempts open burning at altitudes over 6,000 feet (m.s.l.) from the "no-burn day" requirements. All are disapproved because no analysis has been submitted by the District to demonstrate that these exemptions will not interfere with the attainment and maintenance of the NAAQS. 307(E) is also disapproved because it specifies the procedures for the issuing of burning permits for the above mentioned categories of open burning.

Rule 332, Mechanized Burners, is disapproved because it exempts open outdoor fires in mechanized burners from "no-burn day" requirements. Although a visible emission limitation of Ringlemann No. 1 is set, there is no demonstration that this new rule will not interfere with the attainment and maintenance of the NAAQS.

Rule 404, Upset Conditions, Breakdown, or Schedule Maintenance, is disapproved because it permits the automatic exemption of sources from applicable emission limitations during equipment malfunction and scheduled maintenance, and therefore could render the emission limitations unenforceable.

Rule 409, Public Records, is a new rule adopted to provide public availability of emission data furnished by source owners or operators. The rule is approved because it partially satisfies the requirements of 40 CFR 51.10(e). However, since the rule does not provide for the correlation of emission data with applicable emission limitations as required by § 51.10(e), paragraph (b)(4) of the federally promulgated regulation in 40 CFR 52.224, General requirements, is retained and shall remain in effect for the District.

Rule 507, Provision of Sampling and Testing Facilities, is a new rule adopted to implement the continuous monitoring program in accordance with the requirements of 40 CFR 51.19(e). The rule is now approved; however, since the rule does not satisfy all the requirements specified in 40 CFR Part 51, Appendix P, the plan will be disapproved in part under 40 CFR Part 52.

Regulation VII revisions (which include rules 700, 703, and 710) are approved as part of a procedure for the granting of variances. Each variance, however, must satisfy the requirements of section 110 of the Clean Air Act and 40 CFR Part 51 in order to be approved by EPA as a revision to the SIP.

Certification has been received from the ARB that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301(a), Clean Air Act, as amended (42 U.S.C. 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

[FRL 966-6]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Nevada County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on revisions to the Nevada County Air Pollution Control District (APCD) portion of the California State implementation plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations, and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Allyn M. Davis, Director, Air & Hazardous Materials Division, U.S. Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105, Attn: Wayne A. Blackard, telephone, 415-556-7882.

SUPPLEMENTARY INFORMATION: On September 16, 1977, EPA published a notice of proposed rulemaking (42 FR 46556) for revisions to the rules of the Nevada County APCD submitted to EPA by the California Air Resources Board (ARB) on June 6, 1977 for inclusion in the SIP.

The changes contained in the June 6, 1977 submittal that are being acted on in this notice include the following:

(a) Some definitions are amended.
(b) The list of exceptions to the visible emission control rule is amended.
(c) New rules are added to control pathological incineration and abrasive blasting.
(d) The emission standards for particulate matter are modified.
(e) Some rules for controlling open outdoor fires including agricultural burning are amended.
(f) Two new rules are adopted to implement the source surveillance programs related to source inspection and continuous monitoring, and one new rule is adopted to provide penalties for violations.
(g) Several administrative and procedural changes are made in the procedures before the hearing board.
(h) Minor wording changes, that do not affect the degree of control, are made to a number of rules.
(i) The sections of the California Health and Safety Code referred to in the rules are renumbered to conform to the recodification of the Code.
(j) A number of rules are renumbered.

A list of the rules considered in this notice was published as part of the September 16, 1977, notice of proposed rulemaking. The proposed rulemaking provided 30 days for public comments. No comments have been received.

Under section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the submitted rules as SIP revisions. It is the purpose of this notice to approve all the revisions contained in the June 6, 1977, submittal, and incorporate them into the California SIP, with the exception of those rules not being acted upon and those rules being disapproved as discussed below.

No action is being taken on Rule 203(d), *Exceptions*, as the rule will be addressed in a future FEDERAL REGISTER notice.

Also, no action is being taken on Rule 205, *Nuisance*, because the rule is not specifically directed at the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS) and thus is not appropriate for inclusion in the SIP.

Rule 304, *Exceptions to Rule 303*, is disapproved because it exempts open burning of agricultural waste at altitudes above 3,000 feet mean sea level (msl) and agricultural burning in areas above 6,000 feet (msl) from permit requirements without an adequate control strategy analysis demonstrating non-interference with the attainment and maintenance of the NAAQS.

Rule 319, *Open Burning of Wood Waste on Property Where Grown*, sets the standard procedures for carrying out open burning of unsalable wood waste from property being developed for commercial or residential use. Without any showing that this additional category of open burning will not interfere with the attainment and maintenance of the NAAQS, this relaxation in control on open burning should not be allowed. Therefore, rule 319 is disapproved.

Rule 409, *Public Records*, is a new rule adopted to provide public availability of emission data furnished by source owners or operators. The rule is approved because it partially satisfies the requirements of 40 CFR 51.10(e). However, since the rule does not provide for the correlation of emission data with applicable emission limitations as required by § 51.10(e), paragraph (b)(4) of the federally promulgated regulation in 40 CFR 52.224, *General requirements*, is retained and shall remain in effect for the district.

Rule 507, *Provision of Sampling and Testing Facilities*, is a new rule adopted to implement the continuous monitoring program in accordance with the requirements of 40 CFR 51.19(e). The rule is now approved; however, since the rule does not satisfy all the requirements specified in 40 CFR part 51 appendix P, the plan will be disapproved in part under 40 CFR part 52.

Regulation VII revisions (which include rules 700, 703, 704, 710, and 711) are approved as part of a procedure for the granting of variances. Each variance, however, must satisfy the requirements of section 110 of the Clean Air Act and 40 CFR part 51 in order to be approved by EPA as a revision to the SIP.

Certification has been received from the ARB that the public hearing re-

quirements of 40 CFR 51.4 have been satisfied.

[6730-01]

Title 46—Shipping

with the rules. However, should the Commission's monitoring of the carriers' compliance with these regulations household goods, as defined in part 1056 of this chapter, under tariffs lawfully on file with this Commission.

(c) Claims for duplicate payment and overcollection shall be accompanied by the original freight bill(s) for

quirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410 and 7601(a)).)

Dated: September 8, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of part 52 of chapter I, title 40, of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c)(39)(x) is added as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *
(39) * * *
(x) Nevada County APCD.
(A) New or amended rules 102(B), 102(E), 102(S), 102(II), 102(SS), 103, 104, 203(e and i), 206(B), 207, 216, 304, 319, 320, 321, 402, 407, 409, 507, 514, 700, 703(E and I), 704, 710 and 711(A).

* * * * *

2. Section 52.224, paragraph (a)(2)(ii)(D) is added as follows:

§ 52.224 General requirements.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. 342]

PART 1008—PROCEDURES GOVERNING THE PROCESSING, INVESTIGATION, AND DISPOSITION OF OVERCHARGE, DUPLICATE PAYMENT, OR OVERCOLLECTION CLAIMS

Procedures Governing the Processing, Investigation, and Disposition of Overcharge, Duplicate Payment, or Overcollection Claims

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: These regulations provide uniform procedures for the efficient processing, investigation, and timely disposition of overcharge, duplicate payment, and overcollection claims by motor common carriers and freight forwarders. They are issued in response to the many complaints received by the Commission concerning extended delays in the disposition of such claims and based upon the comments submitted in this proceeding.

EFFECTIVE DATE: October 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, 202-275-7693 or Harvey Gobetz, 202-275-7656.

SUPPLEMENTARY INFORMATION: This proceeding was instituted by a notice of proposed rulemaking, published in the FEDERAL REGISTER on October 7, 1977 (42 FR 54579), to consider the propriety of the practices of motor common carriers and freight forwarders in the processing and disposition of claims of overcharge, duplicate payment, and overcollection for the transportation of household goods, and to determine if new rules are necessary to govern the processing of such claims in a more expeditious manner.

As indicated in the notice, this Commission has received and continues to receive numerous complaints from shippers, receivers, and their representatives respecting the practices of motor carriers and freight forwarders in the processing of overcharge, duplicate payment, and overcollection claims. Essentially, the complaints involve either a failure by motor carriers and freight forwarders to acknowledge such claims, or extended delays in their processing and disposition.

In response to the notice over 150 initial and reply statements have been received. It is evident, that many of the parties recognize the need for uniform procedures to foster prompt and equitable handling of claims. The need for a practical, efficient, and workable method of dealing fairly with all concerned parties in processing such claims, and of protecting the public interest in the entire transportation process, is, in essence, the underlying purpose for which this proceeding was commenced.

The proposed regulations as revised and adopted require written acknowledgment of all claims, a strict time limitation for their disposition, and a flexible documentation rule which should substantially improve carrier practices and alleviate the vast majority of complaints concerning recovery or overpayments by shippers. The regulations also provide uniform procedures for the disposition of unidentified payments, overcharges, duplicate payments, and overcollections not supported by claims.

The timelag between overpayment and refund should be reduced substantially by carriers' adherence to these regulations.

A mandatory interest requirement has not been required at this time because we are not persuaded that it would result in any greater compliance with the rules. However, should the Commission's monitoring of the carriers' compliance with these regulations indicate the need for an interest requirement, this matter will be reopened for further consideration.

Complete copies of the decision in this proceeding can be obtained from the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

Accordingly, chapter X of title 49 of the Code of Federal Regulations is amended by adding a new part 1008 as follows:

Sec.
1008.1 Applicability.
1008.2 Definitions.
1008.3 Filing and processing claims.
1008.4 Documentation of claims.
1008.5 Investigation of claims.
1008.6 Claim records.
1008.7 Acknowledgment of claims.
1008.8 Disposition of claims.
1008.9 Disposition of unidentified payments, overcharges, duplicate payments, and overcollections not supported by claims.

AUTHORITY: Secs. 553 and 559 of the Administrative Procedure Act (5 U.S.C. 553 and 559) and secs. 204(a)(8), 204a, 208(a), 216(b), 217(b), 404(a), 405(c), 406a, 410(e), and 417(a) of the Interstate Commerce Act.

§ 1008.1 Applicability.

The regulations set forth in this part govern the processing of claims for overcharge, duplicate payment, or overcollection for the transportation of property in interstate or foreign commerce by motor common carriers and freight forwarders subject to part II or IV of the Interstate Commerce Act.

§ 1008.2 Definitions.

(a) "Carrier" means a motor common carrier or freight forwarder subject to part II or IV or the Interstate Commerce Act.

(b) "Overcharge" means an overcharge as defined in sections 204a(6) and 406a(6) of the Interstate Commerce Act. It also includes duplicate payments as defined in paragraph (c) of this section and overcollections as defined in paragraph (d) of this section when a dispute exists between the parties concerning such charges.

(c) "Duplicate payment" means two or more payments for transporting the same shipment. Where one or more payment is not in the exact amount of the applicable tariff rates and charges, refunds shall be made on the basis of the excess amount over the applicable tariff rates and charges.

(d) "Overcollection" means the receipt by a household goods carrier of a payment in excess of the transportation and/or accessorial charges applicable to a particular shipment of household goods, as defined in part 1056 of this chapter, under tariffs lawfully on file with this Commission.

(e) "Unidentified payment" means a payment which a carrier has received for the performance of transportation services but which the carrier is unable to match with its open accounts receivable or otherwise identify as being due.

(f) "Claimant" means any shipper or receiver, or its authorized agent, filing a request with a carrier for the refund of an overcharge, duplicate payment, or overcollection.

§ 1008.3 Filing and processing claims.

(a) A claim for overcharge, duplicate payment, or overcollection shall not be paid unless filed in writing with the carrier that collected the transportation charges. The collecting carrier shall be the carrier to process all such claims. When a claim is filed with another carrier that participated in the transportation, that carrier shall transmit the claim to the collecting carrier within 15 days after receipt of the claim. If the collecting carrier is unable to dispose of the claim for any reason, the claim may be filed with or transferred to any participating carrier for final disposition.

(b) A single claim may include more than one shipment provided the claim on each shipment involves (1) the same tariff issue or authority or circumstances, (2) single line service by the same carrier, or (3) service by the same interline carriers.

§ 1008.4 Documentation of claims.

(a) Claims for overcharge, duplicate payment, or overcollection shall be accompanied by sufficient information to allow the carriers to conduct an investigation and pay or decline the claim within the time limitations set forth in § 1008.8. Claims shall include the name of the claimant, its file number, if any, and the amount of the refund sought to be recovered, if known.

(b) Claims for overcharge shall be accompanied by the original freight bill. Additional information may include, but is not limited to, the following:

(1) The rate, classification, or commodity description or weight claimed to have been applicable.

(2) Complete tariff authority for the rate, classification, or commodity description claimed.

(3) Freight bill payment information.

(4) Other documents or data which is believed by claimant to substantiate the basis for its claim.

(c) Claims for duplicate payment and overcollection shall be accompanied by the original freight bill(s) for which charges were paid and by freight bill payment information.

(d) Regardless of the provisions of paragraphs (a), (b), and (c) of this section, the failure to provide sufficient information and documentation to allow a carrier to conduct an investigation and pay or decline the claim within the allowable time limitation shall not constitute grounds for disallowance of the claim. Rather, the carrier shall comply with § 1008.5(c) to obtain the additional information required.

(e) A carrier may accept copies instead of the original documents required to be submitted in this section where the carrier is furnished with an agreement entered into by the claimant which indemnifies the carrier for subsequent duplicate claims which might be filed and supported by the original documents.

§ 1008.5 Investigation of claims.

(a) Upon receipt of a claim, whether written or otherwise, the processing carrier shall promptly initiate an investigation and establish a file, as required by § 1008.6.

(b) If a carrier discovers an overcharge, duplicate payment, or overcollection which has not been the subject of a claim, it shall promptly initiate an investigation and comply with the provisions in § 1008.9.

(c) In the event the carrier processing the claim requires information or documents in addition to that submitted with the claim, the carrier shall promptly notify the claimant and request the information required. This includes notifying the claimant that a written claim must be filed before the carrier becomes subject to the time limits for settling such a claim under § 1008.8.

§ 1008.6 Claim records.

At the time a claim is received the carrier shall create a separate file and assign it a successive claim file number and note that the number on all documents filed in support of the claim and all records and correspondence with respect to the claim, including the written acknowledgment of receipt required under § 1008.7. If pertinent to the disposition of the claim, the carrier shall also note that number on the shipping order and delivery receipt, if any, covering the shipment involved.

§ 1008.7 Acknowledgment of claims.

Upon receipt of a written claim, the carrier shall acknowledge its receipt in writing to the claimant within 30 days

after the date of receipt except where the carrier shall have paid or declined in writing within that period. The car-

transportation charges or to the person that made duplicate payment within 30 days from the date of such

has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under

(2) Vehicle travel is restricted to public roads and the refuge entrance road to refuge headquarters. All other

ance with all applicable State regulations covering the hunting of deer.

The provisions of this special regula-

after the date of receipt except where the carrier shall have paid or declined in writing within that period. The carrier shall include the date of receipt in its written acknowledgment and shall also enter this date on the face of the written claim which shall be placed in the file for that claim.

§ 1008.8 Disposition of claims.

The processing carrier shall pay, decline to pay, or settle each written claim within 60 days after its receipt by that carrier, except where the claimant and the carrier agree in writing to a specific extension based upon extenuating circumstances. If the carrier declines to pay a claim or makes settlement in an amount different from that sought, the carrier shall notify the claimant, in writing, of the reason(s) for its action, citing tariff authority or other pertinent information developed as a result of its investigation.

§ 1008.9 Disposition of unidentified payments, overcharges, duplicate payments, and overcollections not supported by claims.

(a) Carriers shall establish procedures for identifying and properly applying all unidentified payments. If a carrier does not have sufficient information with which properly to apply such a payment, the carrier shall notify the payor of the unidentified payment within 60 days of receipt of the payment and request information which will enable it to identify the payment. If the carrier does not receive the information requested within 90 days from the date of the notice, the carrier may treat the unidentified payment as a payment in fact of freight charges owing to it. Following the 90-day period, the regular claims procedure under this part shall be applicable.

(b) When a carrier which participated in a transportation movement, but did not collect the transportation charges, finds that an overpayment has been made, that carrier shall immediately notify the collecting carrier. When the collecting carrier discovers or is notified by such a participating carrier that an overcharge, duplicate payment, or overcollection exists for any transportation charge which has not been the subject of a claim, the carrier shall create a file as if a claim had been submitted and shall record in the file the date it discovered or was notified of the overpayment. The carrier that collected the charges shall then refund the amount of the overpayment to the person who paid the transportation charges or to the person that made duplicate payment within 30 days from the date of such discovery or notification.

H. G. HOMME, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 26—PUBLIC ENTRY AND USE

Closing the Charles M. Russell National Wildlife Refuge and the UL Bend National Wildlife Refuge, Montana, to the unauthorized operation of aircraft at low altitudes

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the unauthorized operation of aircraft at low altitudes over the Charles M. Russell National Wildlife Refuge and the UL Bend National Wildlife Refuge is incompatible with the objectives for which the areas were established.

DATES: Year around (October 1, 1978, through September 30, 1979).

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Charles M. Russell National Wildlife Refuge, P.O. Box 110, Lewistown, Mont. 59457, telephone 406-538-8707.

SUPPLEMENTARY INFORMATION:

§ 26.34 Special regulations.

The unauthorized operation of all aircraft below 1,000 feet above the ground of the landing or aircraft on the Charles M. Russell National Wildlife Refuge and the UL Bend National Wildlife Refuge is prohibited. The boundaries of these areas are delineated on maps available at the refuge headquarters, Lewistown, Mont., and from the office of the area manager, U.S. Fish and Wildlife Service, Federal Building, 316 North 26th Street, Billings, Mont. 59101.

The provisions of this special regulation supplement the regulations which are set forth in Title 50, Code of Federal Regulations, Part 27.34. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

LARRY L. CALVERT,
Refuge Manager, Charles M. Russell National Wildlife Refuge, Lewistown, Mont.

OCTOBER 1, 1978.

PART 32—HUNTING

Opening of Lake Zahl National Wildlife Refuge, North Dakota, to the Public Hunting of Ring-Necked Pheasants

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening of pheasant hunting on Lake Zahl National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 20, 1978, through December 10, 1978.

FOR FURTHER INFORMATION CONTACT:

John Venegoni, Project Leader, Des Lacs National Wildlife Refuge, Kenmare, N. Dak. 58746, 701-385-4046.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game, for individual wildlife refuge areas.

The public hunting of ring-necked pheasant will be permitted on Lake Zahl National Wildlife Refuge. The open area consists of the refuge portion owned in fee title and includes 3,296 acres located in northern Williams County. Hunting shall be in accordance with all applicable State regulations covering ring-necked pheasant hunting, subject to the following conditions:

(1) No motorized vehicles will be allowed within the boundaries of the refuge.

(2) Pheasant hunting is permitted from November 20 through December 10, 1978.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas, generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 10, 1978.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 6, 1978.

JOHN VENEGONI,
Project Leader, Des Lacs National Wildlife Refuge Complex, Kenmare, N. Dak.

PART 32—HUNTING

Opening of Lostwood National Wildlife Refuge, North Dakota, to Use of Guns for the Public Taking of Deer

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening of deer hunting on Lostwood National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 17, 1978 through November 26, 1978.

FOR FURTHER INFORMATION CONTACT:

John Venegoni, Project Leader, Des Lacs National Wildlife Refuge, Kenmare, N. Dak. 58746, 701-385-4046.

SUPPLEMENTARY INFORMATION:

§32.32 Special regulations, big game for individual wildlife refuge areas.

The use of guns for the taking of deer will be permitted on Lostwood National Wildlife Refuge except within a 1½ mile square area surrounding the refuge headquarters buildings which is posted "Closed to Hunting." The area open to hunting, comprising 25,300 acres is delineated on a map available at the refuge headquarters and from the Area Manager, U.S. Fish and Wildlife Service, P.O. Box 1897, Bismarck, N. Dak. 58501. Hunting shall be in accordance with all applicable State regulations and the following special conditions.

(1) Only those hunters with special refuge permits will be permitted to take deer from November 17 through November 19, 1978. From November 20 through November 26, no special refuge permit is required. All hunters possesing appropriate state hunting permits will be permitted to take the type of deer specified on their state permit.

(2) Vehicle travel is restricted to public roads and the refuge entrance road to refuge headquarters. All other roads and trails are closed to vehicles.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 26, 1978.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 6, 1978.

PART 32—HUNTING

Opening of Agassiz National Wildlife Refuge, Minn., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Agassiz National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 4, 1978, to November 19, 1978, and November 24, 1978, to November 26, 1978, all dates inclusive from sunrise to sunset.

FOR FURTHER INFORMATION CONTACT:

Joseph Kotok, Refuge Manager, Agassiz National Wildlife Refuge, Middle River, Minn. 56737, 218-449-4115, or Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of white-tailed deer is permitted on the Agassiz National Wildlife Refuge, Minn. in all areas except those designated by closed area signs.

The open area comprised approximately 57,600 acres and is delineated on a map available at the refuge headquarters. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 26, 1978.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

PART 33—SPORT FISHING

Opening of Lake Ilo National Wildlife Refuge, North Dakota, to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to sport fishing of Lake Ilo National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: December 15, 1978 through March 25, 1979.

FOR FURTHER INFORMATION CONTACT:

John Venegoni, Project Leader, Des Lacs NWR Complex, Kenmare, N. Dak. 58746, 701-385-4046.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

Sport fishing is permitted on the Lake Ilo National Wildlife Refuge, North Dakota, only on the areas designated by signs as being open to fishing. These areas comprising 1050 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Post Office Box 25486, Denver Federal Center, Denver, Colorado 80225. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions:

(1) Fishing shall be limited to daylight hours only. The provisions of this special regulations supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in title 50 Code of Federal Regulations, part 33, and are effective through March 25, 1979. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 6, 1978.

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 285—ATLANTIC TUNA FISHERIES

Bluefin Tuna Regulations; Closure Notice

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Final rulemaking

SUMMARY: This document provides notices to those fishing for giant Alantic bluefin tuna with gear other than purse seines in the area north and east of a line drawn from a point on the southern coast of Massachusetts extending due south through Gay Head Light, Mass. into the Atlantic Ocean, that the season will close because the annal quota for that area has been caught.

EFFECTIVE DATE: September 10, 1978, at 2400 hours, e.d.t.

FOR FURTHER INFORMATION CONTACT:

Mr. William G. Gordon, Regional Director, Northeast Region, 14 Elm Street, Gloucester, Mass. 01930, telephone. 617-281-3600.

SUPPLEMENTARY INFORMATION: Pursuant to the Atlantic Tunas Convention Act of 1975, 16 U.S.C. Secs. 971-971h, final regulations implementing the recommendations of the International Commission for the Conservation of Atlantic Tunas were published in the FEDERAL REGISTER on June 21, 1978 (43 FR 26581). 50 CFR 285.13(b)(1)(i) provides that no more than 2,075 of the total annual quota of 2,250 giant Atlantic bluefin tuna allocated to those fishing with gear other than purse seines may be taken north and east of a line drawn from a point on the southern coast of Massachusetts extending due south through Gay Head Light, Mass. into the Atlantic Ocean.

The Assistant Administrator for Fisheries has determined that the annual quota of 2,075 giant Atlantic bluefin tuna allocated to be taken by fishing with gear other than purse seines in the above described area has been caught.

The Assistant Administrator has determined further that if this fishery were to continue, future levels of giant Atlantic bluefin tuna stocks could be adversely affected. Consequently, in accordance with 5 U.S.C. 553(d), it is found for good cause that the 30-day effective rule period is impractical and contrary to the public interest.

Therefore, pursuant to 50 CFR 285.12 and 285.13(d), notice is hereby given that the fishing season for giant Atlantic bluefin tuna with gear other than purse seines in the above described area will close on September 10, 1978, at 2400 hours, e.d.t.

Issued at Washington, D.C., and dated September 7, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

Title 41—Public Contracts and Property Management

CHAPTER 1—FEDERAL PROCUREMENT REGULATIONS

APPENDIX—TEMPORARY REGULATIONS

[FPR Temp. Reg. 47]

Major System Acquisitions for Automatic Data Processing (ADP) and Telecommunications

AGENCY: General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This FPR temporary regulation provides interim policies and procedures applicable to the acquisition of major ADP and telecommunications systems under the requirements of Office of Management and Budget (OMB) Circular A-109. The provisions are required to implement the reform principles of A-109 with respect to the acquisition of major ADP and telecommunication systems by executive branch agencies. The intent of the temporary regulation is to clarify the relationship between OMB Circular No. A-109, the FPR, and the Federal Property Management Regulations for these major system acquisitions.

DATES: Effective date: This regulation is effective October 16, 1978, but may be observed earlier. Expiration date: This regulation will continue in effect until canceled. Comments due on or before: December 13, 1978.

ADDRESS: Comments should be addressed to: Director, FPR Staff (FV); General Services Administration; Washington, D.C. 20406.

FOR FURTHER INFORMATION CONTACT:

Philip G. Read, Director of Federal Procurement Regulations, 703-557-8947.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).)

In 41 CFR Chapter 1, the following temporary regulation is added to the appendix at the end of the chapter to read as follows:

[Federal Procurement Regs.; Temporary Reg. 47]

To: Heads of Federal agencies.

Subject: Major system acquisitions for automatic data processing (ADP) and telecommunications.

1. *Purpose.* This FPR temporary regulation clarifies the relationship between Office of Management and Budget (OMB) Circular No. A-109, Major System Acquisitions, the Federal Procurement Regulations (FPR), and the Federal Property Management Regulations (FPMR) governing major ADP/telecommunications system procurements. The temporary regulation also provides interim policies and procedures concerning such acquisitions.

2. *Effective date.* This regulation is effective October 16, 1978, but may be observed earlier.

3. *Expiration date.* This regulation will continue in effect until canceled.

4. *Background.* a. The Commission on Government Procurement studied the Government's major system acquisition practices and recommended basic changes to promote economy, efficiency, and effectiveness in the management of the major system acquisition process. OMB Circular A-109, which implements these recommendations, was issued April 5, 1976. This OMB Circular establishes specific policy and procedural requirements for implementation by executive branch agencies. Basically, the Circular provides for:

(1) Top level management attention to the determination of agency mission needs and goals;

(2) An integrated systematic approach for establishing mission needs, and for budgeting, contracting, and managing programs;

(3) Improved opportunities for innovative private sector contributions to national needs; and

(4) Early communication with the Congress and OMB in the acquisition process by relating major system acquisitions to agency mission needs and goals. OMB Circular A-10 relating to budget estimates establishes requirements that should be followed in the communication to the Congress. OMB Circular A-11 relating to ADP and telecommunication requirements establishes requirements that should be followed in the preparation and submission of budget estimates to OMB.

b. The decision whether ADP and/or telecommunications major systems are required is the responsibility of the using agency. Under OMB Circular A-109 the using agency head establishes dollar thresholds for the determination of which agency programs are to be considered major system acquisitions for that agency.

c. The fact that the acquistions of major systems are made in accordance with OMB Circular A-109 does not alleviate the need for compliance with the applicable provisions of the FPR and/or the FPMR. Accordingly, this temporary regulation describes the responsibilities of the using agency after the agency's decision is made to acquire under the A-109 policies. In addition, this temporary regulation describes the responsibilities of the General Services Administration (GSA) when GSA procures the major ADP or telecommunication system for the using agency or delegates the authority to the using agency to conduct the procurement.

d. In August 1976, the Office of Federal Procurement Policy (OFPP) published pamphlet No. 1, titled "Major System Acquisitions, A Discussion of the Application of OMB Circular No. A-109." an OFPP pamphet setting forth the application of A-109 policies to the acquisition of major ADP and telecommunications systems is being developed by GSA and OFPP. The new pamphlet will supplement the provisions of this temporary regulation.

5. *Policy.* The major system acquisition procedures described in OMB Circular A-109 are designed to maximize competition and encourage innovative solutions to agency mission needs. Accordingly, major ADP and/or telecommunications systems shall be acquired in accordance with this regulation, other applicable provisions of the FPR and/or FPMR, the OFPP pamphlet and agency A-109 implementing procedures to meet agency mission requirements.

6. *Agency action.*—a. *Using agency responsibilities prior to the contracting phases of the acquisition.* (1) The using agency shall perform an analysis of mission needs. However, the advice and assistance of GSA may be requested in performing the analysis, particularly in regard to contemporary experience which may be applicable to the agency need. Requests for assistance should be addressed to General Services Administration, Agency Services Division (CDS), Washington, D.C. 20405.

(2) The agency shall advise GSA upon agency head approval of the mission need statement (Key Decision I) and of the assignment of the program manager when major ADT/telecommunications equipment or services (systems) are to be acquired in accordance with A-109.

(3) The agency is responsible for the development of the system acquisition strategy and plan. However, since this plan will become the blueprint for the procurement, it should be developed in coordination with GSA. Participation by GSA may be arranged by contacting the Agency Service Division.

(4) The agency program manager shall forward the approved major system procurement request to GSA (CDS). The request shall include applicable data required in the agency procurement request (APR) as required by FPR § 1-4.1104 or the GSA Form 2068, Request for ADP Service, as required by FPMR § 101-36.203-2. In addition, the request should include:

(a) The user mission need statement, approved in accordance with applicable directives (Key Decision I—Approval of Need);

(b) The name and telephone number of the designated program manager togerher with the approved charter outlining the manager's responsibilities, authority, and accountability; and

(c) The system acquisition strategy and plan, approved by the program manager.

b. *GSA responsibilities prior to the contracting phases of the acquisition.* (1) GSA will advise the agency, as requested, in their mission analysis efforts to the maximum practicable extent.

(2) GSA will participate, in an advisory role to the using agency program manager, in the development of the

system acquisition strategy and plan, upon request.

(3) Based on the major system procurement request, GSA will assist the agency in preparing the solicitation document. Assistance may be requested in the development of the evaluation criteria and in the evaluation of proposals. GSA will participate in the negotiation of the contract upon request.

(4) GSA will assist the agency in the implementation. For example, the Government could acquire ADPE and software in accordance with the concepts, the technical, judgmental, and total cost criteria to be used in the evaluation of alternative system

proposed rules

V 43 / 179 SE 14 78 V 4

system acquisition strategy and plan, upon request.

(3) Based on the major system procurement request, GSA will:

(a) Delegate authority to the using agency to conduct the procurement;

(b) Delegate authority to the using agency to conduct the procurement action subject to GSA participation to the extent specified in the delegation; or

(c) Conduct the procurement on behalf of the using agency.

c. *Contracting under A-109 procedures.* When A-109 policies are applicable, normally only one solicitation at the beginning of the exploration of alternative system design concepts will be used. The scope and basis for selection of the solicitation may, however, vary depending on the complexity of the mission need and the acquisition strategy. For example, in complex situations the solicitation may request proposals which describe the contractor's capabilities, understanding of the mission need, approach to developing a system design concept to meet the need, and identify the personnel which would be assigned to the contract; or in less complex situations the solicitation may request proposals which define the contractor's recommended system design concept. In either situation, the evaluation of proposals will result in the selection of two or more contractors to develop or further define recommended system design concepts. When evaluation of the contracted efforts shows sufficient definition of concepts, program manager recommendations will go forward for using agency head Key Decision II—Approval of concepts for Demonstration, or Key Decision III—Approval of Full Implementation. If a demonstration of concept phase is approved, two or more of the remaining contractors in the competition will be selected to verify their concepts and design. Evaluation and selection of the final contractor will be based on this phase. However, it does not necessarily follow that the system contractor would be responsible for all aspects of the full implementation. For example, the Government could acquire ADPE and software in accordance with the system contractor's performance specifications and furnish it to the contractor for incorporation into his system implementation. The using agency head Key Decision IV—Approval for Production, will apply in the case where a multiple quantity of systems are required to meet the agency need.

d. *Using agency responsibilities when GSA delegates contracting action to the using agency.* When the agency is acting under a delegation of procurement authority pursuant to paragraphs 6b(3) (a) or (b) of this temporary regulation, the agency shall conduct the procurement in compliance with applicable procurement policies, regulations, and, in particular, the specific terms of the delegation.

e. *Using agency responsibilities when GSA procures for the using agency.* (1) When GSA elects to conduct the procurement under paragraph 6b(3) (c) of this temporary regulation, the procurement is a joint endeavor. Agency responsibilities shall be as set forth in FPR § 1-4.1105-1, as modified and supplemented in this subparagraph 6e.

(2) The agency shall submit its determination and findings to support the authorization to procure by negotiation.

(3) With reference to paragraph (b) of § 1-4.1105-1, the technical portion of the solicitation document should cover the statement of work, the functional specification addressing the mission need statement, limitations and constraints, environment, facilities, and work force, urgency and priorities, transitioning, changes, growth potential, and other requirements that must be met by the offerors. Other information that the offerors need in order to properly construct their proposal shall be provided. The solicitation should outline the overall acquisition strategy, the specific evaluation criteria for the initial contracting phase, and criteria for follow-on phases. If the initial contracts will be for system design concepts, the technical, judgmental, and total cost criteria to be used in the evaluation of alternative system design concepts should be provided to assist offerors in preparing for the subsequent phases of the acquisition.

(4) The agency shall provide for the necessary personnel for evaluation of the concept designs and demonstration contracts and for the selection of alternatives for further consideration.

(5) The agency shall provide copies of agency head approvals (Key Decisions).

f. *GSA responsibilities when GSA procures for the using agency.* (1) When conducting the procurement, GSA's responsibilities will be as set forth in FPR § 1-4.1105-2, as modified and supplemented in this subparagraph 6f.

(2) When evaluation criteria includes technical considerations (or points), GSA will insure that the evaluations criteria for selecting the successful offeror from the final acceptable alternatives will result in meeting the using agency's need at the lowest ultimate overall cost, price and other factors considered.

7. *Effect on other issuances.* Notwithstanding any limitations of applicability of the FPR or the FPMR, the provisions referenced in this temporary regulation apply to all ADP and telecommunications major system acquisitions by executive branch agencies subject to the provisions of OMB Circular No. A-109.

8. *Solicitation of comments.* Notwithstanding the provisions of this temporary regulation, the views of agencies and other interested parties are invited regarding the policy and procedures that should be adopted in the future. All comments received on or before December 13, 1978, will be considered.

JAY SOLOMON,
Administrator
General Services.

SEPTEMBER 12, 1978.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[7 CFR Part 1940]

[FmHA Instruction 1940-M]

FLOOD PLAIN MANAGEMENT

Proposed Addition of Subpart

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration proposes to add a new subpart to its regulations to provide for flood plain management. This action is being taken to implement an Executive order. The intended effect of this action is to insure that flood plains are properly managed and that construction is not undertaken or the flood plain changed unless there are no other practicable alternatives.

DATES: Comments must be received on or before November 13, 1978.

ADDRESS: Submit written comments to the office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. Cecil W. Rose, 202-447-3394.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration proposes to amend its regulations by issuing a new Subpart M, "Flood Plain Management," in Part 1940, Chapter XVIII, Title 7 of the Code of Federal Regulations. This subpart will provide regulations for compliance with the Executive Order 11988 regarding all programs and activities administered by Farmers Home Administration. Therefore, as proposed, part 1940, subpart M reads as follows:

Subpart M—Flood Plain Management

Sec.
1940.601 Introduction.
1940.602 Policy.
1940.603 [Reserved]
1940.604 Definitions.
1940.605-1940.610 [Reserved]
1940.611 Flood plain identification.
1940.612 Actions to be taken if proposed action is located above base flood plain.
1940.613 Actions taken if project lies within the base flood plain.
1940.614 Facilities financed with Rural Housing (RH) or Rural Rental Housing (RRH) funds only.
1940.615 Floodproofing of low risk facilities within the flood plain.
1940.616-1940.620 [Reserved]
1940.621 Notices required after the evaulation of the flood plain.
1940.622 Flood plain evaluation as part of an Environmental Impact Statement (EIS).
1940.623 Floodproofing of the facility.
1940.624 Acquired property.
1940.625 Compliance with National Flood Insurance.
1940.626-1940.650 [Reserved]

AUTHORITY: E.O. 1198; 7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; Sec. 10 Pub. L. 93-357; 88 State 392; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistance Secretary for Rural Development, 7 CFR 2.70; delegations of authority by Dir., OEO 29 FR 14764, 33 FR 9850.

Subpart M—Flood Plain Management

§ 1940.601 Introduction.

This subpart prescribes agency policies, procedures and guidelines for compliance with the President's Executive Order 11988 for all programs or activities administered by the Farmers Home Administration (FmHA). This Executive order requires that FmHA will determine whether to finance the development of a facility located in a flood plain or take other actions in a flood plain.

§ 1940.602 Policy.

(a) It is FmHA's policy to avoid, to the extent possible, the long and short term adverse impacts associated with the occupancy and modification of flood plains, and to avoid direct and indirect support of flood plain development unless there is no practicable alternative to the development.

(b) FmHA's policy is in basic conformance with a "unified national program for flood plain management," issued by the U.S. Water Resources Council. A copy will be available in each State office.

(c) FmHA will support policies to reduce risk of floods and minimize impacts of floods on human safety, health and welfare, and restore and preserve the natural and beneficial values served by flood plains by:

(1) Providing guidance, training, and assistance by the State Director to County Supervisors and District Directors as needed, so that they are capable of determining whether actions are to be taken within flood plains and if an affirmative decision is reached, the safeguards that will be required.

(2) Requiring compliance with existing laws, statutes, ordinances, etc., of Federal, State or local governments that provide standards for regulation or use of the flood plain in question.

(3) Carrying out its responsibilities for making loan and grants for all programs administered by FmHA.

(4) Managing and disposing of acquired property, lands, and facilities to comply with agency regulations.

§ 1940.603 [Reserved]

§ 1940.604 Definitions.

(a) *Action.* Action means any Federal activity including: (1) Acquiring, managing, and disposing of Federal lands and facilities; (2) providing federally undertaken, financed, or assisted construction and improvements, including guaranteed loans; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. Normal farming operations including extant or normal maintenance and repairs of existing facilities shall not be considered as an action.

(b) *Base flood.* The 100-year flood has a magnitude that may be equaled once every 100 years on the average. It may also be called the "100-year frequency flood" or the 1 percent chance flood.

(c) *Flood plains.* The lowland and relatively flat areas adjoining inland and coastal waters, including at a minimum, that area subject to a 1 percent or greater chance of flooding in any given year.

(d) *Flood hazard.* The risk to life or damage to property from overflows of a river or stream channel; extraordinary waves or tides occurring on lakes, estuaries, or ocean shores; flood flows in intermittent or normally dry streams; floods on tributary streams; floods caused by accumulated debris or ice in rivers; or other similar events.

(e) *Flood hazard zone.* The area inundated by the base flood.

(f) *Flood proofing.* The actions taken to eliminate or greatly curtail flood

damage to buildings, land, or structures for the base flood.

(g) *Flood evaluation.* The process of

§ 1940.612 Actions to be taken if proposed action is located above base flood plain.

and the functional need for locating the proposed action in the flood plain.

(2) If the State Director determines

(2) Determine whether a 100-year flood would cause moderate or exces-

per. This notice will explain why the action is being taken in the floodplain

§§ 1940.626-1940.650 [Reserved]

Dated: September 6, 1978.

damage to buildings, land, or structures for the base flood.

(g) *Flood evaluation.* The process of identifying such factors as flood area, depth of water, velocities, pressure, rates of rise, duration, seasonality, probability of occurrence, probable load of debris and pollutants, and assessing potential damage that may be caused by these factors.

(h) *Impedance of flow.* The obstruction of flow caused by the action proposed during a base flood which causes significant increase is ordinarily considered as 1 foot or more increase in depth or a velocity increase of one-half foot per second or greater.

(i) *Practicable.* Practicable means capable of being done within existing constraints. The test of what is practicable depends upon the situation and includes consideration of the pertinent factors, such as environment, cost, technology, etc.

§ 1940.605–1940.610 [Reserved]

§ 1940.611 Flood plain identification.

Before taking any action, FmHA will determine whether the project to be financed or the action to be taken will occur in a base flood plain area and whether or not flooding will significantly affect the utility of the facility or development. To identify a flood plain for a base flood the County Supervisor will:

(a) Review Federal Insurance Administration (FIA) maps, or more detailed maps of the area if available, from county or State agencies.

(b) In cases where FIA has identified an area as having special flood hazards but has not established the projected elevations of a 100-year flood, the State Director may accept the findings of other State or Federal agencies as well as reliable private firms to establish the 100-year flood level.

(c) Where the project to be financed has not been clearly delineated or there are strong indications that existing maps or surveys are incomplete or are in error, the applicant may provide the following information for FmHA consideration.

(1) Estimated elevations of the base flood level from the Corps of Engineers, Soil Conservation Service (SCS) or other governmental agencies at the location of the project.

(2) Initial and final contour elevations of the property to be developed, by SCS, a private consulting engineer, registered land surveyor, or other recognized qualified individual.

(d) When buildings are to be financed in the base flood area refer to part 1806 subpart B (FmHA instruction 426.2).

§ 1940.612 Actions to be taken if proposed action is located above base flood plain.

If, as a result of the study of maps, elevations, or contours it is determined that the proposed action to be financed or taken will rest entirely above the base flood plain, no further studies or flood plain identification is required. The County Supervisor will use either Form FmHA 440-46, "Environmental Impact Assessment," appraisal reports, or other means to document that the flood plain has been identified and the proposed action does not fall within the flood plain and proceed with the action.

§ 1940.613 Actions taken if project lies within the base flood plain.

(a) If the flood plain identification shows that the proposed action will be located in a flood plain, the County Supervisor will include in the loan or grant docket the following:

(1) Evaluation of the potential flood hazard.

(2) Evaluation of any practical alternatives consistent with the law and FmHA procedures that will allow locating the facility outside the flood plain.

(3) Evaluation of proposals for structures to be located within the base flood area with technical assistance from the local SCS office, private surveyors, or private engineers provided by the applicant to determine that the flood hazard will be minimal with the floodproofing proposed.

(4) Review proposals for subdivisions or large rural businesses or industries, schools, and the like to be constructed, rehabilitated, or floodproofed within the base flood area.

(5) Evaluate alternative sites within the flood plain and show that the site selected is subject to the least flood damage.

(6) Document the actions to be taken to floodproof the facility.

(7) The County Supervisor will provide supporting documentation and forward the information to the State Director.

(b) After the County Supervisor has determined that the proposed action will occur within a flood plain and has forwarded the above documentation to the State Director, the State Director shall:

(1) Determine whether a practicable alternative exists to locating the proposed action in the flood plain. Consideration shall be given to alternate sites, alternate actions, and the taking of no action. Consideration shall also be given to factors including but not limited to: Conservation, economics, natural and beneficial values served by flood plains, impact of floods on human safety, locational advantage, and the functional need for locating the proposed action in the flood plain.

(2) If the State Director determines that the only practicable alternative is locating the facility in the flood plain, consider the impact of the proposed action and modify the proposed action to minimize potential impact on the flood plain.

§ 1940.614 Facilities financed with Rural Housing (RH) or Rural Rental Housing (RRH) funds only.

(a) If the proposed action is to provide financial assistance to buy a dwelling or multi-unit housing facility:

(1) The first floor elevation of the habitable space of the dwelling or housing unit must be above the 100-year flood level, and

(2) The housing must be served by public utilities and facilities, such as sewer, gas, electrical, and water systems that are located and constructed to minimize or eliminate flood damage or have an onsite water supply system and waste disposal system constructed to avoid impairment of such systems including contamination of the water supply by the waste disposal system.

(b) If the proposed action is to provide financial assistance to build or provide substantial improvement, the requirements of paragraph (a)(1) of this section must be met. All construction must meet the requirements of the applicable Minimum Property Standards.

(c) If the financial assistance is to make minor repairs, the conditions of paragraphs (a) (1) and (2) of this section must be met or the building must have existed on the site prior to the date the area was identified as having special flood or mudslide hazards and, the loan approval official must determine that the dwelling is suitable as a residence.

(d) When applications for financial assistance are received in areas identified as having special flood or mudslide hazards, the loan approval official will consider the expected severity and frequency of floods and mudslides in determining whether any housing loans should be made in the area. The loan approval official should be sure, if loans are made, that the objectives of the loans can be accomplished and that the Government's financial interest will be adequately protected.

(e) In cases where the FmHA has financed dwellings in an area now identified as being in a special flood hazard area and the family wishes to sell the property to an applicant who seeks FmHA assistance to buy or assume the existing loan on the property, the following will apply:

(1) Members of our field staff must determine whether the house is structurally sound and should be retained in the programs; and

(2) Determine whether a 100-year flood would cause moderate or excessive damage to the property.

(f) In cases where the dwelling is not structurally sound or the occurrence of a 100-year flood would cause excessive damage to the property, a loan or transfer should not be processed for an eligible applicant. If, however, the house is structurally sound and the occurrence of a 100-year flood would cause only moderate damage to the property, an RH loan could be made to buy the dwelling or a transfer made to an eligible applicant provided the new applicant understands and agrees in writing that the dwelling is located in a special flood hazard area, that the first floor elevation of the dwelling is not above the 100-year flood level, and that National Flood Insurance must be maintained on the property until the FmHA indebtedness is paid in full.

§ 1940.615 Floodproofing of low risk facilities within the flood plain.

(a) Proposed facilities such as leveled land, terraces, and agricultural drainage facilities will be reviewed by the County Supervisor with assistance by the District Director to determine whether such facilities would be substantially damaged by the base flood.

(b) Facilities such as houses, rural businesses, machine storage sheds, milk barns, and the like will be floodproofed. Outlet drains are to be designed so that they can be used by auxiliary pumps during the base flood period whenever practical. Assistance in this regard may be requested from SCS or the State Director.

(c) Water facilities may be located in floodplains by installing such items as grout, pitless adapters, sanitary well seals, etc., so that water supplies can be operated without being polluted during reasonable periods of inundation.

(d) Septic tanks shall be designed with excess storage capacity and provided with adequate weight so they will not float out of the ground during periods of inundation. Septic tanks and absorption fields will not be used when the period of inundation exceeds 10 days under base flood conditions.

§§ 1940.616–1940.620 [Reserved]

§ 1940.621 Notices required after the evaluation of the floodplain.

(a) *Actions where there is no practicable alternative to locating in the floodplain.* If the State Director determines that there is no practicable alternative to locating the proposed action in a floodplain, the County Supervisor will inform the applicant to prepare a notice of proposed actions for projects which would involve an action in the floodplain. Such notice will be published in the local newspaper. This notice will explain why the action is being taken in the floodplain and provide a brief description of the proposal together with the economic justification and evaluation of the project. The notice will also show the address where the general public can review the facility plans during normal working hours.

(b) *On projects requiring compliance with OMB Circular A-95.* On all applicant projects requiring compliance with OMB Circular A-95, the applicant will include the following information along with the SF 424, "Federal Assistance," to the appropriate clearinghouse(s) for comment with a copy of the notice forwarded to the FmHA County Office.

(1) Floodplain map with project location indicated thereon.

(2) Reasons why facility is proposed to be located in the floodplain.

(3) Statement indicating whether action conforms to applicable State of local floodplain protection standards.

(4) List of alternatives considered.

(5) The clearinghouse(s) will be allowed 30 days for comment prior to FmHA taking any further action on the application. The applicant will provide the County Supervisor with written notice of any comments, or lack of comments, received from the clearinghouse(s) at the end of the specified period.

§ 1940.622 Floodplain evaluation as part of an environmental impact statement (EIS).

In those cases where it is determined through the environmental assessment that an EIS is required, a complete floodplain evaluation will be part of the EIS.

§ 1940.623 Floodproofing of the facility.

The State Director will determine whether the facilities to be constructed in the floodplain are floodproofed in a manner that the flood hazard is minimal, and whether the facility can reasonably be operated during the indundation period. The applicant will obtain and pay for any necessary engineering studies required by the State Director to support the determination.

§ 1940.624 Acquired property.

Disposition of inventory property which may be in floodplains will need to be conveyed by deeds containing the appropriate restrictions. Such cases will be referred to the National Office for for review and advice regarding necessary actions.

§ 1940.625 Compliance with National Flood Insurance.

The requirements of part 1806 subpart B (FmHA instruction 426.2) will be followed regarding flood insurance requirements.

[FmHA Instruction 1940-Q]

PROTECTION OF WETLANDS

Proposed Addition of Subpart

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration proposes to add a new subpart to its regulations to provide for the preservation of wetlands. This action is being taken to implement the provisions of an Executive order. The intended effect of the action is to assure the protection of wetlands by not providing assistance to applicants whose proposed construction would interfere with or destroy wetlands.

DATE: Comments must be received on or before November 13, 1978.

ADDRESS: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Mr. Cecil W. Rose, 202-447-3394.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration proposes to amend its regulations by issuing a new subpart Q, "Protection of Wetlands," in part 1940, chapter XVIII, title 7 of the Code of Federal Regulations. This subpart will provide regulations for compliance with Executive Order 11990 regarding all programs and activities administered by the Farmers Home Administration. Therefore, as proposed, part 1940, subpart Q reads as follows:

Subpart Q—Protection of Wetlands

Sec.

ceived. All comments submitted will be available, both before and after the closing date for comments, in the

under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transpor-

1940.815-1940.850 [Reserved]

AUTHORITY: E.O. 11990; 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; Sec. 10 Pub. L. 93-357, 88 Stat. 392; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.

Subpart Q—Protection of Wetlands

§ 1940.801 Introduction.

This subpart prescribes Farmers Home Administration (FmHA) policies, procedures, and guidelines for compliance with the President's Executive Order 11990 for all programs or activities administered by FmHA. This Executive order requires that FmHA (a) make decisions whether to finance the development or otherwise interfere with the wetland, and (b) assure that actions of the agency are directed toward protecting our wetlands.

§ 1940.802 Policy.

It is the general policy of the FmHA to avoid providing financial assistance for new construction located in wetlands unless the State Director finds: (a) that there is no practicable alternative to such new construction, and (b) that the proposed new construction includes all practicable measures to minimize harm to wetlands which may result from such use.

§ 1940.803 Definitions.

(a) *Wetland.* The term "wetland" means those areas that are inundated by surface or ground water with a frequency sufficient to support a prevalence of aquatic vegetation or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetland may include swamps, marshes, bogs, sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds.

(b) *New construction.* New construction shall consist of draining, dredging, channelizing, filling, diking, impounding, and related activities or part thereof together with the building facilities after the wetland has been drained or altered. Normal farming operations and maintenance of existing facilities are not considered to be new construction.

(c) *Practicable.* Practicable means capable of being done within existing constraints. The test of what is practicable depends upon the situation and includes consideration of the pertinent factors such as environment and cost of technology.

§§ 1940.804-1940.810 [Reserved]

§ 1940.811 Determination whether area is a wetland.

If an FmHA appraisal, U.S. Geological Service maps, local county maps, or other source material, indicate that the area to be developed is a wetland, the County Supervisor will document the facts and submit them to the State Director for review before new construction is to take place on wetlands and a final determination is made. The State Director will determine whether to proceed with the new construction before funds are allocated or other commitments have been made. If the County Supervisor, upon inspection of the area where new construction is to be commenced, is unable to determine whether the area is a wetland, he/she should contact the local Soil Conservation Service (SCS) office and seek assistance. The local SCS representative may determine that an area is a wetland in those questionable areas if the predominate species of grasses or vegetation are of the variety usually supported on soil which is seasonally wet.

§ 1940.812 Decisionmaking process.

(a) The State Director will determine whether there is a practicable alternative to locating the new construction on wetlands.

(b) In carrying out these activities the State Director shall consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are:

(1) Public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion;

(2) Maintenance of natural systems, including conservation and long-term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and

(3) Other uses of wetlands in the public interest, including recreational, scientific, and cultural uses.

(c) If there appears to be no practicable alternative to locating the new construction on wetlands, the State Director will determine that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use. In making this determination, economic, environmental, and other pertinent factors may be taken into account.

§ 1940.813 Notices required after the evaluation of wetland.

(a) *Projects involving new construction.* If it has been determined that the project will constitute new construction and will have an impact on a wetland, the County Supervisor will inform the applicant to prepare a notice of proposed actions for projects which impact on the wetland. Such notice will be published in the local newspaper. This notice will explain why the action is being taken in the wetland and will provide a brief description of the proposal together with the economic justification and evaluation of the project. The notice will also show the address of the location where the general public can review plans during normal working hours.

(b) *Projects requiring compliance with OMB Circular A-95.* On all projects requiring compliance with OMB Circular A-95, the applicant will include the following information along with the SF 424, "Federal Assistance," to the appropriate clearinghouse(s) for comment with a copy of notice forwarded to the FmHA County Office.

(1) Wetland map with project location indicated thereon.

(2) Reasons why facility is proposed to be located in the wetland.

(3) Statement indicating whether action conforms to applicable State or local wetland protection standards.

(4) List of alternatives considered.

(5) The clearinghouse(s) will be allowed 30 days for comment prior to FmHA taking any further action on the application. The applicant will provide the County Supervisor with written notice of any comments, or lack of comments, received from the clearinghouse(s) at end of period specified.

(c) *Wetland evaluation as part of an Environmental Impact Statement (EIS).* In those cases where it is determined through the environmental assessment that an EIS is required, a complete wetland evaluation will be part of the EIS.

§ 1940.814 Acquired property.

Disposition of inventory property which may be located in wetlands will need to be conveyed by deeds containing the appropriate restrictions. Such cases will be referred to the National Office for necessary actions.

§§ 1940.815-1940.850 [Reserved]

Dated: September 6, 1978.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 78-NE-16]

TRANSITION AREA

Proposed Designation of the State of New Hampshire as a 1,200-Foot Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice (NPRM) proposes to designate the entire State of New Hampshire as a 1,200-foot transition area. This action would consolidate all existing 1,200-foot transition areas in the State and converts a small segment of remaining uncontrolled airspace in the State (about 200 square miles) to controlled airspace, to be defined as the "State of New Hampshire Transition Area."

DATE: Comments must be received on or before October 4, 1978.

ADDRESS: Send comments to the Federal Aviation Administration, Office of the Regional Counsel, ANE-7, Attention: Rules Docket Clerk, Docket No. 78-NE-16, 12 New England Executive Park, Burlington, Mass. 01803.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 12 New England Executive Park, Burlington, Mass. 01803.

FOR FURTHER INFORMATION CONTACT:

Richard G. Carlson, Operations Procedures and Airspace Branch, ANE-536, Federal Aviation Administration, Air Traffic Division, 12 New England Executive Park, Burlington, Mass. 01803; telephone 617-273-7285.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking process by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted to the Office of the Regional Counsel, ANE-7, Attention: Rules Docket Clerk, Docket No. 78-NE-16, Federal Aviation Administration, 12 New England Executive Park, Burlington, Mass. 01803. All communications received on or before October 4, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of the Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington D.C. 20591, or by calling 202-426-8085. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would establish the State of New Hampshire Transition Area. Presently, about 98 percent of the airspace in New Hampshire is designated as transition area, all contiguous. This proposal would consolidate all the existing transition areas which are now listed in Part 71 of the Federal Aviation Regulations under numerous geographic names into a single 1,200-foot transition area. It would also require that a small segment of uncontrolled airspace, about 200 square miles, be converted to controlled airspace. This amendment will simplify charting and reduce the possibility of pilot confusion in distinguishing the boundaries of designated controlled airspace.

THE PROPOSED AMENDMENT

Accordingly, the FAA proposes to amend § 71. 181 of Part 71 of the Federal Aviation Regulations (14 CFR 71.181) as follows:

1. By designating a new transition area to read:

STATE OF NEW HAMPSHIRE TRANSITION AREA

"That airspace extending upward from 1,200-feet above the surface within the territorial boundaries of the State of New Hampshire, including offshore airspace beginning at latitude 42°56'00" N., longitude 70°34'00" W.; to latitude 42°56'00" N., longitude 70°25'00" W.; to latitude 42°43'15" N., longitude 70°25'00" W., to latitude 42°41'20" N., longitude 70°30'00" W.; to latitude 42°52'00" N., longitude 70°45'00" W., then via state territorial boundaries to point of beginning."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)).) sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Burlington, Mass., on August 22, 1978.

ROBERT E. WHITTINGTON,
Director, New England Region.

[6750-01]

FEDERAL TRADE COMMISSION

[16 CFR Part 451]

ADVERTISING FOR OVER-THE-COUNTER ANTACIDS

Final Notice Concerning Proposed Trade Regulation Rule; Correction

AGENCY: Federal Trade Commission.

ACTION: Correction.

SUMMARY: This document makes corrections to the Federal Trade Commission's notice which established the dates for oral hearings to be held on FTC's proposed trade regulation on advertising for over-the-counter antacid prodcts. These corrections are to FR Doc. 78-24602 which appeared at page 38851 in the issue for Thursday, August 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Joel Brewer, 202-724-1530.

The changes are as follows:

1. On page 38851 in the first column under the paragraph captioned SUMMARY, and in the seventh line therein, change the word "product" to "products".

2. On page 38851 in the third column and in paragraph 4. therein, change the deadline for filing statements or outlines from November 3, 1978 to November 10, 1978.

3. On page 38852 in the second column and in paragraph 10. therein, change the word "They" to "Then" in the eighteenth line so that the sentence reads, "Then you may summarize the statement in your testimony, and the entire statement will be introduced into the record as an exhibit."

4. On page 38852 in the third column, third paragraph of SECTION E, and in the first sentence change the symbol (g) to (j) so that the sentence reads, "Accordingly, in the following questions, the term 'warning' refers to the FDA antacid labeling requirements set forth in (a) to (j) below;".

5. On page 38853 in the second column and in paragraph 4. therein, in the final sentence of the paragraph, insert the word "a" before the word "general" so that the sentence reads, "Can criteria be developed to deter-

mine what elements a general disclosure must contain in order to induce

ties and Exchange Commission, 500 North Capitol Street, Washington,

to fixed charges ratios (varying according to industry) for the most

that many companies with no publicly held voting stock may be better established than those with such stock. In response to these comments, the

the $50 million voting stock market capitalization requirements, the first proposed amendment would require the issuer to have outstanding debt or

that the form be available only to a category of issuers whose earnings exceed fixed charges by a generally accepted multiple amount for the partic-

mine what elements a general disclosure must contain in order to induce consumers to familiarize themselves with the warnings on particular antacid products?".

6. On page 38853 in the third column and in the first line therein, insert the word "a" before the word "specific".

Dated: September 7, 1978.

JAMES P. GREENAN,
Presiding Officer.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 239]

[Release Nos. 33-5974, IC-10395; File No. S7-754]

SHORT FORM FOR THE REGISTRATION OF SECURITIES

AGENCY: Securities and Exchange Commission.

ACTION: Proposed amendments to a form.

SUMMARY: The Commission is proposing amendments which would revise the short form for the registration of securities in order to further expand its usage for primary offerings by subsidiaries of certain issuers. Presently, an issuer with no publicly held voting stock may use the form for primary offerings of securities if it meets certain requirements and is a majority owned subsidiary whose parent guarantees the securities as to principal and interest. The proposed amendments would eliminate the guarantee requirement under certain circumstances and also allow the use of the form for the registration of equity securities by certain subsidiary issuers under conditions designed to assure adequate dissemination of current information about the issuer.

DATE: Comments should be submitted on or before October 31, 1978. Issuers desiring to take advantage of the proposed amendments may do so immediately, provided they comply with all applicable provisions of the new form.

ADDRESS: Comments should refer to file S7-754 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Steven J. Paggioli, Office of Disclosure Policy and Proceedings, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202-376-8090.

SUPPLEMENTARY INFORMATION: On April 11, 1978, the Commission in Securities Act Release No. 5923 (43 FR 16672) announced the adoption of amendments to form S-16 (17 CFR 239.27), a form for registration of certain securities under the Securities Act of 1933 ("Securities Act") (15 U.S.C. 77a et seq., as amended by Pub. L. 94-29 (June 4, 1975)). Form S-16 is a registration form which is comparatively simpler and shorter than other available forms for the registration of securities under the Securities Act.

The amendments adopted in release 33-5923 broadened the types of transactions for which form S-16 may be used in that for the first time the form was made available for primary offerings by issuers under certain specified conditions. One of these conditions requires issuers or their parents to meet a $50 million market capitalization standard based on computation by reference to voting stock held by nonaffiliates. In adopting this requirement, the Commission noted that several commentators had criticized the relation of the $50 million amount to issuers' voting stock. These commentators noted that many companies with no publicly held voting stock may be more seasoned than some companies with publicly held voting stock. Accordingly, the Commission determined to permit the use of form S-16 by issuers with no publicly held voting stock when the issuer is a majority owned subsidiary and its parent meets the $50 million voting stock market capitalization requirements and guarantees the securities as to principal and interest. However, at that time the Commission also directed the staff to consider what conditions for the availability of form S-16 would be appropriate for other issuers with no publicly held voting securities. The amendments proposed today generally would expand the class of subsidiary issuers eligible to use the form for primary offerings to include those whose parents do not guarantee their securities as to principal and interest and also allow the use of the form for the registration of equity securities of such issuers.

In addition to the general requirements for the use of the form and the market capitalization requirement of the parent, the proposed criteria for subsidiaries include (1) The existence of outstanding debt or equity securities held by nonaffiliates, with an aggregate principal amount or market value of at least $250 million, the offer or sale of which has been registered pursuant to the provisions of section 6 of the Securities Act of 1933, (2) compliance with certain specified earnings to fixed charges ratios (varying according to industry) for the most recent fiscal period reported, (3) the existence of at least 2,500 security holders who receive annual reports from the issuer containing certified financial statements.

This release contains a general discussion of the background and purpose of the proposed amendments and a brief description thereof. Attention is directed to the text of the proposed amendments for a more complete understanding.

BACKGROUND AND PURPOSE

The adoption in release 33-5923 of the amendments making form S-16 available for primary offerings reflects in part the recommendation of the Advisory Committee on Corporate Disclosure ("Advisory Committee") that form S-16 be available for the registration of securities to be offered directly to the public by a "small top tier of companies * * * which usually provide high quality corporate communication documents, including 1934 act reports, * * * whose corporate information is widely disseminated * * * [and] which are widely followed by debt and equity analysts." [1] This is also consonant with the position set forth in the Commission's original concept release [2] on the amendments ultimately adopted in release 33-5923 that the category of issuers should be limited to those which, in addition to meeting the existing standards set forth in form S-7, are of sufficient size and have an established reporting history that would justify the use of an abbreviated prospectus.

As noted infra, one of the major conditions ultimately adopted in furtherance of identifying a category of such issuers was the requirement that an issuer have outstanding voting stock held by nonaffiliates with an aggregate market value of at least $50 million. This standard was considered appropriate in that in addition to wide dissemination of information about such companies in the marketplace, they would also be the subject of significant scrutiny by securities analysts.[3]

The relation of this requirement to the issuer's voting stock, however, was criticized by several commentators on the proposed amendments who noted

[1] Report of the Advisory Committee on Corporate Disclosure to the Securities and Exchange Commission ("Report"), House Committee on Interstate and Foreign Commerce, 95th Cong., 1st sess., Committee Print 95-29 at 433-34.

[2] Securities Act Release No. 5792, Dec. 20, 1976, 41 FR 56331.

[3] See report at A-51. This requirement had its origin in a report by the Financial Analysts Federation to the Advisory Committee indicating that New York City based brokerage firms and institutions generally will follow companies of this size.

that many companies with no publicly held voting stock may be better established than those with such stock. In response to these comments, the amendments as adopted permit the use of form S-16 by issuers with no publicly held voting stock when the issuer is a majority owned subsidiary and its parent meets the $50 million market capitalization requirement and guarantees the securities as to principal and interest.

Since the date these amendments were adopted, further comments have been received to the effect that several subsidiary issuers, such as finance companies and utility companies, are among the largest and best established business concerns and frequently finance externally. In view of their previous issuances of securities and reporting history, substantial public information is available regarding these issuers. Further, it has been suggested that the parent companies of these issuers generally do not guarantee securities issued by their subsidiaries, and in view of the quality of these issuers there is no need for such a guarantee. Accordingly, these commentators believe that such issuers should have access to form S-16 for primary offerings without requiring a guarantee by their parent companies. In addition, it has been suggested that the form also should be available for the issuance of nonvoting equity securities by these issuers.

In light of these concerns, the Commission is proposing amendments to form that would allow its use under certain circumstances by issuers with no publicly held voting securities without requiring a parent guarantee. The proposed criteria discussed below are intended to assure that the subsidiary issuers which will be able to use the form for primary offerings in the absence of a parent guarantee will satisfy similar standards of information dissemination and significant interest by securities professionals.

TWO HUNDRED AND FIFTY MILLION DOLLARS AGGREGATE / PRINCIPAL AMOUNT OR MARKET VALUE OF OUTSTANDING SECURITIES

In addition to the requirement that the issuer satisfy the rules for the use of form S-7 [4] and that its parent meet the $50 million voting stock market capitalization requirements, the first proposed amendment would require the issuer to have outstanding debt or equity securities held by nonaffiliates, with an aggregate principal amount or market value of at least $250 million, the offer or sale of which has been registered pursuant to the provisions of section 6 of the Securities Act of 1933.

This proposed requirement is similar in concept to the $50 million market capitalization requirement adopted with respect to voting stock and is intended to serve the same function as that requirement, i.e., assuring a category of issuers about which significant information is available, disseminated, and analyzed. With respect to those subsidiary issuers with substantial debt and nonvoting equity securities outstanding, the $250 million standard has been suggested and is proposed as a means of assuring the same type of significant interest within the investment community and the wide dissemination of adequate current information on issuers that is attendant to that interest.

The requirement that the debt or preferred stock used to meet the $250 million condition have been registered pursuant to the provisions of the Securities Act is likewise further intended to provide additional assurance that information regarding the issuer has been disseminated, in view of the nature of the disclosure required by the registration provisions of that Act and the reporting obligations that attach.

COVERAGE RATIOS

An additional proposed requirement relates to the issuer's ratio of earnings to fixed charges. Specifically, the issuer's earnings for the last fiscal year or 12-month period reported in the registration statement, after all operating and income deductions except fixed charges and taxes based on income or profits after eliminating undistributed income of unconsolidated subsidiaries and 50 percent or less owned persons, must be at least: (a) 1.25 times fixed charges for finance companies; (b) 3 times fixed charges for utilities; and (c) 6 times fixed charges for any other issuers. The ratios are to be adjusted to give effect to: (1) The issuance of the securities being registered; (2) any issuance, retirement, or redemption of securities during or after such period; or (3) any issuance, retirement, or redemption of securities after, or presently proposed for the year after, such period.

The earnings to fixed charges ratio criterion is also designed to assure that the form be available only to a category of issuers whose earnings exceed fixed charges by a generally accepted multiple amount for the particular industry in which the issuer is engaged. The selected ratios are based on one of the conditions for use of form S-9, a now rescinded form for registration of certain debt securities.[5] In rescinding the form, the Commission noted that one of the factors contributing to the form's infrequent use may have been the effect of increased interest rates on the ability of many registrants to meet the minimum fixed charges coverage standards. Although the proposed format for coverage ratios is based on form S-9 and contains the same ratios for utilities and general industrial issuers, the Commission feels that these ratios may be appropriate for an initial period of experimentation. Comment is specifically invited, however, as to the appropriateness of the ratios selected for each industry, and any other conditions that would include the category of issuers described above. Comment is also requested with regard to whether a definition of "finance company" is necessary and with regard to any other appropriate standards for classifying companies within an industry or other appropriate industry groups in which special conditions would warrant different ratios.[6]

DISTRIBUTION OF ANNUAL REPORTS WITH CERTIFIED FINANCIAL STATEMENTS

As noted above, one of the major arguments in favor of making form S-16 available for primary offerings by high quality issuers is the accessibility to investors and shareholders of adequate current information about these issuers. An important source of that information is the annual and periodic reporting obligation of the Exchange Act; companies must be subject to those requirements and current in filing such reports in order to use forms S-7 and S-16. Although subsidiary issuers intended to be covered by the proposed amendments published today must also be subject to Exchange Act reporting requirements, those reports and other disclosure doc-

[4] Generally, an issuer may use form S-16 if it meets the conditions for use of form S-7, which require an issuer (a) to have a class of securities registered under sec. 12 or be subject to the reporting requirements of sec. 15(d) of the Exchange Act; (b) to have been subject to the requirements of sec. 12 or 15(d) and to have filed all applicable reports for 36 calendar months prior to filing the registration statement and have timely filed all required reports for the past 12 calendar months; (c) to have had no default in payments on preferred stock, indebtedness for borrowed money or long-term leases during the past 36 months; and (d) to have had consolidated net income of at least $250,000 for 3 of the last 4 fiscal years, including the most recent fiscal year. See 17 CFR 239.26.

[5] Form S-9 was a registration form available for registration of nonconvertible, fixed-interest debt securities of an issuer required to file reports pursuant to sec. 13 or 15(d) of the Exchange Act; that form required certain earnings to fixed charges ratios as a condition to its use. Form S-9 was rescinded on Dec. 30, 1976, in view of the minimal number of registrations that had been filed on the form in recent years. Securities Act Release No. 5791, 41 FR 56306, Dec. 20, 1976.

[6] See also Accounting Series Release No. 119, June 16, 1971, 36 FR 11918, and Accounting Series Release No. 122, Aug. 10, 1971, 36 FR 15527, with regard to computation of earnings to fixed charges ratios.

uments regarding issuers with no publicly held voting securities may not be widely distributed. This may be particularly true with respect to the market for the securities. Comment is requested as to whether the proposed amendments should require that the issuer have a minimum number of shareholders of record or a minimum number of holders of the class of securities to be registered. Comment is also requested as to whether the proposed amendments should require that the securities be listed on a national securities exchange or quoted in an automated quotation system. Comment is also requested as to whether the proposed amendments should require that there be a minimum number of market makers for the securities. Comment is also requested as to whether the proposed amendments should require that there be a minimum number of shares of the class of securities to be registered sold, or the average of the bid and asked prices of such stock, as of a specified date within 60 days prior to the date of filing.

[4110-07]

DEPARTMENT OF HEALTH,

SUPPLEMENTARY INFORMATION: Under existing regulations, income for SSI purposes is defined as including vices under any governmental program.

The proposed amendments reflect

Dated: July 25, 1978.

DON WORTMAN,
Acting Commissioner of

uments regarding issuers with no publicly held voting securities may not be widely distributed. This may be particularly so with reference to issuers of debt securities. For example, a recent survey of corporations having over $4 billion in debt outstanding and over 30,000 bondholders indicated that only 28 percent of their bondholders received annual reports and only 20 percent received interim reports.[7]

In view of the possible difference in degree and frequency of disclosure by those issuers with no publicly held voting securities, the Commission is proposing the additional requirement that the issuer have at least 2,500 security holders who were furnished an annual report containing certified financial statements for its most recent fiscal year. The requirement is also intended to assure the existence of complete and current information on the issuer and sufficient market interest in its securities.

REQUEST FOR COMMENT

All interested persons are invited to submit their views and comments on the amendments proposed herein. All comments should be received no later than October 31, 1978. Issuers desiring to take advantage of the proposed amendments may do so immediately, provided they comply with all applicable provisions of the new form.[8]

PROPOSED AMENDMENTS

The text of the proposed amendments is set forth below:

Form S-16 (17 CFR 239.27) is proposed to be amended to read as follows:

§ 239.27 Form S-16, for registration under the Securities Act of 1933 of securities of certain issuers offered pursuant to certain types of transactions.

(No change in facing page.)

GENERAL INSTRUCTIONS

A. Rule as to use of form S-16: Form S-16 may be used for registration under the Securities Act of 1933 of securities offered in the transactions specified below, if the issuer meets the requirements for the use of form S-7 (17 CFR 239.26) at the time of filing the registration statement:

1. Transactions involving certain primary offerings. Debt or equity securities offered for cash by or on behalf of the issuer provided the following conditions are met:

(a) The issuer meets the conditions listed in (i), (ii), or (iii) below. The aggregate market value of the issuer's or its parent's outstanding stock shall be computed by reference to the price at which the stock was sold, or the average of the bid and asked prices of such stock, as of a specified date within 60 days prior to the date of filing. (See the definition of affiliate in rule 405.)

(i) The aggregate market value of the voting stock held by nonaffiliates of the issuer is $50 million or more; or

(ii) The aggregate market value of the voting stock of the issuer's parent held by nonaffiliates is $50 million or more, the issuer is a majority owned subsidiary and its parent has fully guaranteed the securities as to principal and interest; or

(iii) The aggregate market value of the voting stock of the issuer's parent held by nonaffiliates is $50 million or more, the issuer is a majority owned subsidiary; and

(A) The issuer has outstanding securities held by nonaffiliates, with an aggregate principal amount or market value (computed in accordance with instruction A(1)(a) above) of at least $250 million, the offer or sale of which has been registered pursuant to the provisions of section 6 of the Securities Act of 1933;

(B) For the last fiscal year or 12-month period reported in the registration statement the earnings of the issuer after all operating and income deductions except fixed charges and taxes based on income or profits after eliminating undistributed income of unconsolidated subsidiaries and 50 percent or less owned persons have been at least: (a) 1.25 times its fixed charges in the case of finance companies, (b) 3 times its fixed charges in the case of utilities, or (c) 6 times its fixed charges in the case of any other issuer for such period, adjusted to give effect to: (1) The issuance of securities being registered; (2) any issuance, retirement, or redemption of securities during or after such period; and (3) any issuance, retirement, or redemption of securities after, or presently proposed for the year after, such period; and

(C) The issuer has at least 2,500 security holders to whom the issuer, for its most recent fiscal year, has furnished an annual report containing certified financial statements.

(No other change in form S-16.)

(Secs. 6, 7, 10, 19(a), 48 Stat. 78, 81, 85; secs. 205, 209, 48 Stat. 906; sec. 8, 68 Stat. 658; sec. 1, 79 Stat. 1051; 15 U.S.C. 77f, 77g, 77j, 77s(a).)

STATUTORY AUTHORITY

The foregoing action is taken pursuant to the Securities Act of 1933, particularly sections 6, 7, 10, and 19(a) thereof.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 7, 1978.

[FR Doc. 78-25888 Filed 9-13-78; 8:45 am]

[7] The survey is referred to in the report of the Fixed Income Analysts Society to the Advisory Committee. See report at A-65-66.

[8] Rule 401 under the Securities Act, 17 CFR 230.401, provides that any registration statement shall be deemed to be filed on the proper form unless objection is made by the Commission prior to the effective date.

Social Security Administration

[20 CFR Part 416]

[Reg. No. 16]

SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Medical and Social Services Which Are Not Income

AGENCY: Social Security Administration, HEW.

ACTION: Notice of Proposed Rule Making.

SUMMARY: The proposed amendments concern the treatment under the Supplemental Security Income (SSI) program of various types of assistance furnished for the purpose of providing medical care and services and social services. The amendments are a result of continued questions from interested sources concerning the treatment of cash payments by social services programs, and the treatment of food, clothing, or shelter provided incident to social services or incident to medical care and services other than during a medical confinement. The proposed amendments are intended to promote better understanding of what assistance provided in cash or in kind under any medical care or services or social services program is excluded as income under the SSI program.

DATES: Comments must be received on or before November 13, 1978.

ADDRESSES: Prior to final adoption of these proposed amendments to the regulations, consideration will be given to any data, views, or arguments which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Md. 21203.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 5131, 330 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

Mr. Henry D. Lerner, Legal Assistant, Office of Policy and Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301-594-7336.

SUPPLEMENTARY INFORMATION: Under existing regulations, income for SSI purposes is defined as including "* * * the receipt by an individual of any property or service which he can apply, either directly or by sale or conversion, to meeting his basic needs for food, clothing, and shelter." Therefore, services of a strictly social nature provided by any private or governmental agency are excluded from this definition of income. Third party payments for medical care and services, including those for support and maintenance provided during a medical confinement, regardless of source, are also excluded from the definition of income. Further, although not now explicit in regulations, present policy excludes from the concept of "income" any public or private agency cash payment to an individual as reimbursement for, or restricted to the future purchase of, approved medical or social services which are not food, clothing, or shelter.

Medical care and services and social services are not included as "income" for SSI purposes because they are not intended to meet on a continuing basis the individual's basic need for food, shelter, and clothing, toward which the SSI program is primarily directed. Moreover, inclusion of these items as income would be inconsistent with the basic pattern of the Social Security Act, where SSI benefits are provided under title XVI, while medicaid is provided under title XIX, and social services are provided under title XX. Nevertheless, questions have arisen in situations where medical or social services, provided under a public or private program, have included food, shelter, or clothing, or cash or other items convertible into food, shelter, or clothing. The proposed regulations clarify how the rules apply in these situations.

There are governmental medical care and services and social services programs under other authority than the Social Security Act that provide food, clothing, and shelter and other assistance as an integral or essential part of the medical care and services and social services (e.g., vocational rehabilitation, developmental disabilities). Where the SSI program reduces its payments to take into account assistance of this type furnished under other governmental programs, SSI is, in effect, nullifying or frustrating achievement of those other programs' purposes. Consistent with the intent underlying these medical care and services and social services programs, SSI policy is being modified so as to exclude from the definition of income cash or food, clothing, or shelter furnished for the purpose of providing medical care and services or social services under any governmental program.

The proposed amendments reflect an essential distinction made by the Congress between title XVI of the Social Security Act and other Federal programs designed to meet needs other than those met by SSI. SSI payments are provided in recognition of basic needs. The expenditure of public funds under other governmental programs is assumed to be consistent with the purpose and requirements of these other programs and their legislative authorizations.

This rationale cannot be extended to embrace nongovernmental programs under the exclusion. Bills that would have created an income exclusion for assistance provided by private nonprofit organizations have been introduced into the Congress and voted down on three separate occasions. Only one exclusion along these lines has been enacted, and it is limited to the provision of in-kind support and maintenance to certain residents of private nonprofit institutions.

The following examples show medical and social services situations.

Example 1: In State A, the State vocational rehabilitation agency agrees to provide required training to a disabled SSI recipient at a State university. The State agency pays for his tuition and since the recipient must temporarily live apart from his family while taking the required training, the State agency provides a cash living allowance while he is away. Under the existing regulations, the value of the living allowance would be considered as income, and the SSI payment would be reduced. Under the proposed regulations, none of the assistance from the State vocational rehabilitation agency would be counted as income with no consequent reduction in the recipient's SSI benefit.

Example 2: Religious Charities, Inc., a nonprofit social service organization, provides Mr. Smith, who had been recently released from the hospital, with cash to pay for temporary homemaker services. Mr. Smith must give the receipt for the service to his caseworker before he can receive the following week's payment. Under the existing regulations, this payment is considered income. Under the proposed regulations, payments of this sort would not be considered income and would not be counted against Mr. Smith's SSI benefit.

Example 3: Mr. Morris, an alcoholic, was given room and board for over a month by the Salvation Hall Halfway House until he could be accommodated at a local clinic for treatment. Under both the existing and the proposed regulations, this assistance would be considered income.

The proposed amendments are to be issued under the authority contained in sections 1102, 1612, and 1631(d) of the Social Security Act, 49 Stat. 647, as amended, 86 Stat. 1468 and 1475; 42 U.S.C. 1302, 1382a and 1383(d).

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

Dated: July 25, 1978.

DON WORTMAN,
Acting Commissioner of Social Security.

Approved: September 6, 1978.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended by revising § 416.1109 to read as follows:

§ 416.1109 Medical and social services.

(a) *Medical services.* The term "income" does not include the value of:

(1) Room and board furnished during a medical confinement;

(2) Any assistance provided in cash or in kind under any Federal, State or local governmental program, the purpose of which is to provide medical care or medical services (including those related to vocational rehabilitation) or both;

(3) Any in-kind assistance (other than food, clothing, or shelter) provided under a nongovernmental program, the purpose of which is to provide medical care or medical services or both;

(4) Any cash provided by any nongovernmental medical care and services program as reimbursement for services (not to include food, clothing, or shelter) already purchased by the individual and approved by the services program, or as a payment restricted to the future purchase of a service (not to include food, clothing, or shelter) approved by the medical care and services program.

(b) *Social services.* The term "income" does not include the value of:

(1) Any assistance provided in cash or in kind under any Federal, State or local governmental program, the purpose of which is to provide social services (including those related to vocational rehabilitation);

(2) Any in-kind assistance (other than food, clothing, or shelter) provided under a nongovernmental program, the purpose of which is to provide social services.

(3) Any cash provided by any nongovernmental social services program as reimbursement for services (not to include food, clothing, or shelter) already purchased by the individual and approved by the services program, or as a payment restricted to future purchase of a service (not to include food, clothing, or shelter) approved by the services program.

Office of Education

[45 CFR Part 177]

GUARANTEED STUDENT LOAN PROGRAM

Extension of Period for Public Comment on Supplemental Proposed Rulemaking

AGENCY: Office of Education, HEW.

ACTION: Extension of comment period for public comment on supplemental proposed rulemaking.

SUMMARY: On July 19, 1978, the Office of Education published a notice of supplemental proposed rulemaking for the guaranteed student loan program (43 FR 31104). This proposed rule concerned refund policies of institutions participating in the guaranteed student loan program (GSLP), and amended the previously published notice of proposed rulemaking for the GSLP which was published on April 5, 1978 (43 FR 14376). Comments on the supplemental notice of July 19 were to be received on or before September 5, 1978. However, due to unavoidable delays encountered by the Office of Education in obtaining and mailing reprints of the July 19 proposed regulations, some members of the public who are interested in the GSLP may not have adequate opportunity to submit their comments by September 5. Therefore, notice is hereby given that the Commissioner of Education will accept public comments on the July 19 supplemental proposed rulemaking which are received on or before October 5, 1978, rather than the previously announced date of September 5, 1978.

DATE: Comments now due by October 5, 1978.

ADDRESS: Comments must be addressed to Miss Patricia Hopson, Guaranteed Student Loan Branch, DPPD, Bureau of Student Financial Assistance, Office of Education, 400 Maryland Avenue SW., Washington, D.C. 20202. Comments will be available for public inspection at the GSA Building, 7th and D Streets SW., Room 4642, between 9 a.m. and 3:30 p.m., Monday through Friday, except on Federal holidays. DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 75-16; Notice 22]

AIR BRAKE SYSTEMS

Parking and Emergency Brake Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Proposal.

SUMMARY: This notice proposes amendment of the air brake standard to broaden and simplify the parking and emergency brake performance requirements, and to temporarily extend exclusions for heavy hauler and auto transporter vehicles from aspects of the standard that are the subject of judicial review. The proposal responds to manufacturers petitions and recommendations, and to the agency's experience with implementation of the air brake standard since January 1975. The modifications are intended to improve the means by which a vehicle manufacturer is able to comply with the standard, and the exclusions would preserve the status quo for affected vehicles regarding those portions of the standard subject to judicial review.

DATES: Comments must be received on or before October 23, 1978. Proposed effective Date: Date of publication of the final rule in the FEDERAL REGISTER.

ADDRESSES: Comments should refer to the docket number and be submitted to: Room 5108, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Duane Perrin, Office of Crash Avoidance, National Highway Traffic Safety Administration, Washington, D.C. 20590 202-426-2153.

SUPPLEMENTARY INFORMATION: Standard No. 121 (49 CFR 571.121) regulates the braking system performance of air-braked trucks, buses, and trailers. The standard has been in effect for trailers since January 1, 1975, and for trucks and buses since March 1, 1975. The standard contains requirements for service brake systems, emergency brake systems, and parking brake systems.

Based on more than 3 years' experience with the standard on the part of manufacturers, users, the agency, and other interested parties, it is judged that some modifications of the performance requirements may be justified. Quite apart from the more controversial aspects of the standard, some of which are still subject to judicial challenge, manufacturer and user experience indicates that some emergency and parking brake performance requirements could be more broadly stated to allow new design options that offer an equivalent level of safety to existing designs.

EMERGENCY AND PARKING BRAKES

In December 1975, the NHTSA issued a notice of proposed rulemaking (40 FR 56920; December 5, 1975) that would have resulted in a major restructuring of several portions of the standard, including the parking and emergency braking requirements for trailers. Since that time, several petitions relating to this subject have been received. This notice is based on analysis of those petitions as well as the comments received in response to the

December 1975 proposal. The intent of this proposal is to allow manufacturers more latitude in their engineering choices, while maintaining a safety performance level equivalent to that currently required. All parking and emergency brake systems meeting the current requirements of Standard No. 121 would also meet these proposed requirements.

The existing parking brake requirements set forth in S5.6 of the standard require minimum performance levels, application by an energy source that is not affected by loss of service brake pressure, maintenance of the brakes in the applied postion by mechanical means, and certain parking brake control requirements in the case of trucks and buses. The "separate energy source" requirement is intended to provide parking brake capability at all times. The "holding by mechanical means" requirement insures that the gradual leaking away of air pressure or other fluid pressure over time would not permit a parked vehicle to become a "rollaway" hazard.

The agency has granted two petitions of the Truck Trailer Manufacturers Association (TTMA) to modify the minimum parking brake performance levels. The TTMA asked that the existing specification to provide certain retardation forces on an axle-by-axle basis (S 5.6.1(a)) be changed to specify the same total retardation forces, but to permit their calculation on the basis of all the axles on the vehicle considered together. This would permit a somewhat closer calculation of the necessary retardation forces, without as much "overdesign" of each axle to allow for manufacturing tolerances in order that the performance of no axle fell below the minimum. The agency intended that the retardation forces be adequate for the vehicle in its entirely, and tentatively adopts the TTMA rationale. Accordingly S 5.6.1's specification would be modified to specify calculations on a "whole vehicle" basis.

The TTMA also petitioned to eliminate the parking brake test of an unloaded vehicle, arguing that testing of the loaded vehicle would be adequate as the test of the system at its greatest strain. The agency decided that the argument had some merit and granted the petition.

However, upon further consideration of the issue, the agency concludes that the unloaded test is a realistic test of a condition under which vehicles are parked. The requirement precludes the possibility of a manufacturer placing parking brakes only on a lightly loaded axle that would allow the vehicle to roll in the unloaded condition.

Manufacturers have apparently not encountered problems in meeting this requirement in the 3 years since the effective date of the standard. Therefore, the agency declines to propose this TTMA recommendation.

Trailer manufacturers have generally used compressed springs to provide the "separate energy source" and "holding by mechanical means" required by S 5.6.3 of the existing standard. This is a traditional means to ensure that, upon sudden loss of service brake air pressure in operation or gradual leaking away of service brake air pressure when parked, the spring brake can actuate to stop the moving vehicle or hold the parked vehicle. While spring brakes are commonly used on trucks and trailers, buses often use a "double diaphragm" air-applied system, along with a mechanical gripping device, that together meet the requirements of S 5.6.3.

A potential problem has arisen with the near universal installation of spring brakes on trailers. Because these vehicles do not have air compressors to generate their own air supplies independently of a towing vehicle, the automatic application of the spring brakes when air pressure is lost can be troublesome. For example, in applications such as logging and agricultural harvesting, regular towing of the air-braked trailer off road by a vehicle without an air compressor makes difficult the release of the spring brakes that applied automatically when the trailer was disconnected from the highway tractor. Alternatively, on the highway, any air-braked trailer which suffers a supply line rupture will be stopped by automatic application of the spring brakes, and without pressure in the supply line, the spring brakes cannot be released. In both situations, a solution is to "cage" (manually compress) the springs, but this can lead to an unsafe situation on the highway if the springs are not subsequently uncaged. Specifically, the caged springs mean there is no parking brake capability, and in current trailers, this means there also is no emergency braking capability. Bureau of Motor Carrier Safety (BMCS) and NHTSA monitoring of this situation has not uncovered significant caging, but the agency is concerned about the potential problem.

In the case of certain bulk agricultural commodity trailers, the agency has provided an alternative means to meet the standard (42 33293, June 30, 1977) because of the greater potential for operation with caged spring brakes. These trailers may meet the standard's requirements or, at the option of the manufacturer, the breakaway protection requirements of the BMCS (49 CFR 393.43). A petition by R. E. Thomas Erectors, asking for a similar option in the case of logging trailers because of their similar operation, has been granted. In addition, it is proposed that the same option be extended to straddle-type agricultural commodity trailers and heavy hauler trailers, for the same reason. The proposed provision makes clear that, while excluded from Standard 121's parking brake requirements, the trailers would still be required to have an emergency brake system.

It has also become apparent that the present wording of S5.6.3. may prevent the use of several innovations in parking brake design. One device is comparable to the mechanical gripping device used with the "double diaphragm" system earlier described, but it is also intended and could be used with at least some single diaphragm systems. Another innovation is a design that provides for emergency application of air pressure through the service brake system of the trailer, and uses the spring brakes only as a backup system for extended parking or in case of a service system failure such as a ruptured brake chamber diaphragm. This system is considered to be simpler than existing systems and might thereby reduce the possibility of system failure.

One impediment to these systems has been the current requirement of S5.2.1.1 for an isolated source of air pressure to permit release of the parking brakes. This reservoir has been required to allow for the prevention of the problem of spring-brake lockup on the highway without a means of release. Some early FMVSS 121 towing vehicle brake system designs were able to utilize this reservoir for modulation of trailer brakes through the supply line in case of failure of the trailer service brake system. However, more recent towing vehicle brake designs generally use a split braking system instead, and the isolated reservoir is largely unused. In the December 1975 proposal earlier noted, the agency responded to a California Highway Patrol petition to increase the utility of this reservoir by requiring the provision of a manual parking brake release on the trailer so that a driver could quickly actuate the isolated air supply and move the vehicle. This action would be comparable to the simple action of releasing the air applied "breakaway" capability that had been in common use prior to Standard No. 121. The vast majority of commenters objected to this requirement, however, because of concern over added complexity and cost to the system, and the fear of unintended actuation of the release control on parked trailers.

The agency has tentatively determined that the use of an air-applied emergency brake with a backup spring brake or other mechanical means of holding should not be discouraged. Pe-

titions from the Berg Mfg. Co., Fruehauf Corp., and the Bendix Corp. re-

for the installation of components could interfere with compliance with

ed that interested persons continue to examine the docket for new material.

The program official and lawyer

titions from the Berg Mfg. Co., Fruehauf Corp., and the Bendix Corp. requesting deletion or rewording of S5.2.1.1 have all been granted. While it is noted that the requirement of S5.2.1.1 does not prohibit production of an air-applied system, the agency understands that the economic incentive to offering such a system depends in large part on being able to produce a system with one less reservoir. Air-applied systems offer the important advantage that, even if the parking brakes are caged, an emergency braking capability is still available on the highway. The agency considers this important because of the potential for the caging of spring brakes. In addition, an air-applied system will offer antilock control of emergency braking if the trailer is antilock-equipped and the antilock system is powered during emergency braking.

The agency has proposed the "separate energy source" requirement in different terminology to encourage alternatives to the use of spring brakes, while still insuring a back-up capability independent of the service brake system and a "holding" capability by mechanical means.

Another impediment to new innovations is the requirement, in the case of trailers, that emergency braking must be accomplished by automatic application of the parking brake system. Greater flexibility of design would be afforded if alternative means of emergency brake application were also allowed. Therefore, this proposal would also reword the emergency brake requirement to clarify that it is distinct from the parking brake requirement, although the same hardware could be used to accomplish both functions. Definitions of service, emergency, and parking brake systems are proposed, to clarify that each system has a distinct function, although some components may be common to two or more systems.

VEHICLE EXCLUSIONS

Auto transporters and heavy hauler trailers have been excluded from Standard No. 121 until January 1, 1979, due to the distinctive construction or use of these vehicles that makes compliance with certain aspects of the standard more difficult. The Truck Trailer Manufacturers Association (TTMA) has petitioned for permanent exclusion of heavy hauler trailers from the standard for these and related reasons.

The agency's analysis of available componentry and of the engineering issues involved in compliance of these vehicles with the standard indicates that the only remaining difficulties with compliance might be satisfaction of the "no lockup" and parking brake requirements. For example, less room for the installation of components could interfere with compliance with the parking brake requirement on these vehicles.

A separate but critical consideration is that the road tests (including "no lockup" requirements) of the standard remain subject to judicial review. Reengineering of presently excluded vehicles to meet these requirements might be for a temporary period only. In view of this uncertainty about long term requirements, it is proposed that auto transporters and heavy hauler trailers be temporarily excluded from the road test requirements.

Because reservoir volume requirements are closely related to the "no lockup" performance requirement, it is proposed that the two vehicle types also be temporarily excluded from S 5.1.2.1 and S 5.2.1.2. On this subject, it is noted that the TTMA has petitioned for a 50-percent reduction in reservoir requirements on trailers not equipped with antilock systems. The agency granted this petition because the volume requirements are based in part on the air release cycling of antilock systems. However, the agency would prefer a requirement that applies whether or not a vehicle is antilock-equipped, specifying a certain number of stops that must be made with the compressor turned off and any antilock cycling, without a drop in air pressure below a specified level. Such a requirement would encourage design of brake systems that use less air, especially those that are antilock-equipped. The NHTSA does not have sufficient test data to define what such performance levels should be, however, and no change in the current requirements can be proposed at this time. Comments are solicited on the advisability of NHTSA's suggested alternative, and on the number of stops and pressure levels that would meet the need for motor vehicle safety.

To the degree that this proposal does not grant the TTMA's heavy hauler petition, it is denied.

In accordance with Department of Transportation policy, it is hereby stated that the agency does not consider this amendment of standard No. 121 to have significant impact as defined in the Department's criteria for internal review. The proposed changes all permit greater manufacturing flexibility and do not impose any additional requirements. The implementation of some of the standards's requirements for heavy hauler trailers and auto transporters reflects the termination of an exclusion, not new agency action, and the controversial "no lockup" requirement is being excluded for an indefinite period.

In consideration of the foregoing, it is proposed that Standard No. 121 (49 CFR 571.121) be amended as follows:

1. Section S 4 (Definitions) would be amended by the addition of six new definitions to read:

"Agriculture commodity trailer" means a trailer that is designed to transport bulk agricultural commodities in off-road harvesting sites and to a processing plant or storage location, as evidenced by skeletal construction that accommodates harvest containers, a maximum length of 28 feet, and an arrangement of air control lines and reservoirs that minimizes damage in field operations.

"Emergency brake system" means the components of a motor vehicle that provide the primary means of stopping the vehicle in the event of a failure or loss of energy source in the service brake system. Some of these components may be common to the service or parking brake systems.

"Parking brake system" means the components of a motor vehicle that provide the primary means of preventing movement of the vehicle when stationary. Some of these components may be common to the service or emergency brake systems.

"Pulpwood trailer" means a trailer that is designed exclusively for harvesting logs or pulpwood and constructed with a skeletal frame with no means for attachment of a solid bed, body, or container, and with an arrangement of air control lines and reservoirs designed to minimize damage in off-road operations.

"Service brake system" means the components of a motor vehicle that provide the primary means of retarding, stopping and holding the vehicle, and any other vehicle that it is designed to tow. Some of these components may be common to the parking or emergency brake systems.

"Straddle trailer" means a trailer that is designed to transport bulk agricultural commodities from the harvesting location as evidenced by a framework that is driven over the cargo and hydraulic lifting arms that suspend the cargo for transit.

2. Section S5.1.2.1 would be amended by the addition of a sentence at the end of the text to read: "However, the reservoirs on the truck portion of an auto transporter need not meet this requirement."

3. Section S5.2.1.1 would be deleted and reserved.

4. Section S5.2.1.2 would be amended by the addition of a sentence at the end of the text to read: "However, the reservoirs on a heavy hauler trailer and on the trailer portion of an auto transporter need not meet this requirement."

5. The last sentence in the paragraph designated S5.3 would be replaced by a new sentence to read: "However, a heavy hauler trailer and the truck and trailer portions of an auto transporter need not meet the requirements of S5.3."

6. Section S5.3.2.2 would be amended to read:

S5.3.2.2 When stopped in accordance with S5.3.2, a pulpwood trailer need not meet the requirements relating to wheel lockup, but must nevertheless meet the requirements of staying within the 12-foot lane.

7. Section S5.6 and its subsections would be amended to read:

S5.6 *Parking brake system.* Except for an agricultural commodity trailer, a heavy hauler trailer, a pulpwood trailer, a straddle trailer, or a trailer converter dolly, each vehicle shall be equipped with a parking brake system that, under the conditions of S6.1, meets the requirements of S5.6.1 through S5.6.5.

S5.6.1 *Parking brake system performance.* With no other vehicle braking systems applied, both when loaded to its GVWR and when at its unloaded weight plus 500 pounds (including driver and instrumentation), the parking brake system shall be capable of holding the vehicle stationary when racing uphill or downhill on a smooth, dry, portland cement concrete roadway with a 20-percent grade, or, at the option of the manufacturer, during a static drawbar pull in the forward or rearward direction, with drawbar force equal to—

(a) 0.14 times the vehicle's weight in the case of a truck tractor equipped with more than two axles; or

(b) 0.28 times the sum of the weights on all axles other than all front steerable axles in the case of any vehicle other than a truck tractor with more than two axles.

S5.6.2 *Application.* The parking brake system shall be capable of application with the forces specified in S5.6.1 with any single failure in any other brake system of a part designed to contain compressed air or brake fluid (except failure of a component of a brake chamber housing).

S5.6.3 *Holding.* The parking brake system shall maintain the retardation performance level specified in S5.6.1 in the event of complete loss of electric energy and fluid pressure, including air pressure, in the vehicle.

S5.6.4 *Release.* The parking brake system shall not be capable of release unless adequate energy is available to make immediate reapplication with sufficient retardation force to meet the requirements of S5.6.1.

S5.6.5 *Parking brake control—trucks and buses.* Each vehicle shall be equipped with a manual control, separate from the service brake control and operable by a person seated in the normal driving position, that controls application and release of the parking brake system of the vehicle and of any air-braked vehicle it is designed to tow. The control shall be identified in a manner that specifies the method of control operation.

8. Section S5.7 would be amended by replacing the last sentence with a sentence to read: "However, the truck portion of an auto transporter need not meet the road test requirements of S5.7.1."

9. Section S5.8 and its subsections would be amended to read:

S5.8 *Emergency brake system—trailers.* Each trailer shall be equipped with an emergency brake system which, under the conditions of S6.1, conforms to the requirements of S5.8.1 through S5.8.4.

S5.8.1 *Emergency brake system performance.* The retardation afforded by the trailer's emergency brake system shall be not less than that required for the parking brake system, as specified in S5.6.1.

S5.8.2 *Application.* With the trailer supply line initially pressurized to 90 psi, the brakes on the trailer shall automatically apply when the trailer supply line coupling is vented to the atmosphere. The emergency brake system shall be capable of application at any vehicle speed.

S5.8.3 *Holding.* After automatic application, the emergency brake system shall be capable of maintaining the application for not less than 15 minutes.

S5.8.4 *Release.* The emergency brake system shall be capable of release when the vehicle's supply line is pressurized to 90 psi.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

In the case of comments that contain materials for which confidential treatment is requested, those materials should be deleted from the copies submitted to the docket. A copy of the complete comments should be submitted to the Office of Chief Counsel at the above address, with an indication of which portions of the comments are the subject of the request for confidentiality.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

The program official and lawyer principally responsible for the development of this proposal are Duane Perrin and Tad Herlihy, respectively.

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Propose Critical Habitat for the Colorado Squawfish

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The Service issues this proposed rulemaking which would determine critical habitat for the Colorado squawfish (*Ptychocheilus lucius*). This action is being taken because of the threatened modification of its remaining habitat. Destruction of habitat in the past has been and is presently the primary factor which jeopardizes the continued existence of the Colorado squawfish. This proposal would provide for Federal protection of the remaining habitat for this species. The proposed critical habitat is located in Colorado and Utah.

DATES: Comments from the public must be received by November 13, 1978. Comments from the Governors of the State involved with this action must be received by December 13, 1978.

ADDRESSES: Submit comment to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials received will be available for public inspection during normal business hours at the Service's Office of Endangered Species, suite 1100, 1612 K Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director, Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 202-343-4646 or Mr. Harvey Willoughby, Regional Director, Fish and Wildlife Service, 10597 West Sixth Street, Denver, Colo. 80215 303-234-2209.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In 1976, the U.S. Fish and Wildlife service requested the Colorado Squawfish Recovery Team to make recommendations for critical habitat for the squawfish under the provisions of section 7 of the Endangered Species Act of 1973. The team recommended that all areas where the fish is currently known to occur be determined to be critical habitat. The team presented its reasons for recommending the entire currently occupied areas as follows: (1) There has been a decline or elimination of the squawfish from the majority of its historic range, (2) there has been a continued alteration of much of the remaining habitat, and (3) there are ever increasing demands on the remaining habitat.

In compliance with the intent of the Endangered Species Act of 1973 and the Memorandum of Understanding on Interagency Cooperation in Nonemergency Critical Habitat Determinations Pursuant to section 7 of the Endangered Species Act of 1973, with the Bureau of Land Management and the Bureau of Reclamation, requests for comments on the recommended areas were sent to all concerned State and Federal agencies. All of these agencies have now responded to that request. They are:

Arizona Game and Fish Department, Phoenix Ariz.; Utah Division of Wildlife Resources, Salt Lake City, Utah; Colorado Division of Wildlife, Denver, Colo.; Bureau of Land Management, Colo.; Bureau of Land Management, Ariz.; Bureau of Land Management, Utah; Bureau of Reclamation, Boulder City, Nev.; Bureau of Reclamation, Salt Lake City, Utah; and U.S. Forest Service, Region 3, Albuquerque, N. Mex.

Copies of these comments are on file in the U.S. Fish and Wildlife Service's Regional Office in Albuquerque, N. Mex. The comments and objections generally fall into several, similar categories, including: (1) Criteria used to delineate the recommended areas; (2) how designating an area as critical habitat will affect proposed or ongoing projects in the areas and the watersheds above the areas; (3) conflicts over who has the authority to designate critical habitat and who must abide by the decision; (4) what part public participation will have and the final designation; and (5) questions about specific areas recommended by the recovery team.

After reviewing all of the comments and suggestions from the above agencies, the Service finds that only those from the U.S. Forest Service and Bureau of Reclamation contain data which are biologically relevant. The other comments are either not of a biological nature or have already been addressed in the April 22, 1975 and January 4, 1978 FEDERAL REGISTER discussion of critical habitat (40 FR 17764-17765 and 43 FR 870-876). In answer to the relevant biological questions, a recent letter from Dr. Paul B. Holden indicates Colorado squawfish have been recently collected from the Gunnison River and the Yampa River above Maybell. Colo. Reaches above these points, although historic range for the species, are not known to support Colorado squawfish at present, and therefore, can no longer be considered critical to survival of the species. Surveys within the past 5 years have failed to find Colorado squawfish in the Salt River above Roosevelt Dam or in the Grand Canyon portion of the Colorado River, both localities in Arizona. Thus, protection of these areas seems less critical for the continued survival of the species than those areas presently supporting populations and therefore, the former areas are not being proposed as critical habitat at this time.

Several professional fisheries organizations have recently passed resolutions supporting the designation of critical habitat for the Colorado squawfish and the work of the recovery team.

EFFECT OF THE RULEMAKING

The effects of this determination are involved primarily with section 7 of the act, which states:

"The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this act. All other Federal departments and agencies shall, in consulation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 7 of this act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species of result in the desturction or modification of habitat of such species which is determined by the Secretary, after consultation an appropriate with the affected States, to be Critical."

A definition of the term "critical habitat" was published by the Fish and Wildlife Service and the National Marine Fisheries Service in the FEDERAL REGISTER of January 4, 1978 (43 FR 870-876) and is reprinted below:

"Critical habitat" means any air, land or water area (exclusive of those existing manmade structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would appreciable decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. The constituent elements of critical habitat include, but are not limited to: physical structures and topography, biota, climate, human activity, and the quality and chemical content of land, water, and air. Critical habitat may represent any portion of the present habitat of a listed species and may include additional areas from reasonable population expansion."

As specified in the regulations for Interagency Cooperation as published in the January 4, 1978, FEDERAL REGISTER (43FR-870-876), the Director will consider the physiological, behavioral, ecological, and evolutionary requirements for survival and recovery of listed species in determining what areas or parts of habitat are critical. These requirements include, but are not limited to:

(1) Space for individual and population growth and for normal behavior;

(2) Food, water, air, minerals, or other nutritional or physiological requirements;

(3) Cover or shelter;

(4) Sites for breeding, reproduction, or rearing of offspring; and generally,

(5) Habitats that are protected from disturbances or are representative of the geographical distribution of listed species.

With respect to the Colorado squawfish, the portions of the rivers proposed as critical habitat satisfy all known criteria for the evolutionary, ecological, behavioral, and physiological requirements of the species. The stream areas proposed have backwater areas where there is little or no current and a firm silt bottom with shallow depths (1 to 2 feet) which are required by young-of-the-year Colorado squawfish. Juvenile Colorado squawfish inhabit similar backwater areas but are found in a wider range of depths (up to 3 feet). Juveniles also inhabit eddies 2 to 3 feet deep along the edge of backwater areas. These areas also support a good population of crustaceans and aquatic insects which are utilized as food by the squawfish.

The deeper runs and eddies in the proposed stream areas provide habitat for subadult and adult Colorado squawfish. These areas also support populations of aquatic insects and small fishes which are prey for subadult and adult Colorado squawfish. Deep backwater areas are used by adult Colorado squawfish during periods of high discharge. The portions of the rivers proposed are representative of the geographical distribution of this species. There may be many kinds of action which can be carried out within the critical habitat of a species which would not be expected to adversely affect that species.

This point has not been well understood by some persons. There has been widespread and erroneous belief that a critical habitat designation is something akin to establishment of a wilderness area or wildlife refuge, and automatically closes an area to most human uses. Actually, a critical habitat designation applies only to Federal agencies, and essentially is an official notification to those agencies that their responsibilities pursuant to section 7 of the act are applicable in a certain area.

A Critical Habitat designation must be based solely on biological factors. There may be questions of whether and how much habitat is critical, in accordance with the above interpretation, or how to best legally delineate this habitat, but any resultant designation must correspond with the best available biological data. It would not be in accordance with the law to involve other motives; for example, to enlarge a critical habitat delineation so as to cover additional habitat under section 7 provisions, or to reduce a delineation so that actions in the omitted area would not be subject to evaluation.

There may indeed by legitimate questions of whether, and to what extent, certain kinds of actions would adversely affect listed species. These questions, however, are not relevant to the biological basis of critical habitat delineations. Such questions should, and can more conveniently, be dealt with after critical habitat has been designated. In this respect the Service, in cooperation with other Federal agencies, has drawn up a set of regulations which, in part, establish consultation and assistance process for helping to evaluate the possible effects of actions on critical habitat. The regulations for Interagency Cooperation were published on January 4, 1978, in the FEDERAL REGISTER (43 FR 870-876) to assist Federal agencies in complying

with section 7 of the Endangered Species Act of 1973.

SQUAWFISH MAP OF ORIGINAL RANGE

expected that the amended PMP and revised proposed regulations will be re-published for public comment on or

notices

with section 7 of the Endangered Species Act of 1973.

PUBLIC COMMENTS SOLICITED

The Director intends that the rules finally adopted will be as accurate as possible in delineating the critical habitat of the Colorado squawfish. The Director, therefore, desires to obtain the comments and suggestions of the public, other concerned governmental agencies, the scientific community, or any other interested party on these proposed rules.

Final promulgation of critical habitat regulations will take into consideration all comments received by the Director. Such comments and any additional information received may lead the Director to adopt final regulations that differ from this proposal.

An envirionmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. and may be examined during regular business hours. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

The primary authors of the proposed rule are Dr. James D. Williams and Dr. James Johnson, Office of Endangered Species 202-343-7814.

REGULATION PROMULGATION

Accordingly, it is hereby proposed to amend Title 50, Chapter I, § 17.95(e) by adding critical habitat of the Colorado squawfish after the spotfin chub, as follows:

(e) *Fishes.* • • •

COLORADO SQUAWFISH (*Ptychocheilus lucius*)

Utah. San Juan, Wayne, Grand, Emery, Carbon, and Uintah Counties. Colorado River, main channel from backwaters of Powell Reservoir in San Juan County upstream to the Utah-Colorado State line in Grand County. Green River, main channel from its junction with the Colorado River in San Juan County upstream to the Utah-Colorado State line in Unitah County.

Colorado. Mesa and Moffat Counties. Colorado River, main channel from the Colorado-Utah State line upstream to the junction of Plateau Creek, all within Mesa County. Gunison River, main channel from its junction with the Colorado River upstream to the Colorado State Highway 141 crossing at Whitewater, Mesa County. Green River, from the Colorado-Utah State line upstream to the junction of the Yampa River. Yampa River from its junction with the Green River upstream to the junctions of Milk Creek, approximately 12 air miles southwest of Craig, Moffat County.

SQUAWFISH MAP OF ORIGINAL RANGE

NOTE.—The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 7, 1978.

ROBERT S. COOK,
Acting Director,
Fish and Wildlife Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 611]

PACIFIC BILLFISH AND OCEANIC SHARKS

Foreign Fishing Regulations PMP and Supplementary Regulations

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Withdrawal of notice of proposed rulemaking; advance notice of proposed plan amendment and proposed rulemaking.

SUMMARY: This notice is to withdraw a Preliminary Fishery Management Plan (PMP) for Billfish and Oceanic Sharks in the Pacific Ocean, which was published on July 21, 1978 (43 FR 31374), because of the public comments which have been received. This notice is also intended to provide advance notice to the public of prospective amendments which may be made to the PMP with corresponding changes in the proposed regulations.

EFFECTIVE DATE: The withdrawal is effective September 14, 1978. It is expected that the amended PMP and revised proposed regulations will be republished for public comment on or about October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Gerald V. Howard, Director, Southwest Region, 300 Ferry Street, Terminal Island, Calif. 90731, telephone 213-548-2575.

SUPPLEMENTARY INFORMATION: NMFS received a number of comments on the PMP and proposed regulations. A large number of commentators opposed adoption of the PMP and implementing regulations because they felt (1) that the proposed management measures did not afford sufficient recognition to the socio-economic differences existing among the human populations of the State of Hawaii, American Samoa, and Guam; and (2) that the PMP should also include management measures for wahoo (ono) (*Acanthocybium solanderi*), and both dolphin (mahimahi) and little dolphin (little mahimahi) (*Coryphaena hippurus* and *C. equisetis*, respectively).

The Assistant Administrator for Fisheries has determined, consequently, that this PMP should be reconsidered. Therefore, NMFS is presently considering amendments to the plan which would (1) include both species of dolphin and wahoo, and (2) modify certain of the management measures relating to billfish, based on the unique socio-economic characteristics and needs of the particular human populations involved. Special consideration is being given to dividing the optimum yield and total allowable level of foreign fishing figures for various species of billfish by geographic area.

One major purpose of this advance notice is to invite comments concerning any of these or other possible amendments to the PMP.

NMFS will consider this information in developing amendments to the PMP, and will then resubmit the amended plan and proposed implementing regulations for an additional comment period of 30 days.

In consideration of the foregoing, the proposal published in the FEDERAL REGISTER (43 FR 31374) on July 21, 1978, and circulated as proposed regulations, is hereby withdrawn, and advance notice is hereby given of proposed amendment and rulemaking.

Signed at Washington, D.C., this 28th day of August 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[FR Doc. 78-25870 Filed 9-13-78; 8:45 am]

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

TARGHEE NATIONAL FOREST GRAZING ADVISORY COMMITTEE

Meeting

The Targhee National Forest Grazing Advisory Committee will meet at 10 a.m., November 21, 1978, at the Forest Supervisor's Office, 420 North Bridge Street, St. Anthony, Idaho 83445. The purpose of this meeting is to secure recommendations for use of range betterment funds.

The meeting will be open to the public. Persons who wish to attend should notify Bill Little, Targhee Supervisor's Office, telephone 208-624-3151. Written statements will be filed with the committee before or after the meeting.

The committee has established the following rule for public participation: Nonmembers are asked to withhold comments until the close of business.

PHILIP L. LEE,
Acting Forest Supervisor.

CIVIL AERONAUTICS BOARD

[Order 78-9-29; Docket Nos. 32738, et al.]

EASTERN AIR LINES, INC., ET AL.

Roanoke-Pittsburgh Service Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 7th day of September 1978. Application of Eastern Air Lines, Inc., for temporary suspension authority, docket 32738. Applications of Allegheny Airlines, Inc., Piedmont Aviation, Inc., for certificate amendment, dockets 32587, 32739. Applications of Piedmont Aviation, Inc., Allegheny Airlines, Inc., for Roanoke-Pittsburgh exemption authority, dockets 32740, 32834. Roanoke-Pittsburgh service investigation, docket 33364.

By application filed May 24, 1978, Eastern Air Lines asked authority to suspend service at Roanoke for a period of 5 years.[1] In support of its application, Eastern asserts that, due to certain route limitations on its system, Roanoke has become an economically marginal point, with a continually declining proportion of the traffic using its service; that it would realize a financial improvement of as much as $141,000 a year, were the Board to grant its request; and that Piedmont Aviation stands ready to provide replacement service.

On May 24, 1978, Piedmont filed simultaneous applications for temporary exemption[2] and permanent certificate authority to provide Roanoke-Pittsburgh nonstop service. It maintains that, if the Board should grant its applications, it would fill the void resulting from Eastern's suspension by providing more service at lower fares.

By application filed June 9, 1978, Allegheny Airlines requests a temporary exemption to provide service between Roanoke and Pittsburgh.[3] It contends that it is the logical replacement for Eastern in this market because it will provide nonstop service and will also be able to provide service to a number of beyond points that are not on Piedmont's system. Earlier it had filed an application for permanent certificate authority to provide service between Pittsburgh and Charlotte via Roanoke and Raleigh/Durham.

No answers to Eastern's suspension application have been filed. Answers, generally in support of one or more of the exemption applications, have been filed by various civic parties.[4] Both Allegheny and Piedmont filed answers in opposition to the other's exemption request. Piedmont argues that Allegheny's application was filed with the intention of preventing Piedmont from serving Pittsburgh rather than from any interest Allegheny may have in the market; and that route structure considerations support its own selection. Allegheny replies that it has every incentive to serve the market effectively; that it would provide better service than Piedmont; and that route structure considerations support its selection.

We have decided to institute an investigation to determine the need for new nonstop authority between Roanoke and Pittsburgh and to decide whether Eastern's authority to serve Roanoke should be suspended, deleted, or otherwise amended. We are consolidating for hearing the applications in dockets 32738 (Eastern), 32587 (Allegheny), and 32739 (Piedmont).

As we have made clear in recent decisions (see, e.g., *Service to Oakland* Case, order 78-4-121), we believe that market forces are more likely than limitations on entry and selection of carriers by the Board to result in optimum service at optimum fares, since the market selection process operates continuously and efficiently. We will therefore consider the possible grant of permissive authority to all fit, willing, and able applicants, and the extent to which such awards encourage the efficiency, innovation, and competition deemed to be in the public interest by section 102 of the act. In view of this, we are less inclined than we were when we laid down the policy in our order instituting the Chicago-Albany/Syracuse-Boston Competitive Service Investigation, order 77-12-50, to give heavy weight in carrier selection to the offer or failure to offer low prices, since open competition will insure these offers more effectively than restrictive carrier selections based on their promise.

We are therefore concerned about the delay and costs of the evidentiary burdens which traditional carrier-selection cases entail for the parties, the Board and the Board's staff, and par-

[1] Eastern currently provides only one daily round trip at Roanoke, serving Miami and Greensboro to the south and Pittsburgh and Cleveland to the north.

[2] Piedmont proposes a pattern of two nonstop round trips between Roanoke and Pittsburgh, as follows: (1) Washington, D.C.-Roanoke-Pittsburgh, scheduled every day but Saturday with the return trip scheduled every day but Sunday, and (2) Richmond-Roanoke-Pittsburgh, scheduled every day but Sunday with the return trip scheduled every day but Saturday.

[3] Allegheny proposes a pattern of two nonstop round trips between Roanoke and Pittsburgh as follows: (1) Roanoke-Pittsburgh-Philadelphia-Albany and return scheduled every day but Sunday; (2) Roanoke-Pittsburgh-Cleveland-Toronto scheduled every day but Saturday; and (3) Detroit-Cleveland-Pittsburgh-Roanoke scheduled every day but Saturday.

[4] The Metropolitan Richmond Chamber of Commerce, the Commonwealth of Virginia, and the Pittsburgh Parties (the county of Allegheny and the Pittsburgh Airport Advisory Committee). The Metropolitan Richmond Chamber of Commerce answer was accompanied by a motion to file an unauthorized document. We will grant the motion. The Niagara Frontier Transportation Authority and the Buffalo Area Chamber of Commerce filed a petition for leave to intervene in the matter of Allegheny's application for certificate amendment.

ticularly with the burden of introducing and evaluating evidence that will

provides, and there is no civic opposition to the latter's suspension. Under

be authorized and should the new or existing authority be subject to any

13. This order may be amended or revoked at the discretion of the Board without hearing.

Interested persons will be given 30 days following the date of service of this order to show cause why the ten-

[6320-01]

[Order 78-9-31; Docket 32708]

ticularly with the burden of introducing and evaluating evidence that will be unnecessary if the case results in multiple permissive awards. We invite the parties and the administrative law judge to explore ways of reducing the quantity of required exhibit material, eliminating duplication and superfluous detail, standardizing methodology, and focusing on the significant facts and assumptions. Specifically, we are interested in reducing or eliminating the tremendous amount of detail on schedules, traffic, profitability, and diversion typically required to adjudicate the issue of comparative carrier selection. The possibility of stipulating facts and eliminating comparative selection evidence should be carefully explored. In particular, carriers interested in being selected for a market only if multiple, permissive authority is awarded generally should be excused from submitting the full panoply of comparative selection evidence for that market.[5] Further, although low fares naturally will continue to be reflected in any revenue estimates submitted, we are not interested in any detailed comparative examination of the price/quality options arrived at by the various applicants. Ultimately, of course, we leave the resolution of all of these matters to the administrative law judge.

We have also decided to grant for a period of 5 years or until 90 days after the final decision in the investigation instituted here (1) Eastern's application for temporary suspension of service at Roanoke and (2) the concurrent applications of Allegheny and Piedmont for exemptions permitting them to provide service between Roanoke and Pittsburgh.

We see no reason to compel Eastern to continue to engage in economically marginal operations, particularly when two carriers stand ready to furnish replacement service, which may be superior to what Eastern currently provides, and there is no civic opposition to the latter's suspension. Under these circumstances, we find that grant of suspension is in the public interest.

We will also grant both exemption requests.

The schedules proposed by Allegheny and Piedmont would complement each other, and granting exemptions to both of them will result in substantial benefits to the traveling public in the primary and beyond markets. Roanoke and Pittsburgh are major hubs on the systems of Piedmont and Allegheny, respectively. Only one new station each would have to be established, at Roanoke (Allegheny) and at Pittsburgh (Piedmont). Thus, these carriers would be able to provide replacement service at nominal risk. Granting temporary authority to them to correspond with Eastern's suspension will permit a continuation of service at Roanoke. To require the carriers to seek certification for their temporary operations would be disproportionate to any economic benefits that they can expect to gain.

We find that enforcement of section 401 of the Act and the terms, conditions, and limitations of Allegheny's certificate for Route 97 and Piedmont's certificate for Route 87, to the extent that they would otherwise prevent them from providing the services authorized would be an undue burden on the carriers by reason of the limited extent of their operations and would not be in the public interest.[6]

Applications, amendments to applications, motions to consolidate, and petitions for reconsideration of this order shall be filed within 20 days of its date of service and replies shall be filed within 10 days later.

Accordingly,

1. We institute under section 204 of the Act the *Roanoke-Pittsburgh Service Investigation*, docket 33364, and we set it for hearing before an administrative law judge of the Board at a time and place to be determined later;

2. The investigation instituted in paragraph 1, above, shall consider the following issues:

a. Do the public convenience and necessity require the authorization of an air carrier or air carriers to engage in nonstop air transportation between Roanoke, Va., and Pittsburgh, Pa;

b. If the answer to (a), above, is affirmative, which air carrier(s) should be authorized and should the new or existing authority be subject to any terms, conditions, or limitations; and

c. Should Eastern's authority at Roanoke, a point on segment one of its Route 6, be suspended or deleted or otherwise amended;

3. Any authority awarded in this investigation shall be category II subsidy ineligible;

4. To the extent that they conform to the scope of this investigation, we consolidate into the proceeding instituted in paragraph 1, above, the applications of Eastern Air Lines, Inc., in docket 32738, Piedmont Aviation, Inc., in docket 32739, and Allegheny Airlines, Inc., in docket 32587;

5. We grant the motion for leave to file an unauthorized document of the Metropolitan Richmond Chamber of Commerce;

6. We grant the petition for leave to intervene filed by the Niagara Frontier Transportation Authority and the Buffalo Area Chamber of Commerce;

7. The following we make parties to the proceeding instituted by paragraph 1, above: Allegheny Airlines, Eastern Air Lines, Piedmont Aviation, Metropolitan Richmond Chamber of Commerce, Commonwealth of Virginia, the Niagara Frontier Transportation Authority, the Buffalo Area Chamber of Commerce, and the Pittsburgh Parties;

8. We suspend under section 401(j) of the Act the authority of Eastern Air Lines to serve Roanoke, Va., on Route 6 for a period of 5 years or until 90 days after final decision in docket 33364, whichever occurs first;

9. We exempt Allegheny Airlines and Piedmont Aviation from section 401 of the Act and the terms, conditions, and limitations of their certificates for Routes 97 and 87, respectively, to the extent necessary to permit them to provide air transportation between Roanoke, Va., and Pittsburgh, Pa., for a period of 5 years or until 90 days after the final decision in docket 33364, whichever occurs first;

10. Applications, amendments to applications, motions to consolidate, and petitions for reconsideration of this order shall be filed by September 26, 1978, and answers shall be filed by October 6, 1978;[7]

11. All carriers filing applications in this proceeding shall file environmental evaluations under § 312.12 of the Board's regulations within 30 days of the date of service of this order;[8]

12. The authority granted above shall be effective on the date of service of this order; and

13. This order may be amended or revoked at the discretion of the Board without hearing.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[9]
Secretary.

[FR Doc. 78-25948 Filed 9-13-78; 8:45 am]

[5] Moreover, for those who wish to pursue a traditional carrier selection theory of the case, detailed cost accounting evidence, e.g., separate estimates for every segment or each type of fare, need not be required to justify the various price and quality proposals. For the Board's purposes, an analysis of profit of any applicant's proposal shall be adequate if the expense estimates are calculated in accordance with the methodology described for local service carrier route applicants in the Board's procedural regulations. 14 CFR 302.1101 et seq., subpt. K and PR-172, Apr. 14, 1978. Applicants, including new entrants, whose data are not included in this costing system shall submit costings based on their internal company data, in subpt. K format to the extent feasible. While all applicants are of course free to include estimates of expense computed using a different methodology, we do not believe that it is a fruitful use of the applicants', the staff's, or the Board's resources to require an analysis of the cost of an applicant's proposal by a second costing method.

[6] On review of the environmental evaluations submitted by Allegheny and Piedmont in their applications for exemptions and Eastern in its application for suspension, to which no answers were filed, we find that our decisions does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Act of 1969 or a major regulatory action under the Energy Policy and Conservation act of 1975.

[7] We delegate to the presiding administrative law judge the authority to consolidate by order any applications which conform to the scope of the proceeding.

[8] Allegheny and Piedmont filed environmental evaluations as part of their applications.

[9] All members concurred.

[6320-01]

[Order 78-8-182; Docket 33327]

FRONTIER AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 73

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 31st day of August 1978.

By order 78-8-178, issued concurrently with this order, we have proposed to realign the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the Memphis-Omaha market, a minor market[1] where Frontier holds restricted authority. As discussed in orders 78-7-91, 78-4-109, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Frontier as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with out tentative findings and conclusions set forth in order 78-8-178, and those in orders 78-7-91, 78-4-1-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Frontier's operations in the Memphis-Omaha market is required by the public convenience and necessity, and is consistent with our policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, *it is ordered that:*

1. All intrerested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Frontier's certificate for Route 73 so as to remove operating restrictions in the Memphis-Omaha market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in appendix I of order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised before further action is taken by the Board;[3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in appendix I of order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[4]
Secretary.

[FR Doc. 78-25943 Filed 9-13-78; 8:45 am]

[1] All members concurred.

[2] Since this market generated 5,600 true O.&D. plus interline connecting passengers for the year ended Sept. 30, 1975, it meets the Board's definition of a minor market, i.e., one with less than 20 daily passengers.

[2] We further tentatively find and conclude that Frontier is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[3] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideraton of this order will be entertained.

[4] All Members concurred.

solidate, shall be filed within 20 days of the date of service of this order, and answers shall be filed 10 days later.[1]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, *it is ordered that:*

1. All intrerested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Frontier's certificate for Route 73 so as to remove operating restrictions in the Memphis-Omaha market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in appendix I of order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised before further action is taken by the Board;[2]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in appendix I of order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board: [3]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-25944 Filed 9-13-78; 8:45 am]

[1] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideraton of this order will be entertained.

[2] All Members concurred.

[6320-01]

[Order 78-8-185; Docket 33330]

HOUSTON-PHOENIX/TUCSON CASE

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 7th day of September, 1978.

By Order 78-5-109, May 19, 1978, the Board instituted this proceeding to determine whether the public convenience and necessity require the grant of new authority in the Houston-Phoenix/Tucson market. Western Air Lines has filed a petition for reconsideration asking us to clarify our intention that this proceeding consider the issue of additional service between Phoenix and Tucson. Hughes Airwest filed an answer; it does not oppose inclusion of Phoenix-Tucson service within the scope of this case, provided that any carrier authorized to serve Phoenix-Tucson as a result of this proceeding be required to serve Houston on all such flights. Airwest argues that, were we to include the issue of unrestricted Phoenix-Tucson rights, we would shift the focus of the proceeding from the primary Houston-Phoenix/Tucson market and raise the additional issue of the removal of long-haul restrictions on carriers currently operating between Phoenix and Tucson market.

We recognize that our instituting order was ambiguous on this point. We will therefore grant Western's petition and clarify the scope of this case to include the issue of nonstop authority between Houston, on the one hand, and the coterminal points of Phoenix and Tucson, on the other. The right to serve Phoenix and Tucson on the same flight and to carry local and through traffic between the two Arizona points will be in issue. Turnaround authority will not be in issue, as this would unduly delay and complicate the examination of the Houston-Phoenix/Tucson markets.

Accordingly,

1. We grant Western's petition;

2. The issues in this proceeding shall include:

(a) Whether the public convenience and necessity require that new nonstop service be granted between the terminal point Houston, Tex., and the coterminal points Phoenix and Tucson, Ariz.: *Provided*, That all flights serving both Phoenix and Tucson shall also serve Houston;

(b) If the answer to (a) is in the affirmative, which air carrier(s) should be authorized to provide such service; and

(c) Whether any terms, conditions and/or limitations should be attached to any new authority which may be awarded; and

4. Applications within the expanded scope of this case, and motions to con-

solidate, shall be filed within 20 days of the date of service of this order, and answers shall be filed 10 days later.[1]

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board:[2]

PHYLLIS T. KAYLOR,
Secretary.

[Order 78-8-183; Docket 33328]

HUGHES AIR CORP., D.B.A. HUGHES AIRWEST

Amendment of Certificate of Public Convenience and Necessity for Route 76

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 31st day of August, 1978.

By Order 78-8-178, issued concurrently with this Order, we have proposed to realine the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the Palm Springs-Salt Lake City market, a minor market[1] where Hughes Airwest holds restricted authority. As discussed in Orders 78-7-91, 78-4-109 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Hughes Airwest as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with out tentative findings and conclusions set forth in Order 78-8-178, and those in Orders 78-7-91, 78-4-109 and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Hughes Airwest operations in the Palm Springs-Salt Lake City market is required by the public convenience and necessity, and is consistent with our policy of removing restirctions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here whould not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, it is ordered That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Hughes Airwest certificate for Route 76 so as to remove operating restrictions in the Palm Springs-Salt Lake City market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and seve upon all persons listed in Appendix I of Order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full considerations will be accorded the matters or issues raised before further action is taken by the Board;[3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix I of Order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

[6320-01]

[Order 78-8-184; Docket 33329]

NATIONAL AIRLINES, INC.

Amendment of Certificate of Public Convenience of Necessity for Routes 31 and 39

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 31st day of August 1978.

By Order 78-8-178, issued concurrently with this Order, we have proposed to realign the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the Houston-Providence market, a minor market[1] where National holds restricted authority. As discussed in Orders 78-7-91, 78-4-109 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on National as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with our tentative findings and conclusions set forth in Order 78-8-178, and those in Orders 78-7-91, 78-4-109 and 76-5-101, we tentatively find and conclude that the elimination of restrictions on National's operations in the Houston-Providence is required by the public convenience and necessity, and is consistent with our policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, *It is ordered*, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending National's certificates for Routes 31 and 39 so as to remove operating resrtrictions in the Houston-Providence market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideraton will be accorded the matters or issues raised before further action is taken by the Board;[3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix I of Order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

[Order 78-8-185; Docket 33330]

NORTH CENTRAL AIRLINES, INC.

Amendments of Certificate of Public Convenience and Necessity for Route 86

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 31st day of August, 1978.

By Order 78-8-178, issued concurrently with this Order, we have proposed to realign the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the Cincinnati-Omaha, Columbus-Omaha and Dayton-Omaha markets, minor markets,[1] where American holds unresticted authority. As discussed in Orders 78-7-91, 78-4-109 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on North Central as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with our tentative findings and conclusions set forth in Order 78-8-178, and those in Orders 78-7-91, 78-4-109 and 76-5-101, we tentatively find and conclude that the elimination of restrictions on North Central's operations in the Cincinnati-Omaha, Columbus-Omaha and Dayton-Omaha markets is required by the public convenience and necessity, and is consistent with our policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, *It is ordered*, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending North Central's certificate for Route 86 so as to remove operating restrictions in the Cincinnati-Omaha, Columbus-Omaha and Dayton-Omaha markets;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised before further action is taken by the Board;[3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix I of Order 78-8-178.

This Order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:[4]

[Order 78-8-186; Docket 33331]

PIEDMONT AVIATION, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 87

Adopted by the Civil Aeronautics Board at its Office in Washington, D.C., on August 31, 1978.

By Order 78-8-178, issued concurrently with this order, we have proposed to realign the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the Charleston, W. Va.-Nashville market, a minor market[1] where Piedmont holds restricted authority. As discussed in Orders 78-07-91, 78-4-109, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Piedmont as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with our tentative findings and conclusions set forth in Order 78-8-178, and those in Orders 78-7-91, 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Piedmont's operations in the Charleston, W. Va-Nashville market is required by the public convenience and necessity, and is consistent with our policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, *It is ordered*, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Piedmont's certificate for Route 87 so as to remove operating restrictions in the Charleston, W. Va-Nashville market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in appendix I of Order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised before further action is taken by the Board;[3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in appendix I of Order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

[Order 78-9-25; Docket 22388]

REA EXPRESS, INC.

Interstate Air Freight Forwarding Operating Authority Application

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on September 7, 1978.

In Order 78-6-206, June 29, 1978, we directed all interested persons to show cause within 30 days why we should not dismiss the application of REA Express, Inc. for interstate air freight forwarder operating authority. The order stated that if no objections were filed, we would consider all further procedural steps waived and would issue an order making our tentative findings and conclusions final.

No objections to Order 78-6-206 have been filed. Accordingly, we conclude that the tentative findings and conclusions set forth in the order should be made final, and that the application of REA Express for interstate air freight forwarder operating authority should be dismissed.

Accordingly, 1. We make the tentative findings and conclusions set forth in Order 78-6-206 final; and

2. We dismiss the application of REA Express, Inc. for interstate air freight forwarder operating authority filed in Docket 22388.

We shall publish this order in the FEDERAL REGISTER.

[Order 78-9-18; Docket 32920]

ST. LOUIS-DENVER-LAS VEGAS/RENO ROUTE INVESTIGATION

Order on Motions to Consolidate applications

Issued under delegated authority September 6, 1978.

Because of ambiguity in the instituting order (Order 78-6-191) concerning the markets in issue in the instant proceeding, Allegheny Airlines, Inc., Frontier Airlines, Inc., and Western Air Lines, Inc., did not make application for Las Vegas-Reno authority during the period allowed for filing of applications and amendments to applications. After the ambiguity was brought to its attention, the Board on August 17, 1978, issued Order 78-8-90 to clarify the authority in issue. The Board indicated that the scope of the instant proceeding includes Las Vegas-Reno authority but with the restriction that any flights serving this market must also serve either Denver or St. Louis.

Allegheny, Frontier, and Western have now filed amended applications for Las Vegas-Reno authority subject to long-haul restriction and have moved to consolidate these applications into this proceeding. No answers have been filed to the amended applications or the related motions to consolidate.

[1] All Members concurred.

The amended applications will be consolidated into Docket 32920 to the extent that they conform to the scope of the investigation instituted by Order 78-6-191, as clarified by Order 78-8-90. To the extent that the applications do not conform to that scope by route description or otherwise, they will be dismissed.

Western also filed a motion for leave to file its motion to consolidate as an otherwise unauthorized document on the assumption that this action was necessary in the circumstances. This motion will be granted.

Accordingly, pursuant to authority delegated to the presiding administrative law judge by Order 78-6-191, served June 28, 1978.

1. I grant Western's motion for leave to file an unauthorized document.

2. I grant the following motions:

a. Of Allegheny to consolidate its amended application in Docket 33047 into Docket 32920;

b. Of Frontier to consolidate its Amendment No. 1 to its application in Docket 33043 into Docket 32920; and

c. Of Western to consolidate Amendment No. 2 to its application in Docket 32458 into Docket 32920;

to the extent they conform to the scope of the investigation specified in Order 78-6-191, as clarified by Order 78-8-90.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within 10 days after the service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless before that date a petition for review thereof if filed, or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By Joseph J. Saunders, Administrative Law Judge.

PHYLLIS T. KAYLOR,
Secretary.

[6320-01]

[Order 78-8-187; Docket 33332]

TEXAS INTERNATIONAL AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 82

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 31st day of August 1978.

By Order 78-8-178, issued concurrently with this Order, we have proposed to realign the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the El Paso-Salt Lake City market, a minor market[1] where Texas International holds restricted authority. As discussed in Orders 78-7-91, 78-4-109, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Texas International as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with our tentative findings and conclusions set forth in Order 78-8-178, and those in Orders 78-7-91, 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on American's operations in the El Paso-Salt Lake City markets is required by the public convenience and necessity, and is consistent with our policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained; answers shall be filed 10 days after objections are due.

Accordingly, *it is ordered* that:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Texas International's certificate for Route 82 so as to remove operating restrictions in the El Paso-Salt Lake City market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in Appendix I of Order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised before further action is taken by the Board;[3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix I of Order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[4]

[Order 78-8-188; Docket 33333]

TRANS WORLD AIRLINES, INC.

Amendment of Certificate of Public Convenience and Necessity for Route 2

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 31st day of August 1978.

By Order 78-8-178, issued concurrently with this Order, we have proposed to realign the route system of American Airlines in a manner which would, among other things, give American unrestricted authority in the Indianapolis-Nashville market, a minor market[1] where TWA holds restricted authority. As discussed in

[1] Since this market generated 6,100 true O&D plus interline connecting passengers, for the year ended Sept. 30, 1975, it meets the Board's definition of a minor market, i.e., one with less than 20 daily passengers.

[2] We further tentatively find and conclude that Texas International is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[3] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[4] All members concurred.

[1] Since this market generated 6,660 true O&D plus interline connecting passengers, respectively, for the year ended 9-30-75, it meets the Board's definition of a minor market i.e., one with less than 20 daily passengers.

Orders 78-7-91, 78-4-109, and 76-5-101, it is our view that such small markets do not, as a practical matter, pres-

shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in appendix I of Order

lines for State reports containing sample data from the 1980 census of

Orders 78-7-91, 78-4-109, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and, accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on TWA as well as American will give those carriers greater flexibility to establish more logical aircraft routings, and may enable them to offer new or additional service, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Therefore, consistent with our tentative findings and conclusions set forth in Order 78-8-178, and those in Orders 78-7-91, 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on TWA's operations in the Indianapolis-Nashville markets is required by the public convenience and necessity, and is consistent with our policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.[2]

Interested persons will be given 30 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing complete with the opportunity for oral cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be enterained; answers shall be filed 10 days after objections are due.

Accordingly, *It is ordered* That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending TWA's certificate for Route 2 so as to remove operating restrictions in the Indianapolis-Nashville market;

2. Any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendment and modification set forth here shall, no later than October 11, 1978, file with the Board and serve upon all persons listed in appendix I of Order 78-8-178, a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections; answers to objections shall be filed no later than October 26, 1978;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised before further action is taken by the Board; [3]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix I of Order 78-8-178.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[4]
Secretary.

[FR Doc. 78-25937 Filed 9-13-78; 8:45 am]

[2] We further tentatively find and conclude that TWA is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[3] All motions or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[4] All members concurred.

DEPARTMENT OF COMMERCE

Bureau of the Census

CENSUS ADVISORY COMMITTEE ON POPULATION STATISTICS

Public Meeting

Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that the Census Advisory Committee on Population Statistics will convene on October 6, 1978, at 9:40 a.m. The Committee will meet in Room 2424, Federal Building 3, at the Bureau of the Census in Suitland, Md.

The Census Advisory Committee on Population Statistics advises the Director, Bureau of the Census, on current programs and on plans for the decennial census of population.

The Committee is composed of 5 members appointed by the Secretary of Commerce, and 10 members designated by the president of the Population Association of America from the membership of that association.

The agenda for the meeting, which is scheduled to adjourn at 4:15 p.m. is: (1) Introductory remarks; (2) status of 1980 census planning; (3) table outlines for State reports containing sample data from the 1980 census of population; (4) National Academy of Sciences Decennial Census Review Panel; (5) Committee recommendations from the March 31 meeting, and Census Bureau responses; (6) goals and operating procedures of the Advisory Committee; (7) possible revisions in Census Bureau publications on international demographic statistics; (8) design of 1940 and 1950 public use samples; (9) new criteria for defining metropolitan areas; and (10) Committee recommendations, agenda for the next meeting, and election of the chairperson-elect.

The meeting will be open to the public, and a brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee control officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Dr. Paul C. Glick, Senior Demographer, Population Division, Bureau of the Census, Room 2011, Federal Building 3, Suitland, Md. (Mailing address: Washington, D.C. 20233.) Telephone 301-763-7030.

Dated: September 8, 1978.

MANUEL D. PLOTKIN,
Director,
Bureau of the Census.

[FR Doc. 78-25866 Filed 9-13-78; 8:45 am]

[3510-07]

CANCELLATION OF SURVEY TO COMPILE REGISTRATION AND VOTING STATISTICS

Notice was given in the FEDERAL REGISTER, Wednesday, March 22, 1978 (43 FR 11841) that the Bureau of the Census would conduct a survey to collect registration and voting statistics in certain jurisdictions covered under section 207 of the Voting Rights Act of 1965, as amended, 42 U.S.C. 1973aa-5.

Notice is hereby given that this survey will not be conducted because the funding required for fiscal year 1979 was not appropriated by the Congress.

Dated: September 8, 1978.

MANUEL D. PLOTKIN,
Director,
Bureau of the Census.

Economic Development Administration

CHARTER OAK INDUSTRIES, INC. AND DIANE KNITFABRICS, INC.

Petitions for Determinations of Eligibility to Apply for Trade Adjustment Assistance

Petitions were accepted for filing from two firms: (1) Charter Oak Industries, Inc., 1407 Park Street, Hartford, Conn. 06106, a producer of women's coats (accepted September 5, 1978); and (2) Diane Knitfabrics, Inc., 85 Spring Street, South Norwalk, Conn. 06854, a producer of women's sweaters (accepted September 6, 1978). The petitions were accepted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and Section 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

CHARLES L. SMITH,
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

Industry and Trade Administration

COMPUTER PERIPHERALS, COMPONENTS AND RELATED TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Computer Peripherals, Components and Related test Equipment Technical Advisory Committee will be held on Thursday, September 21, 1978, at 9 a.m. in Room 3817, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. The Executive Session will begin at 11 a.m. and will be a joint meeting with the Computer Systems Technical Advisory Committee.

The Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer peripherals, components and related test equipment, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has six parts:

GENERAL SESSION

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Report on the solicitation for new members.
4. Nomination and election of a new chairman.
5. Report and discussion on combining the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee and the Computer Systems Technical Advisory Committee.

EXECUTIVE SESSION

6. Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The general session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the committee. Written statements may be presented at any time before or after the meeting.

With respect to agenda item (6), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the executive session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the executive session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the committee during the executive session of the meeting have been properly classified under Executive Order 11652. All committee members have appropriate security clearances. This meeting is called on short notice because of the need to obtain and consider the committee's advice on proposals to revise the multilateral COCOM control list prior to the beginning of negotiations on October 1, 1978.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3012, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230.

FOR FURTHER INFORMATION, CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee and of any subcommittees thereof is hereby published.

Dated September 11, 1978.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

U.S. DEPARTMENT OF COMMERCE, OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

COMPUTER PERIPHERALS, COMPONENTS AND RELATED TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Notice of determination

In response to written requests of representatives of a substantial segment of the computer peripherals, components and related test equipment industry, the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee was established by the Secretary of Commerce pursuant to section 5(c)(1) of the Export Administration Act of 1969, 50 U.S.C. App. 2404(c)(1) (1976), to advise the Department of Commerce with respect to

questions involving (A) technical matters, (B) worldwide availability, and actual utili-

Dated: September 11, 1978.

LAWRENCE J. BRADY,

meetings dealing with the matters set forth in the first paragraph of this determination. These meetings will include discussions of

It has been determined that this standard is technically inadequate, and in view of the existence of an up-

questions involving (A) technical matters, (B) worldwide availability, and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to computer peripherals, components and related test equipment, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates, including proposed revisions of any such multilateral controls.

The Committee, which currently has 12 members representing industry and 9 members representing Government agencies, will terminate no later than August 29, 1980, unless extended by the Secretary of Commerce or her designee. All members of the Committee have the appropriate security clearances.

The Committee's activities are conducted pursuant to 50 U.S.C. App. 2404(c)(1); the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976); and the Office of Management and Budget Circular A-63 (Revised), Advisory Committee Management, effective May 1, 1974. Section 10 of the Federal Advisory Committee Act as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, provides that advisory committee meetings or portions thereof may be exempt from the open meeting and public participation requirements of the Federal Advisory Committee Act if the President, or the head of the agency to which the advisory committee reports, determines that such meetings or portions thereof may be closed to the public in accordance with 5 U.S.C. 552b(c).

5 U.S.C. 552b(c)(1) provides that agency meetings or portions thereof may be closed to the public where they are likely to disclose matters that are specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and are in fact properly classified pursuant to such Executive order.

Eight notices of determination authorizing the closing of meetings, or portions thereof, of the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee and its formal subcommittees, dealing with security classified matters, have been approved in the past.

In order to provide advice to the Department under the terms of its charter, the Committee and formal subcommittees thereof will continue to hold a series of meetings dealing with the matters set forth in the first paragraph of this determination. These meetings will include discussions of the COCOM control list as it relates to the commodities and technical data under its purview, and with the foreign availability of these commodities and technical data. In addition, the Committee and its formal subcommittees will be preparing recommendations for the Department's consideration relating to the U.S. Government's negotiating position on COCOM-related matters. Much of the information relating to the COCOM control list, as well as proposed changes, is now or will be security classified for national defense or foreign policy reasons, pursuant to Executive Order No. 11652, 3 CFR 339 (1974) or Executive Order No. 12065, 43 FR 28949 (1978). In order for the Committee and its formal subcommittees to provide required advice to the U.S. Government, it will be necessary to provide the Committee and its formal subcommittees with such classified material. Therefore, the series of meetings or portions thereof will be open to the public.

Accordingly, I hereby determine, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the series of meetings or portions of meetings of the Committee and of any subcommittees thereof, dealing with the aforementioned classified materials shall be exempt, for the period from the date of the signing of this determination, to August 29, 1980, from the provisions of section 10 (a)(1) and (a)(3), relating to open meetings and public participation therein, because the Committee and subcommittee discussions will be concerned with matters listed in 5 U.S.C. 552b(c)(1). The remaining series of meetings or portions thereof will be open to the public.

Dated: September 6, 1978.

ELSA A. PORTER,
Assistant Secretary for Administration.

Dated: September 5, 1978.

DANIEL GARBERN,
Acting Assistant General Counsel.

COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Computer Systems Technical Advisory Committee will be held on Thursday, September 21, 1978, at 9:30 a.m. in Room 1851, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C. At 11 a.m. the Committee will continue the meeting in Room 3817 with the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of Trade Regulation, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee will meet only in executive session to discuss matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the executive session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and the public participation therein, because the executive session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the meeting have been properly classified under Executive Order 11652. All Committee members have appropriate security clearances. This meeting is called on short notice because of the need to obtain and consider the Committee's advice on proposals to revise the multilateral COCOM control list prior to the beginning of negotiations on October 1, 1978.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Industry and Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

The complete notice of determination to close meetings or portions thereof of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof is hereby published.

Dated: September 11, 1978.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

U.S. DEPARTMENT OF COMMERCE, OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

COMPUTER SYSTEMS TECHNICAL ADVISORY COMMERCE

Notice of determination

In response to written requests of representatives of a substantial segment of the computer systems industry, the Computer Systems Technical Advisory Committee was established by the Secretary of Commerce pursuant to section 5(c)(1) of the Export Administration Act of 1969, 50 U.S.C. App. 2404(c)(1) (1976), to advise the Department of Commerce with respect to questions involving (A) technical matters, (B) worldwide availability, and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates, including proposed revisions of any such multilateral controls.

The Committee, which currently has 10 members representing industry and 11 members representing Government agencies, will terminate no later than August 29, 1980, unless extended by the Secretary of Commerce or her designee. All members of the Committee have the appropriate security clearances.

The Committee's activities are conducted pursuant to 50 U.S.C. App. 2404(c)(1); the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976); and the Office of Management and Budget Circular A-63 (Revised), Advisory Committee Management, effective May 1, 1974. Section 10 of the Federal Advisory Committee Act as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, provides that advisory committee meetings or portions thereof may be exempt from the open meeting and public participation requirements of the Federal Advisory Committee Act if the President, or the head of the agency to which the advisory committee reports, determines that such meetings or portions thereof may be closed to the public in accordance with 5 U.S.C. 552b(c).

5 U.S.C. 552b(c)(1) provides that agency meetings or portions thereof may be closed to the public where they are likely to disclose matters that are specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and are in fact properly classified pursuant to such Executive order.

Eight notices of determination authorizing the closing of meetings, or portions thereof, of the Computer Systems Technical Advisory Committee and its formal subcommittees, dealing with security classified matters, have been approved in the past.

In order to provide advice to the Department under the terms of its charter, the Committee and formal subcommittees thereof will continue to hold a series of meetings dealing with the matters set forth in the first paragraph of this determination. These meetings will include discussions of the COCOM control list as it relates to the commodities and technical data under its purview, and with the foreign availability of these commodities and technical data. In addition, the Committee and its formal subcommittees will be preparing recommendations for the Department's consideraton relating to the U.S. Government's negotiating position on COCOM-related matters. Much of the information relating to the COCOM control list, as well as proposed changes, is now or will be security classified for national defense or foreign policy reasons, pursuant to Executive Order No. 11652, 3 CFR 339 (1974) or Executive Order No. 12065, 43 FR 28949 (1978). In order for the Committee and its formal subcommittees to provide required advice to the U.S. Government, it will be necessary to provide the Committee and its formal subcommittees with such classified material. Therefore, the series of meetings or portions of meetings of the Committee and of subcommittees thereof that will involve discussions of matters specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive order, must be closed to the public. The remaining series of meetings or portions thereof will be open to the public.

Accordingly, I hereby determine, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the series of meetings or portions of meetings of the Committee and of any subcommittees thereof, dealing with the aforementioned classified materials shall be exempt, for the period from the date of the signing of this determination, to August 29, 1980, from the provisions of section 10 (a)(1) and (a)(3), relating to open meetings and public participation therein, because the Committee and subcommittee discussions will be concerned with matters listed in 5 U.S.C. 552b(c)(1). The remaining series of meetings or portions thereof will be open to the public.

National Bureau of Standards

SIMPLIFIED PRACTICE RECOMMENDATION

Action on Withdrawal

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the withdrawal of simplified practice recommendation R 78-50, "Iron and Steel Roofing, Siding, and Ridge Roll."

It has been determined that this standard is technically inadequate, and in view of the existence of an up-to-date American Iron and Steel Institute's Steel Products Manual which adequately covers R 78-50, revision of this simplified practice recommendation would serve no useful purpose.

This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the FEDERAL REGISTER of July 7, 1978 (43 FR 29345) to withdraw this standard. The effective date for the withdrawal of this standard will be 60 days after the publication of this notice. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce procedures.

Dated: September 11, 1978.

THOMAS A. DILLON,
Acting Director.

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Meetings

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of public meeting.

SUMMARY: The South Atlantic Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) will meet September 26-28, 1978.

DATES: The meeting will convene at 1:30 p.m. on Tuesday, September 26 and will adjourn at about noon on September 28.

ADDRESS: The meeting will be held at the Velvet Cloak Inn, 1505 Hillsborough Street, Raleigh, N.C. 27605.

FOR FURTHER INFORMATION CONTACT:

Ernest D. Premetz, Executive Director, South Atlantic Fishery Management Council, 1 Southpark Circle, Suite 306, Charleston, S.C. 29407, 803-571-4366.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. For information on seating, changes to the agenda, or written comments, contact the Executive Director. Proposed Agenda:

SEPTEMBER 26, 1978

(1) Snapper-Grouper FMP status and recommendation; (2) Billfish FMP update.

SEPTEMBER 27, 1978

(1) Coral FMP contract selection de-

Patent 4,042,938: Analog and Digital Data Recorder; filed January 8, 1976, patented

Patent 3,958,602: Flueric Laminar Digital Amplifier; filed March 12, 1975, patented

Patent 3,919,406: Thermochemical Production of Hydrogen; filed July 10, 1974, patented November 11, 1975.

Patent 3,971,110: Method for Fabricating an Electron-Emission Cathode; filed September 11, 1975, patented July 27, 1976.

SEPTEMBER 27, 1978

(1) Coral FMP contract selection decision review; (2) King and Spanish Mackerel FMP status report; (3) Other management plan-related activities; (4) Involved agencies Council-related activities.

SEPTEMBER 28, 1978

(1) Foreign fishing permit applications, if any; (2) Other management business.

Dated: September 8, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for $4 ($8 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

U.S. DEPARTMENT OF THE ARMY, Office of Judge Advocate General, Patent Division, Room 2C-455, Pentagon, Washington, D.C. 20310

Patent 3,941,999: Automatic Focus Pulse Gated System; filed April 1, 1975, patented March 2, 1976.

Patent 3,944,950: Quasi-Optical Integrated Circuits; filed September 30, 1974, patented March 16, 1976.

Patent 3,949,246: Piezoelectric Bimorph Controlled Variable Capacitor; filed December 23, 1974, patented April 6, 1976.

Patent 3,952,378: Mechanical Closure Device; filed February 4, 1975, patented April 27, 1976.

Patent 3,952,576: Laminar Jet Fluid Property Sensor; filed April 10, 1975, patented April 27, 1976.

Patent 3,953,129: Testing and Inspecting Lens by Holograph Means; filed January 9, 1975, patented April 27, 1976.

Patent 3,953,850: Radar Test Facility Communication System; filed October 8, 1974, patented April 27, 1976.

Patent 3,958,121: Infrared Image Storage Plate; filed September 10, 1975, patented May 18, 1976.

Patent 3,958,602: Flueric Laminar Digital Amplifier; filed March 12, 1975, patented May 25, 1976.

Patent 3,960,022: Null Adjustable Vortex Rate Sensor; filed May 9, 1973, patented June 1, 1976.

Patent 3,962,591: Voltage Doublar Circuit; filed December 23, 1974, patented June 8, 1976.

Patent 3,962,657: Broadband Data Modulation System; filed October 22, 1974, patented June 8, 1976.

Patent 3,967,218: Edge-Guided Wave Directional Combiner; filed September 26, 1975, patented June 29, 1976.

DEPARTMENT OF THE AIR FORCE AF/JACP, Washington, D.C. 20314

Patent 3,970,007: Salvage Switch; filed January 20, 1971, patented July 20, 1976.

Patent 3,975,210: Metal-Gas Battery with Axial Reactant Gas Storage Cavity; filed March 27, 1975, patented August 17, 1976.

DEPARTMENT OF ENERGY

Bonneville Power Administration

FRANKLIN AREA SYSTEM REINFORCEMENT

Meeting

This notice is published to apprise interested parties of a public information meeting to be held by the Bonneville Power Administration (BPA) on Tuesday, October 17, 1978, at 7:30 p.m. in the Burbank High School Commons Building, Burbank, Wash. The meeting is being held so that BPA officials may describe to the public the proposed facilities for Franklin area system reinforcement. BPA will also be soliciting public comments on the draft location supplement to BPA's fiscal year 1979 program environmental statement covering Franklin area system reinforcement.

The draft location supplement on this proposal describes the environmental impact of constructing approximately 6 miles (10 km) of 500-kV transmission line between the existing BPA Lower Monumental-John Day 500-kV line and the Sacajawea substation near Ice Harbor Dam in Walla Walla County, Wash. Impacts resulting from expanding Sacajawea substation by approximately 6 acres (2.4 ha) are also described.

All interested parties are urged to attend. All comments are welcomed in order to assist the administration in fully evaluating the environmental

factors pertinent to this particular aspect of BPA's fiscal year 1979 program. Comments received will be con-

sion's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be consid-

producer certificate issued in docket No. CS71-70 on May 4, 1971. With regard to the proposed rate increase,

(B) B&S is authorized to collect a total rate of §1.00 per Mcf at 14.65 psia for the sale of natural gas from the

Line No. and item	Amount
(a)	(b)

factors pertinent to this particular aspect of BPA's fiscal year 1979 program. Comments received will be considered in the preparation of the Franklin area system reinforcement final location supplement.

In addition to the nonconstruction alternative, with its lack of environmental impacts and resultant line overloading, two alternative route locations for the proposed transmission line have been identified. The alternative locations of the transmission line and the additional substation facilities and the environmental impacts associated with each are more thoroughly presented in the draft location supplement for Franklin area system reinforcement.

Copies of the draft location supplement are available for inspection in the library of the BPA headquarters, 1002 Northeast Holladay Street, Portland, Oreg.; the BPA Washington, D.C., office in the Interior Building, room 5600; and at the Walla Walla area office, West 101 Poplar, Walla Walla, Wash.

For those who cannot attend the meeting, written comments will be accepted until the end of the comment period, October 27, 1978.

Additional or clarifying information may be obtained by writing or calling the Environmental Manager, Bonneville Power Administration, P.O. Box 3621, Portland, Oreg. 97208; 503-234-3361, extension 5136.

Dated at Washington, D.C. this 11th day of September 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

Federal Energy Regulatory Commission

[Docket Nos. CI66-853, et al.]

AMINOIL USA, INC. (OPERATOR), (SUCC. TO BURMAH OIL AND GAS CO. AND SIGNAL OIL AND GAS CO.

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

SEPTEMBER 6, 1978.

Take notice that each of the applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 15, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI78-29]

BRIGHT & SCHIFF

Order Granting Petition for Special Relief

SEPTEMBER 7, 1978.

On February 13, 1978, Bright & Schiff [1] (B&S) filed a petition [2] for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations. In the subject petition, B&S seeks authorization to charge the increased total rate of $1.00 per Mcf for the sale of gas attributable to the 100 percent working interest in gas produced from the Hamman No. 1 Well, Monte Christo Field, Hidalgo County, Tex. South Texas Natural Gas Gathering Co. (South Texas) is purchaser of the subject gas.[3]

B&S is currently selling this gas to South Texas at a rate of 33.32 cents per Mcf pursuant to a 20-year contract, dated May 1, 1959, and a small producer certificate issued in docket No. CS71-70 on May 4, 1971. With regard to the proposed rate increase, South Texas agreed, in a letter to B&S, to pay the requested $1.00 per Mcf rate if the Commission authorizes B&S to charge the increased rate for its gas.

On March 7, 1978, notice of B&S's petition was issued. No protests or petitions to intervene were filed.

As justification for the proposed rate increase B&S states that compression is needed so that the subject gas can continue to be delivered to South Texas. Further B&S avers that it is uneconomical to continue to operate compression at the current rate of 33.32 cents per Mcf and that if special relief is not granted, it will sek abandonment of the subject well.

Due to the adequacy of the data finally submitted, Staff concludes that no field investigation is necessary.

B&S states that it has invested $10,000 for a major overhaul of the compressor on the Humman Lease.[4] Staff considers this expense reasonable. Moreover, based on the data filed by B&S and Staff's analysis thereof, Staff determined that B&S's a remaining net book investment of $5,315, and estimated initial yearly production expenses of $10,852 [5] are reasonable. Additionally, using the estimated yearly production expense of $10,852, and allowing for a 5 percent yearly inflation factor over the estimated remaining 2½ year life of the well, Staff estimates that total operating expenses for this project will be $29,641.

The above costs and the net working interest reserves of 46,275 Mcf of gas were used in a traditional cost study.[6] The results of this study, utilizing a 15 percent rate of return, indicates the rate requested is supported on a cost basis.[7]

A review of the economics associated with this project, and Staff's analysis thereof, indicates that the requested rate is cost supported and it is in the public interest to grant special relief.

The Commission orders: (A) B&S's petition for special relief, in docket No. RI78-29, is hereby granted.

(B) B&S is authorized to collect a total rate of §1.00 per Mcf at 14.65 psia for the sale of natural gas from the Hamman No. 1 Well to South Texas effective on the date of the Commission order herein, subject to the conditions in paragraph (C) below.

(C) B&S must file a Notice of Independent Producer Rate Change reflecting the above authorized rate, an executed amendment to its contract with South Texas providing for payment of the rate granted above, and a statement signed by South Texas that the compressor overhaul work was completed to South Texas's satisfaction within 30-days of the date of the order herein.

By the Commission.

KENNETH F. PLUMB,
Secretary.

Bright & Schiff, Docket No. RI78-29, Hamman No. 1 Well, Monte Christo Field, Hidalgo County, Tex.

[Unit cost of gas]

Recommendation for Change in Project Operation

SEPTEMBER 7, 1978.

Take notice that on August 4, 1977, the U.S. Department of the Interior petitioned to intervene in the proceeding involving the raising of Ross Dam—one of three developments licensed under Project No. 553. Interior requested that the Federal Power Commission stay the effect of Order No. 808, which permitted the raising of Ross Dam, until an examination was made of the effect of the project's flow regime on the river's fishery resource. The Secretary of the Interior requested that he be given 45 days to file conditions to be included in the project license to protect the fishery resource. The FPC granted intervention and the requested stay. Interior filed its proposed conditions on September 21, 1977.

On August 2, 1978, the Federal Energy Regulatory Commission [1] issued Opinion No. 808-A reaffirming the earlier order. The FERC stated that, while it would not stay its approval of raising Ross Dam nor would it include Interior's proposed conditions in the license amendment at that time, it would treat Interior's request for minimum flows in the Skagit River below the project as a recommendation under article 37 of the license.

Article 37 states:

> The Licensee shall in connection with the Gorge development, construct, maintain, and operate such protective devices and comply with such reasonable modifications of the project structure and operation in the interests of fish and wildlife resources as may be hereafter prescribed by the Commission upon the recommendation of the Secretary of the Interior, the Washington Department of Game.

Interior's minimum flow recommendation is as follows:

> During the period of February 1 through July 15, the Licensee shall release enough water from Gorge Dam so as to maintain a constant minimum flow of 3,000 c.f.s. at Marblemount Bridge. Any flow reductions below 3,000 c.f.s. are unacceptable. However, if drought conditions necessitate, a lower flow from 3,000 c.f.s. is to be maintained with little or no fluctuation and the minimum base instantaneous flow is not to be less than 1,000 c.f.s. from Gorge Dam irrespective of tributary inflow. Any reduction in minimum flow below 3,000 c.f.s. should not exceed 200 c.f.s. per hour. Flow reduction from 5,000 c.f.s. to 3,000 c.f.s. is not to exceed the rate of 500 c.f.s. per hour. From the period August 15 through October 1, minimum base instantaneous flow at Gorge Dam shall be maintained at 1,000 c.f.s. (or approximately 2,000 c.f.s. at Marblemount Bridge). Any flow reductions from the period of August 15 through October 1 shall not exceed 200 c.f.s. per hour.
>
> For the flows from the periods of July 15 to August 15 and October 1 to February 1, additional studies are needed to determine proper flows downstream from Gorge Dam. When the studies are completed additional conditions will be submitted for inclusion in the license.

This notice initiates a proceeding on this recommendation.

Any person desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or participate in any hearing, a person must file a petition to intervene in accordance with the Commission's rules. Any protest or petition to intervene must be filed on or before October 17, 1978. The Commission's address is: 825 North Capitol Street NE., Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25837 Filed 9-13-78; 8:45 am]

[1] This proceeding was commenced before the FPC. By the joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the FERC. The term "Commission", when used in the context of action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[6740-02]

[Docket No. CP71-132]

COLUMBIA GAS TRANMISSION CORP., ET AL.

Petition To Amend

SEPTEMBER 7, 1978.

In the matter of Columbia Gas Transmission Corp., Atlantic Seaboard Corp., Cumberland & Allegheny Gas Co., Home Gas Co., Kentucky Gas Transmission Corp., the Manufacturers Light & Heat Co., the Ohio Fuel Gas Co., and United Fuel Gas Co.

Take notice that on August 25, 1978, Columbia Gas Transmission Corp. (Petitioner), P.O. Box 1273, Charleston, W. Va. 25325, filed in Docket No. CP71-132 a petition to amend the order of March 10, 1971 (45 FPC 398) issued by the Federal Power Commission (FPC) in the instant docket pursuant to section 7(c) of the Natural Gas Act [1] so as to eliminate the condition that Petitioner maintain its books and records in such a manner that certain of its accounts would be identifiable as to each of the eight constituent companies to the merger which was approved in the aforementioned order, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of March 10, 1971 (45 FPC 398), Petitioner was authorized to acquire and operate all of the natural gas facilities of Atlantic Seaboard Corp., Cumberland & Allegheny Gas Co., Home Gas Co., Kentucky Gas Transmission Corp., the Manufacturers Light & Heat Co., the Ohio Fuel Gas Co., and United Fuel Gas Co. Petitioner states that the effectiveness of the certificates issued in the FPC order was conditioned in ordering paragraph (F) "upon Columbia's maintenance of its books and records, until further order of the Commission, in such a manner that its operating revenue accounts, gas purchase costs, other direct operating expense accounts, and gas plant accounts, will be identifiable as to each of the constituent companies to the merger." (45 FPC at 402.) The order also indicates that Petitioner had advised various intervenors that it was willing to maintain the identifiable accounts, as described above, through July 1, 1978, it is stated.

Petitioner asserts that the maintenance of accounts identifiable as to each constituent company to the merger authorized herein no longer serves any useful purpose. Petitioner states that by the order issued January 20, 1975, in docket No. RP73-86, the Commission approved article III of a proposed stipulation and agreement which provided for a phased removal of Petitioner's multiple zone system. As a result, says Petitioner, the maintenance of accounts identifiable with the constituent companies is no longer used in Columbia's rate cases.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 29, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and

[1] This proceeding was commenced before the FPC. By joint regulation of Oct. 1, 1977 (10 CFR 1000.01), it was transferred to the FERC.

procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it or its designee in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-506]

CONSOLIDATED GAS SUPPLY CORP. AND TEXAS EASTERN TRANSMISSION CORP.

Order Granting Temporary Certificates of Public Convenience and Necessity

SEPTEMBER 7, 1978.

On August 29, 1978, Consolidated Gas Supply Corp. (Consolidated) and Texas Eastern Transmission Corp. (Texas Eastern) at the request of Columbia Gas Transmission Corp. (Columbia) filed a notice with the Commission that on or about September 1, 1978, they would, for a period not to exceed 60 consecutive days, pursuant to § 157.22 of the Commission's regulations under the Natural Gas Act (18 CFR 157.22), commence emergency transportation and delivery of natural gas for injection into Consolidated's storage facilities of up to six million dekatherms (6,000,000 dts)of natural gas for the account of Columbia. Withdrawals would be made by Consolidated and return delivery would be made by Texas Eastern to Columbia during another period, not to exceed 60 consecutive days, during the course of the 1978-79 winter heating season. Withdrawal of the volumes would commence on a date mutually agreed to by the parties. The Notice assumes that § 157.22 of the Commission's regulations is sufficiently broad to exempt from Commission regulation under seciton 7 of the Natural Gas Act both the 60-day injection into Consolidated's storage and the subsequent withdrawal and redelivery to Columbia during the second 60-day period.

The contemplated transportation and storage service would be rendered for Columbia on an interruptible basis and would be subordinate to the other delivery obligations of Consolidated and Texas Eastern. The storage injection volumes would be made available to Consolidated through a reduction by Columbia in its takes of natural gas from Texas Eastern at existing points of delivery in Texas Eastern's Rate Zone "C". Texas Eastern would then deliver to Consolidated the storage injection volumes made available to it by Columbia at existing points of delivery to Consolidated, also in Texas Eastern's Rate Zone "C". Subsequent redelivery of the withdrawal volumes from Consolidated's storage facilities to Columbia would be made through the facilities of Texas Eastern by reversing the flow of the injection volumes.

The Notice asserts that Columbia has a critical short-term need for additional storage capacity to accommodate volumes of gas available for injection during the remainder of the current summer season. Columbia's gas supply and market situation is such that it will be unable, without the utilization of Consolidated's storage facilities, to take all of the volumes of gas which will be available to it between now and October 31, 1978. There will be a permanent loss of this supply currently available to Columbia unless it can be injected into storage. If these presently available volumes can find their way into storage, they will be withdrawn for high-priority service during the forthcoming winter heating season. Columbia projects curtailment of high priority customers during the forthcoming winter heating season. It currently projects that during the 5-month winter heating season commencing November 1, 1978, it will be required to curtail 100 percent of priority 3 and a substantial percentage of its priority 2 requirements.[1]

Columbia is unable to provide capacity for this currently available gas in its own storage facilities which are now more than 10 Bcf above scheduled injection levels. Columbia contends that it can avoid the loss of these volumes if it is permitted to utilize available storage capacity belonging to Consolidated.

Columbia has agreed to pay Consolidated in accordance with the rates contained in Consolidated's GSS Rate Schedule in its effective FERC Gas Tariff, adjusted to an average rate per dekatherm stored. Accordingly, Columbia would be billed monthly thirty cents (30¢) per dt injected for each month in which gas is injected for storage. Columbia has agreed to pay Texas Eastern the applicable TS-1 or TS-1 Excess rate currently effective for transportation under Texas Eastern's Rate Schedule TS-1 of its FERC Gas Tariff. When Texas Eastern's transportation of gas from Columbia constitutes a "backhaul" of gas, Columbia is to pay Texas Eastern a charge of $1, 148.43 per day; and when Texas Eastern's transportation of gas to Columbia constitutes a "backhaul" of gas, Columbia is to pay Texas Eastern a charge of $1,351.10 per day.

The language of § 157.22(a) of the regulations specifically provides that the section is to be "limited to a single period of not more than 60 days * * *". The Federal Power Commission (FPC), predecessor agency to this Commission in an order issued in *Transcontinental Gas Pipeline Company* and *Consolidated Gas Supply Corporation*, Docket No., CP77-25, on February 3, 1977, discussed the meaning of the limited term emergency service provided for under this section. That case involved emergency storage service sought to be undertaken by interstate pipeline companies. Storage injections were to be commenced on a certain date, were scheduled to continue for a period of not more than 60 consecutive days, and were to be withdrawn subsequently during a second 60-day period. The FPC concluded that such a "proposal encompasses a time period not within the contemplation of § 157.22(a) of the regulations".[4]

The same rationale should be applied with respect to Consolidated's proposed storage for Columbia. Not only does the proposed service involve 120 days as opposed to the 60-day period contemplated by § 157.22, but we perceive no emergency of the magnitude presented the FPC prior to its January 19, 1977, order in Transco, Docket No. CP77-128. Moreover, there is considerable question whether § 157.22 can properly be applied in a situation involving storage and transportation service only. We need not decide that issue, however, because of our determination, infra that a temporary certificate of public convenience and necessity should be issued promptly pursuant to section 7 of the Natural Gas Act so that the proposed storage

[1] Such curtailment is estimated both under its currently effective three priority end use curtailment plan as well as under a curtailment plan predicated on the priorities specified for curtailment under FPC order No. 467-B (18 CFR 2.78). These projections evidently contemplate Columbia storage facilities being filled to capacity prior to the start of the 1978-79 winter heating season.

[4] In the February 3, 1977, order the FPC referred to another order issued in *Transcontinental Gas Pipeline Corporation*, Docket No. CP77-128 on January 19, 1977, in which it had permitted the use of § 157.22 in a similar situation. The FPC in the February 3, 1977, order emphasized the extreme emergency presented in the earlier matter, stating: "* * * Finding the severity of the current individual emergency situation expressed therein precluded the pipelines from responding effectively on an emergency basis under section 7 procedures, the Commission determined that the public interest demanded that pipelines be allowed to act quickly to "assure the maintenance of adequate natural gas service where interruption or serious curtailment exist * * * because of * * * curtailment of supply* * *". (sec. § 157.22(a)). However, we are not compelled to apply that rationale here in that we find the granting of a certificate is a more appropriate response.

injections can commence as soon as possible.

sales by persons with exemptions under section 1(b) and 1(c) of the Act

public convenience and necessity authorizing the proposed service. As pre-

therefor should be issued as hereinafter ordered and conditioned.

[6740-02]

[Docket No. RP74-100 et al.]

by Colorado Interstate Gas Co. at Docket No. RP78-51 and a semiannual purchased gas adjustment filed by

injections can commence as soon as possible.

On August 31, 1978, Consolidated, Texas Gas Transmission Corporation (Texas Gas) and Texas Eastern filed a Notice [5] at the request of New Jersey Natural Gas Co. (NJN) that they intend to commence on or about September 1, 1978, pursuant to § 2.68 of the Commission's Statement of General Policy and Interpretations for a period not to exceed 60 consecutive days, emergency transportation and deliveries of natural gas for the account of NJN for injection into Consolidated's storage facilities.

The proposed gas storage service is to be utilized by NJN to husband certain supplies that have become available to it pursuant to a 60-day emergency gas purchase agreement with Louisiana Gas Intrastate, Inc., providing for the purchase of up to a total of approximately 1,000,000 delkatherms (dt) of natural gas. Deliveries are to be made in Louisiana, beginning on or about September 1, 1978, and continuing for a period up to 60 consecutive days. The deliveries of natural gas in Louisiana will first be made to Texas Gas, followed by delivery into the facilities of Texas Eastern. Texas Eastern will in turn transport and deliver to Consolidated for the account of NJN. Texas Eastern's deliveries to Consolidated will be at existing points of interconnection between the facilities of Consolidated and Texas Eastern in the latter's Rate Zone C, for injection by Consolidated into storage. On a subsequent date during the 1978-79 winter, to be mutally agreed upon by NJN, Consolidated and Texas Eastern, withdrawals by Consolidated and deliveries by Texas Eastern to NJN will commence and continue for a period not to exceed 60 consecutive days.

In the August 31, 1978, Notice, Consolidated asserts that NJN is in need of additional storage to offset critically low storage balances resulting from the severity of the past two winters and is currently seeking additional storage on a long-term basis. It further notes that the customer profile of NJN is virtually all in Priority 1 with a relatively small amount in Priority 2 and that but for emergency purchases made in February and March of this year NJN would have depleted its storage by the third week of March.

Consolidated indicates that all phases of the contemplated transaction as to NJN are to be instituted pursuant to § 2.68 of the Commission's Statement of General Policy and Interpretations under the Natural Gas Act (18 CFR 2.68). It is of the view that § 2.68 is broad enough in scope to include not only 60 day emergency sales by persons with exemptions under section 1(b) and 1(c) of the Act but also the transportation and storage of such volumes by interstate pipelines subject to the jurisdiction of the Commission.

While the 60-day sale described in Consolidated's August 31, 1978, Notice between Louisiana Gas Intrastate, Inc. and NJN would seem to fall within the purview of § 2.68,[6] it does not follow that Consolidated's proposed storage service for NJN may also be performed pursuant to § 2.68. The language of that section extends a 60 day emergency exemption only to the nonjurisdictional companies described. Moreover, § 2.68 like § 157.22 contemplates exempting from section 7 certificate requirements certain emergency sales and operations which do not exceed 60 consecutive days. The injection and withdrawal operations of Consolidated and the transportation by Texas Eastern are proposed to encompass 120 days.

We believe that Consolidated's proposed storage service and Texas Eastern's proposed transportation service for NJN cannot be permitted pursuant to § 2.68. Not only would these services involve 120 days as opposed to 60 days, but § 2.68 by its terms applies only to nonjurisdictional entities. Consolidated and Texas Eastern are both jurisdictional natural gas companies. We are aware, in this regard, of a Commission order issued in *Southern Natural Gas Company*, Docket No. RP77-136-1 on November 29, 1977, wherein we permitted a nonjurisdictional distributor to provide emergency storage service and two jurisdictional pipelines to provide the necessary transportation service pursuant to § 2.68. It is sufficient for present purposes to note again that § 2.68 refers expressly to only nonjurisdictional entities. Moreover, because we herein determine that the proper course in this instance involving jurisdictional companies is to issue a temporary certificate of public convenience and necessity authorizing the proposed storage and transportation for NJN, it is not necessary for us to reconsider any previous order involving the application of § 2.68 to storage service by a nonjurisdictional entity.

By letter filed September 1, 1978, Consolidated states that it does not intend to commence the service contemplated in its Notices of August 29 and 31, 1978, discussed infra until the Commission informs it that its proposed use of § 157.22 (with respect to Columbia) and § 2.68 (with respect to NJN) is permissible or, in the alternative, issues temporary certificates of public convenience and necessity authorizing the proposed service. As previously stated, we decline to authorize the use of §§ 157.22 and § 2.68 proposed by Consolidated and, instead, herein grant the temporary certificates alternatively sought by Consolidated.

The rate proposed to be charged by Consolidated for its temporary emergency storage service for NJN is identical to that it will charge Columbia, discussed previously. NJN has agreed to pay Texas Eastern, for its transportation of the gas to Consoldiated for injection, the applicable TS-1 or TS-1 Excess currenctly effective rate for transportation from Texas Eastern's Zone A to its Zone C as set forth in Texas Eastern's Rate Schedule TS-1 of its FERC Gas Tariff. During the withdrawal period the applicable TS-1 or TS-1 Excess currently effective rate for transportation from Zone C to Zone D will be the basis for the transportation charge. NJN has agreed to reimberse Texas Eastern for all charges paid by Texas Eastern to Texas Gas under the transportation agreement between Texas Eastern, NJN, and Texas Gas.

We shall require that Consolidated and Texas Eastern file, within 15 days of the issuance of this order formal applications seeking appropriate authorization for the services to be rendered Columbia and NJN. The temporary authorization granted herein will be subject to all the terms and conditions of any permanent authorization granted by the Commission in this docket.

The Commission finds: (1) Applicants, Consildated GAs Supply Corp. and Texas Eastern Transmission Corp. are "natural gas companies" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The facilities hereinbefore described, as more fully described in the Notices filed by consolidated on August 29, 1978, and August 31, 1978, are to be used in the transportation and storage of natural gas in interstate commerce, subject to the jurisdiction of the Commission and the operation thereof described in this order are subject to the requirements of subsection (c) and (e) of section 7 of the Natural Gas Act.

(3) Applicants are able and willing properly to do the acts and to perform the sevice propsed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The operations and services described in the Notices filed by Consolidated on August 29, 1978, and August 31, 1978, to be undertaken byConsolidated and Texas Eastern, may be required by the public convenience and necessarity and temporary certificates therefor should be issued as hereinafter ordered and conditioned.

(5) The public interest requires that the temporary certificates issued to Texas Eastern and Consolidated be made subject to all the terms and conditions that the Commission may impose with respect to any permanent certificate issued in this docket.

(6) The public convenience and necessity requires that Consolidated and Texas Eastern file formal applications, consistent with the Commission's Regulations under the Natural Gas Act, requesting authorization to perform the operations and services sought to be rendered on behalf of Columbia and NJN.

The Commission orders: (A) Temporary certificates of public convenience and necessity are issued authorizing Texas Eastern and Consolidated to operate certain facilities for the transportation, storage and withdrawal of natural gas as hereinbefore described, all as more fully described in Consolidated's Notices filed on August 29 and Augusts 31, 1978, upon the terms and conditions of this order.

(B) The certificate authorization issued in paragraph (A) above and the rights granted thereunder are conditioned upon the following:

(1) The temporary certificates issued herein to Consolidated and Texas Eastern shall be made subject to all of the terms and conditions imposed by the Commission in any permanent certificate that may ultimately be issued in this docket.

(2) The ultimate disposition of any revenues that may be received by Consolidated and Texas Eastern shall be subject to the terms and conditions that the Commission may impose in any permanent certificate that it may issue in this docket.

(3) Consolidated and Texas Eastern shall file with the Commission appropriate applications, consistent with the Commission's regulations under the Natural Gas Act, requesting authorization to undertake the operations and services more fully described in this order and in Consolidated's Notices of August 29, 1978, and August 31, 1978, within 15 days for the issuance order

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25839 Filed 9-13-78; 8:45 am]

[5] The Notice was filed on behalf of Consolidated and Texas Eastern.

[6] Moreover, the deliveries contemplated in this transaction by Texas Gas are for a single 60-day period. In the circumstances, Texas Gas appears to be able to perform its specific portion of the proposal under § 157.22.

[6740-02]

[Docket No. RP74-100 et al.]

NATIONAL FUEL GAS SUPPLY CORP.

Proposed PGA Rate Adjustment

SEPTEMBER 7, 1978.

Take notice that on August 28, 1978, National Fuel Gas Supply Corp. (National) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, 21st Revised Sheet No. 4, proposed to be effective October 1, 1978.

National states that the sole purpose of this revised tariff sheet is to adjust National's rates pursuant to the PGA provisions in section 17 of the General Terms and Conditions. National further states that such tariff sheet reflects an adjustment in National's rates of 7.61 cent per Mcf on 21st Revised Sheet No. 4.

It is stated that copies of the filing have been mailed to all of its jurisdictional customers and affected State regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 20, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants party to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25840 Filed 9-13-78; 8:45 am]

[6740-02]

[Docket No. RP73-48]

PEOPLES NATURAL GAS DIVISION OF NORTHERN NATURAL GAS CO.

Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

SEPTEMBER 7, 1978.

Take notice that Peoples Natural Gas Divsion of Northern Natural Gas Co., on August 28, 1978, tendered for filing First Substitute 21st Revised Sheet No. 3a of its FPC Gas Tariff, Original Volume No. 4. The proposed change to become effective October 1, 1978, would increase the rate per Mcf to jurisdictional customers by 27.67 cents per Mcf. This increase reflects the net effect of a decrease in rates to Peoples resulting from a rate change by Colorado Interstate Gas Co. at Docket No. RP78-51 and a semiannual purchased gas adjustment filed by CIG in accordance with the provisions of its FPC Gas Tariff. Colorado Interstate is the pipeline supplier to Peoples for sales made under volume No. 4.

Copies of the filing were served upon the gas utility customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with § § 1.8 and 1.10 of the Commission's Rules of Practrice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants prarties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25841 Filed 9-13-78; 8:45 am]

[6740-02]

[Docket No. R178-53]

SUN OIL CO. (Delaware)

Order Granting Petition for Special Relief

SEPTEMBER 7, 1978.

On April 20, 1978, Sun Oil Co. (Sun) filed a petition [1] for special relief, in Docket No. R178-53, pursuant to § 2.76(d)(1) of the Commission's General Policy and Interpretations, requesting permission to charge a base rate of 50 cents per Mcf for the sale of its 50 percent working interest in gas produced from the Tebo Gas Unit, Hamilton County, Kans. (Hugoton-Anadarko Area). Kansas-Nebraska Natural Gas Co., Inc. (Kansas-Nebraska) is the purchaser of the subject gas.[2] In a letter, dated March 23, 1978, to Sun, Kansas-Nebraska stated that it will purchase the subject gas at whatever special relief rate the Commission permits Sun to charge. Currently Sun sells the subject gas at 29.5 cents per Mcf at 14.73 psia.

Notice of Sun's petition was issued on May 25, 1978. No protests or petitions to intervene were filed.

[1] This petition covers only Sun's 50 percent working interest in the gas. Kansas-Nebraska's 50 percent working interest in the subject gas is not covered by this petition.

[2] This gas is being sold to Kansas-Nebraska pursuant to a contract, dated November 14, 1957, which is on file as Sun's FERC Gas Rate Schedule No. 99 in Docket No. G-15434.

In support of its petition, Sun states that it intends to restimulate the sub-

[6740-02]

[6740-02]

refund from October 1, 1978 (subject to the limitation prescribed in § 154.38(d)(4)(vii)(e)), until an agree-

day, on an interruptible basis, for the accounts of various companies who have participated in three programs

gas developed in the Bolivar Point Area, Plaquemines Parish, La.

Applicant states that in the initial

In support of its petition, Sun states that it intends to restimulate the subject well and install a pumping unit to lift water therefrom at a cost of $20,000 in the furtherance of producing the estimated remaining reserves of 71,000 Mcf of gross working interest gas over the projected seven year life of the well. Staff finds that the proposed $20,000 expenditure is reasonable.

In consideration of the section and the subsection [3] thereof under which the petition was filed and the reasonableness of Sun's proposed expenditure, Staff concludes that a field investigation is unnecessary.

Sun's petition meets the criteria for special relief as established by § 2.76(d)(1) of the Commission's General Policy and Interpretations. Sun's proposed increase in revenue of $12,736 over the life of the project is less than the $50,000 maximum established by the above section. The proposed new investment of $20,000 exceeds 25 percent of the increased revenue. The requested base rate of 50 cents per Mcf at 14.73 psia meets the requirement of the above section.

Inasmuch as Sun's petition meets the criteria for special relief set forth for minor projects in 18 CFR § 2.76(d)(1), we believe that it is in the public interest to grant Sun's petition for special relief.

The Commission orders:

(a) The petition for special relief filed, in Docket No. RI78-53, by Sun is hereby granted.

(B) Sun is authorized to collect a base rate of 50 cents per Mcf at 14.73 psia for natural gas produced from its Tebo Gas Unit, located in Hamilton County, Kans., and sold to Kansas-Nebraska, effective upon the date that the proposed work is completed or the date of the Commission order herein whichever is later, subject to the conditions set forth in paragraphs (C) and (D) below.

(C) Within 30 days of the effective date specified above, Sun must file a statement signed by Kansas-Nebraska that the proposed work has been completed to Kansas-Nebraska's satisfaction.

(D) Sun must file an executed contract amendment providing for the payment of the approved rate and a notice of Independent Producer Rate Change within 30 days of the date of the order herein.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP74-41]

TEXAS EASTERN TRANSMISSION CORP.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 7, 1978.

Take notice that Texas Eastern Transmission Corp. on August 28, 1978, tendered for filing as a part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the following tariff sheets:

Revised Forty-second Revised Sheet No. 14.
Revised Forty-second Revised Sheet No. 14A.
Revised Forty-second Revised Sheet No. 14B.
Revised Forty-second Revised Sheet No. 14C.
Revised Forty-second Revised Sheet No. 14D.

The above sheets were issued in compliance with the Commission's order issued July 28, 1978, in docket No. RP74-41 (PGA 78-6). In such July 28, 1978, order the Commission accepted Texas Eastern's PGA filing of June 16, 1978, subject to modification to reflect the proper rate levels from its pipeline suppliers as of August 1, 1978.

The above tariff sheets also reflect a flow through to Texas Eastern's Zone D customers the monthly exchange charge of $150,000 received from Consolidated System LNG Co. by means of a rate reduction to the demand component of rate schedules DCQ, GS, WS, SS, and X-28 as previously filed for on June 2, 1978, and approved by Commission order issued July 5, 1978.

The proposed effective date of these tariff sheets is August 1, 1978.

Copies of this filing were served on the company's jurisdictional customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 28, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-87]

TEXAS EASTERN TRANSMISSION CORP.

Proposed Increase in Gas Tariff

SEPTEMBER 7, 1978.

Take notice that Texas Eastern Transmission Corp., on August 31, 1978, tendered for filing proposed changes in its FERC gas tariff, fourth revised volume No. 1 and original volume No. 2. The proposed changes would increase revenues from jurisdictional sales and services by approximately $55,700,000 per year based on actual sales and services for the 12-month base period ended May 31, 1978, as adjusted through September 30, 1978. This annual increase is exclusive of an additional increase of approximately $38,500,000 per year attributable to purchase gas costs and advance payment recoveries which Texas Eastern will track under applicable provisions of its FERC gas tariff and past rate settlements.

Texas Eastern states that this filing is being submitted pursuant to §§ 154.38(d)(4)(vi)(a) and 154.63 of the Commission's regulations and includes known and measurable adjustments to the 12-month base period through September 30, 1978.

Texas Eastern also states that the rates set forth in the revised tariff sheets are based on the United method of cost classification and the rate design prescribed by the Commission in opinion No. 21 issued on August 9, 1978, in docket No. RP74-41. However, because opinion No. 21 was issued while Texas Eastern was preparing this filing, it has not utilized the new cost allocation methods prescribed by the Commission in opinion No. 21. Accordingly, the rates set forth in the above-revised tariff sheets are based on the methods of cost allocation underlying the base tariff rates prescribed for Texas Eastern in its last general rate increase in docket No. RP75-73. (See "Order Modifying and Accepting Settlement" issued June 6, 1977, in docket No. RP75-73.) Prior to October 1, 1978, Texas Eastern will file substitute revised tariff sheets reflecting rates based on the cost allocation as well as the cost classification and rate design prescribed in opinion No. 21 and will request that such substitute revised tariff sheets be permitted to become effective October 1, 1978, in lieu of the revised tariff sheets currently on file.

Texas Eastern further recites that in compliance with § 154.38(d)(4)(vi)(a) of the Commission's regulations it has submitted statements A through M in support of the proposed new base tariff rates. As required by such section, Texas Eastern states its agreement that this filing will be subject to refund from October 1, 1978 (subject to the limitation prescribed in § 154.38(d)(4)(vi)(c)) until an agreement is reached or a Commission determination is made with respect to the base tariff rates filed herewith or the aforementioned substitute revised base tariff rates to be filed by Texas Eastern prior to October 1, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 21, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-421]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Amendment to Application

SEPTEMBER 1, 1978.

Take notice that on August 23, 1978, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in docket No. CP77-421 [1] an amendment to its pending application in said docket pursuant to section 7(c) of the Natural Gas Act so as to provide for (1) a long-haul interruptible transportation service for UCG Energy Corp. (UCG Energy), instead of United Cities Gas Co., North and South Carolina Division (United Cities), as proposed in the application as initially filed, and (2) a similar transportation service for Devco Enterprises, Inc. (Devco), for gas produced in one producing area identified in the initial application in which Devco has an interest, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

It is indicated that pursuant to the application filed herein on June 3, 1977, Applicant requested authorization to transport up to 18,000 dekatherms equivalent of natural gas per day, on an interruptible basis, for the accounts of various companies who have participated in three programs for the exploration and development of new natural gas reserves in onshore areas, or in State waters, in the gulf coast region. The companies for which Transco has proposed to render transportation service are 11 of its distribution company customers, its 1 direct industrial customer, and 2 industrial customers of its distribution customers, or affiliates of such customers, it is said. It is indicated that as a result of their participation in the drilling programs, these customers have earned rights to gas production from successful wells discovered by the three drilling programs and that it is this production which is the subject of the transportation service. It is further indicated that a temporary certificate was issued on December 21, 1977.

Applicant states that in the application initially filed herein, United Cities, Applicant's distribution company customer serving communities in North and South Carolina, was a party for which transportation service was proposed. United Cities participated in two of the drilling programs, the Transmac exploration and development program (Transmac) and the Enterprise Resources, Inc. program, through its subsidiary, UCG Energy, a small producer qualified under section 157.40 of the Commission's regulations (18 CFR 157.40), it is said. Applicant states that the transportation service for United Cities authorized in the temporary certificate of December 21, 1977 is provided in accordance with a transportation agreement dated November 10, 1976, as amended February 25, 1977 (Applicant's FERC gas tariff rate schedule X-135, original volume 2). Under this transportation agreement, Applicant receives gas tendered by United Cities in the producing area from fields listed in the initial application and transports gas through its production area and mainline facilities for delivery at existing delivery points to United Cities in North and South Carolina, it is said.

Applicant states that United Cities has requested Applicant to provide the transportation service for the gas production to which it is entitled from the two drilling programs to the account of its subsidiary, UCG Energy, instead of for its own account.

Applicant indicates that pursuant to this request, Applicant, United Cities, and UCG Energy have amended their previous agreement to provide for transportation for the account of UCG Energy rather than for United Cities.

Applicant also requests authority to provide transportation service to Devco, an affiliate of Cherokee Brick Co. of North Carolina, Inc. and a participant in the Transmac program for gas developed in the Bolivar Point Area, Plaquemines Parish, La.

Applicant states that in the initial application, it was shown that Devco had an interest in the production from two other producing areas, but inadvertently, Devco's interest in the production from the Bolivar Point Area was not identified in the initial application. Transportation service for other participants in the Transmac program who have interests in the production from the Bolivar Point Area began July 14, 1978, it is said. It is further indicated that Devco's interest is being banked until the authority it is requesting to provide transportation of its gas from the Bolivar Point Area is granted.

Applicant states its transportation service for Devco is in accordance with an agreement, dated March 25, 1977 (Applicant's FERC gas tariff rate schedule X-138, original volume No. 2) and that Applicant and Devco have entered into a new transportation agreement, dated August 22, 1977, which includes the Bolivar Point Area as a source of supply.

Applicant also states that it is renewing a request which it made in its application for a temporary certificate for authority to attach new resources of supply available to the transportation customers as a result of the activities of the three exploration and development programs without the need for filing an application for and receiving a certificate of public convenience and necessity. This request was denied in the temporary certificate issued December 21, 1977.

It is stated that the drilling programs were established in 1975 as 3-year programs but have been extended with substantial increases in their budgets. In 1975, the Transmac program had a budget of $36 million for exploration activities over a 3-year period, but after 2 years it was extended with a prospective 3-year budget of $67.5 million, it is said.

Applicant states that the purpose of its request is to reduce the number of certificate filings that would be required by Applicant in the future to transport gas developed from the three drilling programs.

Applicant also requests transportation authority herein for industrial customers on a long-term basis, instead of the 2-year term which was granted in the temporary certificate issued December 21, 1977, if a term of more than 2 years is allowed in the proceedings in docket Nos. CP77-71 et al., Natural Gas Pipeline Co. of America et al. The temporary certificate granted to Applicant provides that the initial term of 2 years is without prejudice to Applicant's filing or refiling for authorization to continue the transportation service beyond the 2-year

[1] This proceeding was commenced before the FPC. By joint regulation of Oct. 1, 1977 (10 CFR 1000.1), it was transferred to the FERC.

period, pending the outcome of the proceedings in docket Nos. CP77-71 et

ments of the National Petroleum Council will meet Thursday, October

period, pending the outcome of the proceedings in docket Nos. CP77-71 et al. In docket Nos. CP77-71 et al., several interstate pipelines, including Applicant, have applied for authority to transport industry-owned natural gas for a 10-year period pursuant to section 7(c) of the Natural Gas Act, and not under the Commission's order No. 2 (issued February 1, 1978) which limits authorization to transport gas for industry to a 2-year period.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-88]

TRANSWESTERN PIPELINE CO.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 7, 1978.

Take notice that pursuant to the provisions of section 4 of the Natural Gas Act, Transwestern Pipeline Co. (P.O. Box 2521, Houston, Tex. 77001) on August 31, 1978, tendered for filing proposed changes in its FERC gas tariff, second revised volume No. 1. The proposed changes would increase revenue from jurisdictional sales by approximately $14 million based on the 12 months ended April 30, 1978, as adjusted. Approximately $2 million of the proposed increase can be attributed to purchased gas cost increases, and includes a surcharge adjustment to cover costs reflected in the proposed rate levels but not accounted for in the present rate level and which Transwestern asserts it is permitted to track under the purchased gas cost adjustment provision in its FERC gas tariff. The remainder of the increase is related to other than purchased gas cost increases.

Transwestern states that the principal reasons for the proposed rate increase are: (1) Increased cost of labor, supplies, expenses, plant facilities, and working capital requirements; (2) the need for an increased rate of return of 10.75 percent; (3) the need for an overall rate of depreciation of 6.9 percent; (4) increased taxes, including income taxes associated with the increased return; and (5) lower sale quantities than those on which its current rates are based.

The proposed effective date of the tariff changes is October 1, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 21, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25846 Filed 9-13-78; 8:45 am]

[6740-02]

[Docket No. RP77-108]

TRANSCONTINENTAL GAS PIPE LINE CORP.

SEPTEMBER 7, 1978.

Take notice that Transcontinental Gas Pipe Line Corp. (Transco) on August 23, 1978, tendered for filing certain revised tariff sheets to its FERC gas tariff, original volume No. 2, to become effective January 1, 1978. Transco states that the revised tariff sheets reflect a rate reduction for certain interruptible transportation services and are being filed in accordance with article VII of the "Agreement as to Rates" in docket Nos. RP76-136 and RP77-26. Transco states that on June 27, 1978, the Commission approved the settlement agreement in Transco's docket Nos. RP76-136 and RP77-26 and that article VII of that agreement provides that Transco shall reduce its rates for the interruptible transportation services into or within its rate zones (which had been increased in the instant docket No. RP77-108) to the levels provided in said agreement.

The proposed effective date of the revised tariff sheets is January 1, 1978, the effective date of the rates in the captioned proceeding.

Transco states that copies of the instant filing have been mailed to each of its jurisdictional customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determing the appropriate action to be taken, but will not serve to make protestants perties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspections.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP71-41,[1] RP72-75,[1] RP74-20, RP74-83, RP75-30, RP75-109, RP76-84, and RP77-107]

UNITED GAS PIPE LINE CO.

Order Granting in Part Motion to Sever Issue of Interest Reimbursement, Consolidate, and Set Matter for Hearing

SEPTEMBER 7, 1978.

On June 12, 1978, pursuant to § 1.12 of the Commission's rules of practice and procedure (18 CFR § 1.12), the staff of the Federal Energy Regulatory Commission filed a motion requesting the Commission to sever the issue of interest reimbursement payments[2] from each of the above-captioned proceedings,[3] consolidate the issue into one proceeding, and set the matter for hearing. No party has objected to the proposal.[4]

[1]These two dockets have been deleted from the consolidated proceeding for the reasons set forth in the body of the order. Hereafter, the appropriate caption for the consolidated proceeding is "United Gas Pipe Line Co.," docket Nos. RP74-20 et al.

[2]Interest reimbursement has here been used by United as an alternative to advance payments. Under this program United reimburses the producer's actual interest expense on capital procured by the producer for use in exploration and development of natural gas.

[3]In view of staff's discussion of docket No. RP77-107 in the body of its motion, its failure to include that docket in the caption of the motion was apparently an oversight. Therefore, this order includes that docket in its decision.

[4]While not objecting to staff's motion, United Gas Pipe Line Co. did file a response

Footnotes continued on next page

The issue of the proper cost of service treatment for interest reimbursement payments appears in each of the above captioned proceedings with the exception of docket Nos. RP71-41 and RP72-75. These latter two dockets were inappropriately included in the motion and are, therefore, deleted from the proposed consolidated hearing. In the other dockets, which are at various procedural stages, the interest reimbursement issue has not been resolved.

In order to facilitate the Commission's consideration of the interest reimbursement issue, to insure its consistent treatment, and to expedite the Commission's business, we shall grant staff's motion as limited by the exception set forth above.

The Commission orders: (A) The issue of interest reimbursement payments is hereby severed from each of the following proceedings: Docket Nos. RP74-20, RP74-83, RP75-30, RP75-109, RP76-84, and RP77-107, and that issue is consolidated into a single proceeding. Hereafter, all filings made in the consolidated proceeding should be captioned "United Gas Pipe Line Co.," docket Nos. RP74-20 et al.

(B) Pursuant to the authority under the Natural Gas Act, particularly sections 4 and 15 thereof, and the Commission's rules and regulations, a consolidated hearing shall be held to consider the issue of the proper cost of service treatment for interest reimbursement payments in docket Nos. RP74-20 et al.

(C) An administrative law judge to be designated by the Chief Administrative Law Judge, for that purpose (see delegation of authority, 18 CFR § 3.5(a)), shall preside at the hearing, prescribe necessary procedures not provided for in this order and otherwise conduct the hearing in accordance with the Commission's rules of practice and procedure.

(D) The administrative law judge shall call a prehearing conference within 15 days from the issuance of this order to discuss procedural matters and to establish appropriate hearing dates for the conduct of the hearing.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-25848 Filed 9-13-78; 8:45 am]

Footnotes continued from last page

which contained several suggested modifications. These suggestions were given consideration and where appropriate incorporated into the order.

[6740-02]

[Docket Nos. RP72-41 (PGA 78-2)]

WESTERN TRANSMISSION CORP.

Notice of Proposed Changes

SEPTEMBER 7, 1978.

Take notice that Western Transmission Corp. (Western), on August 30, 1978, tendered for filing as part of its FPC gas tariff, original volume No. 1, the following sheet: Eighth Revised Sheet No. 3-A, superseding Second Substitute Seventh Revised Sheet No. 3-A.

The proposed changes would increase the monthly charges for purchsed gas to Colorado Interstate Gas Co., Western's sole jurisdictional customer, pursuant to the provisions of section 18 of Western's FPC gas tariff, orginal volume No. 1.

Although this is a rate increase, Western requests that the notice provision otherwise applicable be waived so as to permit the proposed rates to become effective July 1, 1978, insofar as statements and payments will not be rendered and made before August 26, 1978.

Copies of this filing have been served upon Colorado Interstate Gas Co.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatroy Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 20, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

Intergovernmental and Institutional Relations

NATIONAL PETROLEUM COUNCIL, SUBCOMMITTEE ON MATERIALS AND MANPOWER REQUIREMENTS

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Subcommittee on Materials and Manpower Requirements of the National Petroleum Council will meet Thursday, October 5, 1978, at 9 a.m., in the Continental Room of the Fairmont Hotel, 1717 North Akard Street, Dallas, Tex.

The parent committee was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

The subcommittee will make an analysis of materials and manpower requirements for the U.S. oil and gas industry, and will report its findings to the parent committee.

The tentative agenda is as follows:

1. Discussion of scope of the study to be conducted in response to the Secretary of Energy's request for an analysis of materials and manpower requirements.
2. Discussion of an organizational structure for the study.
3. Discussion of a timetable for completion of the study.
4. Discussion of any other matters pertinent to the overall assignment from the Secretary.

The meeting is open to the public. The chairman of the subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the subcommittee concerning matters on the agenda will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to matters on the agenda should inform Georgia Hildreth, director, advisory committee management, 202-566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

The transcript of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 2107, DOE, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on September 11, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

Office of Hearings and Appeals

ISSUANCE OF PROPOSED DECISIONS AND ORDERS

August 14 through August 18, 1978

Notice is hereby given that during the period August 14 through August

18, 1978, the proposed decisions and orders which are summarized below

Great Southern Oil & Gas Co., Inc. filed an application for exception from the provi-

Dated: September 6, 1978.

JAMES R. SCHLESINGER,

proval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding

are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

mated to average 6 man-hours per quarterly report.

18, 1978, the proposed decisions and orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within 10 days of service. For purposes of the new procedures, the date of service of notice of issuance of a proposed decision and order shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a notice of objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the proposed decision and order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In that statement of objections an aggrieved party must specify each issue of fact or law contained in the proposed decision and order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

SEPTEMBER 7, 1978.

E. B. Brooks, Jr., Dallas, Tex., DEE-0154, crude oil

E. B. Brooks, Jr. filed an application for exception from the provisions of 10 CFR 212.73. The exception request, if granted, would permit Brooks to retroactively increase the selling prices for crude oil produced from the V. L. Neis lease, located in Motley County, Tex. On August 14, 1978, the DOE issued a proposed decision and order in which it determined that the exception request should be denied.

Great Southern Oil & Gas Co., Inc., Lafayette, La., DXE-1466, crude oil

Great Southern Oil & Gas Co., Inc. filed an application for exception from the provisions of 10 CFR 212.73. The exception request, if granted, would result in an extension of exception relief previously granted and would permit the firm to continue to sell a portion of the crude oil which it produces from the RA SUA Breaux No. 1 well located in St. Martin Parish, La. at upper tier ceiling prices. On August 15, 1978, the DOE issued a proposed decision and order in which it determined that the exception request should be granted.

R. W. Tyson Producing Co., Inc., Jackson, Miss., DXE-1370 through DXE-1373, crude oil

R. W. Tyson Producing Co., Inc. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Tyson to sell the crude oil produced from four properties situated on the Ovett Field in Jones County, Miss., at market prices. On August 14, 1978, the DOE issued a proposed decision and order in which it determined that the Tyson exception request should be granted.

[3128-01]

CONDUCT OF EMPLOYEES

Waiver From Divestiture Requirements

Section 602(c) of the Department of Energy Organization Act (Pub. L. 95-91, hereinafter referred to as the "Act") authorizes the Secretary of Energy to grant waivers from the divestiture requirements of section 602(a) of the Act to "supervisory employees" (as defined in section 601(a) of the Act) of the Department of Energy who have financial interests in "energy concerns" (as defined in section 601(b) of the Act), where exceptional hardship would result or where such interest is vested.

It has been established to my satisfaction that the interest of the individual "supervisory employee" of the Department of Energy whose name is listed below satisfies the requirements of section 602(c) of the Act. Accordingly, I have granted him a waiver from the divestiture provisions of section 602(a) of the Act for his vested insurance interest until such time as the entity in which he has an interest no longer qualifies as a "energy concern" within the meaning of the Act, or until his employment with the Department of Energy terminates, whichever first occurs.

Name, energy concern

Duane C. Sewell, University of California.

To minimize or eliminate the conflict of interest during the period of this waiver Mr. Sewell will disclose at least annually, pursuant to section 603 of the Act, the nature and extent of his financial interest in the University of California.

Dated: September 6, 1978.

JAMES R. SCHLESINGER,
Secretary of Energy.

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 1624]

MERCHANT BOX CO.

Order of Revocation

On August 30, 1978, Merchant Box Co., 175 West Broadway, New York, N.Y. 10013, voluntarily surrendered its Independent Ocean Freight Forwarder License No. 1624 for revocation.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in manual of orders, Commission order No. 201.1 (revised), section 5.01(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 1624 issued to Merchant Box Co. be and is hereby revoked effective August 30, 1978, without prejudice to Reapplication for a license in the future.

It is further ordered, That a copy of this order be published in the FEDERAL REGISTER and served upon Merchant Box Co.

ROBERT G. DREW,
Director, Bureau of Certification and Licensing.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on September 8, 1978. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed ICC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before October 2, 1978, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, U.S. General Accounting Office, Room 5106, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

INTERSTATE COMMERCE COMMISSION

The ICC is requesting an extension no change clearance of Quarterly Report Form QPA, required to be filed by some 73 Class I Motor Carriers of Passengers, pursuant to section 220 of the Interstate Commerce Act. Data are used for economic regulatory purposes. Reports are mandatory and available for use of the public. Reporting burden for the 73 carriers is estimated to average 6 man-hours per quarterly report.

NORMAN F. HEYL,
Regulatory Reports,
Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

PERSONALITY AND COGNITION RESEARCH REVIEW COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of October 1978:

Personality and Cognition Research Review Committee, October 27-28; 9 a.m., Riviera Room, Holiday Inn Georgetown, 2101 Wisconsin Avenue NW., Washington, D.C. 20007.

Open: October 27, 9 to 10 a.m.

Closed: Otherwise

Contact: Shirley Maltz, Room 10C06, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3942.

Purpose: The Committee is charged with the initial review of grant applications for Federal Assistance in the program areas administered by the National Institute of Mental Health relating to research activities and makes recommendations to the National Advisory Mental Health Council for final review

Agenda: From 9 to 10 a.m., October 27, the meeting will be open for discussions of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal Assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), Title 5 United States Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contract person listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Dr. Jacquelyn Hall, Acting Chief, Public Information Branch, Division of Scientific and Public Information, NIMH, Room 15C-17, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, telephone 301-443-4573.

Dated: September 7, 1978.

EXPERIMENTAL PSYCHOLOGY RESEARCH REVIEW COMMITTEE

Meeting Change

In FR Doc. 78-24297 appearing on page 38626 in the issue of Tuesday, August 29, 1978, the dates for the meeting of this committee have been changed from October 5-7, 1978, to October 6-7, 1978. As a result the meeting will be open to the public from 9 to 9:30 a.m., October 6 instead of October 5 as previously announced. All other arrangements for the meeting remain as announced August 29.

Dated: September 8, 1978.

ELIZABETH A. CONNOLLY,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Center for Disease Control

PRIVACY ACT OF 1974

Systems of Records

AGENCY: Department of Health, Education, and Welfare; Center for Disease Control.

ACTION: Notification of deletion, revision, and consolidation of system notices.

DSHEFS Occupational Health Epidemiological Studies; HEW/CDC/NIOSH; Number 09-20-0147;

Results of DBBS Hearing Studies; HEW/CDC/NIOSH; Number 09-20-0148;

DRDS General Industry Morbidity Studies; HEW/CDC/NIOSH; Number 09-20-0149;

DRDS Morbidity Studies in Coal Mining Activities; HEW/CDC/NIOSH; Number 09-20-0150;

DRDS Mortality Studies in Coal Mining Activities; HEW/CDC/NIOSH; Number 09-20-0151;

DRDS Mortality Studies in Non-Coal Mining Activities; HEW/CDC/NIOSH; Number 09-20-0152;

DRDS General Industry Mortality Studies; HEW/CDC/NIOSH; Number 09-20-0153;

DRDS Medical and Laboratory Studies; HEW/CDC/NIOSH; Number 09-20-0154;

DRDS Morbidity Studies in Metal and Non-Metal Mining Activities; HEW/CDC/NIOSH; Number 09-20-0155;

SUMMARY: The National Institute for Occupational Safety and Health (NIOSH) is publishing these new notices of systems of records in accordance with the requirements of 5 U.S.C. 552a(e)(4).

Since these consolidations do not meet the criteria of OMB Circular A-108, Transmittal Memorandum No. 1, for a new or altered system report, none has been filed.

NIOSH has made no major changes requiring an altered system report nor added any new routine uses.

DATES: These systems are effective September 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter Y. Bengtson, NIOSH Privacy Act Coordinator, 5600 Fishers Lane, Room 8-30, Parklawn Building, Rockville, Md. 20857, or call 301-443-3227.

SUPPLEMENTARY INFORMATION: NIOSH has been working on major revisions of its Privacy Act system notices to (a) reduce the number of system notices by using broader based systems notices to cover all the studies being undertaken by particular divisions; and to (b) replace the Director of NIOSH as a system manager, with someone more closely associated with each system notice. NIOSH expects that these steps will allow closer control and supervision of data being collected under the Privacy Act, and allow NIOSH to be more responsive to requests for epidemiological information on hazards in the workplace.

The Division of Surveillance Hazard Evaluations, and Field Studies (DSHEFS) will use the new notice; DSHEFS Occupational Health Epidemiological Studies; HEW/CDC/NIOSH; Number 09-20-0147; to incorporate a total of 37 system notices, listed below. NIOSH published these system notices in the FEDERAL REGISTER, Part X, Volume 42, Number 189, dated September 29, 1977.

LEONARD SCHAFFER,
Assistant Secretary for Management and Budget.

09-20-0148

System name:

Results of DBBS Hearing Studies, HEW/CDC/NIOSH.

Security classification:

None.

System location:

Division of Biomedical and Behavioral Science (DBBS), National Institute for Occupational Safety and Health (NIOSH), Robert A. Taft Laboratories, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

In addition, data is occasionally at field work sites and contractor sites as studies are developed, data collected and reports written. A list of field and contractor sites where individually identifiable data is currently located is available upon request from the Systems Manager.

Categories of individuals covered by the system:

Workers exposed to noise at a harmful or potentially hazardous level and individuals selected as control groups.

Categories of records in the system:

Physical examinations, results of laboratory tests (physiological, acceleration measures, performance tests); results of hearing tests, hearing acuity tests, occupational histories, medical history, demographic data, related anamenestic information. The specific types of records to be collected and maintained are determined by the needs of the individual study.

Authority for maintenance of the system:

Occupational Safety and Health Act, Section 20 (29 U.S.C. 669); Federal Coal Mine Safety and Health Act (30 U.S.C. 669 Section 20 (1970)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Records may be released to the Department of Justice or other appropriate Federal agencies in defending claims against the U.S. when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the

Public Health Service in connection with such individual. (Appendix B, De-

lumbia Parkway, Robert A. Taft Laboratories, Cincinnati, Ohio 45226.

exposed to substances which are known or suspected respiratory irri-

Policies and practicies for storing, retrieving, accessing, retaining, and disposing of records in the system:

Record access procedures:

Same as notification procedures.

Authority for maintenance of the system:

Coal Mine Health and Safety Act

Public Health Service in connection with such individual. (Appendix B, Department Regulations, (45 CFR Part 5b, Item 100).)

In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosre is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Manual files, computer tape, microfilm, computer cards, index audiogram files, audiogram questionnaire forms.

Retrievability:

The purpose of this system is to assist in the development of standards for occupational exposure to hazards. Name, case number and study number are the indices used to retrieve records from this system.

Safeguards:

24-hour guard service in buildings, locked buildings, personnel screening, access limited to authorized personnel. In most instances informaton is related to individual identifiers by case numbers. The file of individual case number relationships is available to a limited group of people. Departmental security guidelines will be followed.

Retention and disposal:

Record copy maintained from three to ten years in accordance with retention schedules. Source documents for computer disposed of when no longer needed in the study, as determined by the system manager, and as provided in the signed consent form as appropriate. Disposal methods include erasing computer tapes and burning or shredding printouts.

System manager(s) and address:

Industrial Hygiene Engineer, Noise Section, Physical Agents Effects Branch, DBBS, NIOSH, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

Notification prodecure:

To determine if a record exists write to: Director, DBBS, NIOSH, 4676 Columbia Parkway, Robert A. Taft Laboratories, Cincinnati, Ohio 45226.

An individual who requests notification of or access to medical records shall, (1) at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the represnentative's discretion, (2) supply the name of the study if known, (3) provide the approximate date and place of treatment or questionnaire administration. These notification and access procedures are in accordance with Department regulations (45 CFR, Section 5b.6).

Record access procedures:

These access procedures are in accordance with Department regulations (45 CFR, Section 5b.5(a)(2)).

Contesting record procedures:

Contact the official at the address specified under notification procedures above. These procedures are in accordance with Department regulations (45 CFR, Section 5b.7).

Record source categories:

Information is obtained directly from the individual, and employee records. Many of the hearing test results were obtained from Doctors Memorial Hospital Hearing and Speech Center, Atlanta, Ga.

Systems exempted from certain provisions of the act:

None.

09-20-0149

System Name:

Security Classification:

None.

System Location:

Division of Respiratory Disease Studies (DRDS), National Institute for Occupational Safety and Health (NIOSH), Morgantown, W. Va. 26505.

In addition, data is occasionally at field collection sites and contractor sites as studies are developed, data collected, and reports written. A list of field and contractor sites where individually identifiable data is currently located is available upon request to the system manager.

Categories of individuals covered by the system:

Persons working, or having worked at Workplaces not identified as surface mining or below ground mining operations and exposed or potentially exposed to substances which are known or suspected respiratory irritants or carcinogens. Also included are those individuals in the general population which have been selected as a control group.

Categories of records in the system:

Previous and current employment records, medical and occupational histories, demographic data, X-rays, smoking histories, results of medical tests such as pulmonary function data and spirometry test results, permission forms, industrial environmental data, and questionnaires. The specific types of records to be collected and maintained are determined by the research needs of the specific study.

Authority for maintenance of the system:

Occupational Safety and Health Act Section 20 (29 U.S.C. 669); Federal Coal Mine Health and Safety Act, Section 501 (30 U.S.C. 951).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Data may be sent to State Vital Statistics Divisions to obtain death certificates, and to missing person location agencies to find those individuals who cannot otherwise be located.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Records may be released to the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department Regulations. (45 CFR Par 5b), item 100).

In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity: (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practicies for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer tape, cards, and printouts; microfiche; X-rays; and manual files.

Retrievability:

The purpose of this system is to investigate occupationally related diseases and to determine the cause and prevention of such diseases. Plant name, study, name, and/or assigned numerical identifers are some of the indices used to retrieve records from this system. Social security numbers, supplied on a voluntary basis may occasionally be used for data retrieval.

Safeguards:

24-hour guard service in buildings, locked buildings, locked rooms, personnel screening, locked computer rooms, and tape vaults, password protection of computerized records, limited access to only authorized personnel. Two or more of these safeguards are used for all records covered by this system notice. The particular safeguards used are selected as appropriate for the type of records covered by each individual study. Departmental security guidelines will be followed.

Retention and disposal:

Record copy maintained in accordance with retention schedules. Source documents for computer disposed of when no longer needed in the study, as determined by the system manager, and as provided in the signed consent form, as appropriate. Disposal methods include burning or shredding paper materials, and erasing computer tapes.

System manager(s) and address:

Program Management Officer (PMO), DRDS, NIOSH, 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

Notification procedure:

To determine if a record exists write to: Director, DRDS, NIOSH, 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

An individual who requests notification of or access to a medical record shall, (1) at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion, (2) provide the name of the study if known, (3) provide the approximate date and place of treatment or questionnaire administration. These notification and access procedures are in accordance with Department regulations (45 CFR, Section 5b.6).

Record access procedures:

Same as notification procedures. These access procedures are in accordance with Department regulations (45 CFR, Section 5b.5(a)(2)).

Contesting record procedures:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. These procedures are in accordance with Department regulations (45 CFR, Section 5b.7).

Record source categories:

Information is obtained directly from the individual and from employee records.

Systems exempted from certain provisions of the act:

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Data may be sent to State Vital Statistics Divisions to obtain death certificates, and to missing person location agencies to find those individuals who cannot otherwise be located.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Records may be released to the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is base upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department regulations, (45 CFR Part 5b, item 100).)

Portions of records (name, social security number if known, date of birth, and last known address) may be disclosed to one or more other sources selected from those listed in appendix I, as applicable. This may be done solely for obtaining a determination as to whether or not an individual has died. The purpose of determining death is so that NIOSH may obtain death certificates, which state the cause of death, from the appropriate Federal, State, or local agency. Cause of death will enable NIOSH to evaluate whether excess occupationally-related mortality is occurring.

In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Social security numbers, supplied on a voluntry basis may occasionally be used for data retrieval.

Safeguards:

24-hour guard service in buildings, locked buildings, locked rooms, personnel screening, locked computer room and tape vaults, password protection of computerized records, limited access to only authorized personnel. Two or more of these safeguards are used for all records covered by this system notice. The particular safeguards used are selected as appropriate for the type of records covered by such individual study. Departmental security guidelines will be followed.

Retention and disposal:

Record copy maintained in accordance with retention schedules. Source documents for computer disposed of when no longer needed in the study, as determined by the system manager, and as provided in the signed consent form, as appropriate. Disposal methods include burning or shredding materials and erasing computer tapes.

System manager(s) and address:

Program Management Officer (PMO), DRDS, NIOSH, 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

Notification procedure:

To determine if a record exists write to: Director, DRDS, NIOSH, 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

An individual who requests notification of or access to a medical record shall, (1) at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion, (2) provide the name of the study if known, (3) provide the approximate date and place of the treatment or questionnaire administration. These notification and access procedures are in accordance with Department regulations (45 CFR, Section 5b.6).

Record access procedures:

Same as notification procedures. These access procedures are in accordance with Department regulations (45 CFR, Section 5b.5(a)(2)).

Contesting record procedures:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. These procedures are in accordance with Department regulations (45 CFR, Section 5b.7).

Record source categories:

Information is obtained directly from the individual, from employee records, from death certificates, and from industry and trade union records.

Systems exempted from certain provisions of the act:

None.

APPENDIX I—POTENTIAL SOURCES FOR DETERMINATION OF VITAL STATUS

Military records
Appropriate State motor vehicle registration departments
Appropriate State drivers license departments
Appropriate State government divisions of:
- Assistance payments (welfare), social services, medical services,
- Food stamp program, child support, board of corrections, aging,
- Indian affairs, workman's compensation, disability insurance

Retail credit association followup
Veterans' Administration files
Appropriate employee union or association records
Appropriate company pension or employment records
Company group insurance records
Appropriate State vital statistics offices
Life insurance companies
Railroad Retirement Board
Area nursing homes
Area Indian trading posts
Mailing list correction cards (U.S Postal Service)
Letters and telephone conversations with relatives
Letters and telephone conversations with former employees of the same establishment as cohort member
Appropriate local newspaper (obituaries)
Social Security Administration
Internal Revenue Service

09-20-0154

System name:

DRDS Medical and Laboratory Studies, HEW/CDC/NIOSH.

Security classification:

None.

System location:

Division of Respiratory Disease Studies (DRDS), National Institute for Occupational Safety and Health (NIOSH), 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

Categories of individuals covered by the system:

Individuals who have had physical examinations at DRDS or who have had Biochemical tests done on various samples submitted to DRDS.

Categories of records in the system:

Analysis of biochemical data, occupational and medical histories, and results of medical tests. The specific types of records to be collected and maintained are determined by the needs of the individual study.

Authority for maintenance of the system:

Coal Mine Health and Safety Act Section 501 (30 U.S.C. 951), Occupational Safety and Health Act Section 20 (29 U.S.C. 669). Occupational Safety and Health Act Section 22(d) (29 U.S.C. 671(d)); Federal Coal Mine Health and Safety Act Section 427(b) (30 U.S.C. 937(b)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Data may be sent to State vital statistics divisions to obtain death certificates, and to missing person location

agencies to find those individuals who cannot otherwise be located.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Records may be released to the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department regulations, (45 CFR Part 5b), item 100.)

In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Computer tape, cards, and printouts; microfiche; X-rays; and manual files.

Retrievability:

The purpose of this system is to perform medical and epidemiological research, statistical analyses, and to identify early indicators of occupationally-related diseases (biochemical indices). Data is given to other NIOSH units for biochemical and epidemiological studies. Name and case number are the indices used to retrieve records from this system.

Safeguards:

24-hour guard service in buildings, locked buildings, locked rooms, personnel screening, locked computer room and tape vaults, password protection of computerized records, limited access to only authorized personnel. Two or more of these safeguards are used for all records covered by this system notice. The particular safeguards used are selected as appropriate for the type of records covered by such individual study. Departmental security guidelines will be followed.

Retention and disposal:

Record copy maintained in accordance with retention schedules. Source documents for computer disposed of when no longer needed in the study, and as determined by the system manager, as provided in the signed consent form as appropriate. Disposal methods include erasing computer tapes and burning or shredding paper materials.

System manager(s) and address:

Project Management Officer, DRDS, NIOSH, 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

Notification procedures:

To determine if a record exists write to: Director, DRDS, NIOSH, 944 Chestnut Ridge Road, Morgantown, W. Va. 26505.

An individual who requests notification of or access to a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. These notification and access procedures are in accordance with Department regulations (45 CFR, Section 5b.6).

Record access procedures:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. These access procedures are in accordance with Department regulations (45 CFR, Section 5b.5(a)(2)).

Contesting record procedures:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. These procedures are in accordance with Department regulations (45 CFR, Section 5b.7).

Record source categories:

Information is obtained directly from the individual.

Systems exempted from certain provisions of the act:

None.

09-20-0147

System name:

DSHEFS Occupational Health Epidemiological Studies, HEW/CDC/NIOSH.

Security classification:

None.

System location:

Division of Surveillance, Hazard Evaluations, and Field Studies (DSHEFS), National Institute for Occupational Safety and Health (NIOSH), 4676 Columbia Parkway, Cincinnati, Ohio 45226.

Southwest Ohio Regional Computer Center, Medical Sciences Building, University of Cincinnati, Cincinnati, Ohio 45202.

In addition, data is occasionally at field work sites and contractor sites as studies are developed, data collected and reports written. A list of field and contractor sites where individually identifiable data is currently located is available upon request to the system manager.

Categories of individuals covered by the system:

Industrial workers exposed to physical and/or chemical agents that may damage the human body in any way. Some examples are: (1) organic carcinogens, (2) inorganic carcinogens, (3) mucosal or dermal irritants, (4) fibrogenic materials, (5) acute toxic agents including sensitizing agents, (6) neurotoxic agents, (7) mutogenic (male and female) and teratogenic agents, (8) bio-accumulating noncarcinogen agents, and (9) chronic vascular disease-causing agents.

Categories of records in the system:

Physical exams, sputum cytology results, questionnaires, demographic information, smoking history, occupational histories, previous and current employment records, urine test records, X-rays, medical history, pulmonary function test records, medical disability forms, blood test records, drivers license data, hearing test results, spirometry results. The specific types of records to be collected and maintained are determined by the needs of the individual study.

Authority for maintenance of the system:

Public Health Service Act, Section 301 (42 U.S.C. 241); Occupational Safety and Health Act section 20 (29 U.S.C. 669); Coal Mine Health and Safety Act section 501 (30 U.S.C. 951).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Records may be released to the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is al-

leged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Department Regulations (45 CFR Part 5b), item 100.)

Portions of records (name, social security number if known, date of birth, and last known address) may be disclosed to one or more other sources selected from those listed in appendix I, as applicable. This may be done solely for obtaining a determination as to whether or not an individual has died. The purpose of determining death is so that NIOSH may obtain death certificates, which state the cause of death, from the appropriate Federal, State, or local agency. Cause of death will enable NIOSH to evaluate whether excess occupationally related mortality is occurring.

In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system: Storage:

Manual files, computer files, card files, microfilm, microfiche, and other files as appropriate.

Retrievability:

The purpose of these studies is to evaluate mortality and morbidity of occupationally related diseases: to determine the cause and prevention of diseases of industrial origin, and lead toward future prevention of occupationally related diseases. Name, assigned number, plant name, year tested are some of the indices used to retrieve records from these systems. Other retrieval methods are utilized as individual research dictates.

Safeguards:

Locked buildings, locked rooms, locked file cabinets, personnel screening, locked computer room and computer tape vaults, 24-hour guard service, password protection of computerized records, limited access to only authorized personnel. Two or more of the safeguards are used for all records covered by this system notice. The particular safeguards used are selected as appropriate for the type of records covered by an individual study. Departmental security guidelines will be followed.

Retention and disposal:

Records will be maintained from 3 to 20 years in accordance with retention schedules. Every attempt will be made to strip personal identifiers from records and destroy the records when they are no longer needed. Any paper records which are disposed of will be shredded or burned and computer tapes will be erased.

System manager(s) and address:

Program Management Officer (PMO), DSHEFS, P-1, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

Notification procedure:

To determine if a record exists write to: Director, DSHEFS, R-1, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

An individual who requests notification of or access to a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. These notification and access procedures are in accordance with Department regulations (45 CFR, section 5b.6).

Record access procedures:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. These access procedures are in accordance with Department Regulations (45 CFR, section 5b.5(a)(2)).

Contesting record procedures:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. These procedures are in accordance with Department regulations (45 CFR, section 5b.7).

Record source categories:

Vital status information is obtained from Federal, State, and local governments and other available sources selected from those listed in appendix I. Information is obtained directly from the individual and employer records, whenever possible.

Systems exempted from certain provisions of the act:

None.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

OUTER CONTINENTAL SHELF OFFICIAL PROTRACTION DIAGRAMS

Notice of Approval

1. Notice is hereby given that, effective with this publication, the following OCS official protraction diagrams, approved on the dates indicated, are available for information in the Outer Continental Shelf Office, Bureau of Land Management, Anchorage, Alaska. In accordance with Title 43, Code of Federal Regulations, these protraction diagrams are the basic record for the description of mineral and oil and gas lease offers in the geographic area they represent.

OUTER CONTINENTAL SHELF PROTRACTION DIAGRAMS

	Description	Approval date
NM 60-2	Rat Islands	Apr. 25, 1978.
NN 1-8	ATKA	Do.
NO 3-2	Kuskokwin Bay	Do.
NQ 2-4	do.	Do.
NR 3-4	Solivik Island	Do.

OUTER CONTINENTAL SHELF PROTRACTION DIAGRAMS—Continued

	Description	Approval date
NS 4-7	do.	Do.
NS 5-7	do.	Do.
NS 6-7	Laurentian Basin	Do.

2. Copies of these diagrams are for sale at two dollars ($2.00) per sheet by the Manager, Alaska Outer Continental Shelf Office, Bureau of Land Management, P.O. Box 1159, Anchorage, Alaska 99510. The street address is 800 A Street, Anchorage, Alaska. Checks or money orders should be made payable to the Bureau of Land Management.

ROBERT J. BROCK,
Acting Manager, Alaska Outer Continental Shelf Office.

[4310-84]

[Wyoming 65022]

WYOMING

Application

SEPTEMBER 5, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185) the Colorado Interstate Gas Co. of Colorado Springs, Colo. filed an application for a 6⅝-inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 19 N., R. 98 W.,
Sec. 24, S½SE¼.

The proposed pipeline will transport natural gas from an existing well located in the SE¼ of section 24, T. 19 N., R. 98 W., into an existing natural gas pipeline located in the SW¼ of section 24, in Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. Box 1869, Highway 187 North, Rock Springs, Wyo. 82901.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands Minerals Operations.

[4310-84]

[Wyoming 64652]

WYOMING

Application

SEPTEMBER 7, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Cities Service Gas Co. of Oklahoma City, Okla. filed an application for a right-of-way to construct two 4½-inch pipelines for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 18 N., R. 96 W.,
Sec. 12, lot 2, S½W¼ and SE¼SE¼;
Sec. 24, S½NE¼, N½NW¼, SE¼NW¼ and NE¼SE¼.

One of the proposed pipelines with appurtenant anode facilities will transport natural gas produced from the Champlin 221B-1 well located in the NW¼SW¼ sec. 7, T. 18 N., R. 95 W., to a point of connection with Colorado Interstate Gas Co.'s existing pipeline in the SE¼SE¼ sec. 11, T. 18 N., R. 96 W.; the other pipeline with appurtenant anode facilities will transport natural gas produced from the Champlin 221C-1 well located in the SE¼SW¼ sec. 19, T. 18 N., R. 95 W., to a point of connection with Colorado Interstate Gas Co.'s existing pipeline in the NW¼NW¼ sec. 24, T. 18 N., R. 96 W., all within Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Oprations.

[FR Doc. 78-25829 Filed 9-13-78; 8:45 am]

[4310-84]

[Wyoming 64677]

WYOMING

Application

SEPTEMBER 6, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Phillips Petroleum Co. of Denver, Colo. filed an application for a right-of-way to construct a 4- and 6-inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 44 N., R. 76 W.,
Sec. 7, lots 1 and 2.
T. 44 N., R. 77 W.,
Sec. 1, S½NW¼;
Sec. 2, lot 1 and SE¼NE¼.
T. 45 N., R. 77 W.,
Sec. 35, E½SW¼, N½SE¼ and SE¼SE¼.

The proposed pipeline will transport natural gas from a point in the NW¼NW¼ of section 7, T. 44 N., R. 76 W., to a point in the NW¼NE¼, section 12, T. 44 N., R. 77 W., and from points in the NE¼SW¼, section 1, T. 44 N., R. 77 W., and the SE¼NW¼ and the NW¼SE¼ of section 35, T. 45 N., R. 77 W., to a point in the SW¼, section 15, T. 44 N., R. 77 W., Johnson County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 951 Union Boulevard, Casper, Wyo. 82601.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

[ES 17760; Survey Group 109]

MINNESOTA

Filing of Plat of Survey

SEPTEMBER 6, 1978.

On May 26, 1977, a plat of survey of Tract 37, T. 147 N., R. 30 W., Fifth Principal Meridian, Minnesota, containing 1.30 acres, was accepted. This plat, which represents the survey of an island not previously surveyed, will be officially filed in the Eastern States Office, Silver Spring, Md., at 10 a.m. on October 13, 1978.

The island's formation is similar in all respects to that of the adjacent mainland. The soil is composed of a layer of organic matter on glacial till and large boulders are scattered throughout. Timber on the island consists of elm, cedar, white birch, and aspen with an undergrowth of young oak, willows, and grass. Reeds and elder grow around the fringe of the island. Tract 37, which rises to an elevation of approximately 5 feet above the ordinary high watermark, is well

over 50 percent upland in character

NEW MEXICO

Application

SEPTEMBER 6, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 27 N., R. 8 W.,
Sec. 3, E½SE¼ and SW¼SE¼.

This pipeline will convey natural gas across 0.352 of a mile of public land in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

NUCLEAR REGULATORY COMMISSION

[Docket No. PRM-7-1]

NONDESTRUCTIVE TESTING MANAGEMENT ASSOCIATION

Petition for Rulemaking

Notice is hereby given that Mr. Walter P. Peeples, Jr., on behalf of the Nondestructive Testing Management Association, by letter dated July 19, 1978, has filed with the Nuclear Regulatory Commission a petition for rulemaking.

The petitioner requests the Commission to establish a review board made up of responsible members of the industry to review all pertinent NRC regulations and to clarify positions of the industry prior to issuance of all new regulations. The petitioner states that the petition is related to all regulations that directly affect users of byproduct materials in the field of nondestructive testing. The petitioner states also that since the field of nondestructive testing is large in scope, the members of the review group should be selected from the manufacturers and users of byproduct materials representing industrial radiography, gaging, and oil well logging industries.

As a basis for the petition, the petitioner states that:

Within the past few years, it has become obvious that certain regulations are placed upon the industry which are deemed unnecessary. It is the consensus of the industry that this is caused by certain individuals within the bureaucracy writing regulations and not being familiar with the industry * * * We feel that this petition is necessary and that this approach will serve to educate both the industry and the U.S. Nuclear Regulatory Commission. The industry's objective is to maintain liaison with the U.S. Nuclear Regulatory Commission what is considered necessary and unnecessary in relationship to regulations.

A copy of the petition for rulemaking is available for public inspection at the Commission's Public Document Room, 1717 H Street NW, Washington, D.C. A copy of the petition may be obtained by writing to the Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

All persons who desire to submit written comments or suggestions concerning the petition for rulemaking should send their comments to the Secretary of the Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by November 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald L. Hutton, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301-492-7211.

Dated at Washington, D.C. this 7th day of September.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc. 78-25736 Filed 9-13-78; 8:45 am]

[7590-01]

[Docket NO. STN 50-595]

GILBERT ASSOCIATES, INC., COMMONWEALTH ASSOCIATES, INC.

Receipt of a Standard Safety Analysis Report

Gilbert Associates, Inc. and Commonwealth Associates, Inc. have filed with the Nuclear Regulatory Commission (the Commission) their Standard Safety Analysis Report (GAISSAR) which was docketed on August 21, 1978. GAISSAR was tendered on February 24, 1978. During the acceptance review for completeness, Gilbert Associates, Inc. submitted additional information by letter dated July 31, 1978. Subsequently, GAISSAR was found to be acceptable for docketing. Docket No. STN 50-595 has been assigned to GAISSAR and should be referenced in any correspondence relating thereto.

The GAISSAR application was filed in response to Option 1 (Reference System) of the Commission's standardization policy for nuclear power plants issued on March 5, 1973, and pursuant to appendix 0 of 10 CFR part 50. Under the "Reference System" option, an entire facility or major portions of it can be identified as a standard design to be used in multiple applications. GAISSAR describes and analyzes the balance-of-plant equipment and structures intended to be used conjunction with any one of three standard pressurized water reactor nuclear steam supply systems, namely, the Babcock & Wilcox Co. B-SAR-205, the Combustion Engineering, Inc. CESSAR-80, and the Westinghouse Electric Corp. RESAR-414. Each of the above nuclear steam supply systems have a rated thermal output of about 3,800 MWt.

The Commission's Office of Nuclear Reactor Regulation (staff) will publish a summary report on its review of GAISSAR and will refer it to the Advisory Committee on Reactor Safeguards (ACRS) for its review and a report thereon. Subsequently, the staff will prepare a Safety Evaluation Report documenting the results of the review and will publish in the FEDERAL REGISTER a determination as to whether or not the preliminary design is acceptable.

All interested persons who desire to submit written comments for consideration by the staff and ACRS during their review of GAISSAR should send them to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC. 20555, attention: Docketing and Service Section by November 13, 1978.

A copy of the GAISSAR Standard Safety Analysis Report is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC. 20555. When available, the Safety Evaluation Report and the ACRS report will be made available for inspection by the Public at the Commission's Public Document Room.

Dated at Bethesda, Md., this 7th day of September 1978.

For the Nuclear Regulatory Commission.

CLEMENS J. HELTEMES, Jr.,
Chief, Standardization Branch, Division of Project Management.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 78-37]

SAFETY RECOMMENDATIONS AND RESPONSES

Accident Report

RAILROAD ACCIDENT REPORT

The National Transportation Safety Board announces the availability of its formal report of investigation into the February 10, 1978, collision of a trolley car and a bus in Pittsburgh, Pa. The report, No. NTSB-RAR-78-5, shows that the collision occurred during the morning rush hour on a portion of the Port Authority of Allegheny County busway which is used both by buses and trolleys. The bus, with at least 39 passengers, was inbound. The trolley, with only its operator aboard, was outbound.

The busdriver and three bus passengers were killed in the crash. The car operator and 36 bus passengers were injured. Probable cause of the accident, the Safety Board finds, was the operator's inadvertent and untimely operation of an unprotected track switch, which caused the trolley car to be routed into the path of the approaching bus. Contributing to the accident was the operator's operation of the car at a speed too great to permit stopping when he detected the turning movement of the car, and the lack of protective devices to control the switch operation.

Two recommendations, Nos. R-78-49 and 50, were made to the Port Authority of Allegheny County concerning the means by which the track switch can be operated from the trolley car and the provision of protection against the switch's operating when another vehicle is in a danger zone. One recommendation, No. R-78-51, was also made by the Safety Board to the Governor of the Commonwealth of Pennsylvania, urging the State to encourage communities that have emergency response facilities to establish emergency procedures for disasters. (See also 43 FR 39871, September 7, 1978.)

AVIATION SAFETY RECOMMENDATIONS

Last April 25 the Safety Board expressed its concern to the Federal Aviation Adminstration about multiple tire failures on wide-bodied aircraft, such as that experienced by the Continental Air Lines DC-10 at Los Angeles International Airport on March 1, 1978. FAA's response of May 23 detailed several actions which FAA had underway or was planning to initiate.

The Safety Board acknowledges FAA's actions as a step toward reducing the potential risk of tire failures. However, the Board's public hearing, which was convened on May 30 as part of the investigation of the DC-10 accident, elicited much testimony regarding factors which can affect tire safety and reliability. As a result, the Board believes that additional regulatory or advisory actions are needed in the areas of design standards, qualification testing, quality control during manufacture, and operational limits. The Board's concerns apply to retreaded tires as well as new tires.

Hearing testimony indicates that some confusion exists within the industry regarding the significance of a tire's rated load, as defined by the Tire & Rim Association, and the consideration given when mating a particular tire with airframe design and intended operations. No margin is required for possible overload from unequal load distribution which can be created by normal differences between the two tires—differences in deflection characteristics between tires from different manufacturers, differences in retread levels, differences in inflation pressures, differences in outside diameters, and differences in wear. In addition, no margin is provided for possible overload caused by the angle at which the landing gear contacts the airport surface. The Board believes that steps must be taken to insure that such factors are considered when tires are selected and when maintenance and operational practices are established for the aircraft's service life.

On September 6 the Safety Board directed a recommendation letter to FAA, noting that minimum performance standards for aircraft tires, as established by TSO-C62b, have not been revised since 1962. These standards apply only to new tires. The Board further noted that currently there are no methods of nondestructive inspection available to insure satisfactorily that carcasses intended for retread are free of defects which can produce premature failure. Accordingly, the Board's September 6 letter recommended that FAA—

Assess current tire rating criteria, as used by the Tire & Rim Association and as interpreted by airframe designers and Federal standards, in terms of compatibility of tire, airframe, and intended operation to assure that adequate margins are provide for all normal conditions. (A-78-67)

Upgrade technical standard order C62b to reflect current engineering practices and operational conditions in both the specifications for performance standards and certification test requirements. (A-78-68)

Insure that the tire is compatible with the airframe by considering this compatibility during the airplane certification. Tire loads which result from design peculiarities and normal variations in maintenance and operational practices must be considered. (A-78-69)

Issues a new technical standard order to specify performance standards and qualification test requirements for retreaded tires. (A-78-70)

Prohibit different model tires or tires manufactured by different manufacturers from being mounted on the same axle where different characteristics between such tires can affect tire loading under normal operating conditions. (A-78-71)

Require that operator maintenance and operational practices regarding tire usage, such as taxi speeds and distances and inflation pressures, are in accordance with the tire manufacturers' recommendations. (A-78-72)

Expedite the development of a nondestructive inspection technique which would detect flaws in tire carcasses. Require nondestructive inspection for new and retreaded tires and develop criteria based upon such inspection to withdraw a faulty tire from service. (A-78-73)

In the interim, establish a safe upper limit for the number of retread cycles allowed each model tire. (A-78-74)

Recommendation A-78-71 is designated "Class I, Urgent Action"; all other above recommendations are designated "Class II, Priority Action."

RESPONSES TO SAFETY RECOMMENDATIONS

Highway

H-78-56 through 60.—Letter of August 14 from the Department of Highways and Transportation, Commonwealth of Virginia, is in response to recommendations issued by the Safety Board following its investigation of the truck/automobile collision on U.S. route 50 near Chantilly, Va., July 21, 1977. The truck, loaded with 17 tons of stone, violated a red traffic signal at an intersection and struck the car, killing all four occupants of the car.

The department reports that direct-

and the element of watch officer dis-

In answer to M-77-5, recommending prohibition of the use of metals with

cedures for issuing, transmitting, and posting certificates.

agencies. Coast Guard states that it lacks statutory authority to impose

V 43 / 179 SEP 14 1978

The department reports that directly after this accident occurred, its traffic engineers visited the location and found, as pointed out by the Safety Board, that the yellow clearance interval was 6 seconds due to the width of the intersection. An all-red phase with a 2-second interval has now been added. The department is now allowing for an all-red phase on all new installations and has been adding such to its signals in places where the speed limit is 45 mph or more. Former Virginia law made it illegal for a motorist to enter an intersection when the signal turned to "Caution." A few years ago this was changed, the department notes, and now a motorist may enter on caution provided he feels that it is safe to do so—thus the need for an all-red clearance period.

The department states that since all actuated equipment is used, and due to eight phases at this location, it was not thought practical to use multipoint detection. The Fairfax Police Department has greatly intensified their enforcement at this location, not only as to speeding, but also to violations of the weight laws. According to the department, since the subject fatal accident, hundreds of summonses have been issued for both.

Marine

M-77-1 through 6.—U.S. Coast Guard's letter of August 15 is in reply to the Safety Board's letter of May 30 which commented on the Coast Guard's initial response, dated October 11, 1977, to recommendations developed as a result of the collision between the *SS Keytrader* and *SS Baune* on the lower Mississippi River on January 18, 1974.

Recommendation M-77-1 asked Coast Guard to determine the maximum safe speeds for vessels that are navigating with radar in limited visibility on inland waters and require vessel operators to set the vessel's speed at, or less than, the maximum safe speed. The Safety Board stated in its May 30 letter that its intent in making this recommendation was to urge Coast Guard to develop the correlation between the ability of the vessel's personnel to process and use radar data and the safe speed of the vessel. The Board said that the speed of a vessel navigating with radar should be such that there is adequate time to detect other vessels, evaluate their movements, and make passing agreements. Coast Guard on August 15 stated that equating time required to solve a relative motion problem to safe speed introduces a number of additional variables not heretofore considered. Aside from operator proficiency, such a relationship is very much involved with vessel size and speed, congestion and geographic restraints, and the element of watch officer distraction during plotting and solution time. However, Coast Guard states that it has not investigated this concept and it is possible that a solution time standard may be useful for this or other purposes. Coast Guard will pursue the idea as time and workload permit.

Recommendation M-77-2 asked Coast Guard to determine the maximum strength of current which leads to the mandating of one-way traffic for vessels that are navigating by radar in limited visibility on inland wates, and require the Vessel Traffic Service (VTS) to mandate one-way traffic when the strength of the current exceeds the maximum strength. The August 15 response indicates that Coast Guard believes that one-way traffic imposition should be considered on a case-by-case or port-by-port basis. This opinion is based on the variables encountered in each situation. The case-by-case approach rather than strict quantifiable standards keeps the safety of the wateway under continued surveillance, and the supervision of the situation is not dulled when the standards have not yet been breached, according to Coast Guard. A summary of normally encountered, one-way traffic situations in the VTS program is provided in the response.

Recommendation M-77-3 asked Coast Guard to establish minimum standards for manually processing radar data to assist in evaluating the movements of approaching radar contacts on inland waters, and require vessel operators to insure that radar data is processed in accordance with the standards unless a collision avoidance system is in use. In response to the Safety Board's May 30 followup, Coast Guard has supplied further information and states that the notice of proposed rulemaking to amend 46 CFR 10.05-46 concerning the endorsement of a deck officer's license as a "radar observer" does include a proficiency requirement for manipulation radar data. The officer will be required to demonstrate his ability to plot, interpret, and evaluate approaching radar contacts within a specified time.

Concerning M-77-4, which asked Coast Guard to develop and publicize information about deficiencies in the use of sound signals between vessels including the effect of environmental conditions on sound propagation, Coast Guard reports that the information on sound signal characteristics, to be published in local notices to mariners is being compiled but has been delayed by higher priority items. Coast Guard believes that the information, when published, will be precisely what the Safety Board seeks.

In answer to M-77-5, recommending prohibition of the use of metals with low melting points and of fire-consumable gaskets in both tankcovers and deck piping systems on tank ships, Coast Guard indicates that a test series has been completed which evaluated the potential problems associated with aluminum hatch covers on tank ships. Based on these tests, a rulemaking has been initiated to require retrofitting of steel hatchcovers.

Recommendation M-77-6 called for Coast Guard to study the adequacy of its capability to fight major marine fires on remote waterways where the local firefighting capability is inadequate and establish an adequate firefighting capability for such areas. The Safety Board's May 30 followup noted that Coast Guard's initial response to M-77-6 placed the responsibility for fighting marine fires totally on the local jurisdiction and stated that Coast Guard has neither the assets nor the mandate to accept such a role. The Board agreed with Coast Guard as this responsibility relates to large port areas or along waterways where development is directly related to and supported by marine commerce, but noted that in remote areas such as this accident location there is no local firefighting capability and no incentive to acquire that capability. The Board on May 30 also stated that the obvious gap in emergency response must be filled by an agency with the needed resources—Federal, State, or nearest major port authority.

Coast Guard's August 15 response to M-77-6 states: "Whether or not the alleged gap in fire fighting capability should be filled by the federal government is a question for the Congress, not the Coast Guard. Until so tasked, funded, staffed, and equipped, the Coast Guard will continue to offer, when asked or on scene, such very limited capability as it now has, to the extent that that assistance does not interfere with higher priority missions."

M-78-3 through 8.—Coast Guard's letter of August 11 comments on recommendations issued last March 4 following investigation of the fire and explosion aboard Tank Barge B-924 which occurred November 13, 1975, at the barge's repair facility in Greenville, Miss.

Recommendation M-78-3 asked that Coast Guard establish a program for licensing or documenting marine chemists, which includes the latest methods and materials, to safely insure that all marine chemists demonstrate a working knowledge of all necessary regulations pertaining to the repair of vessels; reexamine marine chemists periodically to insure that they maintain familiarity with current regulations and provide for

the suspension or revocation of licenses or documents of marine chemists who do not comply with these regulations. In response Coast Guard states that an extensive review of the marine chemist program of the National Fire Protection Association (NFPA) has been made and Coast Guard concludes that the existing NFPA organization is a suitable vehicle for administering and upgrading the program, provided that NFPA supplies the logistical support to effectively implement the recommendations of its Qualifications Board and Sectional Committee on Gas Hazards.

Coast Guard notes that NFPA has formally indicated that they will provide the necessary support. The rules for certification of marine chemists have been extensively revised by NFPA to require an examination on applicable Coast Guard and the Occupational Safety and Health Administration (OSHA) regulations prior to certification. A 5-year interval for recertification has been established. As a part of this process, marine chemists will be required to pass an examination on NFPA standard No. 306 and current Coast Guard and OSHA regulations. Current certification rules are adequate for suspension or cancellation of NFPA certification. The presence of a Coast Guard liaison on the Qualifications Board meetings will insure thorough investigation.

In answer to M-78-4, which called for regulations to establish specific procedures for issuing, transmitting, and posting marine chemists' certificates, Coast Guard notes that NFPA standard No. 306 contains these procedures. This standard is presently being amended, with the Coast Guard represented on the committee. Coast Guard reports that the modified standard will contain specific responsibilities delineating (a) certificates to be completed and issued by the marine chemist prior to any hot work, (b) certificate to be presented to owner or representative with a signature for receipt, and (c) owner or repairer or his representative to be responsible for securely posting the marine chemists' certificate in a conspicuous place aboard the vessel.

Coast Guard notes that the use of NFPA standard No. 306 as a guide in conducting inspections and issuing certificates is currently specified in 46 CFR 35.01-1. In addition, each marine chemist at the time of his certification by NFPA must sign a Memorandum of Agreement stating that he will perform all of his work in accord with the requirements of NFPA-306. Also, Coast Guard is reviewing all regulations concerning this subject and will soon issue a notice of proposed rulemaking that will require specific procedures for issuing, transmitting, and posting certificates.

In answer to M-78-5, which sought regulations to establish specific criteria which must be met before personnel enter and repair vessels, Coast Guard says that an advance notice of proposed rulemaking entitled, "Entry Into Cargo Tanks, Cofferdams and Pumprooms," has been drafted but not yet released. Coast Guard notes that a complete technical review of all current Federal regulations regarding vessel repairs and tank entry is tentatively scheduled for completion during September 1978 and that subsequent to this review, regulatory action will be initiated as appropriate.

Regarding M-78-6, Coast Guard states that, in consultation with OSHA, it will determine standards that should be established for fire watch personnel, as recommended.

Recommendation M-78-7 asked Coast Guard review of personnel utilization practices and staffing levels at marine safety detachments to insure that adequate resources are available to properly monitor vessel repairs and related activities. Coast Guard reports that its Headquarters Office of Personnel completed a body-billet match study last fall. The objective of the study was to determine excesses and/or needs by program at each grade level. The study has been a help in developing plans to fill existing vacancies and new billets. The Office of Personnel has reviewed utilization practices and will do so periodically in the future. A discussion of the philosophy of "monitoring" is included in the Coast Guard response. Coast Guard states that its function is not to "monitor vessel repairs and related activities," but to determine what repairs are required and that the repairs are completed in an acceptable manner. Coast Guard says, "Any requirement to 'monitor' or 'superintend' repairs would require tripling or quadrupling of our inspection resources and would, in essence, have the Coast Guard assume the responsibility for safety previously held by the ship repair facility."

Recommendation M-78-8 called for Coast Guard to initiate contingency plans for responding to major marine casualties in the Greenville, Miss., area, such plans to require that emergency communications are established, that appropriate training be provided, and that firefighting resources are coordinated. In response, Coast Guard notes that its Captains of the Port have developed contingency plans which systematically list steps to be taken upon occurrence of certain mishaps, including marine fires, within their zone of authority. Such contingency plans include identification of local points of contact for response agencies. Coast Guard states that it lacks statutory authority to impose upon local communities any requirements that they establish emergency communications systems, provide firefighting training, and coordinate resources as recommended by the Safety Board. Cooperation is encouraged but is dependent upon voluntary implementation. Coast Guard units, if requested by local authority, will provide assistance to local firefighting forces in the event of a vessel fire or a fire at a waterfront facility. Such assistance is on an "as available" basis and actual firefighting involvement has been very limited. Funds for this purpose are limited.

NOTE.—The above notice reports on Safety Board documents recently released and recommendation response letters received. Single copies of accident reports and the Board's recommendation letters in their entirety are available to the general public without charge. Copies of the full text of responses to recommendations may be obtained at a cost of $4 for service and 10 cents per page for reproduction.

All requests to the Board for copies must be in writing, identified by report or recommendation number. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of accident reports may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

PIPELINE ACCIDENT, DONNELLSON, IOWA

Investigation Hearing

Notice is hereby given that the National Transportation Safety Board will convene an accident investigation hearing at 9 a.m. (local time) September 26, 1978, in the Grand Ballroom of the Hotel Savery at Locust and Fourth Streets, Des Moines, Iowa.

The public hearing will be held in connection with the Safety Board's investigation of an accident involving the failure of an 8-inch propane pipeline owned by the Mid America Pipeline System which occurred August 4, 1978, in Donnelison, Iowa.

HENRY M. SHEPHERD,
Hearing Officer.

CLEARANCE OF REPORTS

List of Request

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 8, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the clearance office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

DEPARTMENT OF ENERGY

Automotive Fuel Economy Guide Evaluation Survey, EIA-35, single time, sample of new car and truck buyers in 41 States, 2,400 responses, 6,000 hours, C. Louis Kincannon, 395-3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration (medicare), Summary of Utilization at Different Levels of Care, HCFA-L-70T, single time, 108 PSROS that had implemented review by December 31, 1977, 108 responses, 54 hours, Richard Eisinger, 395-3214.

REVISIONS

U.S. CIVIL SERVICE COMMISSION

Application for Federal Summer Employment, OPM 843A, on occasion, students, 100,000 responses, 16,666 hours, Warren Topelius, 395-6132.

DEPARTMENT OF ENERGY

Natural Gas Liquids Operations Report, EIA-64, monthly, natural gas processing plant operators, 8,700 responses, 17,400 hours, C. Louis Kincannon, 395-3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service, National Ambulatory Medical Care Survey (1979), HRA 34-2, 3, 4, and 5, other (see SF-83), physicians in office practice, 91,000 responses, 1,525 hours, Office of Federal Statistical Policy and Standard, Richard Eisinger 673-7956.

Social Security Administration:

Evaluation and Measurement System (EMS) Questionnaire—Retirement Survivors Disability Insurance (RSDI) SSA-1398, monthly, monthly samples of original adjustment RSDI application within each sample month, 24,000 responses, 12,000 hours, Human Resources Division, Reese, B. F., 395-3532.

Statement Regarding Wages by Person Having Knowledge Thereof, SSA-7013, on occasion, any person having knowledge of wages paid to an individual, no evidence, 15,000 responses, 5,000 hours, Reese, B. F., 395-3211.

Health Care Financing Administration (medicare), RACC Provider Survey (hospital administrators, directors of nursing, and physicians), HCFA-28T, 73T, and 19T, single time, admitting physicians in rural hospital in Texas, Iowa, and South Dakota, 588 responses, 294 hours, Office of Federal Statistical Policy and Standard, 673-7956.

DEPARTMENT OF LABOR

Bureau of Labor Statistics, Utility Information Authorization, BLS-CCE—10(X), weekly, households in 3 test areas—Philadelphia, Pa.; Akron, Ohio; and Wisconsin, 1,600 responses, 7,200 hours, Office of Federal Statistical Policy and Standard, 673-7956.

EXTENSIONS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration, Statement of Institution or Social Agency, SSA-1255, on occasion, institution or social agency in which a beneficiary resides, 3,500 responses, 600 hours, Reese, B. F., 395-3211.

Health Care Financing Administration (medicare), End Stage Renal Disease Medical Information System, HCFA-2742, 2743, 600-1 through 600-5, annually, facilities certified for ESRD services, 330,000 responses, 18,929 hours, Richard Eisinger, 395-3214.

[3190-01]

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

TRADE POLICY STAFF COMMITTEE

Solicitation of Public Views

Pursuant to section 201 of the Trade Act of 1974, on September 1, 1978, the President received a report from the U.S. International Trade Commission (USITC) on the case of Bicycle Tires and Tubes (Investigation No. TA-201-33). The Commission submitted a report containing an affirmative determination that pneumatic bicycle tires provided for in item 772.48 of the Tariff Schedules of the United States (TSUS), other than tubular tires consisting of tires with tubes permanently enclosed therein; and tubes for bicycle tires, provided for in TSUS item 772.57, are being imported into the United States in such increased quantities as to be substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

The Commission finds and recommends that, to prevent or remedy the serious injury or the threat thereof to the domestic industry, it is necessary to impose rates of duty, in lieu of the present rates of duty, with respect to U.S. imports of pneumatic bicycle tires, other than tubular tires consisting of tires with tubes permanently enclosed therein; and tubes for bicycle tires as follows:

[Figures in percent ad val.]

Item	Recommended rates of duty				
	1st yr	2d yr	3d yr	4th yr	5th yr
Pneumatic bicycle tires, provided for under TSUS item 772.48 (other than tubular tires consisting of tires with tubes permanently enclosed therein)	15	15	15	15	10
Tubes for bicycle tires, provided for under TSUS item 772.57	25	25	20	20	20

Within 60 days of receiving a report from the Commission containing an affirmative determination, the President must determine what method and amount of import relief he will provide or determine that the provision of relief is not in the national economic interest, and whether he will direct expeditious consideration of adjustment assistance petitions.

In determining whether to provide import relief and what method and amount of import relief he will provide, the President must take into account, in addition to other considerations he may deem relevant, the following factors:

(1) the probable effectiveness of the import relief as a means to promote adjustment, the efforts being made or to be implemented by the industry concerned to adjust to import competition, and other considerations relevant to the position of the industry in the Nation's economy;

(2) The effect of import relief on consumers and on competition in the domestic markets for such articles;

(3) The effect of import relief on the international economic interest of the United States;

(4) The impact on U.S. industries and firms as a consequence of any possible modification of duties or other import restrictions which may result from international obligations with respect to compensation;

(5) The geographic concentration of imported products marketed in the United States;

(6) The extent to which the U.S. market is a focal point for exports of such article by reason of restraints on exports of such article to, or on imports of such article into, third country markets; and

(7) The economic and social costs which would be incurred by taxpayers, communities, and workers if import relief were or were not provided.

The Office of the Special Representative for Trade Negotiations chairs the interagency Trade Policy Committee structure that makes recommendations to the President as to what action, if any, he should take on reports submitted by the USITC under section 201(d). In order to assist the Trade Policy Staff Committee in developing recommendations to the President as to what action to take under sections 202 and 203 of the Trade Act of 1974, the Committee welcomes briefs from interested parties on the above listed subjects. (Additional information on this case is available in USITC Report 201-33.)

Briefs should be submitted in twenty (20) copies to Secretary, Trade Policy Staff Committee, Room 728, Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C. 20506.

To be considered by the Trade Policy Staff Committee, submissions should be received in the Office of the Special Representative for Trade Negotiations no later than the close of business Thursday, September 28, 1978.

WILLIAM B. KELLY, JR.,
Chairman,
Trade Policy Staff Committee.

TRADE POLICY STAFF COMMITTEE

Extension of Deadline for Submission of Public Views and Comments

In the FEDERAL REGISTER of August 22, 1978 (43 FR 37249) and of September 7, 1978 (43 FR 39876) the Trade Policy Staff Committee solicited public views and comments with respect to the possible conversion by the United States of certain specific and compound rates of duty to ad valorem rates as part of the "Tokyo Round" of Multilateral Trade Negotiations. The deadline given in those notices for such submissions was specified as September 8, 1978. Notice is hereby given that this deadline has been extended until September 22, 1978.

WILLIAM B. KELLY, JR.,
Chairman, Trade Policy Staff Committee

[4510-23]

PRESIDENT'S COMMISSION ON THE COAL INDUSTRY

MEETING

The first meeting of the President's Commission on the Coal Industry will be held on Friday, September 29, 1978, from 9 a.m. to 1 p.m., in room 2010 of the New Executive Office Building, 726 Jackson Place NW., Washington, D.C.

The Commission was created by Executive Order 12062 on May 26, 1978. Under that order the Commission is to conduct a comprehensive review of the state of the coal industry in the United States with particular emphasis on matters pertaining to productivity, capital investment, and the general economic health of the industry; collective bargaining, grievance procedures, and such other aspects of labor-management relations as the Commission deems appropriate; health, safety, and living conditions in the Nation's coal fields; the development and application of new technologies to the industry; the impact on the coal industry of Federal regulations and such other matters as the Commission deems appropriate.

The Commission membership is as follows:

VOTING MEMBERS

Hon. John D. Rockefeller IV, Chairman, Governor of West Virginia, Charleston, W. Va.
Mr. Jesse Core, Adjunct Professor of Mining Engineering, Pennsylvania State University, University Park, Pa.
Mr. Marvin Friedman, Vice President, Rutenberg, Friedman, Kilgallon, Gutchess & Associates, Inc., Washington, D.C.
Mr. W. Dewey Presley, Director and Chairman of the Executive Committee, First International Bancshares, Inc., Dallas, Tex.
Mr. Willard Wirtz, Wirtz & Gentry, Washington, D.C.

NONVOTING MEMBERS

Hon. Walter Huddleston, U.S. Senate, Washington, D.C.
Hon. Charles Percy, U.S. Senate, Washington, D.C.
Hon. Jennings Randolph, U.S. Senate, Washington, D.C.
Hon. Ray Marshall, Secretary, Department of Labor, Washington, D.C.
Hon. John Buchanan, U.S. House of Representatives, Washington, D.C.
Hon. Austin Murphy, U.S. House of Representatives, Washington, D.C.
Hon. Carl Perkins, U.S. House of Representatives, Washington, D.C.
Hon. James Schlesinger, Secretary, Department of Energy, Washington, D.C.

The Commission is to prepare and transmit a final report of their findings and recommendations to the President, the Secretary of Labor and the Secretary of Energy within a year of the first meeting of the Commission.

The agenda for the September 29 meeting follows:

9 a.m.—Meeting convened—Hon. John D. Rockefeller IV, Chairman.
9:15 a.m.—Background of Commission—Representatives of: The White House, Department of Labor, Department of Energy.
10 a.m.—Scope of work—Commission members.
11:45 a.m.—Hearings schedule—Commission members.
2:30 p.m.—Administrative matters—Commission members.
1 p.m.—Adjournment.

The meeting will be open to the public with approximately 40 seats available on a first-come, first served basis. This first Commission meeting will be devoted primarily to setting an agenda for the coming year. Persons wishing to file statements with the Commission pertaining to the agenda should provide 25 copies of such statement to Mr. James M. Childress, President's Commission on the Coal Industry, P.O. Box 1424, Washington, D.C. 20013, to be received no later than October 13, 1978.

Minutes of the Commission meeting will be available upon request 30 days after the meeting. In addition, copies of the meeting transcript, as well as the Commission agenda and formal statements received from the public will be maintained and available for public inspection and copying at actual cost at the Commission offices. Persons wishing to inspect these documents should contact Mr. Childress at 202-673-7925, or at the above address.

Dated: September 13, 1978.

MICHAEL S. KOLEDA,

an aggregate net asset value equal to the value of the Hunter assets to be acquired shall be issued in exchange

SECURITIES AND EXCHANGE COMMISSION

[Release No. 10392]

BROAD STREET INVESTING CORP.

Filing of an Application Pursuant to Section 6(c) of the Act for an Order Exempting a Proposed Exchange of Shares From the Provisions of Sections 22(c) and 22(d) of the Act, and Rule 22c-1 Thereunder.

SEPTEMBER 17, 1978.

Notice is hereby given, that Broad Street Investing Corp. ("Broad Street"), registered under the Investment Co. Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on July 18, 1978, and an amendment thereto on August 18, 1978, requesting an order of the Commission pursuant to section 6(c) of the Act exempting from the provisions of section 22(c) of the Act and rule 22c-1 thereunder, and section 22(d) of the Act the proposed exchange of Broad Street shares at net asset value without a sales charge and at a price other than the price next determined after receipt of a purchase order, for substantially all of the assets of Hunter Investment Corp. ("Hunter"), which, applicant asserts, is an investment company exempt from registration under the Act by reason of section 3(c)(1) thereof. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Broad Street is a Maryland corporation, and on August 14, 1978, had net assets totalling $331,234,797. Applicant represents that Hunter is a corporation organized and existing under the laws of Massachusetts and that its stock is held of record and beneficially by 5 persons.

Applicant further represents that no affiliation exists between Hunter or its officers, directors or stockholders and Broad Street and its officers or directors.

Applicant states that Broad Street and Hunter have entered into an Agreement and Plan of Reorganization (the "Plan") which provides that substantially all of the cash and securities owned by Hunter will be transferred to Broad Street in exchange for shares of its capital stock. Pursuant to the Plan, Broad Street shares having an aggregate net asset value equal to the value of the Hunter assets to be acquired shall be issued in exchange therefor. The number of shares of applicant to be issued to Hunter on the exchange date is to be determined by dividing the aggregate market value of the assets of Hunter to be transferred to applicant by the net asset value per share of Broad Street. Determination of the aggregate market value of the assets of Hunter will be subject to an adjustment designed to compensate for any increase in the potential taxes of applicant that may result from any excess in the proportion of the net asset value of the assets acquired from Hunter represented by realized and unrealized appreciation over the proportion of the net asset value of applicant represented by realized and unrealized appreciation. The valuation date for purposes of determining the net asset value per share of Broad Street and the market value of the assets of Hunter to be acquired by Broad Street will be the close of business of the New York Stock Exchange on the business day next preceding the exchange date. If the valuation date under the plan had occurred on August 14, 1978, Hunter would have received 420,569 shares of Broad Street's capital stock, having a net asset value of $11.65 per share, in exchange for substantially all the assets of Hunter having an aggregate value as of that date of approximately $4,899,619, and Broad Street would not have recognized any capital loss carryforward as a result of the transaction. Broad Street presently intends to sell approximately 36 percent of the assets to be acquired from Hunter within a relatively short period following their acquisition. As of August 14, 1978, the market value of such assets was approximately $1,742,812.

The Plan also provides for the retention by Hunter of an amount equivalent to less than 10 percent of its net assets to pay its liabilities, costs of liquidation and dividends to its stockholders equal to its "undistributed personal holding company" income as defined in section 545 of the Internal Revenue Code of 1954. Hunter has advised applicant, however, that the Plan calls for the exchange of 100 percent of its assets for applicant's shares, and that within a 12 month period immediately following the exchange date, Hunter intends to transfer to Broad Street any balance of the assets retained by Hunter. Broad Street shall thereupon issue and deliver to Hunter additional Broad Street shares at the net asset value per share next computed after receipt of such assets.

Applicant states that, when received by Hunter, the shares of Broad Street are to be distributed to Hunter's shareholders in complete liquidation of Hunter, in proportion to their respective stock ownership in Hunter. Applicant has been informed by management of Hunter that the shareholders of Hunter have no present intention of redeeming or otherwise transferring any of the Broad Street shares so distributed. Applicant believes that expenses and other costs related to the distribution of an equivalent number of its shares in the ordinary course of business substantially exceed the expenses which Applicant may incur in connection with the proposed transaction.

It is a condition to the obligations of Hunter and Broad Street under the Plan that, prior to the exchange of Hunter's assets for Broad Street shares, Broad Street and Hunter shall have received an opinion of counsel to the effect that the Plan, the acquisition of Hunter's assets by Broad Street, the receipt of Broad Street shares in exchange therefor and the distribution of such Broad Street shares to Hunter shareholders, will not result in taxable gains either to Broad Street, Hunter, or to any of their respective shareholders.

Section 22(c) of the Act and rule 22c-1 thereunder taken together provide, in pertinent part, that a registered investment company may not issue its redeemable securities except at a price based on the current net asset value of such security which is next computed as of the close of trading on the New York Stock Exchange next following receipt of an order to purchase such security.

Section 22(d) of the Act provides, in pertinent part, that a registered investment company may sell redeemable securities issued by such company only at the current public offering price described in the prospectus. The current public offering price of the shares of Broad Street as described in its prospectus is net asset value plus a sales charge.

Without an exemption from sections 22(c) and 22(d) of the Act and rule 22c-1 thereunder, Applicant submits that it would be prohibited from (a) exchanging its shares at net asset value without a sales charge for substantially all of the assets of Hunter, and (b) effecting the proposed exchange transaction on the exchange date based on the market value of the assets of Hunter to be transferred and net asset value per share of Broad Street, both determined as of the valuation time which is the close of business on the business day next preceding the exchange date. It is currently expected that the valuation date will be September 29, 1978; the exchange date is expected to be October 2, 1978. Because the exchange date and the valuation date will be fixed in advance, and in view of the short time span involved, applicant argues that the possible abuses at which Rule 22c-1 is directed will not exist. Applicant also argues that consummating the proposed transaction in the manner described above will allow both Broad Street and Hunter adequate time to complete the necessary preparations for closing the transaction.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person or transaction from any provision under the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant represents that it considers the proposed exchange of shares to be at a fair price, arrived at by arms-length bargaining, and believes that granting of the requested exemption from the provisions of section 22(c), rule 22c-1 thereunder and section 22(d) of the Act is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant states that the proposed acquisition will be beneficial to the shareholders of Broad Street because those expenses of Broad Street which do not rise proportionately with an increase in portfolio size will as a result of the proposed transaction be spread over a larger number of shares. In addition, Applicant states that, even after offsetting brokerage commissions and approximate principal transaction costs involved in disposition of securities which Broad Street does not expect to retain for any significant period after consummation of the proposed transaction, the transfer of portfolio securities to be retained pursuant to the proposed transaction will cause Broad Street less expense than the purchase of securities of the same issuers in the open market. Further, Applicants state that the proposed exchange will enable Broad Street to acquire at one time additional securities for its existing portfolio without affecting the market in such securities.

Notice is further given, that any interested person may, not later than September 28, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. 1-4745]

BINNEY & SMITH, INC.

Application To Withdraw From Listing and Registration

SEPTEMBER 5, 1978.

In the matter of Binney & Smith, Inc., common stock, par value $2.50 per share, file No. 1-4745, Securities Exchange Act of 1934, section 12(d).

The above named issuer has filed an application with the Securities and Exchange Commission, pursuant to section 12(d) of the Securities Exchange Act of 1934 and rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The common stock of Binney & Smith, Inc. (the "Company") has been listed for trading on the Amex since May 1, 1963. On June 19, 1978 the stock was also listed for trading on the New York Stock Exchange, Inc. ("NYSE") and concurrently therewith, such stock was suspended from trading on the Amex. In making the decision to withdraw its common stock from listing and registration on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining a dual listing on both exchanges. The Company does not see any particular advantage in the dual trading of its common stock and believes that dual listing would fragment the market for such stock.

The application relates solely to the withdrawal from listing and registration on the Amex and shall have no effect on the continued listing of such common stock on the NYSE. The Amex has posed no objection in this matter.

Any interested person may, on or before October 6, 1978, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission will, on the basis of the application and any other information submitted to it, issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20703]

OHIO EDISON CO.

Proposed Issuance and Sale of Common Stock Pursuant to Dividend Reinvestment and Stock Purchase Plan; Request for Exemption From Competitive Bidding

SEPTEMBER 8, 1978.

Notice is hereby given that Ohio Edison Co. ("Ohio Edison"), a registered holding company, has filed with this Commission a post-effective amendment to its application-declaration previously filed and amended in this matter pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act and rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transaction.

By order dated December 23, 1977 (HCAR No. 20339), Ohio Edison was authorized to issue and sell not more than 1,000,000 shares of its authorized but unissued common stock, par value $9 per share, through October 31, 1979, pursuant to its Dividend Rein-

vestment and Stock Purchase Plan (the "Plan"). Ohio Edison currently

gram and to repay a portion of its unsecured short term debt. Ohio Edison

---

[8010-01]

rules or regulations upon its own motion or by order upon application,

These terms are based upon rule 10f-3 revised for the purposes of the re-

er, but in no event greater than 10 percent of the principal amount of the

vestment and Stock Purchase Plan (the "Plan"). Ohio Edison currently estimates that of such 1,000,000 shares approximately 593,024 remain unsold as of August 30, 1978, and approximately 200,000 shares will remain unsold as of December 31, 1978.

By post-effective amendment Ohio Edison proposes to issue and sell not more than 1,000,000 shares of its authorized but unissued common stock ("Additional Common Stock") pursuant to the Plan through October 31, 1980. It is stated that the common stock remaining to be sold under the previous order will be issued and sold under the Plan before the Additional Common Stock is issued and sold.

The Additional Common Stock will be offered to all of Ohio Edison's common stockholders pursuant to a voluntary plan whereby such stockholders may elect to (a) have dividends on their shares of common stock reinvested or, (b) continue to receive their cash dividends on shares registered in their names and invest by making optional cash payments of not less than $10 per payment nor more than a total of $5,000 per quarter, or (c) invest both their cash dividends and such optional cash payments. No service charge or commission will be paid by participants in connection with purchases under the Plan, and participants will retain all voting rights relating to shares purchased under the Plan. A participant will be able to withdraw from the Plan at any time upon written notice.

The purchase price of shares of common stock purchased with reinvested cash dividends will be an amount equal to 95 percent of the average of the high and low prices for Ohio Edison's common stock, as reported in *The Wall Street Journal* report of NYSE-Composite Transactions, on the investment date as of which the purchase is made. The purchase price of shares purchased with optional cash payments will be an amount equal to 100 percent of such average of the high and low prices. Investment dates will be the last business day of each month. No shares will be sold under the Plan at less than the par value of such shares.

Ohio Edison will announce the Plan to all of its new stockholders by addressing to them a brochure describing the Plan. The continued existence of the Plan will occasionally be brought to the attention of all nonparticipants by a remailing of such brochure. All current participants in the Plan, all stockholders who so request and all stockholders who join the Plan will be sent a copy of a complete prospectus.

The reason for the proposed issuance of the Additional Common Stock is to provide funds for Ohio Edison to continue its ongoing construction program and to repay a portion of its unsecured short term debt. Ohio Edison estimates its total plant additions for 1978 at $381,635,000.

Ohio Edison considers that the issuance and sale of shares of Additional Common Stock through the reinvestment of dividends to be exempted from the requirements of rule 50 by virtue of rule 50(a)(1). With respect to the issuance and sale of shares of Additional Common Stock through optional cash payments, Ohio Edison requests an exemption from the competitive bidding requirements of rule 50 pursuant to rule 50(a)(5).

The fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. The Public Utilities Commission of Ohio has jurisdiction over the proposed issuance and sale of the Additional Common Stock. No other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 6, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as further amended by said post-effective amendment, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date the application-declaration, as further amended by said post-effective amendment or as it may be further amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulation promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 10391]

SHEPMYERS INVESTMENT CO. AND DREXEL BURNHAM LAMBERT INC.

Filing of Application Pursuant to Section 10(f) of the Act for an Order of the Commission Exempting Certain Transactions From the Provisions of Section 10(f)

SEPTEMBER 6, 1978.

Notice is hereby given that Shepmyers Investment Co. (the "Fund"), a Pennsylvania corporation, and Drexel Burnham Lambert Inc. (the "Adviser") (hereinafter collectively referred to as the "Applicants") filed an application on May 26, 1978, and an amendment thereto on August 30, 1978, pursuant to section 10(f) of the Investment Company Act of 1940 (the "Act"), for an order of the Commission exempting certain transactions of the Fund from the provisions of section 10(f) of the Act so as to permit the Fund to purchase Municipal Bonds (as hereinafter defined) in public offerings in which the Adviser participates as a principal underwriter, subject to certain conditions specified in the application and set forth below. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

The Fund is a diversified, closed-end, management investment company registered under the Act. Its investment objective is to provide shareholders with as high a level of income exempt from Federal income tax as is consistent with the preservation of capital. In seeking this objective, the Fund proposes to invest all of its assets in a portfolio consisting of debt obligations issued by States, territories and possessions of the United States and the District of Columbia and their political subdivisions, duly constituted authorities and corporations, the interest on which is exempt from Federal income tax (such obligations being referred to hereinafter as "Municipal Bonds"). The Adviser acts as investment adviser for the Fund.

The Adviser states that it participates as an underwriter in a substantial number of public offerings of Municipal Bonds. Secton 10(f) of the Act, in pertinent part, provides that no registered investment company shall knowingly purchase or acquire, during the existence of any underwriting or selling syndicate, any security a principal underwriter of which is an officer, director, investment adviser, or employee of such investment company, or is a person of which any such officer, director, investment or employee is an affiliated person. That section further provides that the Commission, by

rules or regulations upon its own motion or by order upon application, may exempt any transaction or classes of transactions from the restrictions contained therein to the extent such exemption is consistent with the protection of investors.

Pursuant to the rulemaking authority granted by section 10(f), the Commission adopted rule 10f-3 in 1958. That rule provides that a purchase of securities by a registered investment company prohibited by section 10(f) of the Act shall be exempt from the provisions of that section if certain conditions are satisfied. The Applicants submit that rule 10f-3 was designed for underwritten offerings of corporate equity and debt securities, whereas they intend to invest primarily in Municipal Bonds. They assert that underwritten offerings of Municipal Bonds are conducted under different terms and conditions than corporate underwritings and for several reasons do not fit within the framework of rule 10f-3. For example, there is no registration requirement for Municipal Bonds under the Securities Act of 1933; such registration is one of the conditions precedent to the availability of the exemption provided for by rule 10f-3. Therefore, the Fund will be precluded from being able to take advantage of the exemption afforded by the rule, and will be unable to purchase Municipal Bonds in public offerings in which the Adviser participates as a "principal underwriter", as such term is defined in secton 2(a)(29) of the Act.

It is the Applicants' contention as stated in its application, that, due to the special nature of the Municipal Bond market and its emphasis on distributions through underwriting syndicates, the Fund must have access to the primary underwriting market in order to obtain best price and execution in the accumulation of portfolio securities. Because of the substantial participation of the Adviser in these underwritings, the Applicants believe that the prohibitions of section 10(f) would, unless modified, prejudice the Fund by precluding access to a significant portion of the Municipal Bond market. The Applicants state that, although there may be a large secondary market in Municipal Bonds, this secondary market lacks the depth and liquidity of the corporate bond or short-term securities market and is more susceptible to sharp price fluctuations.

In order for the Fund to participate in public offerings of Municipal Bonds in which the Adviser is a "principal underwriter", the Applicants seek an order of the Commission exempting its proposed future purchases of Municipal Bonds from section 10(f) on the basis of the terms set forth below, which are discussed in the application. These terms are based upon rule 10f-3 revised for the purposes of the requested exemptive order to reflect the special nature of the Municipal Bond market.

Terms of the Proposed Order

The exemptive order sought by the Applicants would be subject to the following conditions:

(a) The securities to be purchased shall be:

(1) Part of an issue of Municipal Bonds, the interest on which is exempt from Federal income tax, which is being offered to the public;

(2) Purchased at not more than the public offering price prior to the end of the first full business day after the first date on which the issue is offered to the public;

(3) Offered pursuant to an underwriting agreement under which the underwriters are committed to purchase all of the Municipal Bonds being offered, if the underwriters purchase any thereof;

(4) Acquired pursuant to an order (which may be conditional) placed by or for the account of the Fund with an underwriter not earlier than two days after the first public announcement of the offering and prior to the first date on which the issue is offered to the public;

(5) Purchased in an unsolicited transaction originating with the Fund or its investment adviser; and

(6) Purchased in transactions for which records are maintained setting forth the reasons for the purchase and for the sale, if any, of any portfolio securities related to the transaction, which records shall be available for inspection by the Commission.

(b) The gross commission, spread or profit to the principal underwriters shall not exceed 2.5 percent of the principal amount of the issue.

(c) On the date of purchase the issue shall have received an investment grade rating, including conditional or provisional ratings, from Standard & Poor's Corp. or Moody's Investors Service, Inc.; provided, however, if the issuer of the securities to be purchased, or the entity supplying the revenues from which the issue is to be paid, shall have been in continuous operation for less than 3 years, including the operations of any predecessor, then on the date of purchase the issue shall have received a rating of "A" or better from Standard & Poor's Corp. or Moody's Investors Service, Inc.

(d) The principal amount of Municipal Bonds to be purchased by the Fund or by the Fund and any other investment companies having the same investment adviser, shall not exceed 3 percent of the principal amount of the issue being underwritten or $500,000 in principal amount, whichever is greater, but in no event greater than 10 percent of the principal amount of the issue.

(e) The consideration to be paid by the Fund in purchasing the Municipal Bonds being offered shall not exceed 3 percent of the total assets of the Fund; provided, that if such consideration shall exceed $1,000,000, it shall not exceed 1 percent of the Fund's total assets.

(f) The exemptive order shall not be construed to permit transactions which would otherwise be prohibited by section 17 of the Act, and the Fund agrees that the exemptive order will not be applicable to a transaction otherwise prohibited by section 10(f) of the Act unless the Fund does not purchase Municipal Bonds being offered directly or indirectly (including purchases from syndicate managers designated as group sales or otherwise allocated to the account of any person designated in clause (i), (ii) or (iii)), from (i) the Adviser or any affiliated person thereof; (ii) an officer, director, member of an advisory board, investment adviser or employee of the Fund; or (iii) a person of which any such officer, director, member of an advisory board, investment adviser or employee is an affiliated person; the Fund having represented that it will keep its noninterested directors completely informed, and fully aware, of the available alternatives with respect to recapture of the costs of portfolio transactions and having undertaken to take such steps as may be necessary to seek to implement any such recapture, including the filing of applications for exemptions under the Act, if the noninterested directors should determine that recapture is in the best interests of the Fund or if otherwise required by developments in the law.

(g) The purchase of the securities being offered shall have been authorized or approved by a resolution of the board of directors of the Fund, or of a committee composed of at least three members of such board (at least a majority of which must be noninterested persons of the Fund), which resolution shall state that in the judgment of the board or committee, the purchase of securities proposed will meet all the requirements of paragraphs (a) through (f) above and which authorization or approval shall have been supported by the vote (at a meeting or by written consent given without a meeting) of not less than a majority (consisting of at least three persons) of the members of the board of directors or of the committee who were not interested persons of the Fund.

(h) The Fund shall set forth all transactions conducted pursuant to the exemptive order in its quarterly reports filed with the Commission on form N-1Q. In addition, information

as to such transactions shall be contained in the notes to the Fund's pub-

the date of the hearing (if ordered) and any postponements thereof.

(iv) through (vi) No change.

(h) through (l) No change.

change Act of 1934, as amended (the "Act"), which authorizes and directs the Board to adopt rules which are:

pal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number

amendment No. 1 to form 19b-4A for copies of such letters of comment.

As a result of the extensive comment

as to such transactions shall be contained in the notes to the Fund's published financial statements.

(i) The officers and directors of the Fund and its investment adviser assume the burden of establishing that each transaction made pursuant to the exemptive order is consistent with the purpose of such order which is to assure that the selection of the Fund's portfolio securities is in the interest of the Fund's security holders rather than in the interest of its affiliated persons or in the interest of underwriters, brokers or dealers.

The Applicants state that, as set forth in Investment Company Act Release No. 2797 (December 2, 1958), the conditions to the exemption from section 10(f) contained in rule 10f-3 are designed to permit purchases without an exemptive order where the circumstances are such as to make it unlikely that the purchase will be inconsistent with the protection of investors. The Applicants contend that the exemption sought from the prohibitions of section 10(f) is consistent with the protection of investors. The Applicants further contend that the terms of the exemption sought in the application attempt to incorporate the substantive provisions of rule 10f-3 into a framework taking into account the realities of Municipal Bond underwritings so as to permit effective use of the exemption and at the same time make it unlikely that a purchase thereunder will be inconsistent with the protection of investors.

Notice is further given that any interested person may, not later than October 2, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-15137; File No. SR-MSRB-78-10]

MUNICIPAL SECURITIES RULEMAKING BOARD

Self-Regulatory Organizations, Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 25, 1978 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

On June 15, 1978, the Municipal Securities Rulemaking Board (the "Board") filed with the Securities and Exchange Commission (the "Commission") proposed amendments to sections (e) and (g) of Board rule G-12 on uniform practice (the "proposed amendments"). The Board has filed the following proposed changes to such amendments (the "proposed rule changes").

Rule G-12. Uniform Practice[1]
(a) through (d) No change.
(e) Delivery of Securities
(i) through (viii) No change.
(ix) Delivery of certificates called for redemption. A certificate for which a notice of call has been published *on or* prior to the delivery date shall not constitute good delivery unless securities are identified as "called" at the time of trade or the notice of call is applicable to the entire issue of securities. For purposes of this subparagraph and item (D)(2) of subparagraph G-12(g)(iii), an "entire issue of securities" shall mean securities of the same issuer having the same date of issue, maturity date and coupon rate.
(x) through (xv) No change.
(f) No change.
(g) Rejections and Reclamations.
(i) and (ii) No change.
(iii) (A) through (C) No change.
(D)(1) No change.
(2) not good delivery because notice of call for less than the entire issue of securities was published *on or* prior to the delivery date and the securities were not identified as "called" at the time of trade.

[1]Marked to show changes from proposed rule changes currently filed with the Commission. Italics indicate new language.

(iv) through (vi) No change.
(h) through (l) No change.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes is as follows:

PURPOSE OF PROPOSED RULE CHANGES

Under section (e) of rule G-12, as presently in effect, delivery of a certificate for which a notice of call has been published prior to the trade date does not constitute good delivery if the securities are not identified as "called" at the time of trade. Section (g) of rule G-12, as presently in effect, provides that reclamation may be made, without time limitation, if it is discovered after delivery that a notice of call was published prior to trade date and this was not specified at the time of trade.

The proposed amendments filed with the Commission on June 15, 1978 would modify section (e) of rule G-12 to provide that delivery of a certificate for which a notice of call has been published for less then the entire issue prior to delivery date, as opposed to trade date, does not constitute good delivery unless the securities are identified as "called" at the time of trade. Similarly, the proposed amendments would amend section (g) of rule G-12 to provide for reclamation of called securities in such circumstances.

The proposed rule changes would modify the proposed amendments by providing that, with respect to section (e), delivery of securities would not be good delivery if a notice of call has been published for less than the entire issue on the delivery date, as well as prior to the delivery date. A comparable change would be made in section (g) of rule G-12.

As indicated in the June 15, 1978 filing, the Board believes that modification of sections (e) and (g) of rule G-12 is necessary to reflect more accurately the bargain of the parties to a transaction involving "called" securities. For example, it seems appropriate to assume that the parties to a transaction intend securities that have not been called to be delivered if the securities are not identified as "called" at the time of trade, and the call is not for the entire issue. This assumption would seem valid whether the call is published on or prior to the delivery date. The proposed rule changes therefore modify the proposed amendments to address the situation involving a call published on the delivery date.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGES

The Board has adopted the proposed rule changes pursuant to section 15B(b)(2)(C) of the Securities Exchange Act of 1934, as amended (the "Act"), which authorizes and directs the Board to adopt rules which are:

designed * * * to foster cooperation and coordination with persons engaged in * * * clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest * * *.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGES

As indicated above, the Board filed proposed amendments to sections (e) and (g) of rule G-12 on June 15, 1978. Such amendments were published by the Commission in the FEDERAL REGISTER on June 29, 1978. In response to a Board notice describing the proposed amendments, the Depository Trust Co. submitted a comment letter to the Board, a copy of which is on file at the offices of the Securities and Exchange Commission and the Board.

Depository Trust Co. expressed support for the proposed amendments, but suggested that the Board consider further amending rule G-12 to provide that the delivery of securities which are called pursuant to a notice published on the delivery date will not be considered "good delivery." As reflected in the proposed rule changes, the Board has determined to adopt the suggestion of the Depository Trust Co.

BURDEN ON COMPETITION

The Board does not believe that the proposed rule changes will impose any burden on competition.

On or before October 19, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 7, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-15138; File No. SR-MSRB-77-12]

MUNICIPAL SECURITIES RULEMAKING BOARD

Self-Regulatory Organizations, Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 23, 1978 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

On September 20, 1977, the Municipal Securities Rulemaking Board (the "Board") filed with the Securities and Exchange Commission (the "Commission") a series of proposed rules and rule amendments, the general purpose of which was to codify basic standards of fair and ethical business conduct for municipal securities professionals (the "fair practice rules"). The Board filed amendments on February 28, 1978 and June 30, 1978 to certain of the fair practice rules.

The Board has filed amendments to proposed rule G-23 on the activities of financial advisors, one of the fair practice rules. The admendments (hereafter sometimes referred to as the "proposed amendments") effect substantial changes to proposed rule G-23, as originally filed with the Commission. The text of the proposed amendments appears below.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes are as follows:

PURPOSE OF PROPOSED RULE CHANGES

As indicated above, the Board filed its fair practice rules on September 20, 1977. In response to the publication of the fair practice rules in the FEDERAL REGISTER on September 28, 1977, the Commission and the Board received 28 comment letters. See exhibit 2 to amendment No. 1 to form 19b-4A for copies of such letters of comment.

As a result of the extensive comment directed specifically to proposed rule G-23, the Board held two open meetings, on March 3, 1978 in Washington, D.C. and on March 30, 1978 in Denver, Colo., to explore in full the issues raised with regard to proposed rule G-23 by the commentators. Copies of the transcripts of the open meetings have been previously furnished to the Commission staff. On June 8, 1978, after extensive deliberation on the subject, the Board issued for public comment certain draft amendments to proposed rule G-23. The proposed amendments reflect the Board's consideration of the comments on the draft amendments.

In the September 20, 1977 filing, the Board indicated its belief that there is a prima facie conflict of interest when a municipal securities professional acts both as a financial advisor to an issuer of municipal securities and as a purchaser of the issuer's securities. The Board therefore provided in proposed rule G-23 that, in competitive bid situations, a municipal securities professional must obtain the express written consent of the issuer to the purchase of securities by the municipal securities professional in a competitive sale. However, in the negotiated bid situation, the Board prohibited a municipal securities professional from acting in such dual capacity under any circumstances, except with respect to certain short-term issues. The focus of discussion in the comment letters and at the open meetings was on the prohibition in the negotiated sale context.

The Board continues to believe that there is a prima facie conflict of interest when a municipal securities professional acts both as financial advisor to an issuer of municipal securities and as a purchaser of the issuer's securities in a negotiated sale. However, after extensive deliberation, the Board believes that the purpose and intent of rule G-23 can be achieved, without restricting the flexibility of issuers, through an approach which would permit a municipal securities professional to purchase in a negotiated sale the securities of an issuer for whom it has acted as financial advisor, provided that certain conditions are met. These conditions are discussed below.

Specifically, the proposed amendments effect the following changes to proposed rule G-23:

1. *Purpose of the rule.* The proposed amendments add a new section (a) which sets forth a brief statement of the purpose and intent of the Board in adopting proposed rule G-23. The Board believes such a provision is helpful in explaining the Board's goals with respect to the regulation of the

activities of financial advisors under proposed rule G-23.

John Hahn, Director of Finance of Trumbull, Conn.

Proposed rule G-23 would not preclude the municipal securities professional in the circumstances described

V 43 / 179 / SEP 14 1978

activities of financial advisors under proposed rule G-23.

2. *Definition of financial advisory relationship.* Section (b) of the proposed amendments (section (a) of the proposed rule as filed with the Commission) defines a financial advisory relationship for purposes of the proposed rule. The proposed amendments would clarify the definition of the term by providing examples of the types of services performed by financial advisors. The proposed amendments would also make clear that a municipal securities professional will not be deemed to have a financial advisory relationship with an issuer solely by reason of rendering financial advice to the issuer in the course of acting as an underwriter. Under the proposed amendments, a financial advisory relationship will be deemed to exist in circumstances in which a municipal securities professional renders financial advisory services to an issuer on a continuing basis.

3. *Nonpublic information.* Section (c) of the proposed rule as filed with the Commission prohibits a municipal securities professional from using, for its own benefit or the benefit of another person, nonpublic information obtained in the course of a financial advisory relationship. The proposed amendments would delete this section in its entirety on the basis that it is duplicative of general antifraud rules applicable to transactions in municipal securities.

4. *Underwriting activities.* As noted above, the Board continues to believe that there is a prima facie conflict of interest when a municipal securities professional acts as both financial advisor to an issuer and purchaser of the issuer's securities in a negotiated sale. However, in order to preserve the flexibility of issuers in obtaining financing, the proposed amendments would permit a financial advisor to change capacity subject to certain conditions.

Under the proposed amendments, a financial advisor could purchase a new issue of municipal securities at negotiated sale if the financial advisor terminates in writing the financial advisory relationship with respect to such issue and obtains the express written consent of the issuer, at or after such termination, to the change in capacity.

Further, under the proposed amendments, the municipal securities professional would be required to disclose in writing to the issuer at or before the termination of the financial advisory relationship (1) that there may be a conflict of interest in changing from the capacity of financial advisor to purchaser in a negotiated sale, and (2) the source and anticipated amount of all remuneration to the municipal securities professional with respect to the issue. The municipal securities professional would be required to obtain the express written acknowledgement of the issuer with respect to the receipt of such disclosures and to maintain such consents, disclosures and acknowledgements in a separate file.

The Board believes that the provisions of the proposed amendments requiring disclosure to an issuer and acknowledgement by the issuer will promote informed determinations by issuers concerning the advisability of permitting a financial advisor to purchase the securities of the issuer in a negotiated sale. In view of the changes in section (d) to permit financial advisors to change capacity with respect to negotiated sales of municipal securities, the Board proposes to remove the exemption for short term issues previously provided in section (d).

The provisions of section (d) relating to the purchase of securities at competitive bid would, under the proposed amendments, remain essentially the same as in the proposed rule as filed with the Commission. However, the Board proposes to modify section (d) to require the financial advisor in a competitive bid situation to make available to other prospective bidders, upon request, information which the financial advisor utilizes or expects to utilize in purchasing or selling the securities constituting the issue.

5. *Disclosure to customers.* Section (e) of the proposed rule as filed with the Commission requires a financial advisor who purchases a new issue of municipal securities at competitive bid to disclose in writing to each customer purchasing the securities the existence of the financial advisory relationship. In view of the proposed changes to section (d), the Board proposes to amend section (e) to require the same disclosure in the case of a financial advisor who purchases a new issue of municipal securities at negotiated sale.

6. *Other provisions of the proposed rule.* The requirement in proposed rule G-23 for financial advisory arrangements to be evidenced in a writing which sets forth, among other matters, the basis for compensation to the financial advisory would not be changed by the proposed amendments. The Board proposes to amend section (b), however, to permit parties to enter into a written agreement promptly after, as well as at or prior to, the inception of a financial advisory relationship. In addition, under the proposed amendments, the consent of the issuer with respect to the purchase by a financial advisor of the issuer's securities at competitive bid is not required to be contained in the original agreement relating to the financial advisory relationship, although such consent must be obtained prior to the bid.

Section (g) of the proposed rule as filed with the Commission is modified by the proposed amendments to clarify that the proposed rule is not intended to apply to financial advisory arrangements reduced to writing prior to September 20, 1977, the date proposed rule G-23 was filed with the Commission. However, any written agreement entered into prior to that date which contemplates only a financial advisory relationship would be subject to the requirements of section (d) of the proposed rule with respect to the purchase of the issuer's securities by the financial advisor.

Basis Under the Act for Proposed Rule Changes

The Board has adopted the proposed rule changes pursuant to section 15B(b)(2) of the Securities Exchange Act of 1934, as amended (the "Act"), which authorizes the Board to adopt rules governing transactions in municipal securities effected by brokers, dealers, and municipal securities dealers, and in accordance with the standards set forth in section 15B(b)(2)(C) of the Act, which provides in part that the Board's rules shall

> be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, • • • to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest; and [shall] not be designed to permit unfair discrimination between customers, issuers, municipal securities brokers, or municipal securities dealers • • •.

Comments Received From Members, Participants or Others on Proposed Rule Changes

Proposed rule G-23 was filed with the Commission on September 20, 1977, as one of several fair practice rules. As indicated above, in view of the extensive comment directed specifically to the proposed rule, the Board held two open meetings to discuss the rule and subsequently circulated draft amendments to the proposed rule for public comment. Set forth below is a discussion of the letters of comment received by the Board on the draft amendments.

The following persons submitted letters of comment on the draft amendments:

Roy Romer, Treasurer, State of Colorado
Columbian Securities, Inc. ("Columbian Securities")
The Connecticut Bank and Trust Co. ("Connecticut Bank and Trust")
Hartford National Bank and Trust Co. ("Hartford National Bank")
Hugo Marx & Co. ("Hugo Marx") (2 letters)
Municipal Finance Officers Association (the "MFOA")
Public Securities Association (the "PSA")
Sullivan & Cromwell

John Hahn, Director of Finance of Trumbull, Conn.

Copies of the above letters of comment are on file at the office of the Securities and Exchange Commission and the Board.

The MFOA and the PSA endorsed without reservation the changes reflected in the proposed amendments. In contrast, Connecticut Bank and Trust urged that proposed rule G-23 be rescinded in its entirety.

Roy Romer, Treasurer of the State of Colorado, expressed support for the proposed amendments. However, he suggested that the Board should consider modifying the rule to cover a municipal securities professional who renders financial advisory services without "present expectation of compensation • • • yet then acts as underwriter via negotiation." The Board determined not to adopt this suggestion because it would be difficult to distinguish that situation from the situation involving a municipal securities professional which renders financial advice in the course of acting as an underwriter. As made clear in the proposed amendments to section (b), a financial advisory relationship will not be deemed to exist for purposes of the rule in the latter circumstances.

Sullivan & Cromwell made several specific recommendations concerning the draft amendments. With respect to the provision on negotiated sales, Sullivan & Cromwell suggested that, in lieu of the requirement for a municipal securities professional to disclose in writing that there may be a conflict of interest in changing capacities, a municipal securities professional should be required to disclose that "upon termination, such broker, dealer or municipal securities dealer would no longer be acting on behalf of the issuer as agent subject to the obligations of a financial advisor to the issuer, but rather as a principal, acting and negotiating on its own behalf with respect to the sale." The Board decided to adopt the language contained in the draft amendments, as opposed to the suggested language of Sullivan & Cromwell, because it believes that such language will more effectively apprise an issuer of the possible conflict of interest involved in a municipal securities professional changing from financial advisor to underwriter in the negotiated sale of the securities of the issuer, and therefore enable the issuer to make a more informed determination concerning the advisability of permitting the financial advisor to do so.

Sullivan & Cromwell also suggested that the requirement to disclose to issuers the source and anticipated amount of all remuneration could present compliance problems. In lieu of such a requirement, Sullivan & Cromwell recommended that a municipal securities professional be required to state at the time of termination of its financial advisory role that the compensation it would receive as an underwriter could be substantially greater than that which it would receive solely for its financial advisory services. The Board believes that the requirement to disclose "anticipated amount of all remuneration" would provide more meaningful information to an issuer than the substitute disclosure suggested by Sullivan & Cromwell. Further, since the proposed amendments require disclosure of only the "anticipated" amount of remuneration, the Board believes that municipal securities professionals should not have difficulty in complying with the rule. In those cases in which a municipal securities professional terminates its financial advisory role at an early point in the process of the development of an issue, the municipal securities professional could satisfy the disclosure requirement with respect to anticipated compensation by making appropriate disclosure to the issuer based on the information then known to the professional.

Sullivan & Cromwell and Columbian Securities objected to the requirement in subparagraph (d)(ii)(B) of the draft amendments which would require a municipal securities professional to disclose all material information obtained as a result of a financial advisory relationship and utilized or expected to be utilized in the course of purchasing or selling securities unless such information is made available on a timely basis upon request to other municipal securities professionals interested in bidding on the issue. The Board believes that such disclosure is appropriate and necessary to assure that a municipal securities professional which has acted as a financial advisor does not obtain an unfair competitive advantage over other municipal securities professionals in acquiring the securities of an issuer by reason of information obtained in the course of acting as a financial advisor.

Sullivan & Cromwell also made several suggestions of a clarifying or technical nature. As reflected in the proposed amendments, the Board adopted several of them.

Mr. Hahn, the director of finance of Trumbull, Conn., expressed concern regarding the application of the rule to bond anticipation notes ("bans"). He specifically questioned whether under the draft amendments a municipal securities professional which resigns and purchases an issue of bans in a negotiated sale could subsequently act as financial advisor in connection with the renewal of the notes or the bond issue with respect to which the notes were issued.

Proposed rule G-23 would not preclude the municipal securities professional in the circumstances described above from acting as a financial advisor in connection with the renewal of the notes of the bond issue. The proposed rule is intended to apply on an issue-by-issue basis. The Board considers bans a separate issue from the bonds with respect to which they are issued.

Mr. Hahn also suggested that the Board consider exempting certain note issues:

> • • • any issue of municipal securities having a term of 1 year or less if the aggregate face amount of the issue does not exceed $1 million, or if the term of the issue does not exceed 90 days or if the dealer or municipal securities dealer represents to the issuer in writing that it is purchasing the issue for its own account and not for purposes of resale.

Similarly, Hartford National Bank recommends that small interim financings and negotiated sales of securities by an issuer in emergency situations be exempted.

The Board believes that the disclosure and consent requirements of proposed rule G-23 should apply to all issues. Also, since the proposed amendments would permit financial advisors to change capacity, the Board believes that it is not necessary to provide an exemption for certain issues, as it did in the proposed rule as previously filed with the Commission.

Burden on Competition

The Board is of the opinion that the proposed amendments will not impose any burden on competition among brokers, dealers, or municipal securities dealers not necessary or appropriate in furtherance of the purposes of the Act.

On or before October 19, 1978 or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule changes, or

(B) institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L

Street NW., Washington, D.C. Copies of such filing will also be available for

nicipal securities dealer or by a person controlling, controlled by, or under

before such termination the source and anticipated amount of all remunera-

curities or participates in a syndicate or other account that acquires new

XII

level 3 service through NASDAQ market makers. Under the proposal,

Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 7, 1978.

RULE G-23 ACTIVITIES OF FINANCIAL ADVISORS [1]

(a) Purpose. The purpose and intent of this rule is to establish ethical standards and disclosure requirements for brokers, dealer, and municipal securities dealers who act as financial advisors to issuers of municipal securities.

(b) [(a)] Financial advisory relationship. For purposes of this rule, a financial advisory relationship shall be deemed to exist when a broker, dealer, or municipal securities dealer renders or enters into an agreement to render financial advisory or consultant services to or on behalf of an issuer *with respect to a new issue or issues of municipal securities, including advice with respect to the structure, timing, terms and other similar matters* concerning *such issue or issues* [a new issue of municipal securities], for a fee or other compensation or in expectation of such compensation for the rendering of such services. *Notwithstanding the foregoing, a financial advisory relationship shall not be deemed to exist when, in the course of acting as an underwriter, a municipal securities dealer renders advice to an issuer, including advice with respect to the structure, timing, terms and other similar matters concerning a new issue of municipal securities.*

(c) [(b)] Basis of compensation. Each [agreement entered into by a broker, dealer, or municipal securities dealer concerning a] financial advisory relationship shall be evidenced *by* [in] a writing entered into [at or] prior to, *upon or promptly after* the inception of the financial advisory relationship (or promptly after the creation or selection of the issuer if the issuer does not exist or has not been determined at the time the relationship commences). Such writing shall set forth the basis of compensation for the financial advisory services to be rendered, including provisions relating to the deposit of funds with or the utilization of fiduciary or agency services offered by such broker, dealer, or municipal securities dealer or by a person controlling, controlled by, or under common control with such broker, dealer, or municipal securities dealer in connection with the rendering of such financial advisory services. The requirement for a writing shall become effective on ———— [90 days after the date of approval by the Commission].

[(c) Nonpublic information. No broker, dealer, or municipal securities dealer shall make use of material, nonpublic information obtained in the course of a financial advisory relationship with an issuer, in connection with the purchase, sale, or exchange of securities of such issuer, whether for the benefit of such broker, dealer, or municipal securities dealer, or any other person.]

(d) Underwriting Activities. No broker, dealer, or municipal securities dealer that has a financial advisory relationship with respect to a new issue of municipal securities shall [:] *acquire as principal either alone or as a participant in a syndicate or other similar account formed for the purpose of purchasing, directly or indirectly, from the issuer all or any portion of such issue, or arrange for such acquisition or participation by a person controlling, controlled by, or under common control with such broker, dealer, or municipal securities dealer, unless*

(i) if such issue is to be sold by the issuer on a negotiated basis [acquire as principal or participate in a syndicate or other similar account formed for the purpose of purchasing, directly or indirectly, from the issuer all or any portion of the issue, or arrange for such acquisition or participation by a person controlling, controlled by, or under common control with such broker, dealer, or municipal securities dealer; or]

(A) the financial advisory relationshp with respect to such issue has been terminated in writing and at or after such termination the issuer has expressly consented in writing to such acquisition or participation in the purchase of the securities on a negotiated basis;

(B) the broker, dealer, or municipal securities dealer has expressly disclosed in writing to the issuer at or before such termination that there may be a conflict of interest in changing from the capacity of financial advisor to purchaser of the securities with respect to which the financial advisory relationship exists and the issuer has expressly acknowledged in writing to the broker, dealer or municipal securities dealer receipt of such disclosure; and

(C) the broker, dealer or municipal securities dealer has expressly disclosed in writing to the issuer at or before such termination the source and anticipated amount of all remuneration to the broker, dealer or municipal securites dealer with respect to such issue in addition to the compensation referred to in, section (c) of this rule, and the issuer has expressly acknowledged in writing to the broker, dealer or municipal securities dealer receipt of such disclosure; or

(ii) if such issue is to be sold by the issuer at competitive bid, [acquire as principal or participate in a syndicate or other similar account formed for the purpose of purchasing, directly or indirectly, from the issuer all or any portion of the issue unless:]

(A) the issuer has expressly consented in writing prior to the bid [the writing referred to in section (b) above includes the express written consent of the issuer] to such acquisition or participation, and

(B) all material information concerning the issue or the issuer thereof *obtained* [known to such broker, dealer, or municipal securities dealer] as a result of the financial advisory relationship *and utilized or expected to be utilized by such broker, dealer, or municipal securities dealer in the course of purchasing or selling the securities constituting such issue* has been *made available* [disseminated] on a timely basis *upon request* to other brokers, dealers, and municipal securities dealers [reasonably expected to be] interested in bidding for the issue.

The limitations *and requirements* set forth in [paragraph (ii) of] this section (d) shall also apply to any broker, dealer, or municipal securities dealer controlling, controlled by, or under common control with the broker, dealer, or municipal securities dealer having a financial advisory relationship. [This section (d) shall not apply to any issue of municipal securites having a final stated maturity of fewer than 366 days, other than bond anticipation notes.] The use of the term "indirectly" in this section (d) shall not preclude a broker, dealer, or municipal securities dealer who has a financial advisory relationship with respect to a new issue of municipal securities from purchasing such securities from *an underwriter* [a syndicate], either for its own trading account or for the account of customers, except to the extent that such purchase is made to contravene the purpose and intent of this rule. *Each broker, dealer, and municipal securities dealer subject to the provisions of this section (d) shall maintain a copy of the written disclosures, acknowledgements and consents required by this section in a separate file and in accordance with the provisions of rule G-9).*

(e) Disclosure to customers. If a broker, dealer, or municipal securities dealer acquires new issue municipal securities or participates in a syndicate or other account that acquires new issue municipal securites in accordance with *section (d)* [paragraph (d) (ii)] of this rule, such broker, dealer, or municipal securities dealer shall disclose [in writing, at or before the completion of the transaction,] the existence of the financial advisory relationship *in writing* to each customer who purchases such securities from such broker, dealer, or municipal securities dealer, *at or before the completion of the transaction with the customer.*

(f) Applicability of State or Local Law. Nothing contained in this rule shall be deemed to supersede any more restrictive provision of state or local law applicable to the activities of financial advisors.

(g) Non-Applicability of Rule to Prior Written Agreements. *This rule shall not apply to any written agreement entered into prior to September 20, 1977* [*the date of filing of this rule with the Commission*] *which expressly permits a broker, dealer or municipal securities dealer to act in a manner or capacity prohibited by this rule, but this rule shall apply to any extension or renewal of any such agreement.* [This rule shall not apply to any written agreement entered into prior to ————, [the date of filing of this rule with the Commission], but shall apply to any extension or renewal of any such agreement.]

[Release No. 34-15131; File No. SR-NASD-78-8]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 23, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

TEXT OF PROPOSED RULE CHANGE

The following is the full text of proposed new part XII of schedule D of article XVI of the Association's bylaws. (New language is indicated by italics.)

XII

PROCEDURES FOR ACCESS TO THE NASDAQ SYSTEM BY NON-NASDAQ MARKET MAKERS

These procedures permit a registered NASDAQ market maker, upon approval by the Corporation, to enter quotations into the NASDAQ System on behalf of another market maker who does not subscribe to Level 3 NASDAQ service.

A. Definitions:

1. An "access market maker" is a member of the Association who does not subscribe to Level 3 NASDAQ service, but is or intends to be a market maker in a security for which quotations are displayed on the NASDAQ System.

2. An "entering subscriber" is a registered NASDAQ market maker who has entered into an arrangement with an access market maker to enter quotations in the NASDAQ System on behalf of such access market maker.

B. The entering subscriber may enter quotations in the NASDAQ System on behalf of an access market maker only upon submission and approval by the Association of the following:

1. A fully executed copy of the access arrangement agreement which shall contain all agreements and conditions concerning the access arrangement.

2. An application for registration as an access market maker for each security.

C. Access market makers and entering subscribers shall be limited to one access arrangement in each security.

D. Quotations displayed by the entering subscriber on behalf of the access market maker shall be accompanied by the entering subscriber's market maker identifier and a special symbol designating that an access arrangement exists. The identity of the access market maker must be made available by the entering subscriber upon request.

E. All transactions resulting from the display of quotations in the NASDAQ System by the entering subscriber shall be executed by the entering subscriber and he shall be responsible for the transaction. Both the entering subscriber and the access market maker shall be subject to and be responsible for compliance with the provisions of Schedule D.

F. Access market makers shall pay to the Corporation an access fee of $100 per month for the first security and $75 per month for each additional security which is subject to an approved access arrangement.

NASD's STATEMENT OF PURPOSE OF PROPOSED RULE CHANGE

Proposed new part XII of schedule D permits non-NASDAQ market makers to gain access to NASDAQ level 3 service through NASDAQ market makers. Under the proposal, an "access market maker" may display his quotations in the NASDAQ System through an "entering subscriber," a registered NASDAQ market maker who agrees to enter quotations on behalf of the access market maker. Both the access market maker and the entering subscriber will be subject to compliance with schedule d. All transactions will be executed by the entering subscriber, who will assume full responsibility for the transactions. A special symbol disclosing that an access arrangement exists will accompany the entering subscriber's quotation, and the identity of the access market maker must be made available upon request.

Each access arrangement will be required to be registered with and approved by the Association. Furthermore, access market makers and entering subscribers will be limited to one access arrangement in each security. Access market makers will be charged an access fee by the Association for each security under an approved access arrangement.

NASD's STATEMENT OF BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

Section 15A(b)(11) provides that the rules of a national securities association shall include provisions governing the form and content of quotations relating to securities sold otherwise than on a national securities exchange which may be distributed or published by any member or person associated with a member, and the persons to whom such quotations may be supplied. Such rules relating to quotations shall be designed to produce fair and informative quotations, to prevent fictitious or misleading quotations, and to promote orderly procedures for collecting, distributing, and publishing quotations.

Proposed new part XII of schedule D has been approved by the Board of Governors under the authority granted to it by article XVI, section 3 of the Association's bylaws as a means of carrying out the purposes of the Act.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

Seven (7) comment letters were received from the membership regarding proposed new part XII of schedule D. The members who responded uniformly objected to what they considered the prohibitive cost of access service.

NASD's STATEMENT REGARDING BURDEN ON COMPETITION

Several of the comments received criticized the proposal as imposing an undue burden on competition. The Association's response to this criticism is

that, far from constituting a burden on competition, the proposal will actu-

U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice

the provisions of this title the rules

rities and Exchange Commission a proposed rule change as follows:

the organization. To allow a member to associate with another member or-

(B) Institute proceedings to determine whether the proposed rule

that, far from constituting a burden on competition, the proposal will actually enhance competition. Currently, non-NASDAQ market makers are not permitted access to the NASDAQ System for market making activities. The proposed access service will permit non-NASDAQ market makers to display their quotations in the NASDAQ system through NASDAQ market makers and therefore increase competition among market makers. Furthermore, the Association believes that, based upon the cost of NASDAQ terminals and the expenses involved in operating a trading department, the $100 fee for access service is reasonable.

On or before October 19, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 21, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED AMENDMENTS

The proposed amendments allow a member organization whose sole qualifying member has ceased to be associated therewith to continue its status as a member organization for a specified period of time.

STATEMENT OF PURPOSE OF PROPOSED AMENDMENTS

The Exchange constitution and rules allow a member organization whose sole qualifying member has died, to remain a member organization for 60 days or such longer period as the Exchange may determine if the member is engaged in active military or political service.

The proposed amendments extend the permitted time period for retention of member organization status from 60 to 90 days, and expand the provisions to be applicable in any situation where the sole qualifying member ceases to be associated with the member orgainization. The member organization must continue to comply with Exchange rules, and would continue to be regulated by the Exchange as a member organization. The Exchange would have the authority to extend the 90-day time period, up to an additional 90 days, where necessary for the completion of legal requirements (e.g., appointment of executor, receipt of will or tax waivers, etc.) necessary for the transfer of the membership, or where an arbitration proceeding has already been commenced to resolve a dispute arising from an a-b-c agreement (a financing arrangement for purchase of a membership) relating to such membership.

STATEMENT OF BASIS UNDER ACT

The basis under the Act for the proposed amendments is sections 3(a)(3)(A)(iv) and 6(b)(5).

The proposed amendments are consistent with section 6(b)(5) in that they provide for the protection of investors and the public interest by allowing a member organization which has lost its sole qualifying member to continue as a member organization with minimal interruption.

The proposed amendments are also consistent with section 3(a)(3)(A) which defines a member of a national securities exchange as " * * * any registered broker or dealer which agrees to be regulated by such exchange and with respect to which the exchange undertakes to enforce compliance with the provisions of this title the rules and regulations thereunder, and its own rules * * *".

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, AND OTHERS

No comments were solicited or received.

STATEMENT OF BURDEN ON COMPETITION

The proposed amendments will impose no burden on competition.

On or before October 19, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submission should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 1, 1978.

[8010-01]

[Release No. 34-15130; File No. SR-NYSE-78-49]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 21, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED AMENDMENTS

The proposed amendments allow an a-b-c member to continue to transact business on the floor during any time period allowed for the exercise of option (a), (b) or (c) of an a-b-c agreement. (Upon termination of an a-b-c agreement, a member must: retain the membership and pay the member organization the amount necessary to purchase another membership (option a); sell the membership and pay the proceeds to the member organization (option b); or transfer the membership to a person designated by the member organization for a nominal consideration (option c)).

EXCHANGE'S STATEMENT OF PURPOSE OF PROPOSED RULE CHANGE

The proposed amendments permit a member, whose membership is financed by his member organization pursuant to an a-b-c agreement and who ceases to be associated with the financing member organization, to transact business as an individual member on the floor during any period allowed for the exercise of option (a), (b) or (c).

In certain situations where the resolution of a-b-c agreement provisions have become protracted, members have been permitted to transact business on the floor provided another member or member organization guaranteed the members trades. The proposed amendments extend the provisions to all a-b-c members, codify the practice in exchange rules and set forth the specific criteria for so acting.

To so act, the member must be a broker/dealer registered with the Securities and Exchange Commission and must comply with the exchange's financial responsibility rule (rule 325(e)). The financial responsibility rule would afford the member organization participant to the a-b-c agreement, which retains a financial interest in the membership until option (a), (b) or (c) is exercised, protection to the extent that claims resulting from the member's transaction of business on the floor would first be satisfied by the $25,000 guarantee requirement. In addition, the member would be restricted to functioning as an individual member (so-called "two-dollar broker"). This restriction results from the operation of the "use and proceeds" agreement in which each member associated with a member organization pledges the use of his membership to the organization and agrees that the proceeds from the transfer of the membership shall be available for the protection of creditors of the organization and generally as an asset of the organization. To allow a member to associate with another member organization prior to the exercise of a-b-c agreement options would be to permit such a member to pledge the use of his membership and the proceeds of transfer thereof with two member organizations, and would diminish the protection which the agreement seeks to provide the creditors and customers of each member organization.

EXCHANGE'S STATEMENT OF BASES UNDER THE ACT

The basis under the Act for the proposed amendments is sections 6(b)(5), 6(b)(7), and 6(c)(3)(A).

Compliance with the financial responsibility rule and the limitation to functioning as an individual member are standards which are consistent with section 6(b)(5) in that they are designed to protect the interests of customers and the public by assuring that members and member organizations with whom they deal have adequate financial responsibility and operational capability pursuant to section 6(c)(3)(A).

Exchange rules deem a membership to be a personal franchise vested solely in the member regardless of the manner in which the membership is financed. A member who is no longer associated with the member organization participant to an a-b-c agreement, remains a member if he elects to retain the membership (option a) or until he sells (option b) or transfers (option c) the membership. To deny a member access to the floor during this transition period solely because he is no longer associated with a particular member organization, would be inconsistent with the Act because: Section 6(b)(7) of the Act which requires that the rules of an exchange provide fair procedures for any limitation of any natural person with respect to access.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED AMENDMENTS

No comments were solicited or received.

EXCHANGE'S STATEMENT OF BURDEN ON COMPETITION

No burden on competition will be imposed by the proposed amendments.

On or before October 19, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

Dated: September 6, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 34-15136; File No. SR-Amex-78-19]

AMERICAN STOCK EXCHANGE, INC.

Self-Regulatory Organization; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 28, 1978 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a rule change as follows:

EXCHANGE'S STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Article III, section 8 of the Constitution of the American Stock Exchange Inc. (the "Amex") is amended by the addition of a new subparagraph (j) (*Italics* indicate new material):

Secrecy in Voting

(j) Whenever any action, including the election of a person to any position or office, is to be taken by the vote of the regular members of the Exchange, secrecy in voting shall be preserved.

After the proxies have been tabulated and the inspectors have certified all results, the proxies shall be sealed by the inspectors and retained by the exchange, sealed.

PURPOSE OF THE PROPOSED RULE CHANGE

[8010-01]

with the Secretary of the Commission, Securities and Exchange Commission,

[4710-07]

[CM-8/100]

the period from September 27, 1977, to May 19, 1978 (list No. 1-78). These actions were taken in accordance with

Approval No. 160.011/23/1, type WUG-N2W universal gas mask, Bureau of Mines approval No. 1445A,

PURPOSE OF THE PROPOSED RULE CHANGE

Amex states that the purpose of the proposed amendment is to establish a general constitutional requirement that membership votes, including elections, be by secret ballot.

BASIS UNDER THE ACT

Amex believes the amendment is consistent with section 6(b)(3) of the Act, in that it formalizes a procedure which contributes to fair representation of Amex members in the selection of the Board of Governors and the administration of its affairs.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, OR OTHERS ON PROPOSED RULE CHANGE

Amex states that no comments were solicited or received from members or any other persons concerning this amendment.

BURDEN ON COMPETITION

The Amex has determined that no burden on competition will be imposed by the proposed rule change.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 7, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-15133; File No. SR-MSE-78-20]

MIDWEST STOCK EXCHANGE, INC.

Self-Regulatory Organization; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975), notice is hereby given that on August 11, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

This filing presents an Option Floor Procedure Manual for the Midwest Stock Exchange, Inc. The manual includes descriptive procedures for complying with various existing rules of the Exchange. It also includes copies of forms used, and discusses interpretations to those rules.

Attached as exhibit A is the complete text of the "Options Floor Procedure Manual".

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the Options Floor Procedure Manual is to clarify existing rules of the Exchange by showing examples, procedures for compliance, forms to be used and interpretations of those Rules.

The basis for this rule proposal is section 6(b)(5) of the Act, which provides that the rules of the Exchange be designed to promote just and equitable principles of trade.

The Midwest Stock Exchange, Inc. has neither solicited nor received any comments.

The Midwest Stock Exchange, Inc. believes that no burdens have been placed on competition.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted by October 5, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 7, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

STUDY GROUP 5 OF THE U.S. ORGANIZATION FOR THE INTERNATIONAL RADIO CONSULTATIVE COMMITTEE (CCIR)

Meeting

The Department of State announces that Study Group 5 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on October 6, 1978, from 9:30 a.m. until 12:30 p.m., in the Aspen Room, National Telecommunications and Information Administration, Department of Commerce, 1325 G Street NW., Washington, D.C.

Study Group 5 deals with propagation of radio waves (including radio noise) at the surface of the Earth, through the nonionized regions of the Earth's atmosphere, and in space where the effect of ionization is negligible. The purpose of the meeting is preparation for the special preparatory meeting for the 1979 World Administrative Radio Conference and the International Study Group 5 meeting.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the chairman.

Requests for further information should be directed to Mr. Gordon Huffcutt, State Department, Washington, D.C. 20520, telephone 202-632-2592.

Dated: September 5, 1978.

GORDON L. HUFFCUTT,
Chairman,
U.S. CCIR National Committee.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 78-088]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Termination of Approval Notice

1. Certain laws and regulations (46 CFR Chapter I) require that various items of lifesaving, firefighting, and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats, and other recreational vessels, and on the artificial islands and fixed structures on the Outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been terminated as herein described during the period from September 27, 1977, to May 19, 1978 (list No. 1-78). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of Title 46, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR parts 160 to 164.

3. Notwithstanding the termination of approval listed in this document, the equipment affected may be used as long as it remains in good and serviceable condition.

KAPOK LIFE PRESERVER

Approval No. 160.002/67/0, model 3, adult kapok life preserver, USCG specification subpart 160.002. Elvin Salow Co., 273-285 Congress Street, Boston, Mass. 02210, no longer manufactures certain kapok life preservers and approval No. 160.002/67/0 was therefore terminated effective February 6, 1978.

Approval No. 160.002/68/0, model 5, child kapok life preserver, USCG specification subpart 160.002. Elvin Salow Co., 273-285 Congress Street, Boston, Mass. 01120, no longer manufactures certain kapok life preserver and approval No. 160.002/68/0 dated February 6, 1973, was therefore terminated effective February 6, 1978.

CORK RING LIFE BUOY

Approval No. 160.009/15/0, 30-inch cork ring life buoy, USCG specification subpart 160.009 and drawing No. 3401/3/68 dated March 14, 1968, and USCG letter dated April 23, 1968. Atlantic-Pacific Manufacturing Corp., 124 Atlantic Avenue, Brooklyn, N.Y. 11201, no longer manufactures certain cork ring life buoy and approval No. 160.009/15/0 dated February 2, 1973, was therefore terminated effective February 2, 1978.

GAS MASK

Approval No. 160.011/22/1, type WUG-N1W universal gas mask, Bureau of Mines approval No. 1443A consisting of BM-1443A canister, BM-1432 harness, and BM-1623 facepiece. Willson Products Division ESB Inc., Second and Washington Streets, Reading, Pa. 19063, no longer manufactures certain gas mask and approval No. 160.011/22/1 dated February 2, 1973, was therefore terminated effective February 2, 1978.

Approval No. 160.011/23/1, type WUG-N2W universal gas mask, Bureau of Mines approval No. 1445A, consisting of BM-1445A canister, BM-1432 or BM-1444 harness, and BM-1423 facepiece. Willson Products Division ESB Inc., Second and Washington Streets, Reading, Pa. 19603, no longer manufactures certain gas mask and approval No. 160.011/23/1 dated February 2, 1973, was therefore terminated effective February 2, 1978.

UNICELLULAR PLASTIC RING LIFE BUOY

Approval No. 160.050/51/0, 30-inch unicellular plastic ring life buoy, USCG specification subpart 160.050 and drawing No. 8431-1-68 dated January 30, 1968. Atlantic-Pacific Manufacturing Corp., 124 Atlantic Avenue, Brooklyn, N.Y. 11201, no longer manufactures certain unicellular plastic ring life buoy and approval No. 160.050/51/0 dated February 2, 1973, was therefore terminated effective February 2, 1978.

Approval No. 160.050/49/0, 30-inch unicellular plastic ring life buoy, USCG specification subpart 160.050, Cal-June Corp. letter dated October 22, 1967, and drawing No. R dated January 25, 1968. Cal-June Corp., P.O. Box 9551, North Hollywood, Calif. 91606, no longer manufactures certain unicellular plastic ring life buoy and approval No. 160.050/49/0 dated November 16, 1972, was therefore terminated effective November 16, 1977.

Approval No. 160.050/59/0, 30-inch model No. CGX-30 unicellular plastic ring life buoy, USCG specification subpart 160.050, Cal-June Corp. letter dated October 22, 1967, and September 17, 1968, and drawing No. RX dated September 1, 1968. Cal-June Corp., P.O. Box 9551, North Hollywood, Calif. 91606, no longer manufactures certain unicellular plastic ring life buoy and approval No. 160.050/59/0 dated August 2, 1973, was therefore terminated effective March 9, 1978.

UNICELLULAR PLASTIC FOAM WORK VEST

Approval No. 160.053/14/0, unicellular plastic foam work vest, drawing Nos. 20, 21, and 22, and bill of materials dated May 21, 1963, Crawford Manufacturing Co., Inc., Third and Decatur Streets, Richmond, Va. 23212, and 12th and Graham Streets, Emporia, Kans. 66801 no longer manufactures certain unicellular plastic foam work vest and approval No. 160.053/14/0 dated January 4, 1973, was therefore terminated effective January 4, 1978.

Approval No. 160.053/25/0, style Nos. 228 and 229, unicellular plastic foam, cloth-covered work vest, Tapatco drawing Nos. 282-1, 282-2, and 282-3 dated February 11, 1965. Outdoor Supply Co., Inc., Oxford, N.C. 27565, no longer manufactures certain unicellular plastic foam work vest and

approval No. 160.053/25/0 dated February 2, 1973, was therefore terminat-

N3S, N3WS, N5S, and N5WS, layout drawing Nos. 4S-453B, 4S-454B, 4S-455B, 4S-456B, all revised May 5, 1958. Bete Fog Nozzle, Inc., 309 Wells Street, Greenfield, Mass. 01301, approval No. 162.036/2/0 dated January 3, 1973, expired and was terminated effective January 3, 1978.

NONCOMBUSTIBLE MATERIAL

Approval No. 164.009/51/0, "Glasweld" and "quasal" cement-asbestos board-type noncombustible materials as described in National Bureau of Standards Report No. TG10210-2023:PF3450 dated May 20, 1958. Champion International U.S. Plywood Division, 777 Third Avenue, New York, N.Y. 10017, approval No. 164.009/51/0 dated April 12, 1973, was terminated effective April 12, 1978.

INTERIOR FINSISH

Approval No. 164.012/5/0, CCC-W408a, type II, mediumweight coated, quality V-275, UL Serial A 34741, vinyl-coated fabric wall covering (Victex) manufactured by L. E. Carpenter & Co., Wharton, N.J. 07885, expired and was terminated January 2, 1978.

Approval No. 164.012/7/0, CCC-W-408a, type I, lightweight coated, quality V-152, UL Serial A 34730, vinyl-coated fabric wall covering (Victrtex) manufactured by L. E. Carpenter & Co., Wharton, N.J. 07885, expired and was terminated January 2, 1978.

Approval No. 164.012/7/0, CCC-W-408a, type I, lightweight laminate, quality VW-73 (1), UL Serial F 22215, vinyl-coated fabric wall covering (Victex) manufactured by L. E. Carpenter & Co., expired and was terminated January 2, 1978.

Approval No. 164.012/8/0, CCC-W-408a, type I, lightweight laminated plus tedlar, quality VR-74 (R), UL Serial F 9531, vinyl-coated fabric wall covering (Victex) manufactured by L. E. Carpenter & Co., expired and was terminated January 2, 1978.

Dated: September 1, 1978.

H. H. BELL,
Rear Admiral, U.S. Coast Guard Chief, Office of Merchant Marine Safety.

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Approval Notice

1. Certain laws and regulations (46 CFR chapter I) require that various items of lifesaving, firefighting, and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motor boats and other recreational vessels, and on the artificial island and fixed structures on the Outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been granted as herein described during the period from September 27, 1977, to May 19, 1978 (list No. 1-78). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of title 46, United States Code, section 1333 of title 43, United States Code, and section 198 of title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR parts 160 to 164.

3. The approvals listed in this document shall be in effect for a period of 5 years from the date of issuance, unless sooner canceled or suspended by proper authority.

LIFE FLOAT

Approval No. 160.027/40/5, 4.17' x 3.0' (8" x 8½" body section) rectangular life float, fibrous glass, reinforced neoprene latex shell with unicellular plastic foam core, or, alternate construction of unicellular plastic foam core, wrapped with waterproof vinyl coated cotton tape and sealed with fire retardant urethane coatings. Six-person capacity, identified by drawing No. 4 LF revised July 23, 1974, drawing No. 4 LF supplement dated July 29, 1977. Manufactured by the Plasti-Kraft Corp., Ozona Industrial Park, Ozona, Fla., effective date September 14, 1977 (supersedes approval No. 160.027/40/5 dated September 14, 1972.)

Approval No. 160.027/41/5, 6.17' x 3.67' (10" x 9¼" body section) rectangular life float, fibrous glass, reinforced neoprene latex shell with unicellular plastic foam core, or, alternate construction of unicellular plastic foam core, wrapped with waterproof vinyl coated cotton tape and sealed with fire retardant urethane coatings, 12-person capacity, identified by drawing No. 4 LF revised July 23, 1974, drawing No. 4 LF supplement dated July 29, 1977 (to show alternate platform construction) effective September 14, 1977, manufactured by the Plasti-Kraft Corp., Ozona Industrial Park, Ozona, Fla. 33560. (Supersedes approval No. 160.027/41/5.)

LIFEBOAT DAVIT

Approval No. 160.032/213/0, type MRD 8.0 gravity davit and launching cradle; approved for a maximum working load of 17,700 pounds per set (8,850 lb per davit head) using single-part falls; identified by general arrangement drawing F103185, revision A dated March 21, 1977, and drawing list D402520, undated. Manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective March 7, 1978 (supersedes approval No. 160.032/213/0 dated September 6, 1977, to include comments in "Remarks" below).

Approval No. 160.032/214/0, type 6.5M A-frame fixed gravity davit; approved for a maximum working load of 11,200 pounds per set (5,600 lb per arm) using one-part falls; identified by Schat Davits, Ltd., general drawing list dated November 16, 1977. Manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective February 15, 1978.

Approval No. 160.032/216/0, type SPG (L) MKII gravity pivot davit; approved for a maximum working load of 11,200 pounds per set (5,600 lb per arm) using 2-part falls; identified by Schat Davits, Ltd., general arrangement drawing F-103561, revision A dated September 26, 1977, and drawing list D-402886 dated December 6, 1977. Manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective March 7, 1978.

Approval No. 160.032/217/0, Type SS2810 survival capsule launching system (winch-type); approved as an alternate to a lifeboat davit for a maximum working load of 11,000 lbs. on a single fall; identified by general arrangement drawing SS2810 dated August 18, 1977. Manufactured by Whittaker Corp., 5159 Baltimore Drive, La Mesa, Calif. 92041, effective March 7, 1978.

MECHANICAL DISENGAGING APPARATUS (FOR LIFEBOATS)

Approval No. 160.033/66/1, Viking on-load release gear, approved for a maximum working load of 8,517 lbs. per hook, identified by 26' on-load release gear arrangment drawing 8.0 EL-015A dated March 6, 1978, and drawing list dated March 23, 1978. Manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective May 8, 1978 (supersedes approval No. 160.033/66/0 dated November 16, 1977, to show revised working load).

Approval No. 160.033/60/4, Rottmer Type, releasing gear, approved for a maximum working load of 15,000 lbs. per hook, identified by disengaging apparatus drawing No. 9090-111 revision E dated June 11, 1976. Manufactured by Whittaker Corp., 5159 Baltimore Drive, La Mesa, Calif. 90242, effective March 30, 1978 (supersedes approval No. 160.033/60/4 dated April 9, 1973, to show revised drawing).

LIFEBOAT

Approval No. 160.035/105/3, Class 1, 48-person capacity, 26.0' x 9.0' x 3.8' steel, motor-propelled lifeboat, identified by general arrangement and construction drawing No. 26-001-1 revision B dated February 11, 1978. Built with wooden or fibrous glass reinforced plastic (FRP) removable interior. Manufactured by Lane Lifeboat Division of Lane Marine Technology, Inc., 150 Sullivan Street, Brooklyn, N.Y. 11231, effective March 3, 1978 (supersedes approval No. 160.035/105/2 dated December 14, 1972, to show addition of alternate engine).

Approval No. 160.035/443/5, Class 1 lifeboat, motor-propelled 74-person capacity, 30.0' x 10.0' x 4.33' fibrous glass reinforced plastic by general arrangement drawing No. P-30-1M, revision K dated December 13, 1977, and drawing list P-30-MP dated December 12, 1977. Manufactured by Marine Safety Equipment Corp., Foot of Wyckoff Road, Farmingdale, N.J. 07727, effective February 8, 1978. (Supersedes approval No. 160.035/443/4 to show optional engine.)

Approval No. 160.035/475/1, Class 1, motor-propelled lifeboat, 44-person capacity, fibrous glass reinforced plastic (FRP), totally enclosed (covered), without radio cabin or searchlight, identified by general arrangement drawing No. 8EL-101 revision 7 dated March 11, 1977, and 8 meter enclosed lifeboat approved drawing list dated July 21, 1977. Manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective September 1, 1977. (Supersedes approval No. 160.035/475/0 dated February 13, 1975, to show effect of modifications.)

Approval No. 160.035/485/0, Class 1, 21.03' x 8.08' x 2.93' fibrous glass reinforced plastic (FRP), totally enclosed (covered) motor-propelled lifeboat, without radio cabin or searchlight, 23-person capacity, identified by constructional arrangement drawing No. 6.5 KL-122A, dated October 3, 1977, and 6.5 meter (21 ft.) class 1 lifeboat drawing list dated November 11, 1977. Manufactured by Watercraft America, Inc., P.O. Box 307, Mims, Fla. 32754, effective November 21, 1977.

Approval No. 160.035/465/1, 14.0' diameter x 4.8' depth fibrous glass reinforced plastic (FRP) motor-propelled, totally enclosed survival capsule, 28-person capacity, as alternate for lifeboat, inflatable liferaft or lifeboat, identified by general arrangement drawing No. 9091-101 dated June 1, 1974, except that Xenon blinker is optional item. Manufactured by Whittaker Corp., 5159 Baltimore Drive, La Mesa, Calif. 92042, effective March 30, 1978 (supersedes approval No. 160.035/465/1 dated April 11, 1973, to show revised laminating procedure and optional blinker).

Approval No. 160.035/480/3, Model CA2801, 14.0' diameter x 4.8' depth fibrous glass reinforced plastic (FRP) motor-propelled totally enclosed survival capsule fitted with Farymann S30M engine 28-person capacity, as alternate for lifeboat, inflatable liferaft or lifefloat, identified by master drawing list for model CA2801, revision B dated August 4, 1975. Manufactured by Whittaker Corp., Survival Systems Division, 5159 Baltimore Drive, La Mesa, Calif. 92042, effective November 4, 1977 (supersedes approval No. 160.035/480/3 dated January 12, 1977, to show revision of master drawing list).

Approval No. 160.035/483/1, Model CA5001, 19.75' x 14.0' x 5.12' fibrous glass reinforced plastic (FRP) motor-propelled, totally enclosed survival capsule fitted with Perkins 4.154 diesel engine, 50-person capacity, as alternate for lifeboat, inflatable liferaft or life float, identified by master drawing list for Model CA5001, revision C dated August 1977 and general arrangement drawing CA5001-101 revision C dated March 31, 1977. Manufactured by Whittaker Corp, 5159 Baltimore Drive, La Mesa, Calif. 92042, effective November 8, 1977. (Supersedes approval No. 160.035/483/1 dated January 12, 1977, to show updated drawing list.)

Approval No. 160.035/486/0, Model CA5003, 19.75' x 14.0' x 5.12' fibrous glass reinforced plastic (FRP) motor-propelled, totally enclosed survival capsule, approved as equivalent to totally enclosed (covered) motor-propelled lifeboat, without radio cabin or searchlight (class 1), 50-person capacity, identified by master drawing list for model CA5003, dated August 1977, and general arrangement drawing CA5003-101, dated March 7, 1977. Manufactured by Whittaker Corp., 5159 Baltimore Drive, La Mesa, Calif. 92041, effective November 8, 1977.

HAND ORANGE SMOKE DISTRESS SIGNAL

Approval No. 160.037/15/0, International hand-held orange smoke distress signal, catalog No. CG-3234, drawing. CP-4335-1-1, dated March 15, 1977. Manufactured by Kilgore Corp., Toone, Tenn. 38381, also produced for Olin Corp. under approval No. 160.037/15/0, effective October 27, 1977.

Approval No. 160.037/14/0, Kilgore's International hand-held orange smoke distress signal, Kilgore drawing. CP-4335-1-1, dated March 15, 1977. Manufactured by Kilgore Corp., Toone, Tenn. for Olin Corp., identical to 160.037/15/0 except for labelling, effective October 27, 1977.

FIRST-AID KIT

Approval No. 160.041/5/0, first-aid kit, model G-12, assembly drawing No. B-12596, dated September 9, 1952, with substitute eye dressing packet, catalog No. 2132. Manufactured by Mine Safety Appliances Co., 3880 Meadowbrook Road, Murraysville, Pa. 15668, effective December 13, 1977. (Supersedes approval No. 160.041/5/0 dated January 3, 1973, to show change of address of manufacturer and substitute eye dressing.

Approval No. 160.041/6/0, first-aid kit, model No. 24 L.B., assembly drawing No. 1-24-LB, revised January 14, 1953, marking drawing No. 2-24-LB revised January 14, 1953. Manufactured by Pac-Kit Safety Equipment Division, K. W. Graffin Co., 100 Pearl Street, Norwalk, Conn. 07850, effective November 2, 1977. (Supersedes approval No. 160.041/6/0 dated October 6, 1977, to change of address of manufacturer.)

UNICELLULAR PLASTIC RING LIFE BUOYS

Approval No. 160.050/48/1, model No. G-20, 20-inch white, becket-type polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification

subpart 160.050, Cal-June, Inc., drawing for 20-inch becket-type ring life

for 24-inch becketless ring life buoy dated February 27, 1978, procedure

Union, W. Va. 24983, effective October 28, 1977. (Supersedes approval No.

subpart 160.050, Cal-June, Inc., drawing for 20-inch becket-type ring life buoy, dated January 12, 1978, and procedure covering production and bill of materials dated February 13, 1978, file No. 160.050/48. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91606, effective March 3, 1978. (Supersedes approval No. 160.050/48/0, dated November 1972, to show changes in construction and color restriction.)

Approval No. 160.050/50/1, type IV PFD, model G-24, 24-inch, white, becket-type polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 24-inch becket-type ring life buoy dated, January 12, 1978, and procedure covering production and bill of materials dated February 13, 1978, file No. 160.050/105; and Cal-June letter dated February 13, 1978, file No. 160.050/48. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91606, effective March 3, 1978. (Supersedes approval No. 160.050/50/0, dated November 15, 1972, to show changes in construction and color restriction.)

Approval No. 160.050/60/1, type IV PFD, 24-inch white, becketless polystyrene foam core ring life buoy, model No. GX-24, covered with unicellular plastic foam and coated with vinyl manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 20-inch becketless ring life buoy dated February 27, 1978, and procedure covering production and bill of materials dated February 3, 1978, both file No. 160.050/102 and Cal-June letter dated February 13, 1978, file No. 160.050/60. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91606, effective March 7, 1978. (Supersedes approval No. 160.050/61/0, dated August 2, 1973, to show change in construction and color restriction.)

Approval No. 160.050/102/0, type IV PFD, model No. GX-20, 20-inch becketless polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June Inc., drawing for 20-inch becketless ring life buoy, dated February 27, 1978; procedure covering production and bill of materials, dated February 3, 1978. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91609, effective February 15, 1978.

Approval No. 160.050/103/0, type IV, model GX-24, 24-inch becketless polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 24-inch becketless ring life buoy dated February 27, 1978, procedure covering production and bill of materials dated February 3, 1978. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91609, effective February 15, 1978.

Approval No. 160.050/104/0, type IV PFD, model No. GX-30, 30-inch becketless polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 30-inch becketless ring life buoy dated February 27, 1978, procedure covering production and bill of materials, dated February 3, 1978. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91609, effective February 15, 1978.

Approval No. 160.050/105/0, type IV PFD, model No. G-20, 20-inch becket-type polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 20-inch becket-type buoy dated January 12, 1978, procedure covering production and bill of materials, dated February 3, 1978. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91609, effective March 2, 1978.

Approval No. 160.050/106/0, type IV PFD, model No. G-24, 24-inch becket-type polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 24-inch becket-type buoy dated January 12, 1978, procedure covering production and bill of materials, dated February 3, 1978. Maufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91609, effective March 2, 1978.

Approval No. 160.050/107/0, type IV PFD, model No. G-30, 30-inch becket-type polystyrene foam core ring life buoy, covered with unicellular plastic foam and coated with vinyl, manufactured in accordance with USCG specification subpart 160.050; Cal-June, Inc., drawing for 30-inch becket-type buoy dated January 12, 1978, procedure covering production and bill of materials, dated February 3, 1978. Manufactured by Cal-June, Inc., P.O. Box 9551, North Hollywood, Calif. 91609, effective March 2, 1978.

Inflatable Liferaft

Approval No. 160.051/60/1, type 20 MC MK 3, davit-launched inflatable liferaft, 20-person capacity, identified by drawing 5RA1097, revision A, dated March 3, 1977, and specification RFD-US-500, revision No. 3, dated December 27, 1974. Manufactured by B. F. Goodrich, Engineered Systems Co., Union, W. Va. 24983, effective October 28, 1977. (Supersedes approval No. 160.051/60/0 dated February 13, 1975, to show design revision.)

Approval No. 160.051/71/1, 4-person inflatable life raft with toroidal stabilizing device identified by general arrangement drawing SPC-MM-4, revised February 28, 1978. Manufactured by Switlik Parachute Co., Inc., 1325 East State Street, Trenton, N.J. 08607, effective March 2, 1978. (Supersedes approval No. 160.051/71/0, dated September 17, 1976, to show design change.)

Desalter Kits

Approval No. 160.058/4/0, type 183, desalter kit, seawater, metal container and contents identified by Revere Supply Co. Inc., drawing D-761-100, dated March 3, 1976, and specification dated, August 24, 1977. Manufactured by Revere Supply Co., Inc., 603-607 West 29th Street, New York, N.Y. 10001, effective October 11, 1977.

Fishing Tackle Kit

Approval No. 160.061/6/0, model FL-214, emergency fishing tackle kit, container drawing, dated October 5, 1977. Alternate zip lock vinyl pouch container identified as model FL-214P, container drawing, dated October 5, 1977. Manufactured by F&L Packing Corp., 681 Main Street, Belleville, N.J. 07109, effective November 3, 1977.

Approval No. 160.061/4/1, model RSCF-182 emergency fishing tackle kit, container drawing No. A-731-03, revision A dated November 17, 1977 and list of drawings dated February 27, 1973. Manufactured by Revere Supply Co. Inc., 603-607 West 29th Street, New York, N.Y. 10001, effective February 15, 1978. (Supersedes approval No. 160.061/4/0 dated April 3, 1973 to show revised container drawing.)

Launching Device for Inflatable Life Rafts

Approval No. 160.063/1/1, type R-50-B single-armed davit with W-50-M pedestal winch; approved for a maximum working load of 5,000 lbs by a one-part fall; identified by general arrangement drawing. D1-E-267 revision A dated January 21, 1975 and drawing lists (2) revision A dated January 21, 1975. Manufactured by Marine Safety Equipment Corp., Foot of Wyckoff Road, Farmingdale, N.J. 07727, effective December 13, 1977. (Supersedes approval No. 160.063/1/0 dated February 13, 1975 to show alternate winch subassembly.)

Marine Buoyant Device

Approval No. 160.064/1341/0, type III PFD, adult large, model No. 901, vinyl dipped unicellular plastic foam

"Water Ski Vest" manufactured in accordance with USCG specification subpart 160.064 and Fabrionics, Inc. approval No. 160.064/1230 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics, Inc., P.O. Box 1061, Tolono, Ill. 61880, for American Marine Products Inc. (private label listee) effective November 22, 1977.

Approval No. 160.064/1287.0, child small (30-50 lbs.), model 505, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with USCG Specification Subpart 160.064 and America's Cup Inc., approval No. 160.064/1023 (revision No. — in effect on date of manufacture) and UL/MD report file No. 69 (sec. 2) Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, for O'Brien International Inc., (private label listee), effective September 20, 1977.

Approval No. 160.064/1287/0, child small (30-50 lbs.), model 505, cloth covered unicellular plastic foam "Buoyant Vest," manufactured in accordance with USCG Specification Subpart 160.064 and America's Cup Inc., approval No. 160.064/1033 (revision No.— in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 2). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, for O'Brien International Inc. (private label listee), effective September 20, 1977.

Approval No. 160.064/1288/0, child medium, model No. 505, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc., approval No. 160.064/1035 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 2). Type III PFD, manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, for O'Brien International Inc., (private label listee) effective September 20, 1977.

Approval No. 160.064/1289/0, type III PFD, adult X-small, model No. 505, cloth covered unicellular plastic foam "Buoyant Vest" manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/1034 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 2). Manufactured by America's Cup Inc., 1443 Petrero, South El Monte, Calif. 91733, for O'Brien International, Inc. (private label listee), effective September 20, 1977.

Approval No. 160.064/1290/0, type III PFD, adult small, model No. 505, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with USCG Specification Subpart 160.064 and America's Cup Inc. approval No. 160.064/634 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 2), effective September 20, 1977.

Approval No. 160.064/1292/0, type III PFD, model No. 505, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/635 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 2). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, for O'Brien International, Inc. (private label listee), effective September 20, 1977.

Approval No. 160.064/1293/0, type III PFD, model No. 505, cloth covered unicellular plastic foam "Buoyant Vest", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/75- (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 2). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, for O'Brien International, Inc. (private label listee) effective September 20, 1977.

Approval No. 160.064/1354/0, type III PFD, model No. 200CM child medium, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/325 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee), effective October 11, 1977.

Approval No. 160.064/1355/0, type III PFD, model No. 200CL child large, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/327 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee), effective October 11, 1977.

Approval No. 160.064/1356/0, type III PFD, model No. 200S adult small, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/328 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee), effective October 11, 1977.

Approval No. 160.064/1357/0, type III PFD, model No. 200M adult medium, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/329 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee) effective October 11, 1977.

Approval No. 160.064/1358/0, type III PFD, model No. 200L adult large, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/330 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee), effective October 11, 1977.

Approval No. 160.064/1359/0, type III PFD, model No. 200XL adult XL, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactrured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/399 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee), effective October 11, 1977.

Approval No. 160.064/1360, type III PFD, model No. 200XXL adult XXL, vinyl dipped unicellular plastic foam "Sail 'N' Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Texas Recreation approval No. 160.064/1064 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 3 (sec. 5). Manufactured by Texas Recreation, Texas Watercrafters Division, Wichita Falls, Tex. 76307, for O'Brien International (private label listee) effective October 11, 1977.

Approval No. 160.064/1431/0, type III PFD, model No. 1200 child medium, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 24. Manufactured by Quality Built Products Co., 1832 East Commercial Street, Springfield, Mich. 65803, effective November 14, 1977.

Approval No. 160.064/1432/0, type III PFD, model No. 1200 adult small,

tured in accordance with USCG specification subpart 160.064 and Fabrion-

effect on date of manufacture) and UL/MD report file No. MQ 174 (sec.

Approval No. 160.064/1344/0, type III PFD, model No. 5515 adult M/L, cloth covered unicellular plastic foam

facture) and UL/MD report file No. MQ 69 (sec. 1). Manufactured by America's Cup Inc., 1443 Potrero,

part numbers. Manufactured by Walter Kidde & Co. Inc., Belleville, N.J. 07109, effective December 15,

Approval No. 160.064/1432/0, type III PFD, model No. 1200 adult small, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 24. Manufactured by Quality Built Products Co., 1832 East Commercial Street, Springfield, Mich. 65803, effective November 14, 1977.

Approval No. 160.064/1433/0, type III PFD, model No. 1200 adult medium, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 24. Manufactured by Quality Built Products Co., 1832 East Commercial Street, Springfield, Mich. 65803, effective November 14, 1977.

Approval No. 160.064/1434/0, type III PFD, model No. 1200 adult large, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 24. Manufactured by Quality Built Products Co., 1832 East Commercial Street, Springfield, Mich. 65803, effective November 14, 1977.

Approval No. 160.064/1435/0, type III PFD, model No. 1200 adult X-large, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 24. Manufactured by Quality Built Products Co., 1832 East Commercial Street, Springfield, Mich. 65803, effective November 14, 1977.

Approval No. 160.064/1322/0, type III PFD, model No. 4030 child medium, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/636 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 1). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Red Head Brand Corp. (private label listee), effective November 22, 1977.

Approval No. 160.064/1323/0, type III PFD, model No. 4031 adult small, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1016 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Red Head Brand Corp. (private label listee), effective November 22, 1977.

Approval No. 160.064/1324/0, type III PFD, model No. 4032 adult medium, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1017 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Red Head Brand Corp. (private label listee), effective November 22, 1977.

Approval No. 160.064/1325/0, type III PFD, model No. 4033 adult large, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1018 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Red Head Brand Corp. (private label listee), effective November 22, 1977.

Approval No. 160.064/1326/0, type III PFD, model No. 4034 adult large, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1230 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Red Head Brand Corp. (private label listee), effective November 22, 1977.

Approval No. 160.064/1327/0, type III PFD, model No. 4035 adult universal, vinyl dipped unicellular plastic foam "Water Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1096 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 3). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Red Head Brand Corp. (private label listee), effective November 22, 1977.

Approval No. 160.064/1328/0, type III PFD, model No. 754 child medium, vinyl dipped unicellular plastic foam "Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/636 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 1). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Buddy Schoellkopf Products Inc. (private label listee), effective November 22, 1977.

Approval No. 160.064/1329/0, type III PFD, model No. 755 adult small, vinyl dipped unicellular plastic foam "Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1016 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Buddy Schoellkopf Products Inc. (private label listee), effective November 22, 1977.

Approval No. 160.064/1330/0, type III PFD, model No. 756 adult medium, vinyl dipped unicellular plastic foam "Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1017 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Buddy Schoellkopf Products Inc. (private label listee), effective November 22, 1977.

Approval No. 160.064/1331/0, type III PFD, model No. 757 adult large, vinyl dipped unicellular plastic foam "Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1018 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Buddy Schoellkopf Products Inc. (private label listee), effective November 22, 1977.

Approval No. 160.064/1332/0, type III PFD, model No. 758 adult large, vinyl dipped unicellular plastic foam "Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1230 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Buddy Schoellkopf Products Inc. (private label listee), effective November 22, 1977.

Approval No. 160.064/1333/0, type III PFD, model No. 759 adult universal, vinyl dipped unicellular plastic foam "Ski Vest", manufactured in accordance with USCG specification subpart 160.064 and Fabrionics Inc. approval No. 160.064/1096 (revision No. — in effect on date of manufacture) and UL/MD report file No. MQ 174 (sec. 2). Manufactured by Fabrionics Inc., P.O. Box 1061, Tolono, Ill. 61880, for Buddy Schoellkopf Products Inc. (private label listee), effective November 22, 1977.

Approval No. 160.064/1343/0, type III PFD, model No. 5514 adult S/M, cloth covered unicellular plastic foam "Trapeze Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 289. Manufactured by Soniform Inc., 8400 Alvarado Road, La Mesa, Calif. 92041, effective August 30, 1977.

Approval No. 160.064/1344/0, type III PFD, model No. 5515 adult M/L, cloth covered unicellular plastic foam "Trapeze Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 289. Manufactured by Soniform Inc., 8400 Alvarado Road, La Mesa, Calif. 92041, effective August 30, 1977.

Approval No. 160.064/1283/0, type III PFD, model No. 1100 adult small, cloth covered unicellular plastic foam "Yachting Jacket", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/221 (revision No. in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 1). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, effective September 19, 1977.

Approval No. 160.064/1284/0, type III PFD, model No. 1100 adult medium, cloth covered unicellular plastic foam "Yachting Jacket", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/222 (revision No. in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 1). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733, for Utica Duxbak Corp. (private label listee), effective September 19, 1977.

Approval No. 160.064/1285/0, type III PFD, model No. 1100 adult large, cloth covered unicellular plastic foam "Yachting Jacket", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/223 (revision No. in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 1). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733 for Utica Duxbak Corp. (private label listee), effective September 19, 1977.

Approval No. 160.064/1286/0, type III PFD, model No. 1100 X-large, cloth covered unicellular plastic foam "Yachting Jacket", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/226 (revision No. in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 1). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733 for Utica Duxbak Corp. (private label listee), effective September 19, 1977.

Approval No. 160.064/1361/0, type III PFD, model No. 1100 adult XX-large, cloth covered unicellular plastic foam "Yachting Jacket", manufactured in accordance with USCG specification subpart 160.064 and America's Cup Inc. approval No. 160.064/640 (revision No. in effect on date of manufacture) and UL/MD report file No. MQ 69 (sec. 1). Manufactured by America's Cup Inc., 1443 Potrero, South El Monte, Calif. 91733 for Utica Duxbak Corp., Utica, N.Y. (private label listee) effective September 19, 1977.

Approval No. 160.064/469/1, type III PFD, model S9762 child small (30-50 lbs.), vinyl dipped unicellular plastic foam "Ski, Swim, and Jump Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 106. Manufactured by Wellington Puritan Mills, Inc., Monticello Highway, Madison, Ga. 30650, effective September 2, 1977 (supersedes approval No. 160.064/469/0 dated February 23, 1973, to show model No. and weight range change).

Approval No. 160.064/471/1, type III PFD, model No. S9764 adult medium, vinyl dipped unicellular plastic foam "Ski, Swim, and Jump Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 106. Manufactured by Wellington Puritan Mills, Inc., Monticello Highway, Madison, Ga. 30650, effective September 2, 1977 (supersedes approval No. 160.064/471/0 dated February 23, 1973, to show model change).

Approval No. 160.064/472/1, type III PFD, model S9765 adult large, vinyl dipped unicellular plastic foam "Ski, Swim, and Jump Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 106. Manufactured by Wellington Puritan Mills, Inc., Monticello Highway, Madison, Ga. 30650, effective September 2, 1977 (supersedes approval No. 160.064/472/0 dated February 23, 1973, to show model change).

Approval No. 160.064/471/1, type III PFD, model No. S9766 adult X-large, vinyl dipped unicellular plastic foam "Ski, Swim, and Jump Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 106. Manufactured by Wellington Puritan Mills, Inc., Monticello Highway, Madison, Ga. 30650, effective September 2, 1977.

Approval No. 160.064/1374/0, type III PFD, model No. S9763 adult small, vinyl dipped unicellular plastic foam "Ski, Swim, and Jump Vest", manufactured in accordance with USCG specification subpart 160.064 and UL/MD report file No. MQ 106. Manufactured by Wellington Puritan Mills, Inc., Monticello Highway, Madison, Ga. 30650, effective September 2, 1977.

FIRE PROTECTIVE SYSTEMS

Approval No. 161.002/6/0, type RB smoke detector system eight (8) through forty-eight (48) lines (drawing SK-122753 wiring diagram, drawing SK-134355 schematic) identified by part numbers. Manufactured by Walter Kidde & Co. Inc., Belleville, N.J. 07109, effective December 15, 1977.

FLOATING ELECTRIC WATER LIGHT

Approval No. 161.010/8/0, Automatic Lite Co., Save-U-Lite, model WL003 floating electric water light with mounting bracket. Manufactured by the Automatic Lite Co. Inc., 900 North Iris Avenue, Baltimore, Md. 21205, effective September 15, 1977.

Approval No. 161.010/9/0, model 375, guest man-overboard light. Case, drawing 061176 Rev. E (sheet 2), lens, drawing No. 61076 Rev. C, schematic operating data and test reports submitted with letters dated July 5, and August 9, 1977. Effective November 9, 1977.

CLASS A EPIRB

Approval No. 161.011/8/0, "Vespir" (PN 15-01-002), class A float-free, emergency position indicating radio beacon (EPIRB). Manufactured by Leigh Systems Inc., 6081 Court Street Road, Syracuse, N.Y. 13206, effective December 13, 1977.

Approval No. 161.011/1/0, model EB-2BW Whaler (PN 750082), class A, float-free, emergency position indicating radio beacon. Manufactured by Martech Inc., P.O. Box 1539, Fort Lauderdale, Fla. 33302, effective March 21, 1978.

PRESSURE VACUUM RELIEF VALVE

Approval No. 162.017/119/0, Martin Hi-Jet Mark III system "C" and junior system "C" high velocity pressure-vacuum relief valve consisting of one high velocity pressure vent, one low velocity pressure vent, and one vacuum vent. Valve construction consists of expox coated mild steel housing with stainless steel valve seats, bearing surfaces, and bushings. Manufactured by Wilson Walton International Inc., 66 Hudson Street, Hoboken, N.J. 07030, effective November 22, 1977.

HALON 1301 FIXED FIRE EXTINGUISHING SYSTEM

Approval No. 162.029/11/0, Sea Fire Marine Model 75M, Preengineered Halon 1301 extinguishing system unit, stored pressure type, identical to that described in Underwriters Laboratories, Inc., report 75NK10159, file EX3080, dated September 16, 1977. Manufactured by Sea Fire Marine Products, 4139 Sunset Lane, Northbrook, Ill. 60062, effective March 7, 1978.

DECK COVERING

Approval No. 164.006/23/0, DEX-O-MAGNABOND No. 1 composite mastic and magnesite type deck covering

identical to that described in National Bureau of Standards test report No.

[4910-06]

er, we are aware of the debate that has been going on for some time with respect to the utility and effectiveness of sealed beam

The second durability issue is properly aimed headlights. Misaimed headlights obviously provide a lower quality of lighting and

identical to that described in National Bureau of Standards test report No. TP 367-116; FR2395 dated July 11, 1945, approved for use with other insulating material as meeting class A-15 requirements in the thickness of DEX-O-TEX No. 1 underlay one-fourth inch plus magnasite overlay three-eighths inch. Manufactured by Crossfield Products Corp., 140 Valley Road, Roselle Park, N.J. 07204, effective October 4, 1977.

BULKHEAD PANELS

Approval No. 164.008/92/0, "Asahi Marilite G-P" inorganic composition board type bulkhead panel identical to that described in Underwriters Laboratories, Inc., report R7709-2 (77NK3407) dated September 12, 1977, approved as meeting class B-15 requirements in a 19 mm thickness. To be used as a component in A-15 construction only. Drawing forms part of this approval. Manufactured by Asahi Asbestos Co., Ltd., 10-6, 7-Chome, Ginza, Chuo-Ku, Tokyo, Japan, effective March 31, 1978.

NONCOMBUSTIBLE MATERIAL

Approval No. 164.009/77/0, "Pabco Precision Molded Super Caltemp Type 'A'" calcium silicate type, identical to that described in Fiberboard Paper Products Corp. letter dated October 15, 1964, and National Bureau of Standards test report No. FR-3937, approved in densities from 11.5 to 13.5 pounds per cubic foot. Manufactured by Fiberboard Corp., 55 Francisco Street, San Francisco, Calif. 94135, effective September 16, 1977.

Approval No. 164.009/104/0, "Foamglas" cellulated glass type noncombustible material identical to that described in National Bureau of Standards letter file No. 10.2/10/2, FP2628 dated August 25, 1948, Pittsburgh Corning letter dated June 5, 1967, and USCG letter 5946/164/009/104 dated June 9, 1967, approved in a 7 through 10 pound per cubic foot density. All contact areas are to be coated with U.S. Gypsum Co's. Hydrocal B-11 when installed in areas subject to vibration or when used to insulate piping. Manufactured by Pittsburgh Corning Corp., Three Gateway Center, Pittsburgh, Pa. 15222, effective February 7, 1978. (Reinstates and supersedes approval No. 164.009/104/0 terminated April 3, 1977.)

Dated: September 1, 1978.

H. H. BELL,
Rear Admiral, U.S. Coast Guard,
Chief, Office of Merchant
Marine Safety.

Federal Railroad Administration

[Docket No. FRA 511-78-1]

GUARANTEE OF OBLIGATIONS

Receipt of Application

Project. Notice is hereby given that the Chicago & North Western Transportation Co. ("C. & N.W.") and its wholly owned subsidiary Western Railroad Properties, Inc. ("WRPI"), both having their principal business office at 400 West Madison Street, Chicago, Ill. 60606 ("applicants") have filed an application with the Federal Railroad Administration ("FRA") under section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976, 45 U.S.C. 831, to secure a commitment by the United States to guarantee obligations and other evidence of indebtedness issued and to be issued by applicants in the principal amount of $531,894,000. Although loan arrangements have not been completed at this time, applicants propose to offer as part of the security for the guarantee a first lien on 519 miles of trackage between Shawnee, Wyo., and Fremont, Nebr., and on 173 miles of trackage between Fremont, Nebr., and Nevada, Iowa.

The guarantee sought by applicants will be used to cover:

(1) Loans to WRPI for (a) $50 million as C. & N.W.'s share of the construction costs for a 106-mile rail line to be owned jointly by WRPI and Burlington Northern Inc., extending from the Atlantic Richfield Co.'s Coal Creek Mine in the Southern Powder River Basin to Shawnee, Wyo., (b) $1,796,000 in interest payments on interim construction loans for these costs pending approval of this application, and (c) $3,750,000 for contingencies in connection with these costs;

(2) Loans to WRPI for (a) $2,096,000 for construction of four relay tracks and a setout track at Bill, Wyo., and a holding track and setout track at Shawnee, Wyo., (b) $332,030,000 for the rehabilitation and improvement of 519 miles of existing track presently owned by C. & N.W., extending from Shawnee, Wyo., to Fremont, Nebr., including installation of locomotive and car shops, headquarters, and maintenance-of-way facilities at Chadron, Nebr., and track, bridge, and traffic control work, and (c) $35,435,000 for contingencies in connection with these costs;

(3) Loans to C. & N.W. for (a) $57,991,000 in operating deficits and capitalized interest incurred in the early years of the project until revenues from traffic are sufficient to cover these costs, and (b) $12,296,000 for contingencies in connection with these costs; and

(4) Existing mortgage indebtedness of C. & N.W. totaling $36,500,000 under its Chicago & North Western Railway Co. 3 percent first mortgage bonds series B, due January 1, 1989.

Justification for project. The applicants state that the project is justified by the present and future demand for rail services. The project will, according to applicants, permit by 1990 up to 33-unit coal trains (including both loaded and empty trains) to travel each day over the Southern Powder River Basin-Fremont track to and from various electric generating plants located in the Midwest, Southwest, South, and Southeast. The applicants state that the project will consequently make an important contribution to the current national effort to generate a greater proportion of electrical demand from clean-burning coal by providing for an additional transportation route for low-sulfur coal and by assuring that transportation prices for low-sulfur coal will be kept at competitive levels. The applicants also state that the project will enable C. & N.W. to transport increased freight tonnage economically and efficiently at higher speeds and under safer conditions than at present. In addition, the applicants state that financing is required for operating deficits and capitalized interest in the early years of the project until the project generates revenues sufficient to cover project-related costs. Finally, the applicants state that a Federal guarantee of C. & N.W.'s existing mortgage indebtedness will permit applicants to offer to the United States as security for its guarantee a first lien on the project facilities and will permit C. & N.W. to remove burdensome contractual restraints on its normal business.

Comments. Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street SW., Washington, D.C. 20590, not later than the comment closing date shown below. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor.

To the extent permitted by law, the application will be made available for inspection during normal business hours in room 5415 at the above address of the FRA in accordance with the regulations of the Office of the Secretary of Transportation set forth in part 7 of title 49 of the Code of Federal Regulations.

The comments will be taken into consideration by the FRA in evaluating the application. However, formal acknowledgment of the comments will not be provided.

The FRA has not approved or disapproved this application nor has it passed upon the accuracy or adequacy of the information contained therein.

(Sec. 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210), as amended.)

Dated: September 7, 1978.

Comment closing date: November 13, 1978.

CHARLES SWINBURN,
Associate Administrator for Federal Assistance, Federal Railroad Administration.

[4910-59]

National Highway Traffic Safety Administration

WASHINGTON STATE COMMISSION ON EQUIPMENT

Denial of Petition for Rulemaking

This notice sets forth reasons for denial of a petition for rulemaking to amend 49 CFR 571.108, Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment.* It is published in accordance with section 124 of the National Traffice and Motor Vehicle Safety Act which provides that the National Highway Traffice Safety Administration must grant or deny such petitions within 120 days, and that if a petition is denied the reasons for it shall be published in the FEDERAL REGISTER (sec. 124(d)).

On February 10, 1978, the Washington State Commission on Equipment petitioned for an amendment of Motor Vehicle Safety Standard No. 108 "that FMVSS 108 be amended to permit retaining existing headlamp standards • • • for a 36-month trial period so that these headlamps can be properly evaluated under the unique weather and road conditions of this State."

This was the second petition from the Commission for an amendment of Federal lighting requirements to permit the sale of European-type unsealed headlamps. Notice of denial of the first petition was published in the FEDERAL REGISTER on May 1978 (43 FR 19313). Because of the public interest in European headlighting systems as reflected in comments to docket No. 78-5 (on increasing headlamp candlepower output), NHTSA believes that the response to the petition should not merely be summarized in this notice but set forth in detail. Portions of its letter of August 1, 1978, follow:

Currently, the National Traffic and Motor Vehicle Safety Act of 1966, does not permit NHTSA to promulgate regulations which would be limited to one specific region. Thus, we could not grant the Commission's request even if we were so inclined. However, we are aware of the debate that has been going on for some time with respect to the utility and effectiveness of sealed beam headlights compared to those manufactured without sealed beams.

The ECE standards are sufficiently vague and subjective to permit substandard products to be sold. The National Traffic and Motor Vehicle Safety Act requires that safety standards be stated in "objective terms." As currently written, there is no way that the ECE headlight standards could be adopted without major revision to fulfill these statutory requirements. These revisions would require a very large commitment of agency resources.

Substantively then, the issue we must address is whether such a commitment of Government resources would result in any improvement in safety. At this juncture, we are not able to conclude that the revision of our lighting standard to permit sale of nonsealed beam halogen headlights would result in any safety improvement at all. Further, most of the scenarios we envision could lead to some reduction in safety.

Our conclusion on the safety effect of this question was reached after considering two major factors, photometrics (including beam pattern), and durability. We also believe that consideration must be devoted to consumer costs.

Photometrics. Photometrics covers both the intensity of the headlights as well as the beam patterns produced. Currently, under the ECE standard, headlights on upper beam can be rated up to 300,000 candlepower. A recent amendment to FMVSS 108 has raised the American ceiling to 150,000 candlepower from the present 75,000 limit. This 150,000 candlepower will provide maximized seeing distance without a major safety detriment of excessive glare produced by still higher candlepower of the ECE regulation.

With respect to beam patterns, for all intents and purposes, the upper beam ECE pattern requirements are so close to the requirements of FMVSS 108 that there is no discernable difference, and the proposed 150,000 candlepower more closely alines the intensity of each system. On the low beam, the patterns do differ, but actual night driving tests on both systems indicate no definitive safety advantage of either pattern, although there clearly are consumer preferences for one or the other. Further, ECE headlamps have higher intensities on the lower beam, lighting the roadway close to the front of the vehicle and producing higher veiling glare than the U.S. pattern. This veiling glare cannot contribute to safety and may detract from it.

Durability. Durability addresses issues of performance of the headlighting system while in use.

With respect to sustained uniformity of quality of the lighting output, sealed lamps are superior to the unsealed ECE lamps. With a sealed beam headlamp, almost by definition, the reflector can never deteriorate. With nonsealed beam lamps, moisture can corrode a reflector. Data from Germany show that upwards of 5 percent of all German motorists' headlamps are rejected in their biennial inspection because of reflector deterioration. While we cannot currently prove that a reduction in lighting quality invariably is linked to an increasing number of accidents, it would be reasonable to conclude that it doesn't contribute to an improvement in highway safety.

The second durability issue is properly aimed headlights. Misaimed headlights obviously provide a lower quality of lighting and increased glare than do properly aimed lights. Vehicle headlamp misaim is one of the major vehicle inspection rejection causes. With American headlights, there is a requirement that they be capable of being aimed with simple to use and objective mechanical aimers. ECE headlights must be optically or visually aimed, which is more difficult and subjective. Further, headlamp reflectors are subject to damage from improperly installed bulbs. The mechanical aim capability should reduce the misaim problem.

Finally, the last durability issue is ease of replacement. The limitations in the U.S. FMVSS are such that original equipment manufacturers and aftermarket suppliers are limited to four configurations of sealed headlights. While this places design restrictions on the manufacturer, the safety benefits from low cost widely available headlights permit broken lamps to be replaced conveniently. Under the ECE standards, any headlight configuration is permitted. While ECE has standardized the halogen bulbs, the same does not hold true for the lens or the reflector. This might require larger inventories resulting in higher prices and frequent problems with local availability of ECE headlight replacements.

This would make the replacement of headlights more difficult and could result in increased driving with broken headlights.

While not necessary to our decision on the petition, we also considered consumer costs. One of the byproducts of the relatively limited number of headlamp configurations that are permitted to be manufactured under U.S. standards is that costs are held down. When a headlight is inoperative, it can be replaced for less than $5 at a local repair shop. This is far less expensive than the European situation where nonstandardization has led to much higher costs. Thus, the consumer's costs are low and hopefully, this encourages him to replace defective headlights.

Based upon our analysis, there is no advantage to revising FMVSS 108 to permit the sale of ECE lamps, and in fact the European experience indicates that there may be some safety degradation.

In consideration of the foregoing I respectfully deny the petition of February 10, 1978, by the Commission on Equipment. • • • In view of this decision, there does not appear to be any useful purpose now in holding the hearing you requested.

The interest of the State of Washington in better headlighting has, over the past year, acted constructively as a catalyst to NHTSA in according priority treatment to improve headlamp photometrics, and we believe that all motorists should be grateful for your interest.

VETERANS ADMINISTRATION

STATION COMMITTEE ON EDUCATIONAL ALLOWANCES

Meeting

Notice is hereby given pursuant to Section V, Review Procedure and Hearing Rules, Station Committee on Educational Allowances that on Thursday, October 19, 1978 at 8 a.m. the Denver Regional Office Station Committee on Educational Allowances shall, in the Hearing Room of the Denver Veterans Administration Regional Office, conduct a hearing to determine whether Veterans Administration benefits to all eligible persons enrolled in LaVonne's Academy of Beauty, 2162 South Colorado Boulevard, Denver, Colo. 80222, and LaVonne's Academy of Beauty, 828 East 104th Avenue, Thornton, Colo. 80229 (formerly located at 1565 Glenarm Place, Denver, Colo. 80202) should be discontinued, as provided in 38 CFR 21.4134, because a requirement of law is not being met or a provision of the law has been violated. All interested persons shall be permitted to attend, appear before, or file statements with the committee at that time and place.

Dated: September 6, 1978.

N. B. ALVERSON,
Director, VA Regional Office, Denver Federal Center, Denver, Colo.

INTERSTATE COMMERCE COMMISSION

[Decisions Volume No. 28]

DECISION-NOTICE

Decided: September 5, 1978.

The following applications are governed by Special Rule 247 of the Commission's Rules of Practice (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protestants not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication.

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, Review Board No. 1, Members Carleton, Joyce, and Jones. (Review Board Member Joyce not participating).

H. G. HOMME, Jr.,
Acting Secretary.

MC 200 (Sub-306F), filed June 23, 1978. Applicant: RISS INTERNATIONAL CORP (a Delaware corporation.), 903 Grand Avenue, Kansas City, MO 64106. Representative: Ivan E. Moody, 903 Grand Avenue, Kansas City, MO 64106. To operate as a *common carrier*, by motor vehicle, transporting: *Printed matter*, serving Kokomo, IN, as an intermediate and off-route point in connection with applicant's otherwise authorized regular-route operations. (Hearing site: Indianapolis, IN, or Kansas City, MO.)

MC 270 (Sub-4F), filed June 30, 1978. Applicant: EGGLESTON TRANSPORTATION, INC., R.D. 1, Corinth, NY 12822. Representative: Richard Rueda, 135 North Fourth Street, Philadelphia, PA 19106. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper, paper products, and materials used in the manufacture of paper* (except commodities in bulk), between the facilities of Scott Paper Co., (1) at or near Philadelphia and Chester, PA, and (2) at or near Fort Edward and Albany, NY. (Hearing site: Philadelphia, PA, or Camden, NJ.)

NOTE.—The person or persons who it appears may be engaged in common control must either file an application under section 5(2) of the Interstate Commerce Act, or submit an affidavit indicating why such approval is unnecessary.

MC 720 (Sub-54F), filed August 8, 1978. Applicant: BIRD TRUCKING CO., INC., P.O. Box 227, Waupun, WI 53963. Representative: Wayne W. Wilson, 150 East Gilman Street, Madison, WI 53703. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from the facilities of Aunt Jane Foods, Inc., at or near Croswell, MI, to those points in the United States in and east of MN, IA, NE, CO, OK, and TX, restricted to the transportation of traffic originating at the named origin and destined to the indicated destinations. (Hearing site: Madison, WI, or Detroit, MI.)

MC 720 (Sub-55F), filed August 8, 1978. Applicant: BIRD TRUCKING CO., INC., P.O. Box 227, Waupun, WI 53963. Representative: Wayne W. Wilson, 150 East Gilman Street, Madison, WI 53703. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from Coloma, MI, to points in IL, MN, OH, and WI. (Hearing site: Detroit, MI, or Madison, WI.)

MC 2505 (Sub-2F), filed August 2, 1978. Applicant: LOTT MOTOR LINES, INC., West Cayuga Street, P.O. Box 751, Moravia, NY 13118. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 11th Street NW., Washington, DC 20001. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum articles, aluminum ingots, aluminum sheet metal, aluminum plate, aluminum scrap, and aluminum industrial foil*, between Oswego, NY, on the one hand, and, on the other, points in the United States (except AK and HI), under a continuing contract with Alcan Aluminum Corp., of Cleveland, OH. (Hearing site: Cleveland, OH, or Washington, DC.)

NOTE.—Dual operations may be at issue in this proceeding.

MC 21866 (Sub-104F), filed June 29, 1978. Applicant: WEST MOTOR FREIGHT, INC., 740 South Reading Avenue, Boyertown, PA 19512. Representative: Alan Kahn, 1920 Two Penn Center Plaza, Philadelphia, PA 19102. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Automotive parts*, and (2) *materials* used in the manufacture of automotive parts (except in bulk), between the facilities of Ford Motor Co., in MI and OH, on the one hand, and, on the other, points in NJ and VA. (Hearing site: Washington, DC, or Philadephia, PA.)

MC 26396 (Sub-188F), filed June 29, 1978. Applicant: POPELKA TRUCKING CO., INC., d.b.a. THE WAGGONERS, P.O. Box 990, Livingston, MT 59047. Representative: Bradford E. Kistler, P.O. Box, 82028, Lincoln, NE 68501. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Drilling mud and additives*, from points in Big Horn County, WY, to ports of entry on the international boundary line between the United States and Canada in MT. Condition: Prior receipt from applicant of an affidavit setting forth its appropriate complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Billings, MT.)

NOTE.—The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled "Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority To Handle Traffic to and From Points in Canada" published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate officials of the Provinces of Alberta, Saskatchewan, and Manitoba regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

(Hearing site: Columbus, OH.)

NOTE.—Dual operations may be at issue in this proceeding.

BROKER AUTHORITY

MC 12613 (Sub-7F), filed June 15, 1978. Applicant: WAYNE'S HERITAGE TOURS OF AMERICA, INC., Greyhound Terminal, 28 North Perry Square, Erie, PA 16501. Representative: Jeremy Kahn, Suite 733 Investment Building, Washington, DC 20005. To engage in operation, in interstate or foreign commerce, as a *broker*, at Pittsburgh and Erie, PA, in arranging for the transportation, by motor vehicle, of: *Passengers and their baggage*, in special and charter operations, between points in the United States (including AK and HI). (Hearing site: Pittsburgh, PA.)

NOTE.—Applicant is cautioned that arrangements for charter parties or groups should be made in conformity with the requirements set forth in Tauck Tours, Inc., Extension—New York, NY, 54 MCC 291 (1954).

[FR Doc. 78-25769 Filed 9-13-78; 8:45 am]

[7035-01]

[Decisions Volume No. 29]

DECISION-NOTICE

Decided: August 31, 1978. The following applications are governed by special rule 247 of the Commission's rules of practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the pertinent rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication.

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is not a major Federal action significantly affecting the quality of the human environment.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

By the Commission, Review Board Number 2, Members Boyle, Eaton, and Liberman.

H. G. HOMME, Jr.,
Acting Secretary.

MC 8948 (Sub-113F), filed August 14, 1978. Applicant: WESTERN GILLETTE, INC., a California corporation, P.O. Box 471, Akron, OH 44309, Representative: William O. Turney, Suite, 1010, 7101 Wisconsin Avenue, Washington, DC 20014. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from Fredonia, AZ, to Salt Lake City, UT. (Hearing site: Cincinnati, OH.)

NOTE.—The person or persons who it appears may be engaged in common control must either file an application under section 5(2) of the Interstate Commerce Commission Act, or submit an affidavit showing why such approval is unnecessary.

PASSENGER AUTHORITY

MC 48561 (Sub-14F), filed July 10, 1978. Applicant: WILSON BUS LINES, INC., Main Street, East Templeton, MA 01438. Representative: David M. Marshall, 101 State Street, Suite 304, Springfield, MA 01103. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in special operations, between Athol, East Templeton, Gardner, Westminster, Fitchburg, and Leominster, MA, on the one hand, and, on the other, Hampton and Hampton Beach, NH. (Hearing site: Boston, MA or Concord, NH.)

MC 144240 (Sub-1F), filed July 11, 1978. Applicant: D. R. WISMER, d.b.a. BAYSIDE LIMOUSINE SERVICE, P.O. Box 4732, Beaufort, SC 29902. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage* in the same vehicle with passengers, in special and charter operations, between points in Beaufort County, SC, on the one hand, and, on the other, Savannah, GA, and the Savannah Airport, near Savannah, GA, limited to the transportation of not more than 16 passengers in any one vehicle, not including the driver of the vehicle. (Hearing site: Columbia, SC.)

MC 145169F, filed August 4, 1978. Applicant: THIELEN BUS LINES, INC., 1205 South Halvarson, Redwood Falls, MN 56283. Representative: Robert P. Sack, P.O. Box 6010, West St. Paul, MN 55118. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage* in the same vehicle with passengers, in special and charter operations, beginning and ending at points in Brown, Redwood, Cottonwood, and Renville Counties, MN, and extending to points in the United States (including AK, but excluding HI). (Hearing site: St. Paul, MN.)

BROKER AUTHORITY

MC 130519F, filed August 11, 1978. Applicant: SUMMIT TRAVEL, INC., 1217 Player Place, Columbia, MO 65201. Representative: Charles J. Fain, 222 Madison, Jefferson City, MO 65101. To engage in operations, in interstate or foreign commerce, as a *broker*, at Columbia, MO, in arranging for the transportation, by motor vehicle, of: *Passengers and their baggage*, in the same vehicle with passengers, in round trip special and charter operations, beginning and ending at Columbia, Kansas City, St. Louis, Cape Girardeau, Springfield, Kirksville, and Marysville, MO, Ames and Iowa City, IA, Lawrence, Manhattan, and Wichita, KS, Normal, Macomb, Champagne, Carbondale, and De Kalb, IL, Lincoln and Omaha, NE, Madison and Milwaukee, WI, Oklahoma City, Norman, and Stillwater, OK, Boulder and Greeley, CO, Louisville and Lexington, KY, Knoxville and Memphis, TN, Austin, Lubbock, Houston, and College Station, TX, Minneapolis, MN, Bloomington, Indianapolis, and West Lafayette, IN, Ann Arbor, Kalamazoo, and East Lansing, MI, and College Park, MD, and extending to points in CO, FL, NH, NM, NY, TX, and VT. (Hearing site: Columbia or Kansas City, MO.)

NOTE.—(1) Authority is to operate as a broker at Columbia, MO. A broker licensed to perform operations at named points may not transact the business of selling transportation at any point other than that named. Activities of a preliminary nature may be conducted outside authorized points, but the actual broker-passenger contract(s) or agreement(s) must be entered into only at a point at which the broker is authorized to conduct operations. See generally Kirkland Broker Application, 61 MCC 691 (1953); and Paragon Travel Agency, Inc., Ext.—MA and RI, 100 MCC 641 (1966). (2) Applicant is cautioned that arrangements for charter parties or groups should be made in conformity with the requirements set forth in Tauck Tours, Inc., Extension—New York, NY, 54 MCC 291 (1954).

[Notice No. 163]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 30, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the

filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the appli-

continuing contract, or contracts, with General Services Administration, Chief, Contracts and Negotiations

operating authority. Supporting shippers(s): Dow Chemical USA, Eastern Division, 14955 Sprague Road

ing authority. Supporting shipper(s): Reichold Chemicals, Inc., P.O. Box 1610, Tuscaloosa, AL 35401. Send pro-

protests to: Charles D. Little, District Supervisor, Interstate Commerce Commission, 414 Leland Office Building,

Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal

filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 13569 (Sub-40TA), filed July 13, 1978. Applicant: THE LAKE SHORE MOTOR FREIGHT CO., INC., 1200 South State Street, Girard, OH 44420. Representative: John P. Tynan, Bowes, Millner, Rodgers, Liberstein & Werner, 167 Fairfield Road, P.O. Box 1409, Fairfield, NJ 07006.
